Periodic Reporting Information Available	Gateway	A joining gateway that continues the Periodic Reporting process after requested additional information is received. The periodic reporting process continues based upon the completion of all of the flows taken out of the "Is supplemental periodic reporting information required?" splitting gateway, indicating that all of the necessary periodic reporting information is available.	
PHD Complete?	Gateway	The determination is made whether the product hazard data (PHD) complies with DoD requirements, and as applicable, whether it meets the needs of the Component PHD request.	
PHD is Deficient and Known/Derived? Or PHD Not Deficient? Or, PHD Deficient?	Gateway	The determination is made whether product hazard data (PHD) that exists in the master product hazard data (MPHD) warehouse contains incomplete or inaccurate information and if the needed information can be derived from existing data.	
PHD Provided and Ready for Validation? Or PHD Not Provided?	Gateway	The determination is made whether the Component product hazard data (PHD) request also contains PHD, for example, a Material Safety Data Sheet for a locally purchased product, to be entered into the master product hazard data (MPHD) warehouse.	
PHD Source Available?	Gateway	The determination is made whether there is a source (eg. manufacturer, supplier or vendor) for the required product hazard data (PHD).	
Prior Period Adjustments Required?	Gateway	Determine if prior period adjustments are required.	
Program Decision Necessary ?	Gateway	Is Program Decision necessary ?	
Project Status?	Gateway	Project Status?	
Purchase Card Entitlement?	Gateway	Gateway to route sequence flow to purchase card pathway or Procurement Instrument pathway.	
Purchase Card Payment?	Gateway	Gateway to route sequence flow to either pay a Procurement Instrument with a purchase card or to continue the Procurement Instrument payment path.	
Purchase Request Acceptable?	Gateway	This gateway evaluates the results of the Receive and Review Purchase Request process to determine if the purchase request is acceptable or will be rejected.	
Pursue Alternate Means to Obtain PHD?	Gateway	The determination is made whether further actions will be taken to pursue the product hazard data (PHD) which was not provided by the source ( eg. manufacturer, supplier or vendor).	
Real Property Acceptance Method Document Type?	Gateway	This gateway determines the appropriate sequencing path based upon the type of real property acceptance instrument.	
Real Property Disposal Requirement ?	Gateway		
Real Property for Acknowledge Goods Tendered and Services Rendered?	Gateway	A gateway to determine if Evidence of Goods Tendered and Services Rendered will be processed by Real Property.	
Real Property for Finalizing Acceptance?	Gateway	A gateway to determine if Acceptance Results will be processed by Real Property.	
Real Property for Perform Acceptance Procedures?	Gateway	A gateway to determine if Acceptable Discrepancies and Inspected Goods and Services Evidence with no Discrepancies will be processed by Real Property.	
Real Property for Perform Inspection and Testing and Verification?	Gateway	A gateway to determine if Goods and Services Acknowledgement will be processed by Real Property.	
Realignment Request	Gateway	Determine the type of realignment request.	
Re-Appportionment or Rescission?	Gateway	Is this a re-apportionment or rescission?	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Reason for Non Approval	Gateway	Determine if the reason for non-approval is due to pro form entry requiring correction or the cost performance requires update.	
Reason why Applicant cannot continue processing	Gateway	Reason why Applicant cannot continue processing: Additional medical information is needed, then request additional medical information. Applicant does not meet medical standards (permanent), then the Service may request medical examination. Applicant does not meet medical standards (temporary), then process will continue after the medical condition resolves itself.	
Rebaseline Required?	Gateway	Determine if a report is an update to the baseline report.	
Receivables Offset Payables?	Gateway	Determine if the receivable offsets the payable.	
Reenlistment?	Gateway	Reenlistment? If this is a reenlistment, then calculate the IRR/ING reenlistment bonus repayment amount. If this is a prior Service, then calculate the IRR/ING prior Service enlistment bonus repayment amount.	
Reimbursable Authority Exceeded?	Gateway	This gateway evaluates whether reimbursable authority has been exceeded.	
Reimbursable Authority Increased?	Gateway		
Re-issue Program Budget Decision?	Gateway	Determine if program budget decision needs to be re-issued as a result of topline passback negotiation between OMB and DoD.	
Release Draft Request for Proposal to Public for Comments?	Gateway	This gateway determines if the Draft Request for Proposal will be released to the public for comments.	
Remedial Action Plan Accepted?	Gateway	Does the Remedial Action Plan that was developed meet the customer's original requirement?	
Request for Proposal Approved?	Gateway	A gateway to determine whether the Request for Proposal is approved after review by the Contracting Officer and ready for release.	
Request with Contract or Order ?	Gateway		
Requested PHD Made Available? Or PHD Not Made Available?	Gateway	The determination is made whether the requested product hazard data (PHD) that is being reviewed already exists in the master product hazard data (MPHD) warehouse.	
Requirement Change Needed?	Gateway	Upon completion of Sourcing Research processes, results will determine if a requirement change from sourcing is needed.	
Requires Congressional Action?	Gateway	Determine if congressional action is required for the cancellation, rescission, or deferrals of budgetary resources.	
Response Type	Gateway	Response Type	
Return or Disposal Request Approved?	Gateway	Return or Disposal Request Approved?	
Revisit Request?	Gateway	Determine if the request should be revisited or if it should be approved.	
RPA_Event_Based_Gateway	Gateway	No description required.	
RPA-MV_Gateway_1	Gateway	No description required.	
RPA-MV_Gateway_2	Gateway		
Scheduled Return or Disposal?	Gateway	Scheduled Return or Disposal decision.	
Scope Changed?	Gateway	A decision as to whether the type and/or amount of work required to address an environmental liability has changed.	
Separate or Terminate?	Gateway	Separate or Terminate individual?	
Should A Reclama Be Submitted?	Gateway	Submit Reclama to Financial Management if reclama should be submitted. If reclama does not need to be submitted then adjust Manpower requirements based on priorities.	
Should the identity credential be revoked?	Gateway	Should the identity credential be revoked? If the identity credential should be revoked, the identity credential's affiliation with the holder will be terminated. If the identity credential should not be revoked, the appropriate parties (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) will be notified that the identity credential will not be revoked.	
Simplified Acquisition?	Gateway	This gateway determines whether the simplified acquisition closeout path is taken.	
Single or Multi Source?	Gateway	A gateway to determine a sourcing plan will go through negotiation process with a single source.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Solicitation Needed?	Gateway	A gateway to determine if a solicitation is required based on the sourcing plan.	
Solution Needed?	Gateway	A decision as to whether action is required to address an environmental liability.	
Sourcing Needed?	Gateway	This gateway determines the path for card sourcing based on whether a source was previously determined.	
Sourcing Research Required?	Gateway	This gateway determines whether an accepted purchase request contains criteria which makes it eligible for sourcing research processes including market research, forecast demand, analyze spend or search agreements.	
Specific Rescission	Gateway	Determine if the rescission is specific or non-specific.	
Terminate Program Decision	Gateway	The Execute Program process completes with one of three mutually exclusive results: (1) the result of the DDR is to terminate the program, (2) the result of the Milestone C decision is to terminate the program, or (3) the Manage Low-rate Initial Production process step completes.	
Title Clear?	Gateway	A gateway to determine whether the title is clear.	
Title Cleared by Legal ?	Gateway	The gateway evaluates the Title legitimacy received from Legal.	
Type of Action	Gateway	The type of action required after the Comptroller reviews Congressional enactments of deferrals and rescissions.	
Type of Collection	Gateway	This Gateway receives Pro Forma Entries and routes the information to the appropriate process based on the type of entry.	
Type of Collection Information Received	Gateway	Determine the type of collection information that has been received.	
Type of Collection Receipt	Gateway	Determine if the collection is reimbursable, receipt or a refund collection.	
Type of Confirmation	Gateway	DRAFT: Is the Treasury data a collection or disbursement confirmation?	
Type of Financial Report	Gateway	Determine type of financial statement or report.	
Type of Reconciliation	Gateway	Is the reconciliation: 1 - a disbursement 2 - a deposit 3 - an undisbursed expenditure 4 - a receipt	
Type of Report	Gateway	Determine type of financial report.	
Unapplied Collection Remains?	Gateway	Determine if payments are greater than the outstanding delinquent debt.	
Update or Maintain Balance?	Gateway	Determine if there is a balance for the accounts payable and if it has to be updated or maintained.	
Upward or Downward Adjustment Required?	Gateway	Is an upward or downward pro form entry adjustment required?	
Usably Complete?	Gateway	A gateway to determine whether an inspected good or service is capable of being accepted in its current state or if an update to the contract is necessary.	
Valid Ready to Pay File?	Gateway	Determine if the Ready to Pay file is ready.	
Valid Request?	Gateway	Determine if the request for billing is valid.	
Valid?	Gateway	Is the cancel payment request a valid document?	
Was additional revocation documentation obtained?	Gateway	Was additional revocation documentation obtained? If additional revocation documentation was obtained, review to ensure its validity. If no additional revocation documentation was obtained, notify the appropriate parties the the identity credential will not be revoked.	
Was derogatory information discovered?	Gateway	Was derogatory information discovered? If yes, then suspend the security clearance. If no, then the process will end.	
Was the clearance outcome unfavorable?	Gateway	Was the clearance outcome unfavorable? If yes, then conduct the unfavorable personnel security clearance determination appeals process as necessary. If no, then the process will end.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Was the determination reversed?	Gateway	Was the determination reversed? If yes, then conduct personnel security adjudication. If no, then enforce the unfavorable personnel security clearance determination.	
Was the performance evaluation revised?	Gateway	Was the performance evaluation revised? If yes, then update the Member's record with the performance evaluation appeals information. If no, then end the process.	
Was there an overpayment?	Gateway	FBwT: TBD	
Were identification documents obtained?	Gateway	Were identification documents obtained? If identification documents were not obtained, the process will end. If identification documents were obtained, the documents will be reviewed.	
Were identity credential issuance documents obtained?	Gateway	Were identity credential issuance documents obtained? If identity credential issuance documents were obtained, the identity credential specialist will validate their completeness. If identity credential issuance documents were not obtained, the process will end.	
Were sufficient identification documents presented?	Gateway	Were sufficient identification documents presented? If sufficient documents were presented, the appropriate party's (e.g., requester, DoD HRM Individual Customer (e.g., Member, contractor, dependent)) identity will be verified. If sufficient documents were not presented (e.g., too few, wrong type), the identity documentation requirements will be explained to appropriate parties again.	
What changes are being made to the existing organization?	Gateway	Determine what changes are being made to the existing organization. Both a reorganization or an update to a unit may occur.	
What Type of Adjustment?	Gateway	Determine if the adjustment needed is either the narrative and or footnote adjustment or the financial statement level adjustment.	
What type of credential request is this?	Gateway	What type of credential request is this? If the request is to issue identity credential, then determine if the Member is eligible to receive. If the service request is to maintain identity credential, then complete the Maintain Identity Credential Process. If the service request is to revoke identity credential, then complete the Revoke Identity Credential Process.	
What Type of Matching is Required?	Gateway	Determine appropriate matching type for the payment request based upon contractual and statutory stipulations. It is assumed that the payment request is properly formatted and complete.	
What was the DRR Decision?	Gateway	A splitting gateway that continues the process flow based on information from the Review Design Readiness process step. There are three mutually-exclusive process flows: (1) Rework is required and the flow returns to Manage System Integration, (2) Approved and the flow continues to Manage System Demonstration or (3) Terminate Program and the Execute Program process ends.	
What was the Milestone C decision?	Gateway	A splitting gateway that continues the process flow based on information from the Evaluate Program Milestone C process step. There are three mutually-exclusive process flows: (1) Rework is required and the flow returns to Manage System Demonstration, (2) Approved and the flow continues to Manage Low-rate Initial Production, or (3) Terminate Program and the Execute Program process completes.	
What was the revision assessment result?	Gateway	A splitting gateway that continues the process flow based on information from the Assess Acquisition Program baseline Revision process step. There are two possible mutually-exclusive process flows: (1) Either the revision is recommended and the flow continues to Evaluate Acquisition Program Baseline Revision or (2) the revision requires rework and the flow returns to Manage Oversight Information.	
Where is Acceptance Performed?	Gateway	Determination of where acceptance procedures are to be performed, either at the vendor or customer facilities.	
Where is Acceptance?	Gateway	A gateway to determine whether the acknowledged goods are source or destination.	
Where to Apply Collection?	Gateway	Apply the collection to the one of the posting general ledger accounts.	
Will an accessions waiver be filed?	Gateway	Will an accessions waiver be filed? If an accessions waiver will be filed, then manage accession waiver. If an accessions waiver will not be filed, then process ends.	
Will Line of Duty decision be appealed?	Gateway	Will Line of Duty (LoD) decision be appealed? If yes, then provide LoD appeal decision. If no, then end LoD determination process.	
Will Member require reenlistment waiver?	Gateway	Will Member require reenlistment waiver? If yes, then submit reenlistment waiver. If no, then make reenlistment decision.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Will the determination be appealed?	Gateway	Will the determination be appealed? If yes, then conduct the unfavorable personnel security clearance determination appeal process. If no, then enforce the unfavorable personnel security clearance determination.	
Work Order Modification Required ?	Gateway	The Modification for the The Work Order is required	
Absence Follow Up	ICOM Arrow	This includes a follow up for additional information concerning a Member who is absent. The information requested may include (but not be limited to) the date and duration of the absence, the location that the Member is absent from, information pertaining to the intent of the absent Member, and the current whereabouts of the absent Member.	
Absence Request	ICOM Arrow	This includes information associated with requesting an absence. This information may include (but not be limited to) the absence start date, the absence end date, the type of absence being requested (e.g., organization controlled absence (regular liberty/pass, special liberty/pass, administrative absence)) and the reason for the absence. This could also include information regarding the cancellation or rescinding of an absence (as identified as necessary from a commander or Member).	
Acceptance Evidence	ICOM Arrow	Documentation of the act of assuming ownership of legal title and accountability of goods tendered and services rendered, excluding Real Property Placed in Service Notification. This serves as proof that the deliverables received or services rendered have been provided fulfilling specified terms and conditions against the previously agreed upon obligating document, contract, and/or intragovernmental order between the supplier and the buyer.	
Accepted Intragovernmental Agreement	ICOM Arrow	An agreement signed by the government supplier and accepted by the government buyer. An agreement is a written instrument of understanding following negotiations between an agency and a government supplier, where terms such as pricing and/or discounts have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains terms and clauses applying to future orders between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future orders will incorporate by reference or attachment the required and applicable clauses agreed upon in the agreement.	
Accepted Intragovernmental Order	ICOM Arrow	An intragovernmental order that has been accepted by the government supplier that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute.	
Accepted Letter of Offer and Acceptance Document	ICOM Arrow	Accepted Letter of Offer and Acceptance is a Foreign Military Sales Trust Fund case document that has been countersigned by USG and signed by the purchaser, if required, accepting terms and conditions of the offer. The document provides information necessary to execute the case in the Foreign Military Sales Trust Fund and is the official document for recording contract (budget) authority at the case level.	
Accepted Purchase Request	ICOM Arrow	Document which has been reviewed by the procurement organization and found to adequately describe the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
Accession Agreement Information	ICOM Arrow	This includes information related to the enlistment/reenlistment of an applicant (e.g., DD Form 4-series, DD Form 4 Annexes). This information may include (but not be limited to) identification data, agreements, certification and acceptance, confirmation of enlistment/reenlistment, approval, and acceptance by Service representative.	
Accession Approval Authority	ICOM Arrow	This performer represents personnel who have decision-making authority to approve/disapprove and record accession-related personnel actions. Accession Approval Authority may include (but not be limited to) a US Military Entrance Processing Command (USMEPCOM) oath official, initial training officer, or unit commander.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accession Eligibility Notification	ICOM Arrow	This includes a notification that captures the eligibility information of an applicant during accession processing. This information may include (but not be limited to) notification date and time, reasons why an applicant is not eligible, whether an applicant meets or does not meet standards, and scheduling guidance.	
Accession Enlistment Information	ICOM Arrow	This includes information related to an applicant's accession enlistment information. This may include (but not be limited to) applicant name, applicant unique identifier/social security number, whether the applicant chose to enlist, whether the applicant as taken the oath, Service commitment, delayed entry program (DEP) information, and ship-to destination information.	
Accession Meal Entitlement Information	ICOM Arrow	This includes accession meal entitlement information, including (but not limited to) accession shipping information and meal check information.	
Accession Processing Request	ICOM Arrow	This includes information related to an accession processing request (e.g., USMEPCOM 680-3A-E). This may include (but not be limited) to applicant name, applicant unique identifier/social security number, applicant date of birth, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifier, processing type, preferred location, date, time, processing requirements, and Service.	
Accession Processing Request Update	ICOM Arrow	This includes the updated information related to an accession processing request (e.g., USMEPCOM 680-3A-E). This may include (but not be limited) to applicant name, applicant unique identifier/social security number, applicant date of birth, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifier, processing type, preferred location, date, time, processing requirements, and Service.	
Accession Processing Scheduling Information	ICOM Arrow	This includes information related to an accession processing schedule (e.g., USMEPCOM 727-E). This may include (but not be limited to) applicant names, unique identifiers/social security numbers, applicants' date of birth, applicants' genders, Recruitment Specialists (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifiers, processing date, lodging, transportation, location, Service, projection type, Special Category information, and comments/notes.	
Accession Profile Information	ICOM Arrow	This includes applicant information collected during the recruiting and accession processes. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), background screening information, accession information, accession disclosure information, and accession shipping information.	
Accession Profile Update Information	ICOM Arrow	This includes the updated information collected from the applicant as a result of further inquiries. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), background screening information, accession information, accession disclosure information, and accession shipping information.	
Accession Shipping Arrangement Information	ICOM Arrow	This includes information related to shipping a Member or applicant, including (but not limited to) shipper name, shipper projections, and seat blocking requests.	
Accession Shipping Final Order	ICOM Arrow	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Accession Shipping Packet	ICOM Arrow	This includes the accession shipping/travel packet information, including (but not limited to) travel information (e.g., itinerary information, meal check information), accession and Service information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accession Shipping Requirement	ICOM Arrow	This includes a requirement to ship a Member to their initial assignment or cancel an existing accession shipping order. This information may include (but not be limited to) personal information, accession shipping date and assignment location.	
Accession Shipping Reservation Information	ICOM Arrow	This includes reservation information related to shipping a Member or applicant, including (but not limited to) shipper name, shipping date, and travel information.	
Accession Shipping Specialist	ICOM Arrow	This performer represents personnel who perform the administrative activities (e.g., creation, verification, validation) associated with shipping related personnel actions: preparing, arranging and coordinating the accession shipping arrangements (e.g., airlines, rental car, lodging) and orders; generating the accession shipping packet and sending it to appropriate parties; and performing the accession shipping brief.	
Accession Specialist	ICOM Arrow	This performer represents personnel who perform all functions pertaining to the management of Candidate accessions. They are the primary persons responsible for, and with authority to perform accessions processing. These responsibilities include, meeting accession goals for both officer and enlisted personnel, developing direct commissioning and appointment policies for their respective Services, and capturing information for non-military personnel.	
Accession Testing Results Notification	ICOM Arrow	This includes information related to a notification of accession testing results (e.g., DD Form 1304-5). This may include (but not be limited to) applicant name, applicant unique identifier/social security number, tests taken, test scores, percentiles, and whether the applicant meets aptitude standards.	
Account for Time, Absence, and Labor Law Policy Reg	ICOM Arrow	Account for Time, Absence, and Labor is constrained by the following: Public Law 103-356, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, SFFAS 1, SFFAS 2, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, Joint Pub 1-0, Joint Pub 3-0, DoDI 1215.06, DoDI 1215.13, DoDI 1300.18, DoDI 1325.02, DoDI 1327.06, DoDI 1332.38, DoDI 2310.05, DoD 6010.13-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-270.	
Account for Workforce Law Policy Reg	ICOM Arrow	Account for Workforce is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Accounting Policy	ICOM Arrow	Policies and procedures that provide guidelines and assistance in accounting for assets, liabilities, revenues, and expenses within the Department of Defense.	
Accounts Payable Adjustments	ICOM Arrow	Adjustment made to outstanding payable that may result from payments made to vendor or credits received from vendor. It also includes adjustments to reflect discrepancies found during periodic account reconciliation.	
Accounts Payable Offset	ICOM Arrow	The amount a payment to a vendor, or other party owed by the government, should be offset to resolve any debts owed to the Government.	
Accounts Payable Offset Pro Forma Entries	ICOM Arrow	This is the general ledger impact of offsetting the balance of an accounts payable. Offsetting accounts payable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accounts Payable Offset Request	ICOM Arrow	A request to compare the payment due to a vendor, or other party owed by the government, against any accounts receivable for the vendor or levies issued by the IRS to determine if the payment should be offset to resolve any debts owed to the Government.	
Accounts Payable Pro Forma Entries	ICOM Arrow	The debit and credit affects of accounts payable pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Accounts Receivable Offset Pro Forma Entries	ICOM Arrow	This is the general ledger impact of offsetting the balance of an accounts receivable. Offsetting accounts receivable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	
Accounts Receivable Principal Balance	ICOM Arrow	This is the receivable principal balance used to establish the initial amount of the accounts receivable for specific customer.	
Accrued Liabilities Pro Forma Entries	ICOM Arrow	The debit and credit affects of accrued liability pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Acknowledged Intragovernmental Order	ICOM Arrow	An intragovernmental order that has been accepted by the government supplier and subsequently acknowledged by the government buyer that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute. The intragovernmental order may contain the original or modified order that has been mutually agreed upon between the buyer and government supplier.	
Acquisition Control Requirement	ICOM Arrow	This control includes Commander Joint Chiefs of Staff Instruction (CJCSI) 3170.01, The National Security Strategy, CJCS Joint Vision, The National Military Strategy, Strategic Planning Guidance, Joint Programming Guidance, Program Objective Memoranda (POM) Formulation, POM Budget Submission, DoD Budget, DoD 5000 Policy Series (Refer to DoDI 5000.2, Enclosures 3 and 4), 10 U.S.Code (U.S.C) 2432, 10 U.S.C.2433, 10 U.S.C.2435, and 42 U.S.C.4321 Programmatic Environment Safety and Occupational Health Evaluation (PESHE) which includes compliance with National Environmental Policy Act (NEPA).	
Acquisition Decision Memorandum	ICOM Arrow	A memorandum signed by the Milestone Decision Authority (MDA) that documents decisions made as the result of a Milestone Decision Review (MDR) or Decision Review.	
Acquisition Information for Congressional and Federal Inquiry	ICOM Arrow	This is the acquisition information required to respond to inquiries from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Acquisition Program Baseline Revision	ICOM Arrow	Revision to the existing program baseline for cost, schedule, performance parameters, constraints, objectives and milestones. This information is developed by the Program Manager for submission to the Decision Authority for approval, which will then guide the PM in the execution of the acquisition program.	
Acquisition Program Projected Manpower	ICOM Arrow	The program objectives of a major acquisition program (e.g., Air Force Airborne Laser Program). This includes, but is not limited to, the projected quantity of labor necessary to support a mission.	
Acquisition Requirement	ICOM Arrow	An acquisition requirement is a clearly defined requirement critical for response to immediate and long-term capability needs of the warfighter that have been reviewed, validated, funded and fielded.	
Additional Accounts Payable Information	ICOM Arrow	Additional information that is required to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Accounts Payable Information Request	ICOM Arrow	Request additional information to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Information Request	ICOM Arrow	The form used to request additional financial or non-financial information to satisfy cost/performance requirements. Request includes, in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Additional Program Information	ICOM Arrow	Additional program information such as supplemental justification materials or other relevant program information to support the OSD/JCS program review.	
Additional Program Information Request	ICOM Arrow	Request for additional program information such as supplemental justification materials or other relevant program information to support the OSD/JCS program review.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Additional Reconciliation Information	ICOM Arrow	Additional supporting documentation that describes the discrepancies between the Treasury and Department of Defense Fund Balance account.	
Additional Temporary Funding Requirement	ICOM Arrow	A request for additional temporary funding requirement for the services or components to continue operating under CRA.	
Adjustment to be Made	ICOM Arrow	The amount recorded by the Government for a change in the amount to be paid or owed by the commercial supplier. (Examples of causes for an adjustment include change in quantity ordered, Approved additional work, Adjustment to Contractor Bill Rates, etc.)	
Administer Assignment Action Law Policy Reg	ICOM Arrow	Administer Assignment Action is constrained by the following: Public Law 103-356, Public Law 105-264, Public Law 107-296, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1100.19, DoDI 1205.05, DoDI 1300.04, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1332.38, DoDI 1342.19, DoDI 1400.32, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, HAP 07-024, AR 601-222, AR 601-270.

Administer Transfer To and From Active Duty Law Policy Reg	ICOM Arrow	Administer Transfer To and From Active Duty is constrained by the following: Public Law 103-356, Public Law 105-264, Public Law 107-296, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1100.19, DoDI 1205.05, DoDI 1300.04, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1332.38, DoDI 1342.19, DoDI 1400.32, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, HAP 07-024, AR 601-222, AR 601-270.	
Administrative Hold Notification	ICOM Arrow	This includes the notification that a hold/flag (e.g., medical, legal) has been placed on a personnel/pay profile which precludes a Member/employee from certain personnel actions (e.g., assignment, deployment, leave, and separation). This may include (but not be limited to) adverse information, medical information, Service obligation information, notification date and time.	
Administrative Procurement Change Request	ICOM Arrow	Requirement to modify a procurement instrument as a result of administering the contract.	
Advance Ship Notice Information	ICOM Arrow	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.	
Adverse Action Notification	ICOM Arrow	This includes the notification of an adverse action being charged, adverse action decision, or any other disciplinary actions needed to be taken.	
Adverse Action Profile Information	ICOM Arrow	This includes adverse action information that is associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action type, duration, administrative hold flag, adverse action process status, and specifics of the adverse action.	
Adverse Action Profile Update Information	ICOM Arrow	This includes updated adverse action information that is associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action type, duration, and specifics of the adverse action decision to be taken, or referral to court-martial.	
Adverse Action Response	ICOM Arrow	This includes the Member providing written matters for consideration in defense of themselves against the adverse action charged to them.	
Advice of Payment	ICOM Arrow	A detail explanation of a payment sent to the vendor, or other party owed by the government.	
Aggregated Spend Information	ICOM Arrow	Collected and consolidated historical spend data that includes what is purchased and from whom it is purchased that is used to identify strategic sourcing opportunities. Spend information includes post-award data such as total obligated amount per fiscal year, socio-economic information, or supplier concentration. Summarized Federal Procurement Information must be obtained from Contract Action Reports from the Federal Procurement Data System.	
Agreement or Contract Information from Supplier	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Comments to Public Draft Request for Proposal, Proposal, Responsive Proposal, Comments to Request for Proposals and Sourcing Planning Information Response.	

AV-2 Integrated Dictionary (BEA 11.1)

Agreement or Contract Information to Supplier	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Pre Solicitation Notice, Draft Procurement Instrument Information, Public Draft Request for Proposal, Approved Request for Proposal, Sourcing Planning Information Request, Contract or Order Information, Buyer Approved Intragovernmental Order, and Signed Intragovernmental Agreement	
Allocate Funds Law Policy Reg	ICOM Arrow	Allocate Funds is constrained by the following: Public Law 097-255, Public Law 101-576, Public Law 103-356, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 33, USC Title 38, USC Title 40, USC Title 42, USC Title 50, OMB Circular A-11, OMB Circular A-21, OMB Circular A-127, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, TFM Vol 1 Part 2, JFMIP SR-99-5, JFMIP SR-99-8, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-02, OFFM-NO-0106, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 06A, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Allowance for Loss on Accounts Receivable	ICOM Arrow	Estimated uncollectible accounts receivables from public debts that brings the receivables amount at their net realizable value. This records the expected expense for any loss due to the debtor's lack of ability to pay DoD for any legal or unforeseeable reasons. This provides DoD the information require to calculate the allowance for doubtful accounts on an annual basis. Appropriate levels of review and approval must be performed prior to recording the allowance for doubtful accounts to the general ledger.	
Alternate Means Product Hazard Data Information	ICOM Arrow	The product hazard data (PHD) which was pursued by alternate means from an external source is received.	
Alternate Means Product Hazard Data Request	ICOM Arrow	The product hazard data (PHD) which is needed is pursued by alternate means from an external source.	
Amortization and Interest	ICOM Arrow	The schedule and amount of investment premiums or discounts recognized on securities through the maturity date of the investment.	
Analytical Results	ICOM Arrow	The collection of one or more of the following: forecast, comparative analysis, trend analysis. A forecast might represent a prediction of future financial needs or trends based on analysis of available historical cost information and planned changes in capabilities. A comparative analysis might represent a comparison of how similar budget programs or business activities are executed by multiple organizations from a cost and performance management perspective. A trend analysis might represent how a single budget program or business activity has performed over multiple reporting periods. These analytical results will support many types of business decision making, to include planning, future years budget formulation, and other resource tradeoffs.	
Analyze Education Course Evaluation Law Policy Reg	ICOM Arrow	Analyze Education Course Evaluation is constrained by the following: Public Law 103-356, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, EO 13434, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, DoDI 1215.06, DoDI 1215.08, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1322.10, DoDI 1322.26, DoDI 1332.38, DoDI 2000.16, DoDI 4500.53, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270

Object	Type	Description	Additional Keys
Anomaly Detection Algorithms	ICOM Arrow	This is the set of criteria by which anomalies will be detected. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule. It is not limited to isolated variables; this may apply to multivariate analysis of data elements.	
Anticipated Adjustment	ICOM Arrow	The amount recorded by the Government for a change in the amount to be paid or owed by the Government supplier. (Examples of causes for an adjustment include change in quantity ordered, Approved additional work, etc.)	
Anticipated Customer Requirements	ICOM Arrow	Projected demand for products or services.	
Appeal Material	ICOM Arrow	Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation requests are reviewed by the DoD components and normally that review process results in the component submitting an appeal to the committee actions. Appeals may be made on the basis of dollars, quantities, manpower and/or language. The submission of appeal materials to the congressional committees involves a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the department's position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the secretary will provide the department's position on appeal items. The sequence for submission of appeal material can vary each year and is primarily dependent upon the timing of each committee's actions on the budget request. The preparation of appeal items begins when the actions of the committees become known. Where feasible, the appeal material will be modified to reflect final floor action since amendments adopted on the floor can significantly change positions reported out by the committees. The appeal will be as close to the President's Budget as possible, while restricted to considering only the last two actions (assuming there have been two) within each separate process (i.e., authorization and appropriation).	
Appeal Submission Instructions	ICOM Arrow	Instructions prepared by OSD to be distributed to the components for the preparation of their appeal materials that will support the department's position to the congressional budget hearing.	
Applicant Additional Information Request	ICOM Arrow	This includes information related to a request for additional applicant information (e.g., personal information, aptitude results, medical information) in order to continue the accession process. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), accession shipping information, and reasons for incomplete applicant information.	
Applicant Additional Information Response	ICOM Arrow	This includes information related to a response to a request for additional applicant information (e.g., USMEPCOM Form 601-23-E). This information may include (but not be limited to) applicant name, applicant unique identifier/social security number, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison), date of response, missing applicant information, and any response information (e.g., medical, Service) addressing a request for additional information.	
Applicant External Organizational Check Information	ICOM Arrow	This includes information related to an external organizational check of an applicant for verifying identity, background screening, and investigation (e.g., FD-258). This may include (but not be limited to) individual personal information (e.g., social security number for Social Security Administration check, alien registration number U.S. Citizenship and Immigration check, fingerprints for Federal Bureau of Investigation and Office of Personnel Management check, and prior military service for Defense Manpower Data Center check).	
Applicant External Organizational Check Response	ICOM Arrow	This includes information related to a response to an external organizational check of an applicant's identity, background screening, and investigation (e.g., FD-258). This may include (but not be limited to) individual personal information (e.g., social security number for Social Security Administration check, alien registration number U.S. Citizenship and Immigration check, fingerprints for Federal Bureau of Investigation and Office of Personnel Management check, and prior military service for Defense Manpower Data Center check).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Apportionment	ICOM Arrow	An apportionment is a distribution made by the Office of Management and Budget of amounts available for obligation in an appropriation. The apportioned amount limits the obligations that may be incurred. An apportionment may be further subdivided by an agency into allotments, sub allotments, and allocations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Apprehension Assistance Notification	ICOM Arrow	This includes a notification to a law enforcement agency, military force, or foreign government for assistance in apprehension of a Member that is classified as Unauthorized Absent (UA) or Deserter. This notification includes attempts to establish liaisons in the hope of increasing cooperation on this matter.	
Appropriation Act	ICOM Arrow	A provision of legal authority by an act from Congress that allows federal agencies to incur obligations. It is the most common means of providing budget authority.	
Approved Acquisition Program Baseline	ICOM Arrow	This information prescribes the key cost, schedule, performance parameters, and other cost constraints, objectives, or thresholds for the Acquisition Program Baseline as approved by the Milestone Decision Authority.	
Approved Adjustment	ICOM Arrow	Notification from supply chain entitlement process approving adjustments to accounts payables transactions.	
Approved Apportionment	ICOM Arrow	Approved apportionment is the notification from OMB that the DoD's apportionment request has been approved and available for distribution to the components and/or services.	
Approved Emergency Implementation	ICOM Arrow	The DSCA's approval to implement a case in the Foreign Military Sales Trust Fund prior to receipt of the amount due with acceptance. The emergency implementation action is taken only when the case document is in accepted status.	
Approved Government Purchase Card Statement	ICOM Arrow	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. For payment to Government Purchase Card providers, approval constitutes certification. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Cost Vouchers.	
Approved Payment Request	ICOM Arrow	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. For payment to Government Purchase Card providers, approval constitutes certification. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Cost Vouchers.	
Approved Request for Proposal	ICOM Arrow	A request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been approved by a contracting officer for release to suppliers. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Approved Sourcing Plan	ICOM Arrow	A plan that is compliant with current DoD guidelines, instructions, and policy and identifies those milestones at which decisions should be made in order to support the attainment of the acquisition objectives. The plan must address all the sourcing and contracting considerations that will control the acquisition of goods and services.	
APUID	ICOM Arrow	An Acquisition Program Unique Identifier (APUID) is the strategic imperative for uniquely marking assets to ensure accurate acquisition data related to a directed, funded effort that provides a new, improved, or continuing materiel, weapon, or information system or capability in response to an approved need. APUID marks acquisition programs to ensure data integrity and data quality throughout the life of the item, and support multifaceted business applications and users.	
Arrival Information	ICOM Arrow	Acknowledgement of the arrival or delivery of passengers or cargo at a destination.	
Assemble and Marshal Forces Law Policy Reg	ICOM Arrow	Assemble and Marshal Forces is constrained by the following: OMB Memo 04-04, DoDD 4500.09E, DoDD 4500.43, DoDD 5158.04, DoDD 8500.01E, DoDI 4500.34, DoDI 4500.53, DoD 4500.9-R, DoD 4515.13-R, DoD 5200.1-R, DoD 5400.11-R.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assess ESOH Risk Law Policy Reg	ICOM Arrow	Assess ESOH Risk is constrained by the following: USC Title 33, USC Title 40, CFR Title 40, Executive Order 13045, Executive Order 13148, FFAA Tech Release 2, OMB Memo 04-04, OMB Memo 06-19, DoDD 4715.1E, DoDD 6055.9E, DoDD 8500.01E, DoDI 2000.18, DoDI 4140.62, DoDI 4145.26, DoDI 5000.02, DoDI 5000.61, DoDI 6050.05, DoDI 6055.1, DoDI 6055.04, DoDI 6055.05, DoDI 6055.06, DoDI 6055.07, DoDI 6055.08, DoDI 6055.11, DoDI 6055.12, DoDI 6055.15, DoDI 6055.16, DoDI 6055.17, DoDI 6490.03, DoDI 8500.2, DoDI 8510.01, DoD 4145.26-M, DoD 6055.05-M, DoD 6055.06-M, DoD 6055.09-M, DoD FMR Vol 04, MIL-STD-882D, MIL-STD-1472F, MIL-STD-1474D.	
Assess Quality of Life Program Law Policy Reg	ICOM Arrow	Assess Quality of Life Program is constrained by the following: Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 4, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.16, DoDD 5124.02, Joint Pub 1-0, Joint Pub 3-0, DoDI 1000.13, DoDI 1300.18, DoDI 1330.21, DoDI 1332.38, DoDI 1332.42, DoDI 5154.30, DoDI 5160.70, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, DTM-09-003, AR 601-270.	
Assessment Budget Request	ICOM Arrow	This is a request for appropriation funding to perform ESOH aspect assessment that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Assessment Cost Information	ICOM Arrow	Details about the estimated work that will be performed during an ESOH Aspect Assessment process. This information is used in the calculation of a cost estimate and is updated on a periodic basis to reflect changes in the cost of work to be completed.	
Assessment Results	ICOM Arrow	The information gathered and/or generated during an ESOH Aspect Assessment that will be used to determine whether an ESOH solution is needed. Examples include sampling analysis results, a risk finding, an explosive hazard ranking, and an ecological hazard index.	
Assessment Results and Risk Finding	ICOM Arrow	The documented results of ESOH aspect and/or risk assessment that is the primary input to developing an ESOH solution.	
Asset Hazardous Process Description	ICOM Arrow	Information that identifies a potential hazardous process(es) in a construction, maintenance or sustainment activity of an asset described to the level of granularity necessary to define effective ESOH controls.	
Asset Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Updated Asset Information, Updated Asset Valuation Information, Property Expense, and Depreciation and Amortization Information.	
Asset Status Information	ICOM Arrow	This is the status of items necessary to provide or support asset accountability and valuation. Examples include: installation operations ceased, serviceable, excess, obsolete, or unserviceable.	
Assignment Draft Order	ICOM Arrow	This includes information pertaining to a draft assignment order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Assignment Final Order	ICOM Arrow	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, accommodations), and order type. This information will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Management Business Area. The information will also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assignment Final Order Update	ICOM Arrow	This includes the information needed to document an update to an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, accommodations), and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area. The information will also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	
Assignment Order Acknowledgement	ICOM Arrow	This includes information necessary to acknowledge the receipt of an order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Assignment Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate an assignment order. An official order requirement may be initiated by an approved assignment action. The information may include (but not be limited to) personnel action status, assignment start and stop date, and personnel action identifier. The information contained in this ICOM will be the basis for a financial commitment and/or obligation of funds in the Financial Visibility Business Area.	
Assignment Profile Information	ICOM Arrow	This includes assignment information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, assignment type, assignment order information (assignment location, assignment start and stop date, order number, order effective date, and order status), arrival date, departure date, duty status and Service obligation.	
Assignment Profile Update Information	ICOM Arrow	This includes updated assignment information associated with a personnel/pay record. This may include (but not be limited to) assignment type, duty start and stop date, and duty location.	
Assignment Request	ICOM Arrow	This includes the career preferences and applicant data of potential candidates for an assignment. The information may include (but not be limited to) assignment preferences, career goals, and training.	
AT&L SOA Service - MDAP	ICOM Arrow	The AT&L SOA Service for a Major Defense Acquisition Program includes the specific Service categories or displays of data: Earned Value Management (EVM); Nunn-McCurdy Unit Cost; Budget; Milestone; Science & Technology; and General Program data that is under governance and available for Defense acquisition decision making.	
AT&L SOA Service Initiative	ICOM Arrow	The AT&L SOA Service Initiative is driven by data governance and technical capability to make real-time, authoritative data for Defense acquisition decision making available on demand via services. The governance includes definition of selected Defense acquisition decision-making data elements, assignment of responsibility for the authoritative copy of each data element, and provision of data access through a services alignment.	
Audit Comments	ICOM Arrow	Comments from the internal Audit community on the draft financial statement package.	
Authorization to Receive Financing Payment	ICOM Arrow	Authorization from the contracting officer or their representative for the contractor to submit financing payment requests.	
Authorize Return or Disposal Law Policy Reg	ICOM Arrow	Authorize Return or Disposal is constrained by the following: USC Title 32, USC Title 40, USC Title 42, USC Title 50, CFR Title 48, SFFAS 1, SFFAS 6, SFFAS 7, SFFAS 10, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-110, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-4, JFMIP SR-03-02, DoDD 4151.18, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDI 3000.04, DoDI 3110.06, DoDI 4151.19, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DLM 4000.25, DoD 4000.25-6-M, DoD 4000.25-8-M, DLM 4000.25-4, DoD 4100.39-M, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4160.21-M, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02B, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, DoD 4500.9-R, DoD 5200.08-R, DFARS.	
Award Draft Order	ICOM Arrow	This includes information pertaining to a draft award order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Award Final Order	ICOM Arrow	This includes the information needed to document an approved order for an award personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Award Procurement Instrument or IGT Order Law Policy Reg	ICOM Arrow	Award Procurement Instrument or IGT Order is constrained by the following: Public Law 112-194, NDAA 2013, USC Title 10, CFR Title 48, OMB Memo 04-04, OMB Memo 06-19, OMB M-11-32, TFM Vol 1 Part 4, DoDD 8500.01E, DoDI 8500.2, DoDI 8510.01, DoD 5200.1-R, DoD 5400.11-R, DFARS, ChargeCardGuide, ICPS, PDS, TCEES.	
Awarded Procurement Instrument or Supplemental Procurement Instrument	ICOM Arrow	A procurement instrument that has been awarded to an external supplier and is a mutually binding legal relationship obligating the supplier to furnish the goods or services (including construction) that can be invoiced, and the buyer to provide payment for those goods and services as agreed upon by the procurement instrument. The awarded procurement instrument may contain the original or modified procurement instrument that has been mutually agreed upon between the buyer and supplier. It includes all types of actions that obligate the DoD to an expenditure of funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, procurement instruments include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. Procurement Instruments could include Fixed-price, Cost-reimbursement, Incentive, Cooperative Agreements, Other Transactions, Indefinite-Delivery type orders, order against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules. A procurement instrument may be funded or unfunded and does not necessarily create an obligation of funds (an example of no funding would be a basic ordering agreement or a contract modification changing the period of performance).	
Base for Programming	ICOM Arrow	This information establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations, except those appropriations having no budget activity subdivisions in the budget document presentation.	
Base Operations Performance Information	ICOM Arrow	This is the narrative and metrics data that when aggregated describes the execution of Service Base Operations activities.	
Baseline Input	ICOM Arrow	Baseline input from the components to be incorporated for congressional review.	
Baseline Report	ICOM Arrow	Baseline report submitted to congress for review. This baseline report will be the initiating point for reprogramming actions.	
BCMR Hearing Notification	ICOM Arrow	This includes the notification information to reflect the time and place of the Board for Correction of Military Records hearing. This information may include (but not be limited to) the notification date, hearing date, hearing time, location of the hearing, and reason for the hearing.	
BEIS	ICOM Arrow	The Business Enterprise Information Services (BEIS) program will build upon existing infrastructure to provide timely, accurate, and reliable business information from across the Department of Defense to support auditable financial statements as well as provide detailed financial information visibility for management in support of the Warfighter. BEIS shall report disbursements, reimbursements, deposits, and receipts to the United States Treasury, as well as, all other transactions which would affect the status of funds. The reporting of expenditure data to the U.S. Treasury includes the processing of transactions by others and for others, the management of interfund and intergovernmental activity, and the performance of other Treasury and departmental functions.	
Below Threshold Reprogramming Actions	ICOM Arrow	Reprogramming actions that do not meet the criteria for prior approval or notification. They do not require approval by the Secretary or Deputy Secretary of Defense and are handled within the individual service. Congressional oversight of these reprogramming actions is through DoD's semiannual submission of report DD1416, which contains cumulative BTR actions for each line item.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Benefit Administration Information	ICOM Arrow	This is information required by external organizations such as Veterans Affairs (VA) or Office of Personnel Management (OPM) to control participation in programs supporting Department of Defense Human Resources.	
Benefit Debt Disposition	ICOM Arrow	This is an overall flow of benefit debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Benefit Information	ICOM Arrow	This is data on a person, or related general population information, regarding benefit enrollment, costs, and benefit program availability.	
Benefit Procurement Request	ICOM Arrow	This is a requirement that defines the need for benefit program related goods or services. It may be an unfunded or funded requirement.	
Benefit Profile Information	ICOM Arrow	This includes benefit information related to a personnel/pay record. The types of information captured may include (but not be limited to) benefit enrollment information, travel voucher information, family member information, individual development information, and information regarding submissions of benefit program proposals or deficiencies.	
Benefit Profile Update Information	ICOM Arrow	This includes updated benefit information related to a personnel/pay record. The types of information captured may include (but not be limited to) benefit enrollment information, travel voucher information, family member information, individual development information, and information regarding submissions of benefit program proposals or deficiencies.	
Billing Document	ICOM Arrow	Included in the billing document are debtor or responsible parties, amount owed, remittance terms and conditions and payment due date. Can be a statement, consolidated billing or payment coupons.	
Billing Requirement	ICOM Arrow	Billing requirements are negotiated with the customer and include agreement on the amount and timeliness of billing. Billing requirements also include terms associated with the application of penalties, administrative fees, and interest against overdue outstanding debts.	
Budget Authority	ICOM Arrow	This is the legal funding document that enables the component to incur obligations. In addition to the funding information, the document includes statutory limitations imposed on a particular appropriation or individual line item. The basis for the release is the program authority.	
Budget Information	ICOM Arrow	The comprehensive financial plan for a program. It includes the on-budget and off-budget amounts combined to derive a total of program fiscal activity. Also includes information related to operations for a fiscal period in terms of estimated costs, obligations and expenditures; source of funds for financing including anticipated reimbursements and other resources, and history and workload data for the projected program and activities.	
Budget Information Estimate	ICOM Arrow	Cost estimate prepared for inclusion in DoD budget to support acquisition programs.	
Budget Planning Memorandum	ICOM Arrow	The USD(Comptroller) guidance memorandum, transmitted in June of each year will provide specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. In addition, "supplementary instructions" memoranda issued on an "as needed" basis (usually in July/August) will be limited to specific instructions which amplify guidance included in the OUSD(Comptroller) memorandum and in this volume. The use of other memoranda to transmit program and budget guidance will be restricted to new or nonrecurring requirements. Included in this guidance will be budget material due dates and instructions for preparing estimates for the prior year (PY), current year (CY), budget years BY1, and BY2 (in the biennial budget year), and the outyears.	
Budget Policy	ICOM Arrow	Provides general guidance on the formulation and submission of budget requests to the Office of Secretary of Defense and also provides guidance on submission, presentation and justification to Congress. The policy will also include memoranda issued throughout the fiscal year regarding budget matters.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Budget Review Analysis	ICOM Arrow	Budget review analysis reflects the result of the joint budget review between OMB and OSD on budget submissions from the components. The analysis should reflect the results of the following budget review activities: - Open forum for deliberation on key issues within DoD and across all organizations - Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs - Review of budget submission that conforms with legal and regulatory guidance on budgetary resources - Review of budget submission that is well justified and balances mission requirements with available resources.	
Budgetary Resources Temporary not Available	ICOM Arrow	The identification of authority transferred to or from the General Fund of the Treasury that is identified as temporarily not available to incur obligations and expenditures. Congress can specify availability and criteria for spending these funds. Funds temporarily not available may include budgetary resources subject to the cancellation of expired and no-year accounts, enacted rescissions, capital transfers, budgetary resources issued pursuant to public law, and other authority withdrawn.	
Business System Approval or Disapproval	ICOM Arrow	Notification to the contractor that their business system has been approved or disapproved.	
Buyer Approved Intragovernmental Order	ICOM Arrow	An intragovernmental order that has been approved by the Government Buyer but not yet accepted by the Government Supplier. It includes terms and conditions between the Government supplier and the Government buyer and meets the requirements of applicable regulations, policy and statute.	
Buyer Materiel and Maintenance and Service Status	ICOM Arrow	This is the information that provides the recipient of a shipment or service with data for both receipt planning and supply chain entitlement such as: inspection and acceptance data, discrepancy reports, service acknowledgement, schedule updates, shipment information, real property placed in service, and services progress status. This must include information necessary for asset valuation (capitalized versus expense determination) and documentation of service rendered or deliverable received to fulfill the terms and conditions of the contract or intragovernmental order. This is a parent ICOM that represents a combination of the information provided by the following children ICOM: Inspection Report for Goods and Services, Advance Ship Notice Information, Real Property Placed in Service Information, Discrepancy Report Information, and Acceptance Evidence.	
Calculate Supply Chain Entitlement Law Policy Reg	ICOM Arrow	Calculate Supply Chain Entitlement is constrained by the following: Public Law 112-194, NDAA 2013, USC Title 10, CFR Title 48, OMB M-11-32, TFM Vol 1 Part 4, DFARS, ChargeCardGuide, ICPS.	
CAMS-ME	ICOM Arrow	Capital Asset Management System-Military Equipment (CAMS-ME) is a DoD Enterprise system that accounts for and reports all material costs incurred to acquire and bring a military equipment (ME) asset to a form and location suitable for its intended use, in accordance with federal accounting standards (Statement of Federal Financial Accounting Standards (SFFAS) No. 6 and 23).	
Cancel Payment Notification	ICOM Arrow	Notification received by the disbursing officer from authorized official that certifies that a payment cancellation request has been received and processed.	
Cancel Payment Request	ICOM Arrow	Request from supply chain entitlement to financial management for cancellation of a payment due to invalid amount, appropriation, or payee.	
Cancel Payment Request Returned	ICOM Arrow	Rejected Cancel Payment Request. A cancel payment request cannot be processed if the payment has already occurred.	
Cancellation Notification	ICOM Arrow	Notification that a cancellation has occurred.	
Cancellation of Budgetary Resources	ICOM Arrow	Cancellation of budgetary resources proposed by the Executive Branch through OMB that is not subject to the requirements of Title X of the Congressional Budget and the Impoundment Control Act of 1974.	
Candidate Recruitment Information	ICOM Arrow	This includes all the initial information provided by the recruitment applicant to apply to the armed services. This information may include (but not be limited to) personal information, school transcripts, resume, contact information, birth certificate, social security card and permanent resident card (i.e., green card).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Capital Asset Valuation Information	ICOM Arrow	This is the information that establishes the initial and updates to capital asset recorded costs. It includes the full cost incurred to bring an asset to form and location suitable for its intended use.	
Career Path Action Request	ICOM Arrow	This includes information associated with personnel submitting a request for the generation of a tailored individual Career Path Plan. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization) and the requested completion date for the career plan.	
Career Path Information	ICOM Arrow	This includes information associated with a person's occupation, or occupation family, and career path. The information may include (but not be limited to) career plan recommended phase points (in terms of years of service) for development actions (e.g., training, education, or distributed learning courses) leading to specified competency levels, recommended credentials, and specified organizational levels (e.g., Major Command Staff Division Chief, Service HQ Action Officer) of assignment.	
Cash Receipt and Payment Information	ICOM Arrow	This is any supporting documentation related to remittance (i.e. copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Cash Receipts	ICOM Arrow	This is any supporting documentation related to remittance for payments for goods or services (i.e. copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Casualty Approval Authority	ICOM Arrow	This represents personnel who have decision-making authority for casualty related personnel actions. Casualty related actions may include (but not be limited to) making a casualty decision and determining whether an incident requires further review.	
Casualty Assistance Delivery Request	ICOM Arrow	This includes the request for delivery of specific casualty assistance program selections. These selections are made from a group of options made available to a casualty Member's family.	
Casualty Assistance Program Feedback Request	ICOM Arrow	This includes the request for feedback on services offered to a casualty Member and/or their family through the casualty assistance program.	
Casualty Assistance Program Feedback Response	ICOM Arrow	This includes aggregated information from affected parties related to the casualty assistance program and delivery of casualty assistance program services. Affected parties may include (but not be limited to) family of casualty Members, casualty assistance representatives (e.g., Army Casualty Assistance Officer, Navy/Marine Corps Casualty Assistance Calls Officer), and vendors.	
Casualty Assistance Program Selections	ICOM Arrow	This includes (but is not limited to) initial and updated information from Member's Next of Kin (NOK) related to Casualty Assistance Program Selections (e.g., type of burial, type of casket or urn).	
Casualty Assistance Request	ICOM Arrow	This includes a request of casualty assistance for a casualty incident. This information may include (but not be limited to) request date and time, requested information, and requester name.	
Casualty Error Information	ICOM Arrow	This includes information regarding an error(s) related to the casualty incident. This may include (but not be limited to) information about the member/employee, details of the circumstance, place of casualty, others involved, or date/time of casualty.	
Casualty Incident Corrective Information	ICOM Arrow	This includes corrected information regarding an error(s) related to the casualty incident. The corrected information could include (but not be limited to) information about the member/employee, details of the circumstance, place of casualty, others involved, or date/time of casualty.	
Casualty Information Request	ICOM Arrow	This includes a request for documentation to assist in a Casualty investigation. This information may include (but not be limited to) request date and time, requested information, and requestor name.	
Casualty Legal Recommendation Information	ICOM Arrow	This includes the results of a request for a legal review of documents concerning a casualty investigation and all associated information. This information may include (but not be limited to) a review of all the evidence and facts from the investigation, observation of all official activities of the board during the proceedings, witness statements, and a recommendation on the deliberations of the Board of Inquiry.	
Casualty Legal Review Information Request	ICOM Arrow	This includes a request for a legal review of documents concerning a Casualty investigation and all associated information. The request may include (but not be limited to) a review of the evidence and facts from the investigation, observation of all official activities of the board during the proceedings, question witnesses, and monitor the deliberations of the Board of Inquiry.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Casualty Mortuary Information	ICOM Arrow	This includes documentation collected and assembled to support the return of human remains and personal effects to the person authorized to direct disposition of human remains (PADD) and person eligible to receive effects (PERE) respectively. This may include (but not be limited to) search and recovery information, personal effects inventory list, and shipping information (e.g., origin, destination).	
Casualty Next of Kin Notification	ICOM Arrow	This includes initially notifying a member or employee's next-of-kin (e.g. the spouse, children not residing with the spouse, parents, the person authorized to direct disposition of human remains (PADD), emergency point of contact or other beneficiaries receiving survivor benefits or entitlements). The information in this notification may include (but not be limited to) incident date and time, place of incident, circumstances of the incident and any other relevant details.	
Casualty Report	ICOM Arrow	This includes a report (i.e. initial, supplemental or final) that is associated with documenting a casualty incident. This may include (but not limited to) background information on the incident, casualty information (e.g., casualty status, casualty type, casualty classification), medical information, assignment information, and the identification of casualty information which may be released to the media and next of kin (NOK).	
Casualty Response Information	ICOM Arrow	This includes a response related to an information request to assist in investigating facts related to a casualty incident. This information may include (but not be limited to) incident reports, information from interviews, medical statements and other supporting information.	
Casualty Specialist	ICOM Arrow	This represents personnel who perform the administrative activities associated with identifying and categorizing casualties (e.g., deceased, missing, and injured), producing casualty reports, coordinating casualty processes (e.g., line of duty determination, legal counsel, search and recovery teams, and assignment of Casualty Assistance Officer), and updating casualty information to resolve casualty status.	
Certified Business Partner Payment Information	ICOM Arrow	Generated as a result of the supply chain entitlement function that identifies the amount that should be paid to a specific payee. Includes scheduled payment date, and the net amount due that has been determined in accordance with the terms and conditions of the contract and in accordance with the Prompt Payment Act. Entitlements are only approved after proper authorization, verification of fund availability, and review for duplicate payment. The Certified Business Partner Payment is certified by the Certifying Officer in accordance with the Certifying Officer Legislation.	
Certified Business Partner Payment Rejection	ICOM Arrow	A vendor payment submitted to Disbursing that has been rejected and returned to Supply Chain Entitlement.	
Certified Financial Statement Information	ICOM Arrow	This is information derived from financial statements for external agencies that have been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Financial Statement Package	ICOM Arrow	This is the financial statement package for external agencies that has been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Human Resources Management Pay Information	ICOM Arrow	This includes information associated with the record, approved by a designated official, of gross pay earnings and Human Resource (HR) entitlements by category, less deductions (statutory and elective) that results in the net disbursement. This record also reflects active employee debt balance, and disbursement information. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Certified Investment Payment Request	ICOM Arrow	This is the record, approved by a designated official, detailing investment payment request.	
Certified Reimbursement Information	ICOM Arrow	This includes information that is certified and related to reimbursement of expenses incurred or expenses expected to be incurred. This may include (but not be limited to) expense type, expense date, and expense amount. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Chairmans Program Assessment	ICOM Arrow	Provides the Chairman of the Joint Chiefs of Staff's personal appraisal on alternative program recommendations and budget proposals to the Secretary of Defense for consideration in refining the defense program and budget in accordance with 10 United States Code. The Chairman's program assessment comments on the risk associated with the programmed allocation of Defense resources and evaluates the conformance of program objective memoranda to the priorities established in strategic plans and combatant commanders' priority requirements. Also called CPA.	
Characterized ESOH Issue	ICOM Arrow	An issue, problem, concern, or aspect that is reviewed, scoped, analyzed, studied so that the nature and extent of the issue is properly characterized and understood. For example, a Characterized ESOH Issue within the context of a clean-up program may define the speed, direction, and contaminant content of a ground water plume. Within the context of a safety program effort, a Characterized ESOH Issue may define the hazards to be addressed. A fire response would identify the specific hazards (i.e., smoke, fire, potential for explosion), and the degree of hazard. (Note: This output also incorporates the ESOH Issue Description).	
Check Payment	ICOM Arrow	Document containing the actual check and associated Check Disbursement Voucher information that is passed on to the Federal Clearinghouse for distribution to the payee.	
Chemical and Regulatory Information	ICOM Arrow	Information on chemicals and hazardous material regulations that is received from a subscription service and maintained in the master product hazard data (MPHD) warehouse.	
Clinically Indicated Testing Request	ICOM Arrow	This includes information related to the request for consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) requestor, request date, request type, and additional comments.	
Clinically Indicated Testing Response	ICOM Arrow	This includes the results from the consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) response date, response type, and additional comments.	
Closeout Information from External Sources	ICOM Arrow	The required information from the External Source to perform instrument closeout process.	
Closeout Period Schedule Information	ICOM Arrow	A schedule sent to the DoD Components that indicates the dates that information must be submitted for closeout.	
Closing Notification Request	ICOM Arrow	This is a management request to close the general ledger prior to generating financial reports.	
Closure Certificate for Case Implemented in Foreign Military Sales Trust Fund	ICOM Arrow	The Case Closure Certificate provides the information necessary for DFAS to close the case implemented in the Foreign Military Sales Trust Fund. The Certificate supports budgetary and/or proprietary impact in the general ledger to balance budget authority ceilings, cash receipts, total disbursements and the value of delivered articles and services for the case implemented in the Foreign Military Sales Trust Fund.	
Collect Program and Budget Information Law Policy Reg	ICOM Arrow	Collect Program and Budget Information is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, TFM Vol 1 Part 2, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 4120.24-M, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Collection Activity Termination Notice	ICOM Arrow	This is the notification from an external entity that collection action related to a debt has been terminated.	
Collection Confirmation	ICOM Arrow	This is the confirmation of collections from Treasury which includes deposit number, confirmation date, deposit amount, etc. In addition, detailed information on Non Sufficient Funds (NSF) checks is provided.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collection Information	ICOM Arrow	This includes information associated with collections which have been processed to include payments to offset an individual's government indebtedness, intergovernmental collections made via the Intra-governmental Payment and Collection (IPAC) system and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository, which have been processed. This collection information encompasses the associated cash collection voucher, as well as the collection of debt and resolution of administrative offsets.	
Collection Pro Forma Entries	ICOM Arrow	The debit and credit affects of collection pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Collection Receipts	ICOM Arrow	This is information associated with collections which have been processed to include intergovernmental collections made via Intra-governmental Payment and Collection and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository. Collection receipts could also include the associated deposit ticket, debit voucher, the associated cash collection voucher, administrative offsets, as well as the collection information for the debt management and accounting general ledger activities.	
Collection Voucher	ICOM Arrow	A form used to record collections that includes Disbursing office collection voucher number, Receiving office collection voucher number, period, name of remitter or description of remittance, detailed description of purpose for which collections were received, amount, and accounting classification.	
Collection Voucher Control Log	ICOM Arrow	Collection Voucher Control Log is prepared regularly by each functional area and/or branch disbursing office that summarizes regular collections, identifies payment mode (check, cash, Electronic File Transfer), and assures all voucher numbers are accounted for and all collection vouchers are entered in the accountability records.	
Comments to Public Draft Request for Proposal	ICOM Arrow	Suppliers' comments on the draft request for proposal that has been publicized to potential suppliers. These comments are incorporated where appropriate prior to final release of the request for proposal for approval.	
Comments to Request for Proposals	ICOM Arrow	Suppliers' comments on the request for proposal that has been publicized to potential suppliers.	
Commercial Banking Change Information	ICOM Arrow	This is a notice of change passed from the Federal Reserve Bank to the originating disbursing activity via Fedline. This notification includes information about changes which impact electronic funds transfer payments such as changes in a commercial bank's routing number.	
Commitment Modification Request	ICOM Arrow	A request to either increase or decrease the commitment amount needed to fulfill the requirement.	
Commitment Pro Forma Entry	ICOM Arrow	The debit and credit affects of commitment pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Commitment Request	ICOM Arrow	This is a request for a commitment or decommitment that has been approved based on the existence of available funding. This commitment/decommitment is an administrative reservation/dereservation of funds for a procurement request, order, directive, or equivalent instrument. This also identifies commitments that have been rejected due to insufficient funding or management discretion.	
Common Human Resources Information Standards	ICOM Arrow	The Common Human Resources Information Standards (CHRIS) represent common Human Resources Management (HRM) functional expressions of an information need within the DoD enterprise business context. Each standard is always presented as an encapsulated, single object that conveys context in a semantically consistent manner. An approved standard consists of a business name, definition, permitted value list when applicable, business use description, and structural business rules. Each standard is also referenced by a Law, Regulation, and/or Policy that establishes the business rule or process from which the information need is derived. The HRM Core Business Mission will use CHRIS in the system certification and investment review processes.	
Communication from Supplier	ICOM Arrow	Communications received from suppliers and transmitted through DoD logistics processes as part of the contract monitoring process, including requests by the Supplier for a change to the terms of the contract or order.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Communication to Supplier	ICOM Arrow	Any official, written, addressed communication between a DoD organization, a DoD employee, or other DoD agent and an internal or external supplier regarding the execution of the supplier's contract, including requests by the internal end user, or contracting officer, for a change to the terms of the contract or order such as changes to delivery date, specifications, and cost.	
Compensation Eligibility Notification	ICOM Arrow	This includes information used to notify an employee/Member that they are no longer eligible or are eligible for compensation.	
Competency Testing Request	ICOM Arrow	This includes the request for competency testing to be performed on the applicant (e.g., Armed Services Vocational Aptitude Battery (ASVAB) testing and special testing) to determine qualification for induction into the Armed Services. This information may include (but not be limited to) applicant's name, date of request, and type of testing required.	
Competency Testing Results	ICOM Arrow	This includes the results of the competency tests performed on the applicant (e.g., Armed Services Vocational Aptitude Battery (ASVAB) testing, and special testing) to determine qualification for induction into the Armed Services. This also includes a recommendation for a waiver submittal. This information may include (but not be limited to) ASVAB test scores and special testing scores.	
Competency Testing Results Report	ICOM Arrow	This includes a summary report of Armed Services Vocational Aptitude Battery (ASVAB) scores taken by applicants. This information may include (but not be limited to) name, date of test, location of test, and ASVAB test score.	
Compliance Determination	ICOM Arrow	This is a decision of program compliance based on the findings of fact.	
Component Apportionment Request	ICOM Arrow	Request from the components for the distribution of funds to be available for obligation. The request could include components spending plan such as specified time periods, activities, projects, objects or combination thereof. The spending plan included in the apportionment request should be consistent with the Appropriation Act and general provisions.	
Component Feedback	ICOM Arrow	Feedback from the components to be considered before the Report of Program is published.	
Component Product Hazard Data Request	ICOM Arrow	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Component Product Hazard Data Request Additional Information	ICOM Arrow	Additional information that is received in order to complete a Component product hazard data (PHD) request.	
Component Product Hazard Data Request Status Update	ICOM Arrow	Notification about the status of a Component request for product hazard data (PHD) that is sent to the requestor at the work unit.	
Component Product Hazard Data Submission	ICOM Arrow	The product hazard data (PHD) that has been received from a DoD Component and is submitted for validation and subsequent entry into the master product hazard data (MPHD) warehouse as a result of PHD provided with the Component Product Hazard Data Request for entry into the MPHD warehouse.	
Components Response	ICOM Arrow	Components response is the acceptance or comments on the draft budget decision as a result of the OMB and OSD joint budget reviews.	
Comptroller Feedback	ICOM Arrow	Feedback from the comptroller regarding the new requirement(s) that will affect existing DoD policies. Changes could affect the SFIS, Chart of Accounts, Pro-Forma entries, or the calendar.	
Comptroller Update	ICOM Arrow	Comptroller's updates that include prior year updates of accounting actuals, congressional actions, or other miscellaneous adjustments (e.g. corrections) that will be used to generate other budget decisions.	
Conduct Acquisition Assessment Law Policy Reg	ICOM Arrow	Conduct Acquisition Assessment is constrained by the following: USC Title 42, OMB Circular A-19, DoDI 5000.02, DoDI 5400.04.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Budget Review Law Policy Reg	ICOM Arrow	Conduct Budget Review is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Conduct Education Course Law Policy Reg	ICOM Arrow	Conduct Education Course is constrained by the following: Public Law 103-356, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, EO 13434, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, DoDI 1215.06, DoDI 1215.08, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1322.10, DoDI 1322.26, DoDI 1332.38, DoDI 2000.16, DoDI 4500.53, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Conduct Family Support Needs Assessment Law Policy Reg	ICOM Arrow	Conduct Family Support Needs Assessment is constrained by the following: Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 4, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.16, DoDD 5124.02, Joint Pub 1-0, Joint Pub 3-0, DoDI 1000.13, DoDI 1300.18, DoDI 1330.21, DoDI 1332.38, DoDI 1332.42, DoDI 1514.30, DoDI 5160.70, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, DTM-09-003, AR 601-270.

Conduct Periodic and Ad-hoc Reporting Law Policy Reg	ICOM Arrow	Conduct Periodic and Ad-hoc Reporting is constrained by the following: OMB Circular A-19, DoDI 5000.02, DoDI 5400.04.	
Conduct Physical Inventory Law Policy Reg	ICOM Arrow	Conduct Physical Inventory is constrained by the following: USC Title 31, USC Title 40, Executive Order 12906, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 6, SFFAS 19, OMB Circular A-16, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, JFMIP SR-00-4, JFMIP SR-03-02, DoDD 8500.01E, DoDI 5000.64, DoDI 8500.2, DoDI 8510.01, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD FMR Vol 04, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD 4140.1-R.	
Conduct Promotion Selection Law Policy Reg	ICOM Arrow	Conduct Promotion Selection is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Conduct Science and Technology Law Policy Reg	ICOM Arrow	Conduct Science and Technology is constrained by the following: CFR Title 15, CFR Title 22, DoDI 5000.02.	
Conference Report	ICOM Arrow	This is a Congressional committee conference report.	
Confirmation of Physically Complete Procurement Instrument or IGT Order	ICOM Arrow	Confirmation that a procurement instrument or intragovernmental order is physically complete based on meeting the terms and conditions for delivery or performance of services rendered as specified in the procurement instrument or intragovernmental order.	
Confirmed Collection	ICOM Arrow	A confirmed collection that has been verified and interpreted to accurately record the collection to the general ledger account and liquidate the outstanding receivable.	
Confirmed Contract Fulfillment	ICOM Arrow	Document received by Contracting Officer that confirms the completion or fulfillment of contractual obligations.	
Confirmed Payment	ICOM Arrow	Confirmation received by accounts payables department that provide confirmation of payment on outstanding accounts payable.	
Congressional Action	ICOM Arrow	This is a Congressional enactment to deferrals and rescissions. The enactment determines the compliance to the Impoundment Act.	
Congressional and Federal Inquiry	ICOM Arrow	This is a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Congressional Enactment	ICOM Arrow	The DoD portion of the President's Budget, is the basis for the DoD congressional enactment process. In the following nine months (February - October) the President's Budget will be closely scrutinized, serving as guidance for two major pieces of defense-related legislation: the National Defense Authorization Bill and the Defense/Military Construction Appropriations Bills. Of all the legislative matters before Congress, none is more important nor more political than the review of the President's Budget. It will be examined by 535 members of Congress and hundreds of congressional staffers, each of whom possess their own agendas and priorities. The end product of the enactment process is the Authorization and Appropriations Bills.	
Congressional Feedback	ICOM Arrow	Congressional feedback or position in the proposed baseline for reprogramming actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Congressional Input Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Congressional and Federal Inquiry, Conference Report, Congressional Action, Congressional Enactment, Congressional Feedback, Congressional Inquiry, General Provision, House Appropriation Committee Report, Official Congressional Position, Appropriation Act, Project Approval Response, Supplemental Appropriation Act, Strength Authorization Information, and Senate Appropriation Committee Report.	
Congressional Inquiry	ICOM Arrow	Congressional inquiry includes request for supplemental budget documentation, testimony, appeal materials, and witnesses.	
Congressional Output Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Transfer Package and Project Approval Request.	
Congressional Tracking Report	ICOM Arrow	A report documenting the changes at the line item level for all unexpired years. This includes supplementals and rescissions, spreads of Congressional undistributed adjustments, general provisions, below threshold reprogramming, and actions dictated by other laws.	
Consolidate Human Resources Profiles Law Policy Reg	ICOM Arrow	Consolidate Human Resources Profiles is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Consolidate Orders into Conveyance-Based Loads Law Policy Reg	ICOM Arrow	Consolidate Orders into Conveyance-Based Loads is constrained by the following: DoDD 4500.09E, DoDD 4500.43, DoDD 4510.11, DoDD 5158.04, DoDI 4500.34, DoDI 4500.53, DLM 4000.25, DoD 4140.1-R, DoD 4500.9-R, DoD 4515.13-R.	
Consolidated Appeal Material	ICOM Arrow	The consolidated appeal materials sets forth the Department's position on the most significant programs/items impacted by congressional actions.	
Consolidated Budget Estimate Submission	ICOM Arrow	This is a consolidation of all BES submitted during the On Year budget planning and submission. It is the primary document used by the services and agencies to submit budget estimates. It is based on the program and fiscal guidance contained in the POM.	
Consolidated Program Objective Memorandum	ICOM Arrow	The Consolidated Program Objective Memorandum (POM) is the collaboration of the primary documents used by the services to submit programming proposals. The Program Objective Memorandum includes an analysis of missions, objectives, alternative methods to accomplish objectives, and allocation of resources.	
Construction Requirement	ICOM Arrow	The requirement to further plan and source a construction agent to execute a construction, restoration or modernization action based on the completion, review and approval of a design project under a design bid build contract type.	
Continuation of Service Request	ICOM Arrow	This includes the Member's request to continue service before or after a fit for duty determination. The information may include (but not be limited to) Member name, current Service or component, date of request, and justification for the request.	
Continuing Resolution Act Estimate	ICOM Arrow	An amount and information estimate received from the components in anticipation of CRA.	
Continuing Resolution Act Estimate Request	ICOM Arrow	An amount and information estimate request to the components in anticipation of CRA.	
Continuing Resolution Amount	ICOM Arrow	Calculated amount available for execution under the Continuing Resolution Act.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Continuing Resolution Pro Forma Entry	ICOM Arrow	The debit and credit affects of continuing resolution pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Contract Action Report	ICOM Arrow	Report on all Federal Acquisition Regulation (FAR) contract actions as required by FAR 4.6. This includes information that identifies the type of report and reporting activity, the transaction, the type of contract, and the business size and socio-economic program data.	
Contract Cost Data Report Information	ICOM Arrow	Actual or projected cost information, contractually required and reported by DoD Contractors, resulting from participation in an acquisition program.	
Contract Debt Information	ICOM Arrow	This is an overall flow of debt information to the reporting function. Information includes account balance information, collection activity, demand letter issuance, debtor response information and results of debt adjudication proceedings. The information includes both vendor and individual debt information: Vendor debt information includes dollar amount owed to the Department of Defense by a vendor. This is due to an overpayment caused by previously processed advanced or financing payments, as well as contract modification actions which were processed after payment had been made.	
Contract Funds Status Report Information	ICOM Arrow	DoD contract funding data contractually required, obtained via the Contract Funds Status Report (CFSR), that includes forecasted contract fund requirements, planned funding changes, justification for funding changes, budget estimates, determination of excess contract funds, and estimates of termination costs.	
Contract Holdback Account Information	ICOM Arrow	Information necessary to create a subsidiary account for each vendor whose contract has a contract holdback clause. A predetermined amount or percentage of a contract is withheld from payment until final completion of the contract.	
Contract or Order Execution Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Intragovernmental Order Closure Information, Performance Evidence, and Procurement Instrument Closure Information.	
Contract or Order Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: "Acknowledged Intragovernmental Order" and "Awarded Procurement Instrument or Supplemental Procurement Instrument".	
Contract Performance Report Information	ICOM Arrow	Cost and schedule performance information submitted by DoD Contractors in the form of a Contract Performance Report that describes fulfillment of an acquisition contract.	
Contractor Receipt of Government Furnished Property	ICOM Arrow	Contractor acknowledgement that they have received government property on the performance of the contract.	
Contractor Surveillance Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Product Surveillance Time and Materiel Surveillance Technical Surveillance for Service This includes those contracts that have Earned Value Management (EVM) requirements.	
Control Program Execution Law Policy Reg	ICOM Arrow	Control Program Execution is constrained by the following: CFR Title 48, TFM Vol 1 Part 4, DoDD 5000.01, CJCSI 3170.01, DoDI 8560.01, DoDI 8580.1, DFARS.

Coordinate Family Support Services Law Policy Reg	ICOM Arrow	Coordinate Family Support Services is constrained by the following: Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 4, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.16, DoDD 5124.02, Joint Pub 1-0, Joint Pub 3-0, DoDI 1000.13, DoDI 1300.18, DoDI 1330.21, DoDI 1332.38, DoDI 1332.42, DoDI 5154.30, DoDI 5160.70, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, DTM-09-003, AR 601-270.	
Coordinate Human Resources Management Policy and Guidance Law Policy Reg	ICOM Arrow	Coordinate Human Resources Management Policy and Guidance is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Coordinate Personnel Distribution Plan Implementation Law Policy Reg	ICOM Arrow	Coordinate Personnel Distribution Plan Implementation is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Core Business Mission	ICOM Arrow	A defined area of responsibility with functions and processes that provides end-to-end support to the warfighter. The five Core Business Missions are: Human Resources Management (HRM) Weapon System Lifecycle Management (WSLM) Real Property & Installation Lifecycle Management (RPILM) Materiel Supply & Service Management (MSSM) Financial Management (FM)	
Correcting Pro Forma Entries	ICOM Arrow	Document contains all financial information needed to post and update the general ledger based on the anomalies correction business event, including the specific general ledger accounts that should be debited or credited and other financial information needed to support general ledger requirements.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Correction of Military Record Information Request	ICOM Arrow	This includes information associated with a request to gather additional information (e.g., pertinent evidence, new evidence, or report of investigation) before a correction of military record request can be accepted.	
Correction of Military Record Information Response	ICOM Arrow	This includes information associated with a response to a request to gather additional information (e.g., pertinent evidence, new evidence, or report of investigation) before a correction of military record request can be accepted.	
Correction of Military Record Request	ICOM Arrow	This includes information associated with a person submitting a request to correct an error within, or remove an injustice from a military record. Corrections will be made under the procedures established by the Secretary concerned. The information may include (but not be limited to) requester and individual personal information (e.g., name, ID number, organization), narrative request details, date of request, narrative decision (e.g., correction actions, notations on perceived problems or injustices, and potential for future actions), and date of decision.	
Correction of Military Record Return Notification	ICOM Arrow	This includes the notification information to reflect the details of returning a correction of military record request that does not meet the established criteria for acceptance. This information may include (but not be limited to) a brief statement of the grounds for denial if the Member/Requester does not meet the established criteria (e.g., Member/Requester fails to complete and sign the application, has not exhausted all other administrative remedies, the Board for Correction of Military Records does not have jurisdiction to grant the requested relief, there is insufficient evidence, no new evidence was submitted with a request for reconsideration, or the application was not timely filed).	
Cost Model Template	ICOM Arrow	A cost model template that will be used to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Cost Model Template Request	ICOM Arrow	A request for a template that is used to accumulate the costs of performance for all orders.	
Cost Performance Information Request	ICOM Arrow	The form used by internal or external customers to request cost/performance information. Request includes in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cost Performance Model	ICOM Arrow	<p>The model consists of the following information:</p> <ol style="list-style-type: none"> <li>1. data requirements (necessary data elements, source of data elements, detailed characteristics of the data, availability of the data)</li> <li>2. structured organization and relationships of model elements.</li> <li>3. criteria for detecting business anomalies.</li> <li>4. methodology for tracing inputs to model components.</li> <li>5. Model type and intended purpose</li> </ol> <p>Model Structure: The model structure reflects the organization and relationships of responsibility segments and cost objects. It also incorporates attributes which may support grouping, sorting, and reporting in ways not possible with pre-defined organizational and cost object structures. For example, if the cost object being reviewed is a geographic location (i.e. Baltimore), this attributing may provide the ability to view information not only by geographic location, but also by type (i.e. seaport, land port, airport), function, size, jurisdiction, etc.</p> <p>Responsibility Segments - A responsibility segment is a component of a reporting entity that is responsible for carrying out a mission, conducting a major line of activity or producing one or a group of related products or services. In addition, responsibility segments usually possess the following characteristics:</p> <ol style="list-style-type: none"> <li>1. Their managers report to the entity's top management directly; and</li> <li>2. Their resources and results of operations can be clearly distinguished from those of other segments of the entity.</li> </ol> <p>These two characteristics differentiate responsibility segments from cost objects. A cost object can be at any level of an organization and may not report to the top management directly. A responsibility segment can contain cost objects within itself.</p> <p>Cost Object - This is an activity or item whose cost is to be measured. In a broad sense, a cost object can be an organizational division, geographical area (e.g., district, region, etc.), cost center, program, activity, task, product, service, customer or asset. Cost objects may be decomposed into lower level cost objects to the extent required.</p> <p>As an example, the purpose of cost accounting by a responsibility segment is to measure the costs of its outputs. These outputs may be the services or products that the segment produces and delivers, the missions or tasks that the segment performs, or the customers or markets that the responsibility segment serves. There may be intermediate cost objects that are used in the course of the cost assignment process.</p>	
Cost Performance Model Requirements Agreement	ICOM Arrow	This object includes the terms and conditions of how the model will meet the customer's requirements. This contains the delivery schedule and specific requirements, such as the expected results, accuracy, and assumptions contained in the model.	
Court-Martial Proceeding Information	ICOM Arrow	This includes detailed results of a Member's court-martial. This may include (but not be limited to) evidence gathered from the investigation, court-martial proceeding outcome (guilt or innocence), charges preferred if applicable, validated punishment, and appeals information.	
Court-Martial Referral Information	ICOM Arrow	This includes the referral by a Commander to court-martial when an adverse action is deemed severe enough, or should a Member decide to exercise their right for court-martial.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
CPARS	ICOM Arrow	Contractor Performance Assessment Reporting System (CPARS) is the authoritative source of commercial supplier performance information reported by Department officials. CPARS is a web-enabled application that collects and manages an automated library of assessment reports of contractor performance completed by government officials, which provides a record, both positive and negative, on a given contract for a specific period of time. Each assessment is based on objective facts and is supported by program and contract management data. Assessment reports are then used in source selection processes as a qualitative input.	
Create Geospatial Features Request	ICOM Arrow	This is a listing of criteria, combined with specific analysis requirements, that are sufficient for creating new geospatial information content (e.g. geometry, attribution, accuracy, precision and quality) to be used in geospatial analysis.	
Create Human Resources Profiles Law Policy Reg	ICOM Arrow	Create Human Resources Profiles is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Create Human Resources Record Law Policy Reg	ICOM Arrow	Create Human Resources Record is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.

Create Individual Training Course Law Policy Reg	ICOM Arrow	Create Individual Training Course Curriculum is constrained by the following: Public Law 103-356, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, EO 13434, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, DoDI 1215.06, DoDI 1215.08, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1322.10, DoDI 1322.26, DoDI 1332.38, DoDI 2000.16, DoDI 4500.53, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Credential Catalog Information	ICOM Arrow	This includes repository information associated with all Department of Defense (DoD)-utilized credentials (e.g., Washington D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber) and civilian-acquired skills (e.g., firefighter, police detective, certified public accountant) identified as DoD mission related. The information may include (but not be limited to) specific credential information (e.g., credential identification information, credential version identification (e.g., Washington, D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian-acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential renewal periods (e.g., 2 years from date of issue, lifetime).	
Credential Deficiency	ICOM Arrow	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring a modification to Department of Defense (DoD) analysis and capture of any person's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), Universal Joint Task List (UJTL) related item (e.g., Strategic Theater 4.2 Coordinate Support for Forces in Theater, Strategic Theater 4.2.3 Reconstitute Theater Forces), narrative on exercise or combat operations-related deficiency or problem, credential version identification (e.g., Washington, DC Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Virginia certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential expiration or renewal date.	
Credential Proposal	ICOM Arrow	This includes information associated with personnel identifying a proposal (e.g., adjustment to the specified metals to be used in the competency testing of underwater electric arc welding) potentially requiring a modification to Department of Defense (DoD) analysis and capture of an individual's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), credential version identification (e.g., Washington, D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential expiration or renewal date.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Credential Proposal Assessment	ICOM Arrow	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, a specific Department of Defense (DoD) credential. This includes information associated with the response to a perceived deficiency of, or proposal for a modification to DoD analysis and capture of a person's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), proposal assessment information, credential version identification (e.g., Washington, DC Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Virginia certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential related competencies, specified DoD competency testing, credential mediums such as paper or electronic, credential expiration or renewal date, related assessment inputs received, analysis summary, evaluation results, proposal assessment information such as determination of related development actions to be further analyzed (within the context of development actions) for implementation details, and projected actions.	
Credit Memo	ICOM Arrow	Notification issued to the customer informing the customer that they have overpaid on a debt to the Department.	
Cross-Service Support Requirements	ICOM Arrow	This is the required set of standards implemented by Human Resources Management (HRM) within business rules specifying compliance items based on Cross-Service support legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by the OUSD P&R and consist of multiple levels of Cross-Service support. Level one is the ability of a designated, full-support activity to provide personnel and pay management services to all Service members assigned to a designated organization/entity/unit regardless of the supported organization/entity/unit's Service affiliation. Level two is the ability to efficiently provide a selected set of personnel and pay management services to Service members who are assigned to an organization/entity/unit that is not designated to receive support, but who may be in an area where services from their own designated support organization/entity/unit are not readily or efficiently available. Cross-Service support increases the effectiveness of combined operations by reducing the Service member's administrative time away from duty. The controls may also define standard operating procedures, specify HRM requirements, prescribe monitoring and reporting requirements, or specify other required activities.	
Customer and Vendor Information	ICOM Arrow	This is information about people and organizations to whom payments will be made. Information includes full name, mailing address, bank account information, SSN, DUNS, DUNS+4 and if an organization, an indication of whether the organization is a public or private sector entity.	
Customer Communication	ICOM Arrow	This includes the flow of narratives from management to all DoD supported personnel. This may include direct communications (e.g., newsletters, e-mail and web pages, bulletin boards, commander's calls, rosters), official surveys, as well as managing publications and postal support.	
Customer or Supplier Input Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Cash Receipt and Payment Information, Customer and Vendor Information, Remittance Information and Advance Ship Notice from Supplier.	
Customer or Supplier Output Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Check Payment, Credit Memo, Demand for Payment, Dunning Letter, Electronic Fund Transfer Payment Information, and Wire Transfer Information.	
DAI	ICOM Arrow	The objective of the Defense Agencies Initiative (DAI) is to achieve auditable, CFO compliant business environments for the Defense Agencies with accurate, timely, authoritative financial data. The primary goal is to deploy a standardized system solution to improve overall financial management and comply with BEA, SFIS, and OFFM requirements. The strategy is to implement a compliant business solution with common business functions within budget execution: e.g. procure to pay; order to fulfill; acquire to retire; budget to report; cost accounting; grants management; time and labor; and re-sale.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
DAIS	ICOM Arrow	I&E Data Analytics and Integration Support (DAIS) platform is the DoD's secure, net-centric, integrated environment for aggregating, accessing and managing accurate, reliable, authoritative and complete physical, legal, and financial data for I&E information. It aggregates and integrates all I&E business information models for improved decision support, situational awareness, reporting, analytics, and asset management.	
DAMIR	ICOM Arrow	The Defense Acquisition Management Information Retrieval (DAMIR) delivers capabilities that provide a performance-based integrated collaborative environment. This capability provides a shared solution for enterprise-wide acquisition management, program oversight, reporting and other related activities.	
DCPDS	ICOM Arrow	The Defense Civilian Personnel Data System (DCPDS) is a single, web-based Human Resources (HR) system that standardizes civilian HR processes and promotes efficiency of HR service delivery. The system uses a standard, easy-to-follow user interface to provide HR specialists, managers, and administrative specialists HR information at their fingertips. DCPDS is also the largest automated HR system in the world, containing over 800,000 civilian employee records and over 1.5 million position records. DCPDS replaced ten legacy civilian HR systems, and supports all targeted DoD civilian employees and organizations.	
Debit Voucher Information	ICOM Arrow	This is information associated with the debit vouchers debiting a disbursing activity. This information includes agency location code, amount, date and the debit voucher number.	
Debt Adjudication Decision	ICOM Arrow	This is information regarding the results of debt adjudication proceedings to include request for waiver, debt determination proceedings, or other administrative hearings conducted within the Component.	
Debt Compromise	ICOM Arrow	This is the notification to the originator of a debt that a debt is to be reduced in part or in whole due to the establishment of a debt compromise agreement.	
Debt Correspondence	ICOM Arrow	This is a variety of debt related correspondence going to external entities. Examples of documents include: responses to inquiries, responses to US bankruptcy court requests, and schedule of payments.	
Debt Disposition	ICOM Arrow	This is an overall flow of debt disposition (either via a write-off or a closeout) for both vendor and individual debts. For individual debt closeouts, this is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties. For individual debt write-offs, this is information detailing an agreed-upon partial payment of a debt made by an individual or employee allowing for a Department of Defense (DoD) write-off to occur in lieu of paying the full amount of the debt. For vendor debt closeouts, this is a notification that a debt case has been closed out and no further collection action will be pursued relative to the associated claims receivable. For vendor debt write-offs, this is the notification to accounting that collection action related to a debt has been terminated and the associated receivable is to be written off.	
Debt Referral Information	ICOM Arrow	Referred debt information based upon the type of debt, amount and age. Information would include account balance, collection activity to date, demand letter issuance, debtor response information and results of debt adjudication proceedings.	
Debt Write-off Notification	ICOM Arrow	This is an overflow of debt disposition (either via a write-off or a closeout) for both vendor and individual debts. For individual debt closeout, this is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties. For individual debt write-offs, this is information detailing an agreed-upon partial payment of a debt made by an individual or employee allowing for a Department of Defense write-off to occur in lieu of paying the full amount of the debt. For vendor debt closeouts, this is a notification that a debt case has been closed out and no further collection action will be pursued relative to the associated claims receivable. For vendor debt write-offs, this is the notification to accounting that collection action related to a debt has been terminated and the associated receivable is to be written off.	
Debtor Response	ICOM Arrow	This is the debtor's response to a demand letter or notice of administrative offset. This may request the debt be satisfied through installment payments or via salary offset. The request may also request an installment payment schedule, waiver, debt determination consideration or administrative hearing within the Component.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Deduction Information	ICOM Arrow	This includes information concerning amounts to be deducted from gross pay and distribution of net pay. This may include (but not be limited to) statutory deductions, garnishments, and withholding for state and federal income taxes, collections, and reductions.	
Deduction Update Notification	ICOM Arrow	This includes information associated with a notification that alerts an employee/Member that there has been an initiation or change to amount or terms of a deduction or reduction of pay. This includes effective date of the change, reason for the change, new deduction or reduction amount.	
Defense Acquisition Executive Summary Information	ICOM Arrow	The information required to track programs between milestone reviews.	
Defense Contract Cost Analysis Information	ICOM Arrow	Cost data for a particular contract activity including work accomplished by contractors and total program cost (awarded and future). Information is used to estimate total Defense Acquisition Program Cost in support of cost and price analysis.	
Defense Planning Scenarios	ICOM Arrow	Provides a depiction of a threat to international security, a corresponding mission for U.S. military forces, and a strategic-level concept of operation for carrying out that mission. The SECDEF approves a single set of scenarios intended to serve as a standard by which the senior leadership of the Department can gauge the sufficiency of the Defense Program. A single set of scenarios ensures DOD consistency for studies, war games, and experimentation.	
Deferral Proposal	ICOM Arrow	Proposal for deferral of appropriated budgetary resources to be temporarily withheld from obligation.	
Deferral Report	ICOM Arrow	Report submitted to the OMB containing a detailed description of the amount, affected accounts, project, government functions involved, reasons for deferral, effects of the deferrals, and any other relevant facts supporting the deferral decision.	
Deferred Amount	ICOM Arrow	Deferred amount approved through congressional action in response to the Impoundment Act.	
Define Cost Performance Model Law Policy Reg	ICOM Arrow	Define Cost Performance Model is constrained by the following: Public Law 106-531, USC Title 10, USC Title 31, USC Title 33, USC Title 37, SFFAS 4, SFFAS 9, SFFAS 18, SFFAS 30, SFFAS 35, SFFAC 1, SFFAC 2, SFFAC 3, SFFAC 4, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-127, JFMIP FFMSR-8, JFMIP - MCAIG, OFFM-NO-0106, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 08, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15.	
Define Program Law Policy Reg	ICOM Arrow	Define Program is constrained by the following: DoDD 5000.01, CJCSI 3170.01, DoDI 8560.01, DoDI 8580.1.	
Delinquent Debt Information	ICOM Arrow	This is an overall flow of debt information to the reporting function. Information includes account balance information, collection activity, demand letter issuance, debtor response information and results of debt adjudication proceedings. The information includes both vendor and individual debt information: Vendor debt information includes regarding a dollar amount owed to the Department of Defense by a vendor. This is due to an overpayment caused by previously processed advanced or financing payments, as well as contract modification actions which were processed after payment had been made. Individual debt information includes information required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from the Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid.	
Deliver Metrics Information	ICOM Arrow	This is the narrative and metrics data that when aggregated describes the execution of distribution activities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Deliver Morale, Welfare and Recreation Program Law Policy Reg	ICOM Arrow	Deliver Morale, Welfare and Recreation Program is constrained by the following: Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 4, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.16, DoDD 5124.02, Joint Pub 1-0, Joint Pub 3-0, DoDI 1000.13, DoDI 1300.18, DoDI 1330.21, DoDI 1332.38, DoDI 1332.42, DoDI 5154.30, DoDI 5160.70, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, DTM-09-003, AR 601-270.	
Deliver Plan	ICOM Arrow	A plan for a course of action over specified time periods that involves a projected appropriation of resources to meet delivery requirements.	
Deliver Return Metrics Information	ICOM Arrow	This is the narrative and metrics data that when aggregated describes the execution of delivery activities associated with a return.	
Demand Letter	ICOM Arrow	Demand letter provides information about eligible accounts receivable that is dunned at the first applicable and subsequent time intervals. Accounts are dunned at periodic intervals (e.g., 30-day intervals). Delinquent accounts should be dunned based on Federal statutes such as the Debt Collection Act of 1982 and the DCIA. Federal regulations on debt collection, such as the Federal Claims Collection Standards, government-wide debt collection guidance such as OMB Circular A-129, Treasury's Managing Federal Receivables, and DoD policies and procedures.	
Demotion Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate a demotion order pertaining to personnel. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Department of Defense Fund Balance	ICOM Arrow	The Department of Defense Fund Balance is the authoritative source for all funds information, including execution transactions and funds availability. A Department of Defense Fund Balance is based on the general ledger data and provides the current balance of funds available for use associated with a specific budget program or any subdivision of a budget program. This information also contains funds availability within a particular program by comparing the fund request with fund balance of the activity providing the goods or services to ensure that the seller has the funding authority to incur the costs that will be associated with providing the buyer's request. In addition, the Department of Defense Fund Balance includes funding originally appropriated, apportioned, allotted, or otherwise distributed and any subsequent execution activity that has occurred, including commitments, obligations, and expenditure activity. This information is also comprised of many views of financial information at various levels of detail.	
Deployed ESOH Solution	ICOM Arrow	This result of the assessment action outlines the actual solution that has been implemented. This may include any details of variances in the actual implementation from the planned implementation, and any requirements for future monitoring or action.	
Deployment Information	ICOM Arrow	Passenger list or numbers and associated materiel and equipment related to a force movement. Includes updated and validated Unit Deployment List (UDL) and Unit Equipment List (UEL).	
Deposit Information	ICOM Arrow	This is information associated with the deposit of funds creditable to a disbursing activity. This information includes agency location code, amount, date of deposit and the deposit ticket number.	
Depreciation and Amortization Information	ICOM Arrow	This represents depreciation and amortization information from the physical asset record, to the fiscal asset record to update asset values based on the depreciation schedule.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Detailed Budget Information	ICOM Arrow	<p>The detailed budget information as found in budget exhibits (e.g. M-1, R-1, P-1). This information identifies types of levels for specific budget requirements that will be used to update FYDP. The level and type of budget information vary depending on appropriation and major programs. Some examples are as follows:</p> <ul style="list-style-type: none"> <li>- Appropriation</li> <li>- Program Element</li> <li>- Budget Line Number</li> <li>- Project</li> <li>- Force Resource Identification</li> <li>- Manpower Resource Identification</li> </ul>	
Detailed Justification Material	ICOM Arrow	<p>President's budget numbers in line item detail, both at direct and reimbursable level. These materials also include documentation that supports the budget estimates submitted by the components. It should include program performance indicators and goals, any proposed policies and strategies along with the amount of mandatory and discretionary spending. The justification should include personnel requirements, its relationship to the President Management Agenda, and additional funding needs in excess of the budget.</p>

Develop Personnel Distribution Plan Law Policy Reg	ICOM Arrow	Develop Personnel Distribution Plan is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Develop Procurement Strategy Law Policy Reg	ICOM Arrow	Develop Procurement Strategy is constrained by the following: Public Law 112-194, NDAA 2013, USC Title 10, CFR Title 48, OMB Memo 04-04, DoDD 8500.01E, DoD 5200.1-R, DoD 5400.11-R, DFARS, ICPS, TCEES.	
Develop Program Guidance Law Policy Reg	ICOM Arrow	Develop Program Guidance is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 37, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 4120.24-M, DoD 5105.38-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 15, DoD 5400.11-R.	
Develop Program Law Policy Reg	ICOM Arrow	Develop Program is constrained by the following: DoDD 5000.01, CJCSI 3170.01, DoDI 8560.01, DoDI 8580.1.	
Developed Proposal	ICOM Arrow	Document that outlines the implementation approach for the new policy or changes to the existing policy.	
Development Competencies Catalog Information	ICOM Arrow	This includes information associated with all Department of Defense (DoD) competencies identified for DoD development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) specific competency identification information related to DoD occupations (e.g., MOS, AFSC) requiring the specified competencies.	
Disapproved Payment Requests	ICOM Arrow	Payment request where payment is based on approval of a government official and the request has been disapproved. A governmental official may approve, may approve for a lesser amount or disapprove the payment request. The Approved Payment Requests will then go to the Entitlement process. Disapproved requests go back to the vendor.	
Disbursement Confirmation	ICOM Arrow	This is the confirmation of disbursements from Treasury. Schedule number, Control totals, Confirm date, range of tracer numbers, payment medium. In addition, detailed information on cancelled checks is provided.	
Disbursement In-Transit Pro Forma Entries	ICOM Arrow	Disbursements In-Transit Pro Forma entry represents the specific debit and credit effects to the general ledger. This entry reflects outlays transmitted to a designated disbursing office or the Treasury that have not been received and/or processed as outlays prior to the reporting period.	
Disbursement Log	ICOM Arrow	A daily log prepared and maintained by the Disbursing Officer to record all the disbursing information which has been processed to include intergovernmental payments made via Intra-governmental Payment and Collection and commercial payments processed via electronic funds transfer and Treasury Check.	
Disbursement Pro Forma Entries	ICOM Arrow	The debit and credit affects of disbursement pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Disbursing Information	ICOM Arrow	This is information associated in processing disbursements that includes intragovernmental payments made via IPAC and commercial payments processed via electronic funds transfer and Treasury checks. This information also contains prepayments to record an expense that was paid in advance and disbursements In-Transit that have been processed by DoD but not yet confirmed by the Treasury. In addition, this information includes the payment instrument to include notification of the final invoice payment and the associated disbursement voucher, as well as disbursement information for the supply chain entitlement and accounting general ledger activities.	
Disbursing Reports	ICOM Arrow	The purpose of disbursing reports is to provide disbursement voucher data for verification and certification of the payroll process and to satisfy requirements of Certifying Officer legislation.	
Discharged Debt Tax Notification	ICOM Arrow	This is the issuance of the IRS Form 1099-C documenting that delinquent debt has been closed out and should thus be treated as taxable income of the recipient.	
Discrepancy Dispute Resolution	ICOM Arrow	The disposition of a discrepancy report.	
Discrepancy Report Information	ICOM Arrow	Report generated upon either Receipt or Acceptance documenting any variance from the terms and conditions of the agreement, Procurement Instrument or intragovernmental order with the supplier.	
Disposal Hazardous Process Description	ICOM Arrow	Information that identifies a potential hazardous process(es) in a property disposal activity described to the level of granularity necessary to define effective ESOH controls.	
Disposal Metrics Information	ICOM Arrow	This is the narrative and metrics data that when aggregated describes the execution of Dispose activities.	
Dispose Property or Materiel Law Policy Reg	ICOM Arrow	Dispose Property or Materiel is constrained by the following: USC Title 32, USC Title 40, USC Title 42, USC Title 50, CFR Title 48, Executive Order 12906, SFFAS 1, SFFAS 6, SFFAS 7, SFFAS 10, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-16, OMB Circular A-21, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-4, JFMIP SR-03-02, DoDD 4151.18, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDD 8500.01E, DoDI 3000.04, DoDI 3110.06, DoDI 4151.19, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-6-M, DoD 4000.25-8-M, DLM 4000.25-4, DoD 4100.39-M, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4160.21-M, DoD 4160.28-M Vol 1, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02B, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, DoD 5200.08-R, DFARS.	
Disposition Information	ICOM Arrow	This is information on the disposition of government property as dictated by contract terms and conditions or weapon systems lifecycle guidance. This parent ICOM represents a combination of the information provided by the following children ICOMs: Transfer of Government Property Disposition of Loss Plant Clearance Disposition Recovered Property Information	
Disposition of Loss	ICOM Arrow	Disposition of a contractor's notice of loss.	
DoD Apportionment Request	ICOM Arrow	DoD Apportionment request contain all funding request from the services/components to be submitted to OMB for approval. This apportionment request is the department's request to make funding available for obligation as stated in the Appropriation Act and general provisions.	
DoD Budget Submission for President's Budget	ICOM Arrow	On-year--DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year--The DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g., cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
DoD EMALL	ICOM Arrow	DoD Electronic Mail (DoD EMALL) provides the entry point for DoD, Federal, Industry (as agents for government) and Allied Nation purchasers to research and acquire off-the-shelf, finished goods and services from the commercial marketplace and government sources. DoD EMALL provides an advanced, web-based government e-procurement application while enabling a Common Supplier Engagement model.	
DoD Information from OMB	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Transfer Requirements, Transfer Request Response, Program Objective Memorandum, Deferral Proposal, OMB Bulletin, OMB Decision, OMB Feedback, OMB Passback, Reprogramming Request Response, and Rescission Proposal.	
DoD Information to Federal Government	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Recommendation on Export Request, Inspection Results Information, Program Deviation Reporting Information, Real Property Outgrant Executed Notification, Request for Non DoD or Operational Threat Assessment, Response to Congressional and Federal Inquiry, Response to Customer, Selected Acquisition Reporting Information, and Unit Cost Reporting Information.	
DoD Information to OMB	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Transfer Request, DoD Budget Submission for President's Budget, Deferral Report, DoD Apportionment Request, DoD Topline Passback Response, Reprogramming Request, Request for Additional Continuing Resolution Amount, Rescission Language, and Rescission Report.	
DoD Output to Federal Government	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Foreign Military Sales Expenditure Authority Request, DoD Response to Congressional Action, Consolidated Appeal Material, Future Years Defense Program, Prepared Testimony, Reprogramming Package, and Updated Detail Justification Material.	
DoD Response to Congressional Action	ICOM Arrow	DoD's position and response to the congressional action regarding the department's proposed reprogramming actions.	
DoD Topline Passback Response	ICOM Arrow	The DoD's response to OMB contains the comments and feedback from the Department on OMB's topline passback. The response reflects the results of the previous negotiations on key issues within DoD and realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs.	
Draft Acquisition Program Baseline	ICOM Arrow	Draft of program cost, schedule, performance parameters, constraints, objectives, and milestones. This information is developed by the Program Manager for submission to the Decision Authority for approval. The program baseline guides the PM in the execution of the acquisition program.	
Draft Baseline Report	ICOM Arrow	A draft baseline report sent to the components for feedback or comments. This report will be used as a baseline for reprogramming actions.	
Draft Budget Decision	ICOM Arrow	Draft budget decision is the result of the joint review between OSD/OMB. This is submitted to the components for review, acceptance and/or comments.	
Draft Human Resources Management Policy and Guidance	ICOM Arrow	This includes a draft of the Human Resources Management (HRM) policy and guidance document that will be sent for collaboration with the appropriate parties for their input. Draft HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, and policy change summary description.	
Draft Human Resources Management Policy and Guidance Input	ICOM Arrow	This includes comments and/or recommendations to the draft Human Resources Management policy and guidance from the appropriate parties. This information may include (but not be limited to) input date, input provider name and organization, and input description.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Draft Procurement Instrument Information	ICOM Arrow	A draft contract that is intended to be a mutually binding legal relationship obligating the external supplier to furnish the goods or services (including construction) and the buyer to provide payment for those goods or services as agreed upon by the contract. The draft contract is finalized following negotiations and revisions in coordination with the supplier. Contracts include all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; orders such as purchase orders, under which the contract becomes effective by written acceptance or performance; and bilateral contract modifications. A contract is not effective until it has been awarded to the supplier.	
Draft Rebaseline Report	ICOM Arrow	A draft rebaseline report sent to the components for feedback or comments. This rebaseline will require congressional action to update the initial baseline report.	
Draft Reconciled Report	ICOM Arrow	Draft program report that has been reconciled against financial accounting balances.	
DTS	ICOM Arrow	The Defense Travel System (DTS) transforms what is currently a paper-based, labor-intensive travel process into a fully automated and web-based system that will support official travel. When fully implemented, DTS will be the designated single standard system for temporary duty travel requirements for all DoD personnel.	
Earned Investment Revenue	ICOM Arrow	Interest earned from investment activity that is posted to general ledger as investment revenue.	
Earned Value Management Central Repository	ICOM Arrow	A system developed to collect, store, and retrieve EVM data for DoD acquisition programs. EVM information is collected and reported in the Contract Performance Reports, Contract Funds Status Reports, and Integrated Master Schedules.	
Earned Value Management Information	ICOM Arrow	Actual contractor cost, schedule, work anticipated, work completed, and performance from an approved accounting system used as internal management controls to monitor completion of contract activities.	
Earnings Information	ICOM Arrow	This includes information associated with determining if personnel are eligible for and authorized to receive a particular pay type and/or allowance. Determination of pay eligibility may include in part the pay amount (e.g., bonus, incentive, allowance) established as part of a personnel agreement, indication that personnel have performed a certain duty (e.g., submarine, flying, and diving), pay grade, and years of service.	
Earnings Update Notification	ICOM Arrow	This includes information used to notify an employee/Member that they are no longer eligible or that they have become eligible.	
EDA	ICOM Arrow	Electronic Document Access (EDA) provides secure online, electronic storage and retrieval capabilities of procurement information and documents across the DoD.	
Education Course Catalog Information	ICOM Arrow	This includes repository information associated with the list of all education programs (these programs could be implemented by resident or distributed learning). The information may include (but not be limited to) eligibility specifications, administration, operations support, and course information needed for the management of higher education (degree granting) programs (Department of Defense (DoD) funded at both DoD and civilian institutions), DoD Education Activity programs, DoD Programs with Industry and schools covered within the National Defense University (i.e., National War College, the Industrial College of the Armed Forces, the Joint Advanced Warfighting School, and the Joint Forces Staff College), and the Services' Command and Staff colleges and War Colleges.	
Education Course Curriculum Information	ICOM Arrow	This includes information associated with newly developed or modified Department of Defense (DoD) education program curriculums. This information may include (but not be limited to) prerequisites, educational goals and objectives, plans, tests, course evaluation methods, and associated courseware.	
Education Course Deficiency	ICOM Arrow	This includes identified mission related problems, from the warfighter community involved with operations, potentially requiring a modification to a specific education program. This information may include (but not be limited to) requestor name, organization, Universal Joint Task List (UJTL) related item (e.g., Strategic Theater item), request date, deficiency information and recommendation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Education Course Proposal	ICOM Arrow	This includes any proposal information from inside or outside the Department of Defense (DoD) for the creation or modification of an education program. This information may include (but not be limited to) requestor name, organization, eligibility specifications, safety analysis information, course information, request date, proposal information and recommendations based on instructor and student evaluations.	
Education Course Proposal Assessment	ICOM Arrow	This includes response to a submitted deficiency or proposal for a creation or modification of an education program. This information may include (but not be limited to) requestor name, organization, analysis summary, evaluation results, proposal assessment information, evaluator name, and assessment date.	
Education Instructor Course Evaluation	ICOM Arrow	This includes information associated with evaluating Department of Defense (DoD) education programs. This information may include (but not be limited to) details of the feedback (e.g., course is sufficient, course has deficiencies, and proposals to make the course better) given by the instructor for that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific education program.	
Education Requirements Information	ICOM Arrow	This includes information associated with education requirements used to create or update a Department of Defense (DoD) education program. This information may include (but not be limited to) new or updated education requirements, deficiencies, and requirement proposals used to create or update DoD and Service education program curriculum to meet current or future DoD and Service education needs.	
Education Resource Availability Information	ICOM Arrow	This includes information associated with the availability of Department of Defense (DoD) resources for education programs (e.g., equipment, facilities, faculty, and other support personnel). This information may include (but not be limited to) what resources are currently available, resources on standby, and resources that may be made available in the future.	
Education Resource Requirements Information	ICOM Arrow	This includes information associated with resource requirements for Department of Defense (DoD) and Service education programs. This information may include (but not be limited to) resources required to deliver the developed education program (e.g., funds, equipment, facilities, faculty, and other support personnel).	
Education Student Course Evaluation	ICOM Arrow	This includes information associated with the evaluation of Department of Defense (DoD) education programs. This information may include (but not be limited to) details of the feedback (course is sufficient, course has deficiencies, and proposals to make the course better) given by the student of that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific education program.	
EEIM	ICOM Arrow	The Enterprise Energy Information Management (EEIM) Standard is a capability based standard designed to inform decision-making through the systematic collection, integration and analysis of facility energy use, production and project data. This capability is comprised of common business language and integrated facility management practices that provides the foundation for a comprehensive DoD energy information capability. This information supports business analytics across the DoD enterprise while streamlining external reporting. EEIM transforms data into actionable and integrated information for energy managers to perform meaningful trend analyses, benchmarking of assets, identification of opportunities for improvement, and tracking of progress against both internal and external performance goals.	
EFD	ICOM Arrow	The Enterprise Funds Distribution Initiative is designed for transformation of the Department's funds management and distribution capabilities to: Streamline funds distribution processes for all DoD appropriations and standardize distribution data across the enterprise. Automate audit trail between president's budget submission and appropriation enactments. Automate and integrate funds authorization documents (FADs), track funds reprogrammed and electronically track funds distributed for execution. Provide full visibility of appropriated funds as they pass through and across different levels of the enterprise.	
Electronic Fund Transfer Payment Information	ICOM Arrow	Electronic Fund Transfer provides for electronic payments and collections. The information needed to process an Electronic Fund Transfer transaction is the payee's name, all relevant bank identifying information, amount and invoice information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Eligible Receivables	ICOM Arrow	Eligible receivables are delinquent debts greater than 90 days to be referred to Treasury for further collection actions.	
ELRV&RR	ICOM Arrow	Environmental Liabilities Recognition, Valuation, and Reporting Requirements (ELRV&RR) initiative supports the Environmental Liabilities Identification and Valuation Enterprise capability, which in turn supports the Real Property Accountability BEP. This includes data capture, inventory recording, integration with core financial systems and linkage to asset records. DoD environmental liability estimates are not auditable and have been identified by GAO as a material weakness. DoD efforts have traditionally focused on updating the required inventories, improving data quality and record keeping, and providing clear OSD financial and program guidance. However, the long term solution to achieving a favorable environmental liabilities audit is to reengineer the environmental liabilities recognition, valuation, and reporting business process and then integrate financial and program IT systems to produce auditable and complete data.	
Energy Conservation Measure Approval Document	ICOM Arrow	Documentation of the authorization to, and the requirements (scope and desired outcomes) for, implementing an energy conservation measure.	
Energy Conservation Measure Potential Mission Impact Information	ICOM Arrow	Information about impacts on mission requirements that may result from implementing an energy conservation measure.	
Energy Conservation Measure Potential Mission Impact Information Request	ICOM Arrow	A request for information about impacts to installation mission requirements that may result from implementing a given energy conservation measure.	
Energy Information from Program Management	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Facility Energy Information, Facility Energy Conservation Information, Facility Energy Consumption Information, Renewable Energy Production and Purchase Information, Energy Conservation Measure Approval Document, Renewable Energy Project Approval Document.	
Energy Information to Program Management	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs:Facility Energy Management Information, Facility Energy Conservation Management Information, Energy Project Execution Information, Facility Energy Consumption Management Information, Renewable Energy Production and Purchase Management Information, Facility Energy Consumption Analysis Results, Renewable Energy Project Execution Information.	
Energy Project Execution Information	ICOM Arrow	Information needed to enter a contract to execute an energy project.	
Enlistment Extension Appeal	ICOM Arrow	This includes a request by the Member to appeal the extension decision of the Approval Authority. The information may include (but not be limited to) appeal date, appeal status, and appeal justification.	
Environmental Liability Footnote Information	ICOM Arrow	The financial and non-financial information that is used to build the financial statement narrative and footnotes as they relate to environmental liabilities.	
Environmental Liability Information Rejected	ICOM Arrow	This is the aggregated financial information for environmental liabilities that has been rejected based on various factors and not applied as applicable. It is not posted to the general ledger, and may be disclosed as a footnote on the financial statements.	
Environmental Liability Site or Item Information	ICOM Arrow	Information about an environmental liability and the property affected by the EL that is needed for EL inventory maintenance and reconciliation with property assets.	
Environmental Liability Transaction Information	ICOM Arrow	This is the financial information for environmental liabilities that will provide the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts) when posted to the general ledger.	
ESOH Assessment Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used in the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the process of assessing an ESOH aspect.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Assessment Geospatial Analysis Results	ICOM Arrow	This is a set of information needed during the process of assessing an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Assessment Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the process of assessing an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Assessment Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to assess an ESOH aspect.	
ESOH Assessment Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Service Request	ICOM Arrow	Information required to request the provision of contract services to perform an approved ESOH Aspect Assessment.	
ESOH Budget Request	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Assessment Budget Request, Identification Budget Request and Implement Solution Budget Request.	
ESOH Control Requirement	ICOM Arrow	This is the required set of operational controls implemented by a mission activity to comply with environment, safety, and occupational health legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by agreement between stakeholders such as the owner or operator of the mission activity; supporting environment, safety, and occupational health organizations; permitting agencies; and the public. A documented terms and conditions agreement might be a: process authorization, permit, license, exemption, explosives safety site plan and management decision or operating exception. Environment, safety, and occupational health controls influence the doctrine, organization, training, materiel, leadership and education, personnel and facilities (DOTMLPF) of mission activities. They may also define standard operating procedures, specify safety requirements, detail experience levels and training requirements, prescribe monitoring and reporting requirements, or specify other required activities.	
ESOH Identification Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used in the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Results	ICOM Arrow	This is a set of information needed during the process of identifying an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Identification Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the process of identifying an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Identification Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product -- such as a map or 'distance to' measurements -- that is needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of identifying an ESOH aspect.	
ESOH Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Characterized ESOH Issue.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Issue Communication	ICOM Arrow	A communication to responsible authorities that an issue of actual or potential ESOH concern exists. The communication may describe an event such as an accident or spill, refer to a set of circumstances of interest to the ESOH community (e.g., paint fumes, archeological discovery) or may be a request for a process authorization. The communication may be from the public, regulatory notices from authorities, or be identified as a result of an internal study or inspection or explosives safety management and site plan review request. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
ESOH Issue Description	ICOM Arrow	This is a narrative that details the problem, issue, or concern. Example components include: statement of understanding, process parameters, issue location, work function, identified hazard, and ESOH issue profile. This output also feeds the environmental inventory.	
ESOH Issue Profile	ICOM Arrow	This is a description of the area of interest and the suspected issue or the aspect associated with a specified location, activity or service. The issue profile can be used to determine if an aspect or issue of interest requires further investigation or may be used as the basic information in beginning the detailed assessment. Example attributes: Area Name Area Location Activity Performed Suspected Issue Materials Used	
ESOH Service Request	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: ESOH Assessment Service Request, ESOH Solution Development Request and ESOH Solution Service Request.	
ESOH Solution Development Request	ICOM Arrow	Information required to request the provision of contract services to perform an approved ESOH Solution development.	
ESOH Solution Development Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used in the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Analysis Results	ICOM Arrow	This is a set of information needed during the process of developing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Development Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the process of developing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Solution Development Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to develop an ESOH solution.	
ESOH Solution Development Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of developing an ESOH solution.	
ESOH Solution Implementation Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used in the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Results	ICOM Arrow	This is a set of information needed during the process of implementing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Implementation Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the process of implementing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.

Execute Promotion Law Policy Reg	ICOM Arrow	Execute Promotion is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Execute Requisition Law Policy Reg	ICOM Arrow	Execute Requisition is constrained by the following: Public Law 112-194, NDAA 2013, CFR Title 48, OMB Memo 04-04, DoDD 8500.01E, DoD 4140.1-R, DoD 5200.1-R, DoD 5400.11-R, DFARS, ChargeCardGuide, ICPS, TCEES.	
Execute Rescission Deferrals and Cancellations Law Policy Reg	ICOM Arrow	Execute Rescission Deferrals and Cancellations is constrained by the following: Public Law 103-356, USC Title 10, USC Title 31, USC Title 37, OMB Circular A-11, OMB Circular A-19, OMB Circular A-127, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, TFM Vol 1 Part 2, OFFM-NO-0106, DoDD 8500.01E, DoDI 8500.2, DoDI 8510.01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 11B, DoD 5400.11-R.	
Executive Financial Information or Guidance	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Closing Notification Request, Comptroller Feedback, Financial Management Policy Request, Financial Statement Narrative Information, Footnote Information, Narrative Information, New Data Element Request, Notification to Re-examine, and Proposal Decision.	
Explained Anomaly	ICOM Arrow	This is an anomaly that has been clarified by its data owner. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule.	
External Carrier Information	ICOM Arrow	A movement plan for specific cargo or passengers. Includes the Manifest document that details the passengers or items carried for a specific destination. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (origin, destination), mode - to include (a) inland surface transportation (rail, road, and inland waterway); (b) sea transport (coastal and ocean); and (c) air transportation. Information concerning commercial or organic transportation mode availability and contract rates and tariffs from carriers by commodity, lane, and mode for shipments including ports, airlift, sealift, railway, highway, customs, and traffic management. Used to track the identity, status, and location of DoD units and non-unit cargo and passengers, medical patients, and personal property from origin to consignee or destination across the range of military logistics operations. (Defense Transportation Regulation -DTR Part I-IV).	
External Energy Goal Information	ICOM Arrow	Information about energy goals issued by an entity other than DoD.	
External Energy Reporting Information	ICOM Arrow	Information generated in response to a requirement to report DoD energy information to an entity other than DoD.	
External Energy Reporting Requirements	ICOM Arrow	Information about DoD energy that must be reported to an entity other than DoD.	
External Shipping Information	ICOM Arrow	Legal documentation of the contents of a shipment from an external source provider.	
Extraordinary Request Information	ICOM Arrow	This includes information related to a request from a Casualty Member or Member's family which exceeds an established threshold, or contains Casualty Assistance Program selections (e.g., urns, caskets, travel requests) which are not typically available as DoD offerings.	
Facility Energy Conservation Information	ICOM Arrow	Information about the energy reporting category, conservation reporting, and conservation related goals that are required to manage facility energy conservation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Facility Energy Conservation Management Information	ICOM Arrow	The information generated for program management of facility energy conservation.	
Facility Energy Consumption Analysis Results	ICOM Arrow	The outcome of DoD Component analysis of energy consumption data.	
Facility Energy Consumption Information	ICOM Arrow	Information about the energy reporting category, consumption reporting, and consumption related goals that are required to manage facility energy consumption.	
Facility Energy Consumption Management Information	ICOM Arrow	Information generated for program management of facility energy consumption.	
Facility Energy Information	ICOM Arrow	Programmatic information needed for facility energy analytics, goal tracking, and reporting.	
Facility Energy Management Information	ICOM Arrow	Information about the energy reporting requirements, goal information, and energy analytics that the Components need to manage facility energy consumption, conservation, and renewable energy production and purchase.	
Family Care Completion Report	ICOM Arrow	This includes an aggregated report which may contain (but not be limited to) information related to the times, dates, and locations of Casualty Assistance Program service deliveries. This may also include feedback related to issues related to vendors and casualty assistance offerings.	
Family of Joint Future Concepts	ICOM Arrow	Used to underpin investment decisions leading to the development of new capabilities beyond the Five-Year Defense Plan. New capability requirements, materiel or non-materiel, must relate directly to capabilities identified through the Family of Joint Future Concepts, whose hierarchical nature and deliberate process require close examination of needed capabilities through an iterative process of assessment.	
Family Support Coordination Assistance Request	ICOM Arrow	This includes information related to a family support coordination assistance request. The request is made to Department of Defense (DoD) entity or non-DoD entity (e.g., other federal, local or state government establishment, non-profits or other private organization), for coordination assistance (e.g., medical, legal, housing, travel) related to providing Family Support services. This information may include (but not be limited to) requestor name, request date and explanation of the request.	
Family Support Coordination Assistance Response	ICOM Arrow	This includes information related to a response from a Department of Defense (DoD) entity or non-DoD entity (e.g., other federal, local or state government establishment, non-profits or other private organization) to a Family Support coordination assistance request related to providing Family Support services. This information may include (but not be limited to) responder name, response date, and explanation of the response.	
Family Support Information Request	ICOM Arrow	This includes information related to a request to gather information on Department of Defense (DoD) personnel or family member for Family Support services. This information may include (but not be limited to) request date, type of information being requested (e.g., presented problem, benefit, medical, contact and personal), feedback regarding provided services, and Family Support program information (e.g., recommendations, referrals and enrollment information).	
Family Support Information Response	ICOM Arrow	This includes information related to a response to an information request to gather information on Department of Defense (DoD) personnel or family member for Family Support services. This information may include (but not be limited to) personal information, contact information, medical information, benefit information, needs assessment information, and feedback regarding services provided.	
Family Support Needs Assessment Information	ICOM Arrow	This includes information regarding the support needs of Department of Defense (DoD) personnel and families requesting assistance. This information will serve to inform the personnel and families about the support recommendations and referrals. This information may include (but not be limited to) case number, assessment of problem presented, primary services recommended (e.g., personal counseling, relocation counseling, family counseling, family advocacy), referrals (e.g., legal, chaplain, housing, child care center), and any other recommendations (e.g., books, pamphlets, classes).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Family Support Needs Assessment Information Update	ICOM Arrow	This includes updating the information for any additional family support needs identified (e.g., medical, legal, housing, travel, etc.) after evaluating initially requested Family Support needs. This information may include (but not be limited to) evaluation date, indication of whether goals are being met, feedback information regarding provided services, needs assessment information, resolution of issues associated with particular needs, and identification of Department of Defense (DoD) personnel or family members who need additional services or no longer require Family Support services.	
Family Support Program Usage Notification	ICOM Arrow	This includes a notification of usage (e.g., registration, enrollment or disenrollment) for a Family Support program or service. This information may include (but not be limited to) case number, name, program/service information, and any comments concerning registration, enrollment or disenrollment.	
Family Support Service Evaluation Information	ICOM Arrow	This includes information regarding the evaluation of a Family Support needs assessment. This information may include (but not be limited to) evaluation date, indication of whether goals are being met, feedback information regarding provided services, needs assessment information, resolution of issues associated with particular needs, and identification of Department of Defense (DoD) personnel or family members who need additional services or no longer require Family Support services.	
Family Support Service Ineligibility Notification	ICOM Arrow	This includes a notification of ineligibility for family support services. This may include (but not be limited to) personal information about the requester (e.g., name, date of request, reason for ineligibility).	
Family Support Service Request	ICOM Arrow	This includes information related to a request for Family Support program services. This may include (but not be limited to) personal information about requester and requester family members (e.g., name, marital status, contact information, education, age, employer/assignment information) request date, type of case (i.e., individual, couple, family), source of referral (e.g., self, legal, command, medical) and problem presented.	
Federal Bureau of Investigation Deserter Information	ICOM Arrow	This includes information in the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) database. The NCIC is a computerized index of criminal justice information (e.g., criminal record history information, fugitives, stolen properties, missing persons) that is available to Federal, state, local law enforcement and other criminal justice agencies. The information in this database includes identification details of a person (e.g., name, sex, race, date of birth, Social Security Number, and driver's license number).	
Federal Bureau of Investigation Deserter Update Information	ICOM Arrow	This includes an update to information in the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) database. The NCIC is a computerized index of criminal justice information (e.g., criminal record history information, fugitives, stolen properties, missing persons) that is available to Federal, state, local law enforcement and other criminal justice agencies. The information in this database includes identification details of a person (e.g., name, sex, race, date of birth, Social Security Number, and driver's license number).	
Federal Information to DoD	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Presidents Management Agenda, Debt Adjudication Decision, Inspection Request, Final Government Export License Decision, Foreign Military Sales Expenditure Authority Response, Intent To Vacate Notification, Non DoD or Operational Threat Assessment Information, and Request for DoD Technology Export.	
Federal Performance information	ICOM Arrow	Stakeholder, supplier, internal/external vendor feedback, fulfillment execution information, and contract execution information (e.g. <a href="http://www.ppirs.gov">www.ppirs.gov</a> ).	
Final Foreign Military Sales Trust Fund Bill	ICOM Arrow	Upon closing of the Case implemented in Foreign Military Sales Trust Fund, DoD sends the Final Case Bill to the purchaser.	
Final Government Export License Decision	ICOM Arrow	Notification of final determination of the Federal government's position regarding export application for DoD technology.	
Final Human Resources Management Policy and Guidance	ICOM Arrow	This includes a final Human Resources Management (HRM) policy and guidance document which has been fully approved and is disseminated to the appropriate parties. Final HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, policy change summary description, and approval authority signature.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Final Performance Evaluation	ICOM Arrow	This includes official documentation of the individual's performance evaluation. This is the updated Performance Evaluation Shell that was provided at the beginning of the process that includes the individual's administrative information (e.g., name, social security number (SSN), rank), ranking criteria, and comment section.	
Financial Execution Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Collection Information, Disbursing Information, Notification of Collection, and Financial Position.	
Financial Institution Input Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Commercial Banking Change Information, Debit Voucher Information, Deposit Information, and Replacement Financial Instrument Request.	
Financial Management	ICOM Arrow	1. Provide accurate and reliable financial information in support of the Planning, Programming, Budgeting, and Execution (PPBE) process to ensure adequate financial, resources for warfighter mission requirements. 2. Provide (a) the conduct, output, and performance of warfighter operations and missions both in total and varying levels of organizational, operational, and resource detail; and (b) ongoing, completed, or projected programs in support of warfighter requirements.	
Financial Management Communication to DoD Executives	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Notification of Requirement Status, Additional Information Request, Request for Narrative and Footnote Information, Notification to Comptroller of New Requirement, and Developed Proposal.	
Financial Management Policy Request	ICOM Arrow	A request to evaluate the impact of a change in financial management law, guidance, or policy on DoD specific financial management policy, the chart of general ledger accounts, or the Standard Financial Information Structure.	
Financial Position	ICOM Arrow	Status of a firm's assets, liabilities, and equity accounts as of a certain time, as shown in its trial balance or financial statement.	
Financial Statement Narrative Information	ICOM Arrow	This is the information used to build the post closing narrative. This information is derived from accumulated cost data, data used to build the working trial balance, mapped financial data, and mapped non-financial data. This is the result of having compiled management's narrative information input into a formal Financial Statement narrative product.	
Financial Transaction Report	ICOM Arrow	The Financial Statement Data shall include, financial results, narrative and or footnote information, value added analysis in order to provide management with a final assessment of the financial condition of the Department of Defense.	
Fiscal Guidance	ICOM Arrow	Annual guidance consistent with Strategic Planning Guidance (SPG). Provides fiscal constraints that must be observed by DoD Components in the formulation of force structures and by the Office of the Secretary of Defense (OSD) and joint staff in reviewing proposed programs.	
Focus Area	ICOM Arrow	Focus Areas to analyze, evaluate, and provide alternative plans, programs, and budgets for DoD's objectives, projected threats, allied contributions, estimated costs, and resource constraints. This information is also used for synthesizing strategic documents and prioritizing programming.	
Footnote Information	ICOM Arrow	Detailed information used to build the financial statement narrative and supporting footnotes. This information is derived from accumulated cost and performance information.	
Force and Simulation Modeling Information	ICOM Arrow	Force and Simulation Modeling Information is used to represent a mission in order to provide guidance on the numbers and kinds of manpower requirements/personnel needed to perform a group of specific functions.	
Force List	ICOM Arrow	This includes a deployment equipment list or a unit deployment list or similar list; or a list of forces required by an operations plan, including assigned forces, augmentation forces, and other forces to be employed in support of the plan.	
Force Structure	ICOM Arrow	This includes position information depicted within the organizational structure and related subdivisions of the Total Force.	
Force Structure Planning Objective	ICOM Arrow	This includes projections of strength ceilings, projected military, civilian and contractor force components and occupational skill sets.	
Force Structure Update Information	ICOM Arrow	This includes the updated position information depicted within the organizational structure, and related subdivisions of the Total Force.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Foreign Currency Conversion	ICOM Arrow	Disbursing officer reports the amount of currency available for conversion to foreign currency or to US currency.	
Foreign Military Sales Trust Fund Expenditure Authority Request	ICOM Arrow	This is a request for expenditure authority associated with a payment which cites a case implemented in the Foreign Military Sales Trust Fund. No payments citing a case implemented in the Foreign Military Sales Trust Fund will be released for disbursement processing prior to receipt of expenditure authority.	
Foreign Military Sales Trust Fund Expenditure Authority Response	ICOM Arrow	This is a response regarding a submitted request for permission to disburse payments against a line on a case implemented in the Foreign Military Sales Trust Fund. Responses include approved, denied, and in-process.	
FoS Benefits Management	ICOM Arrow	The Benefits Management Family of Systems comprises systems that support management of specified benefit programs (e.g., Federal Employee Health Benefit Plan, life, long-term care and unemployment insurance programs) for persons within Department of Defense oversight to include eligibility determination, counseling, and enrollment. This includes medical, dental, life and long-term insurance; pension/retirement; flexible spending; disability benefits; human resources entitlements; benefits eligibility, including management of housing and educational benefits, enrollment and termination; savings management (Thrift/Bonds); and benefits reporting.	
FoS Chemical Management	ICOM Arrow	The mechanism for the family of systems (FoS) Chemical Management engaged in consuming product hazard data (PHD) for use in the management of hazardous materials.	
FoS Energy	ICOM Arrow	The combination of Component energy systems that enable the EEIM capability through management of energy consumption, energy conservation, and renewable energy production and purchase information.	
FoS Force Management	ICOM Arrow	The Force Management Family of Systems comprises systems that support the Force Manager roles, which are involved with total force management, including the development, analysis and implementation of position plans, management of strength levels against those plans, and acceptance of individuals into the Department of Defense to ensure the efficient and effective support of wartime and peacetime operations, contingency planning, and preparedness. In addition, the Force Management Family of Systems supports all activities associated integrating workforce analysis results into force structure requirements and personnel functions such as Stop Loss. This Family of Systems enables proper utilization of Department of Defense human resources through structuring organizations, validating organizations against budgetary constraints, establishing and allocating positions, and managing programs required to support these strategic goals.	
FoS Geospatial Information and Services	ICOM Arrow	Systems that are sanctioned by the DoD Component IGI&S programs. Examples include: Army Mapper, GeoFidelis web viewer, GeoBase, GeoReach, etc.	
FoS HR Decision Support Management	ICOM Arrow	The Human Resources Decision Support Management Family of Systems comprises systems that analyze human resources information and other permanent records from multiple sources. The related automated workforce analysis models and report generation capabilities are needed to support the information requirements of policy formulation and decision support within DoD and other federal government applications. The Readiness Assessment applications, as well as the numerous service Recruiting and Promotion forecasting models, are examples of how systems within this family can provide the information needed to support senior leadership decisions.	
FoS HR Organizational Infrastructure Support Management	ICOM Arrow	The Human Resources Organizational Infrastructure Support Management Family of Systems comprises systems that support oversight of the enterprise human resources organizational infrastructure necessary to sustain DoD mandated responsibilities for safety and accident-reduction activities as well as human resources communications, labor relations and equal opportunity programs.	
FoS Law Enforcement Management	ICOM Arrow	The Law Enforcement Management Family of Systems comprises systems that support the Law Enforcement Professional roles, which are involved with the protection of people, places, and things from criminal activity resulting from non-compliance with U.S. laws.  In addition, the Law Enforcement Management Family of Systems supports all activities associated with law enforcement patrols, undercover operations, responses to emergency calls, as well as arrests, raids, and seizures of property.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Legal Services Management	ICOM Arrow	The Legal Services Management Family of Systems comprises systems that support the Legal Services Professional roles, which are involved with resolution facilitation, the administration of adverse actions (judicial and non-judicial), and analysis of the legal aspects of other actions.	
FoS Personnel and Pay Management	ICOM Arrow	The Personnel and Pay Management Family of Systems comprises systems that support the Human Resources Specialist roles, which are involved with a Member's entry to/exit from the organization; Human Resources profile and record management; career development and management; execution of human resources policies and procedures; and pay administration, authorization and calculation. In addition, the Integrated Personnel and Pay Management Family of Systems supports all activities associated with, recruiting, accessions, civilian personnel acquisitions, individual assignment and transfer, force distribution execution, budget justification, resource utilization projections, discipline, time and attendance tracking, casualty assistance, human resources general reporting, occupational classification, education, training, competency management, disability evaluation, retirement/separation management, recognition, performance review and administration (including the promotion process), pay administration and policy, leave calculation, annuitant and retirement pay, special pay and entitlement, pay authorization and calculation, pay adjustment, allotments, bonds, garnishments and offsets, Thrift Saving Plan calculation, payroll and tax reporting, compensation, travel pay and other reimbursables.	
FoS Quality of Life/MWR Management	ICOM Arrow	The Quality of Life/MWR Management Family of Systems comprises systems that supports the Family Support Manager roles, which are involved with maintaining or improving people's quality of life and individual dignity/rights, providing family support, counseling services, financial planning, off installation housing general information, child care, military spouse employment and career opportunities, dependents' education, schools, children's educational transitions, commissary and military exchange systems, support for victims of domestic violence, support during the deployment cycle, recreational opportunities, and tuition assistance.	
Full Time Support Manpower Report	ICOM Arrow	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain Reserve position information to include the corresponding funding information.	
Funded Position Identification	ICOM Arrow	This includes an extraction of selected detailed force structure attributes that identifies which billets (e.g., slots) can have human resources assignments within available budget allocations.	
Funding Authority	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Apportionment, Deferred Amount, and Rescinded Amount.	
Funds Availability Request	ICOM Arrow	This is a request for Notification of Funds Availability.	
Funds Distribution Reporting Information	ICOM Arrow	Information generated during the funds distribution process for reporting (both internal and external). Examples of the types of information that may be created are: ODS Dashboard data, DD 1002 Funds Distribution Data, SF 133 Funds Distribution Data and Summary Distribution Data.	
Future Years Defense Program	ICOM Arrow	The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a 6-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.	
Gain or Loss on Sale of Investment	ICOM Arrow	Upon the sale of an investment, the gain or loss data is posted to the general ledger as other revenues and expenses.	
General Ledger Account Balance	ICOM Arrow	The balance or dollar amount associated with a general ledger account. This could be a positive or negative balance and could represent beginning of year, current point in time, or end of year.	
General Ledger Detail Transaction Report	ICOM Arrow	The General Ledger Detail Transaction Report provides general ledger account information and balances to support the review and research of all activities relative to a specific USSGL account including general ledger account reconciliation, analysis, and reporting.	
General Program Level Information	ICOM Arrow	This is the information regarding a defined acquisition effort funded by appropriations with the express objective of providing a new or improved capability in response to a stated mission need or deficiency. This includes Program Manager narrative comments regarding the program and may include discussions of current estimates, program management documentation and other information.	

AV-2 Integrated Dictionary (BEA 11.1)

Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information and the tool that creates the visualized products. This is a Parent ICOM. Children are: (1) ESOH Assessment Geo-enabled Visualized Information (2) ESOH Solution Development Geo-enabled Visualized Information (3) ESOH Solution Implementation Geo-enabled Visualized Information (4) ESOH Identification Geo-enabled Visualized Information (5) Real Property Installation Geo-enabled Visualized Information (6) Real Property Build and Maintenance Geo-enabled Visualized Information (7) Real Property Asset Geo-enabled Visualized Information	
Geographic Requirement	ICOM Arrow	Geographic requirements identify the requirements needed for a specific geographic location. This includes the number of positions and equipment that can be accommodated in a location or needed in a location. This list is updated quarterly but submitted yearly to the Office of Management and Budget (OMB).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Geospatial Analysis Requirements	ICOM Arrow	<p>This is a request for geospatial analysis of information that describes the spatial relationships between real world phenomena, expressed as geospatial features or other data used to satisfy a mission requirement.</p> <p>This is a Parent ICOM.</p> <p>Children are:</p> <ul style="list-style-type: none"> <li>(1) ESOH Identification Geospatial Analysis Requirements</li> <li>(2) ESOH Assessment Geospatial Analysis Requirements</li> <li>(3) ESOH Solution Development Geospatial Analysis Requirements</li> <li>(4) ESOH Solution Implementation Geospatial Analysis Requirements</li> <li>(5) Real Property Installation Geospatial Analysis Requirements</li> <li>(6) Real Property Build and Maintenance Geospatial Analysis Requirements</li> <li>(7) Real Property Asset Geospatial Analysis Requirements</li> </ul>	
Geospatial Analysis Results	ICOM Arrow	<p>This is a set of information that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards, responding to a specific set of requirements.</p> <p>This is a Parent ICOM.</p> <p>Children are:</p> <ul style="list-style-type: none"> <li>(1) ESOH Identification Geospatial Analysis Results</li> <li>(2) ESOH Assessment Geospatial Analysis Results</li> <li>(3) ESOH Solution Development Geospatial Analysis Results</li> <li>(4) ESOH Solution Implementation Geospatial Analysis Results</li> <li>(5) Real Property Installation Geospatial Analysis Results</li> <li>(6) Real Property Build and Maintenance Geospatial Analysis Results</li> <li>(7) Real Property Asset Geospatial Analysis Results</li> </ul>	
Geospatial Data Package	ICOM Arrow	<p>Packaged Geospatial Information, organized according to DoD I&amp;E geospatial standards, that is used on its own or in conjunction with other geospatial activities.</p> <p>This is a Parent ICOM.</p> <p>Children are:</p> <ul style="list-style-type: none"> <li>(1) ESOH Identification Geospatial Data Package</li> <li>(2) ESOH Assessment Geospatial Data Package</li> <li>(3) ESOH Solution Development Geospatial Data Package</li> <li>(4) ESOH Solution Implementation Geospatial Data Package</li> <li>(5) Real Property Installation Geospatial Data Package</li> <li>(6) Real Property Build and Maintenance Geospatial Data Package</li> <li>(7) Real Property Asset Geospatial Data Package.</li> </ul>	
Geospatial Features	ICOM Arrow	<p>Created geospatial information that requires review against a family of geospatial standards, guidance documents and received requirements.</p>	
Geospatial Information Request	ICOM Arrow	<p>This is a request for existing geospatial information of sufficient accuracy and quality, necessary for identifying the location of real world phenomena (e.g. an ESOH aspect, a real property asset).</p> <p>This is a Parent ICOM.</p> <p>Children are:</p> <ul style="list-style-type: none"> <li>(1) ESOH Identification Geospatial Information Request</li> <li>(2) ESOH Assessment Geospatial Information Request</li> <li>(3) ESOH Solution Development Geospatial Information Request</li> <li>(4) ESOH Solution Implementation Geospatial Information Request</li> <li>(5) Real Property Installation Geospatial Information Request</li> <li>(6) Real Property Build and Maintenance Geospatial Information Request</li> <li>(7) Real Property Asset Geospatial Information Request.</li> </ul>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating new geospatial information content (e.g. geometry, attribution, accuracy, precision and quality). This is a Parent ICOM. Children are: (1) ESOH Assessment Geospatial Information Requirements (2) ESOH Solution Development Geospatial Information Requirements (3) Real Property Installation Geospatial Information Requirements (4) Real Property Build and Maintenance Geospatial Information Requirements (5) Real Property Asset Geospatial Information Requirements	
Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during another activity or for publication. This is a Parent ICOM. Children are: (1) ESOH Identification Geospatial Product Request (2) ESOH Assessment Geospatial Product Request (3) ESOH Solution Development Geospatial Product Request (4) ESOH Solution Implementation Geospatial Product Request (5) Real Property Installation Geospatial Product Request (6) Real Property Build and Maintenance Geospatial Product Request (7) Real Property Asset Geospatial Product Request.	
Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements, e.g., data currency, data accuracy, data quality. This is a Parent ICOM. Children are: (1) ESOH Identification Geospatial Update Request (2) ESOH Assessment Geospatial Update Request (3) ESOH Solution Development Geospatial Update Request (4) ESOH Solution Implementation Geospatial Update Request (5) Real Property Installation Geospatial Update Request (6) Real Property Build and Maintenance Geospatial Update Request (7) Real Property Asset Update Geospatial Request.	
Goods and Services Acknowledgement	ICOM Arrow	The confirmation by receiver that goods were tendered or services were provided. Acknowledgement includes quantifiable delivery information on time, quantity, date of delivery or performance and completeness of Procurement Instrument or Intragovernmental Order deliverables at the line item level. This information may be adequate to document a receivable transaction.	
Government Furnished Materiel Request	ICOM Arrow	This is a request for equipment in the possession of, or directly acquired by, the Government.	
Grant Pro Forma Entries	ICOM Arrow	The debit and credit affects of pro forma entries to proprietary, budgetary, or memorandum general ledger accounts resulting from business events related to the award, performance, payment and closeout of a grant.	
Hazardous Process Description	ICOM Arrow	A mission activity that potentially poses hazards described to the level of granularity necessary to define effective ESOH controls. This parent ICOM represents a combination of the information provided by the following children ICOM: Installation Support Hazardous Process Description, Disposal Hazardous Process Description and Asset Hazardous Process Description, Human Resources Hazardous Process Description.	
Hazardous Process Description from External	ICOM Arrow	Information that identifies potential hazardous processes in a warfighting mission activity described to the level of granularity necessary to define effective ESOH controls.	
Healthcare Referral Information	ICOM Arrow	The specific healthcare information necessary to refer beneficiaries to the appropriate services, level of care and location. This information is subject to and contingent upon confidentiality restrictions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Healthcare Services Support Request	ICOM Arrow	This includes information related to a healthcare services support request (e.g. in relation to providing Family Support Services, Recovery Coordination Program services, assessments and evaluations for an individual or group of people, etc.). The reasons for this request may include (but not be limited to) healthcare support for a recovering service member (RSM) or a victim of abuse. The request is made to the Department of Defense (DoD) healthcare entity and may include (but not be limited to) information such as the requestor name, request date and explanation of the request.	
Healthcare Services Support Response	ICOM Arrow	This includes information related to a healthcare services support request (e.g. acknowledgement that a request has been received, confirmation a health services support request was completed, etc.). The response from Department of Defense's (DoD) healthcare entity may also include (but not be limited to) information such as the responder's name, response date and status (e.g., completed, received, referred, etc).	
Historical Cost Information	ICOM Arrow	Previously accumulated cost information associated with a specific cost object. For example, this might represent cost information associated with a program, project, activity, asset, or environmental liability. This information is used to support forecasting and other financial analysis.	
Historical Return Rate Information	ICOM Arrow	Information accumulated based upon the return history that is analogous to a present situation, such as the return history on a similar product, and using the past pattern to predict future returns.	
HMEII	ICOM Arrow	The objective of the Hazardous Materials Enterprise Information Integration (HMEII) initiative is to develop and implement an end-to-end, systematic management process for hazardous materials operations in DoD. The "To Be" process will reduce risks and improve accuracy and availability of authoritative hazard data in conjunction with the Material Visibility DoD Data Master initiative. The HMEII initiative is expected to eliminate redundant data purchases and entry across DoD, by influencing appropriate acquisition, logistics, human resources and financial management business processes. As such, this capability provides controls on the Materiel Visibility, Acquisition Visibility, Personnel Visibility, Common Supplier Engagement and Real Property Accountability processes.	
HMIRS	ICOM Arrow	HMIRS is a DoD automated system developed and maintained by the DLA to satisfy DoDI 6050.5 by storing Material Safety Data Sheets (MSDS) and other related data for hazardous material procured by the Department of Defense (DoD), the General Services Administration (GSA), and other Federal Agencies. HMIRS was the DoD system designated by OSD as the solution for one location to store the MSDSs for DoD, making it the authoritative source. The MSDS data is available on the world wide web and via compact disk (CD). HMIRS is the central repository for Material Safety Data Sheets (MSDS) and value added information including HAZCOM warning labels and transportation information on the four major modes of transport for hazardous materials purchased by the Federal Government, Department of Defense (DoD) and Civil Agencies. MSDS data is usually available at the time of material acquisition through DoD focal points, who scan the MSDS into HMIRS then review and place the transportation, labeling, environmental, and disposal information into the system. MSDS information includes chemical constituency and hazard communications information needed to comply with the Occupational Safety and Health Administration (OSHA), and with regulations promulgated by the Environmental Protection Agency (EPA) and the Department of Transportation (DOT) regulatory guidance. The MSDS data is currently rekeyed into like fields to allow for ease of data sharing with other systems. Future XML enhancements for companies providing MSDS in XML format will automate this process.	
House Appropriation Committee Report	ICOM Arrow	Jurisdiction of the Committee on Appropriations Rule X of the Rules of the House vests in the Committee on Appropriations broad responsibility over the Federal budget. Specifically the Rule defines the Committee's jurisdiction, as follows: "Rule X clause (b). Committee on Appropriations. (1) Appropriation of the revenue for the support of the Government. (2) Rescissions of appropriations contained in appropriations Acts. (3) Transfers of unexpected balances. (4) Bills and joint resolutions reported by other committees that provide new entitlement authority as defined in section 3(9) of the Congressional Budget Act of 1974.	
Housing Entitlement Notification	ICOM Arrow	This is a person's validated requirement for DoD housing with mission impact information to be utilized in priority determinations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Human Resources Debt Disposition	ICOM Arrow	This is an overall flow of debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Human Resources Disposition Information	ICOM Arrow	This includes captured personal Human Resources Information (i.e., Human Resources Profile and Human Resources Record) no longer needed for current DoD business. This information may include (but not be limited to) disposition date, disposition actions, disposition status, and retention period.	
Human Resources ESOH Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Research Information, and Workforce Occupational Safety Issue Communication.	
Human Resources Financial Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Request for Administrative Offset, Certified Human Resources Management Pay Information, Separated or Terminated or Transferred Individual Debt Information, Obligation Request, and Sales Reimbursement Information.	
Human Resources Hazardous Process Description	ICOM Arrow	A description of a potential hazardous process, related to human resources, described to the level of granularity necessary to define effective ESOH controls.	
Human Resources Information	ICOM Arrow	This is an extraction of selected data related to a human resources application and human resources profile request.	
Human Resources Information Request	ICOM Arrow	This includes a request from components external to Human Resources Management to extract selected data related to a human resources application and human resources information. This information may include (but not be limited to) requestor's name, request date, and requested human resources information.	
Human Resources Information Response	ICOM Arrow	This includes an extraction of selected data related to an authorized use of Human Resources Information.	
Human Resources Management	ICOM Arrow	The Human Resources Management (HRM) Core Business Mission (CBM) has the responsibility for key initiatives that directly impact and improve personnel management and readiness throughout the Department of Defense. The HRM CBM's goal is to improve and transform business practices and information systems to better support the military Service members, civilian employees, military retirees, contractors (in theater), other U.S. personnel, the warfighter, and others with an agile joint total force in support of DoD Human Capital Strategy. HRM is the fusion of accurate human resources information, with respect to numbers, competencies (occupations, skills, education, and training), reception accounting, individual readiness, patient accountability and status reporting, person's unit and location, and assigned duty within organizations. This includes ensuring timely and accurate access to compensation, pay, benefits, and human resources entitlements for DoD personnel and their families and ensuring that Combatant Commanders have access to the timely and accurate data on personnel and their skill sets. Supporting warfighters with the right mix of people with the right skills, in the appropriate quantity, at the right place and time, will significantly increase the opportunity for mission success.	
Human Resources Management Policy Analyst	ICOM Arrow	This includes personnel who perform activities associated with the analysis and formulation of Human Resources Management (HRM) policy and guidance. These activities include developing policy and guidance and coordinating the approval and implementation of Human Resources Management (HRM) policy and guidance.	
Human Resources Management Policy and Guidance Request	ICOM Arrow	This includes a request to develop a new policy or modify an existing one or a response to an inquiry. This information may include (but not be limited to) request date, requestor name and organization, policy name, request description and inquiry response.	
Human Resources Management Policy and Guidance Request Inquiry	ICOM Arrow	This includes a request for additional information or clarification concerning the request received for development or modification of policy and guidance. This information may include (but not be limited to) request date, requestor name, policy name, request description, inquirer name and organization, and inquiry description.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Human Resources Management Policy and Guidance Review	ICOM Arrow	This includes a review of the proposed Human Resources Management policy and guidance from appropriate parties. This also includes comments and/or recommendations from workforce communications (e.g., publishers of the policy and guidance) as the final reviewer. This information may include (but not be limited to) policy date, policy name, policy description, appropriate parties signatures, review date, reviewer name and organization, and review description.	
Human Resources Management Policy Approval Authority	ICOM Arrow	This includes personnel who perform activities associated with the approval or disapproval of Human Resources Management (HRM) policy and guidance.	
Human Resources Personal Information Change Request	ICOM Arrow	This includes information that is needed to request a change to personal information found in the Human Resources Profile. The information may include (but not be limited to) specific information that has only the person as a source and can only be subjected to very general edits (e.g., local address, email address, local phone number, allotment start / modification, savings bond start / modification, casualty notification information update, documentation that an individual is a military dependent for the purpose of receiving military medical care) needed to support DoD missions.	
Human Resources Profile Information	ICOM Arrow	This includes captured personal, professional, and pay information related to the processes of administering manpower and staffing, human resources, personnel development, benefits, medical services, and pay. The Human Resources Profile is for Human Resources Management (HRM) internal use only. This information is subject to and contingent upon confidentiality restrictions.	
Human Resources Profile Update Information	ICOM Arrow	This includes updated personal, professional, and pay information related to the processes of administering manpower and staffing, human resources, personnel development, benefits, medical services, and pay. This information is subject to and contingent upon confidentiality restrictions.	
Human Resources Record Information	ICOM Arrow	This includes information pertaining to the "Record of Military Processing" (DD Form 1966/1), the member's enlistment/reenlistment document (DD Form 4), training documentation, education documentation, performance, discipline related information, decorations and awards, assignments and duties, casualty documentation, separation/retirement related information, compensation, physical condition, entry and separation physical examinations, biometrics, personal documents and non-service related documents (if deemed necessary and appropriate by the military Service). This may also include additional service-specific information.	
Identification Budget Request	ICOM Arrow	This is a request for appropriation funding to perform ESOH aspect identification that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Identify and Reserve Supply Chain Resources Law Policy Reg	ICOM Arrow	Identify and Reserve Supply Chain Resources is constrained by the following: DoDD 4500.09E, DoDD 4500.43, DoDD 4510.11, DoDD 5158.04, DoDI 3110.06, DoDI 4500.34, DoDI 4500.53, DLM 4000.25, DoD FMR Vol 04, DoD 4140.1-R, DoD 4500.9-R, DoD 4515.13-R.	
Identify Available Education Resources Law Policy Reg	ICOM Arrow	Identify Available Education Resources is constrained by the following: Public Law 103-356, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, EO 13434, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, DoDI 1215.06, DoDI 1215.08, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1322.10, DoDI 1322.26, DoDI 1332.38, DoDI 2000.16, DoDI 4500.53, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270

Identify Promotion Candidates Law Policy Reg	ICOM Arrow	Identify Promotion Candidates is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Identify Property and Materiel for Return or Disposal Law Policy Reg	ICOM Arrow	Identify Property and Materiel for Return or Disposal is constrained by the following: USC Title 32, USC Title 40, USC Title 42, USC Title 50, CFR Title 48, SFFAS 1, SFFAS 6, SFFAS 7, SFFAS 10, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-4, JFMIP SR-03-02, DoDD 4151.18, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDD 8500.01E, DoDI 3000.04, DoDI 3110.06, DoDI 4151.19, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-6-M, DoD 4000.25-8-M, DLM 4000.25-4, DoD 4100.39-M, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4160.21-M, DoD 4160.28-M Vol 1, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02B, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, DoD 4500.9-R, DoD 5200.08-R, DFARS.	
IGT/IVAN	ICOM Arrow	The Intragovernmental Transactions (IGT) initiative addresses one of the DoD's material weaknesses (financial eliminations) by way of standardized, consolidated, and integrated processes and system components, as well as provides significantly enhanced visibility into both the buying and selling elements of intragovernmental transactions both within the DoD and across the Federal Government. IVAN (Intragovernmental Value-Added Network) is the proof of concept solution validating the IGT initiative.	
Impact Statement	ICOM Arrow	Impact statement details the information of what the potential impact to the current resources due to the proposed cancellation of budget authority.	
Implement Case in Foreign Military Sales Trust Fund Law Policy Reg	ICOM Arrow	Implement Case in Foreign Military Sales Trust Fund is constrained by the following: USC Title 22, USC Title 31, DoD 5105.38-M, DoD FMR Vol 02B, DoD FMR Vol 11A, DoD FMR Vol 15.	
Implement ESOH Solution Law Policy Reg	ICOM Arrow	Implement ESOH Solution is constrained by the following: USC Title 33, USC Title 40, USC Title 42, CFR Title 40, Executive Order 13045, Executive Order 13148, FFAA Tech Release 2, OMB Memo 04-04, OMB Memo 06-19, DoDD 4715.1E, DoDD 6055.9E, DoDD 8500.01E, DoDI 2000.18, DoDI 4140.62, DoDI 4145.26, DoDI 5000.02, DoDI 5000.61, DoDI 6050.05, DoDI 6055.1, DoDI 6055.04, DoDI 6055.05, DoDI 6055.06, DoDI 6055.07, DoDI 6055.08, DoDI 6055.11, DoDI 6055.12, DoDI 6055.15, DoDI 6055.16, DoDI 6055.17, DoDI 6490.03, DoDI 8500.2, DoDI 8510.01, DoD 4145.26-M, DoD 6055.05-M, DoD 6055.06-M, DoD 6055.09-M, DoD FMR Vol 04, MIL-STD-882D, MIL-STD-1472F, MIL-STD-1474D.	
Implement Solution Budget Request	ICOM Arrow	This is a request for appropriation funding to implement an ESOH solution that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Implementation Cost Information	ICOM Arrow	Details about the estimated work that will be performed during implementation of an ESOH solution. This information is used in the calculation of a cost estimate and is updated on a periodic basis to reflect changes in the cost of an work to be completed.	
Implemented Case in Foreign Military Sales Trust Fund	ICOM Arrow	The information necessary to establish the initial budget authority and funds control to implement the case in the Foreign Military Sales Trust Fund.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Implemented Case Line Budget Authority in Foreign Military Sales Trust Fund	ICOM Arrow	The Foreign Military Sales Trust Fund budget authority released to the Implementing Agency for execution of the case implemented in the Foreign Military Sales Trust Fund. This records the actual distribution of budget authority to the Implementing Agency at case line level.	
Incident Notification	ICOM Arrow	This includes information (e.g. documents, phone calls, messages) about a death, missing status, injury, or illness incurred by a member or employee. The information may include (but not be limited to) incident date and time, place of incident, others involved, and details of the incident.	
Incorporate Program Decisions Law Policy Reg	ICOM Arrow	Incorporate Program Decisions is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Indebtedness Due Process Notification	ICOM Arrow	This includes information associated with a notification that alerts a member that there has been a government indebtedness initiated against their pay and providing them with their rights in regard to the collection action. This may include (but not be limited to) effective date of the indebtedness, reason for the indebtedness, period of indebtedness, total amount of the indebtedness, and request for a members desired repayment schedule. This notification will be the basis for a receivable being created by Financial Visibility.	
Individual Allotment Information	ICOM Arrow	This includes information associated with establishing, changing or stopping an allotment of pay. This information may include (but not be limited to) allotment type, allotment amount, allotment effective date, and allotment recipient.	
Individual Assignment Response	ICOM Arrow	This includes a response to an approved assignment action. The information may include (but not be limited to) an acceptance or declination of an assignment, response date, and response status.	
Individual Credential Request	ICOM Arrow	This includes information associated with personnel submitting a request for the verification and capture of a person's specific credential. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor and individual personal information (e.g., name, ID number, organization), credential version identification (e.g., Washington D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian-acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified Department of Defense (DoD) competency testing, credential mediums such as paper or electronic, credential expiration or renewal date, and the requested effective date for the credential's capture.	
Individual Debt Information	ICOM Arrow	Individual debt information includes information required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from the Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid.	
Individual Enlistment Extension Response	ICOM Arrow	This includes any reversal of intentions by the Member. The Member may, up until the enlistment extension contract is signed, choose not to extend. The information may include (but not be limited to) Member's decision to extend, extension status, and decision date.	
Individual Human Resources Information	ICOM Arrow	This includes information used as an input into Human Resources Management activities from a person. This may include (but not be limited to) travel voucher information, family member information update, and individual development information.	
Individual Indebtedness Acknowledgement	ICOM Arrow	This includes information associated with an acknowledgement of the indebtedness with a requested repayment amount or schedule.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Individual Information to DoD	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Enlistment Extension Appeal, Individual Human Resource Information, Performance Report Appeal Request, Performance Report Shell, and Personnel Award Reclama.	
Individual In-Service Indebtedness Information	ICOM Arrow	This includes information associated with an individual in-service indebtedness. It includes information required to support a collection action against an employee/Member's pay. The type of indebtedness that are a source for action include, but are not limited to, damage to government property, over weight shipment of household goods. The information included in the indebtedness source documents may include (but not be limited to) the payee or originator of the collection action, dollar amount to be collected, period of indebtedness, and reason for indebtedness.	
Individual In-Service Indebtedness Notification	ICOM Arrow	This includes information associated with the facts supporting a collection action that has been initiated against an employee/Member's pay based on a substantiated indebtedness action. This notification may include (but not be limited to) the type of indebtedness initiated, reason for the indebtedness, period of indebtedness, the total amount of indebtedness, and a request for an indebtedness repayment schedule.	
Individual Promotion Response	ICOM Arrow	This includes the Member's acceptance or declination of a promotion. This may include (but not limited to) acceptance or declination date.	
Individual Reenlistment Response	ICOM Arrow	This includes any reversal of intentions by the Member. The Member may, up until the reenlistment contract is signed, choose not to reenlist. The information may include (but not be limited to) Member's decision to reenlist, reenlistment status, and decision date.	
Individual Reimbursement Request	ICOM Arrow	This includes information associated with a reimbursement request for an expense incurred by an employee/Member while performing official duty or for an expense that the government has agreed to reimburse. The types of reimbursements can include those associated with official government travel, adoption expenses, clothing items generally issued but currently unavailable for issue, student loans. This information may include (but not be limited to) reimbursement type, period expense was incurred, reason expense was incurred, total amount of expense incurred, itemized expenses incurred, and itemized expense amount.	
Individual Tax Levy Information	ICOM Arrow	This includes information associated with a request to start, stop, cancel or update a voluntary repayment of a tax levy. (Involuntary collections of a tax levy will be processed as a Salary Offset) This information may include Tax Levy effective date, Tax Levy total amount, Tax Levy periodic collection amount, payment recipient and payment address.	
Individual Training and Education Procurement Request	ICOM Arrow	This includes information that is a requirement which defines the need for an individual training course, education program, goods, or services. It may be an unfunded or funded requirement.	
Individual Training Catalog Information	ICOM Arrow	This repository includes information associated with all Training programs. The information may include (but not be limited to) eligibility specifications, administration, operations support, and course information needed for management of Department of Defense (DoD) formal classroom, on-the-job and correspondence training courses.	
Individual Training Course Deficiency	ICOM Arrow	This includes identified mission related problems, from the warfighter community involved with operations, potentially requiring a modification to a specific individual training course. This information may include (but not be limited to) requestor name, organization, Universal Joint Task List (UJTL) related item (e.g., Strategic Theater item), request date, deficiency information and recommendation.	
Individual Training Course Information	ICOM Arrow	This includes information associated with newly developed or modified Department of Defense (DoD) individual training courses. This information may include (but not be limited to) prerequisites, educational goals and objectives, plans, tests, course evaluation methods, and associated courseware.	
Individual Training Course Proposal	ICOM Arrow	This includes any proposal information from inside or outside Department of Defense (DoD) for the creation or modification of an individual training course. This information may include (but not be limited to) requestor name, organization, eligibility specifications, safety analysis information, course information, request date, proposal information and recommendations based on instructor and student evaluations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Individual Training Course Proposal Assessment	ICOM Arrow	This includes response to a submitted deficiency or proposal for a creation or modification of an individual training course. This information may include (but not be limited to) requestor name, organization, analysis summary, evaluation results, proposal assessment information, evaluator name, and assessment date.	
Individual Training Course Requirements Information	ICOM Arrow	This includes information associated with individual training course requirements used to create or update a Department of Defense (DoD) individual training program. This information may include (but not be limited to) new or updated individual training requirements, deficiencies, and requirement proposals used to create or update DoD individual training course curriculum to meet current or future DoD individual training needs.	
Individual Training Course Resource Requirements Information	ICOM Arrow	This includes information associated with resource requirements for Department of Defense (DoD) individual training courses. This information may include (but not be limited to) resources required to deliver the developed individual training course (e.g., funds, equipment, facilities, faculty, and other support personnel).	
Individual Training Course Resources Availability Information	ICOM Arrow	This includes information associated with the availability of Department of Defense (DoD) individual training resources for individual training courses (e.g., equipment, facilities, faculty, and other support personnel). This information may include (but not be limited to) what resources are currently available, resources on standby, and resources that may be made available in the future.	
Individual Training Course Student Enrollment Request	ICOM Arrow	This includes information associated with requesting student admission into a Department of Defense (DoD) individual training course. This information may include (but not be limited to) student application paperwork, eligibility requirements met (if necessary), and signatures authorizing individual training course request.	
Individual Transfer Response	ICOM Arrow	This includes the Member's acceptance or declination of a transfer. This may include (but not be limited to) acceptance or declination date.	
Individual Travel Authorization	ICOM Arrow	This includes the authorization for physical relocation and related funds obligation of a person in support of DoD business and/or operations. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Industry Defense Acquisition Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Contract Cost Data Report Information, Contract Funds Status Report Information, Contract Performance Report Information, Integrated Master Schedule, Software Resources Data Report Information, Program Requirement, and Program Work Breakdown Structure.	
Information Assurance	ICOM Arrow	Information Assurance (IA) is defined in DoD Directive 8500.1, "Information Assurance," dated October 24, 2002, as (measures that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. This includes providing for restoration of information systems by incorporating protection, detection, and reaction capabilities. Enterprise information assurance requirements that support a common capability-base approach for enterprise-wide information assurance services to provide timely, secure, ubiquitous end-user access to business information.	
Information Assurance Technology Self Assessment	ICOM Arrow	This is the annual documentation developed in order to satisfy the requirements of 44 U.S.C., Chapter 35 Subchapter III, Information Security: Federal Information Security Management Act of 2002 (FISMA) and other Information Assurance requirements.	
Information Assurance Technology Self Assessment Report	ICOM Arrow	This is the annual report developed to satisfy the reporting requirements of 44 U.S.C., Chapter 35 Subchapter III, Information Security: "Federal Information Security Management Act of 2002" (FISMA), Risk Assessments, and other Information Assurance reporting requirements.	
Information for Assessment	ICOM Arrow	The organized information regarding functional performance, cost effectiveness, contract instruments and interoperability for selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of conducting acquisition assessment.	
Initial Asset Valuation Information	ICOM Arrow	This is the information that establishes the initial asset recorded costs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Initial Human Resources Profile Information	ICOM Arrow	This includes the personal information that the Candidate provides when they are first accessed and any agreement requirements. This information may include (but not be limited to) personal and employment documentation, examination results information, candidate's qualification, eligibility and suitability information, and accession agreement information.	
Initial Human Resources Record Information	ICOM Arrow	This includes initial information pertaining to the member's accession information, agreement requirements, enlistment document (DD Form 4), training documentation, education documentation, compensation, physical condition, entry physical examinations, biometrics, and personal documents.	
Initial Investigation Report	ICOM Arrow	This includes the initial documentation of information related to an initial investigation.	
Initial Report of Offense	ICOM Arrow	This includes a documentation of the offense(s) committed by the accused Member. This may include (but not be limited to) police reports, performance evaluations, disciplinary actions, non-judicial punishments, court-martial information, or unauthorized absence offenses.	
Initiate Asset Valuation Law Policy Reg	ICOM Arrow	Initiate Asset Valuation is constrained by the following: NDAA 2013, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 40, USC Title 42, USC Title 43, CFR Title 48, Executive Order 12906, Executive Order 13327, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 5, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 14, SFFAS 19, SFFAS 23, FFAA Tech Release 2, GAO Title 2, OMB Circular A-11, OMB Circular A-16, OMB Circular A-21, OMB Circular A-50, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP FFMSR-8, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-99-8, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-02-02, JFMIP SR-03-01, JFMIP SR-03-02, OFFM-NO-0106, DoDD 4140.1, DoDD 4151.18, DoDD 4400.01E, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDD 8500.01E, DoDI 3000.04, DoDI 3110.06, DoDI 4165.14, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-2-M, DoD 4000.25-6-M, DoD 4000.25-8-M, DLM 4000.25-4, DoD 4100.39-M, DoD 4120.24-M, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4140.64-M, DoD 4160.21-M, DoD 4160.28-M Vol 1, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, DoD 5200.08-R, DFARS.	
In-Processing Arrival Notification	ICOM Arrow	This includes a notification that captures the notification information to reflect the details of the arrival of an individual to a new temporary or permanent duty station. This notification may include (but not be limited to) any changes made to assignment orders.	
Inspection Report for Goods and Services	ICOM Arrow	Documentation of the results of the inspection of service provided or goods received. This includes quantifiable quality performance information on procurement instruments or intragovernmental orders, at the line item level. Any discrepancies from the requirements of the procurement instrument or intragovernmental orders are fully documented.	
Inspection Request	ICOM Arrow	This is an examination of the property or building to determine condition or quality for a particular purpose.	
Inspection Results Information	ICOM Arrow	This is a record created from the real property inspection. Data included would be the original inspection specification, specific task identified, Asset ID, Work Order ID, Work Order Description, Work Order Type, Work Order Diagnosis Type, Work Order Symptom Type, and Work Order Root Cause Type.	
Installation Support Hazardous Process Description	ICOM Arrow	Information that identifies a potential hazardous process(es) in an installation support activity described to the level of granularity necessary to define effective ESOH controls.	
Instructor Course Evaluation	ICOM Arrow	This includes information associated with evaluating Department of Defense (DoD) individual training courses and education programs. This information may include (but not be limited to) details of the feedback (e.g., course is sufficient, course has deficiencies, and proposals to make the course better) given by the instructor for that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific individual training and education program.	
Integrated Architectures	ICOM Arrow	Architectures consisting of multiple views (Operational View, Systems View and Technical View) that facilitates integration and promotes interoperability across capabilities and among related architectures. See Operational View (OV), Systems View (SV), and Technical View (TV).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Integrated Master Schedule	ICOM Arrow	The Integrated Master Schedule (IMS) is an integrated schedule containing the detailed tasks necessary to ensure successful program execution, and is linked to the Integrated Master Plan. The IMS is used to verify attainability of contract objectives, to evaluate progress toward meeting program objectives, and to integrate the program schedule activities with all related components.	
Integrated Plan and Roadmap	ICOM Arrow	This is the information used to conduct capability assessments, guide systems development and define the associated investment plans as a basis for aligning resources.	
Integrated Program and Budget Information	ICOM Arrow	The information that represents the integration of program decision and data to the Program Budget Decision or other budget decisions.	
Intent To Vacate Notification	ICOM Arrow	This is a customer notice that indicated the use of space assigned will no longer be required or the terms of the contract have or are about to expire, or the space assigned no longer meets the customer's requirement.	
Interest Rate	ICOM Arrow	This is the interest rate established by the Department of Treasury as published in the Federal Register used to calculate the amount of interest needed to apply to the outstanding debt.	
Interfund Bill	ICOM Arrow	Interfund Bills are transactions that represent the payments from one fund group (either Federal or trust funds) to the other fund group.	
Intragovernmental Order Closure Information	ICOM Arrow	All information related to completion of the government supplier's final intragovernmental order closeout process including all necessary closeout details required. This also includes any adjustments to closure information.	
Intragovernmental Payment Collection	ICOM Arrow	Document containing the intra-governmental payment and payee information that is passed on to the U.S. Treasury for distribution to the payee.	
Inventory Availability Information	ICOM Arrow	This is information on those stocks or items on hand used to support production (raw materials and work in process items), supporting activities (maintenance, repairs, and operating supplies), and customer service (finished goods and spare parts).	
Investigating Officer Request	ICOM Arrow	This includes request for appointment of an investigating officer In Accordance With (IAW) installation host procedures. Request can be made to the chief of a central installation authority or to a individual installation unit commander who is next on an installation rotation schedule for appointment of an investigating officer. The information may include (but not be limited to) requestor personal information (e.g., name, official title, organization), required attributes of the investigating officer (e.g., field grade vs. company grade military officer or civilian equivalent, competencies required), narrative nature of the investigation, and required time parameters for the investigation.	
Investigation Officer	ICOM Arrow	This represents personnel who perform activities associated with conducting an investigation (e.g., Line of duty, Casualty, Adverse Actions).	
Investment Asset Record	ICOM Arrow	This is the continuous aggregation of the U.S. Treasury certificates or securities under Department of Defense accountability.	
Investment Payment Request	ICOM Arrow	This is a request for payment to the U.S. Treasury when purchasing Securities (e.g. Treasury Notes and/or Government Bonds) for investment. It normally is executed as cash management when there is a surplus and/or idle cash on hand.	
Invitational Travel Order Requirement	ICOM Arrow	This includes the request to fulfill the invitational travel order requirement in accordance with a casualty Member's family selections. The invitational travel order may be offered in (but not be limited to) casualty cases categorized as ill/injured (e.g., travel to medical treatment facility to visit casualty Member), and casualty cases categorized as death (e.g., travel to Port Mortuary to observe dignified transfer of Member remains).	
Involuntary Separation Nonconurrence	ICOM Arrow	This includes information associated with an official determination that the request for involuntary separation is invalid, inaccurate, or otherwise has been erroneously submitted. This may include (but not be limited to) the areas of the request that were invalid and the date of nonconurrence.	
Involuntary Separation Notification	ICOM Arrow	This includes information associated with a notification that an involuntary separation has been initiated against a Member. This may include (but not be limited to) current Service or component, proof of eligibility for a specific involuntary separation action, cause for separation, and justification for involuntary separation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Involuntary Separation Notification Acknowledgement	ICOM Arrow	This includes information related to a Member's response to a notification of involuntary separation. This may include (but not be limited to) a Member's concurrence on their Statement of Service, a written response to the involuntary separation recommendation, or a decision to seek legal counsel.	
Involuntary Separation Request	ICOM Arrow	This includes the request information related to an involuntary separation. Additionally, this may also include information related to any waivers that are part of the involuntary separation request. The information in this request may include (but not be limited to) Member name, current Service or component, proof of eligibility for a specific involuntary separation action, cause for separation, and justification for involuntary separation.	
Issue Books	ICOM Arrow	Single page narratives prepared by OSD staff, DoD Components, and OMB that contains all the issues identified and documented in the Issue Papers.	
Issue Budget Decision Law Policy Reg	ICOM Arrow	Issue Budget Decision is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Issue Fiscal Guidance Law Policy Reg	ICOM Arrow	Issue Fiscal Guidance is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 37, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 4120.24-M, DoD 5105.38-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 15, DoD 5400.11-R.	
Issue Policy and Guidance Law Policy Reg	ICOM Arrow	Issue Policy and Guidance is constrained by the following: Public Law 097-255, Public Law 101-576, Public Law 103-356, Public Law 104-208, Public Law 111-352, USC Title 5, USC Title 10, USC Title 20, USC Title 31, USC Title 33, USC Title 37, USC Title 38, USC Title 40, CFR Title 15, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 11, SFFAS 12, SFFAS 13, SFFAS 16, SFFAS 18, SFFAS 19, SFFAS 23, SFFAS 25, SFFAS 27, SFFAS 29, SFFAS 30, SFFAS 39, SFFAC 1, SFFAC 2, SFFAC 3, SFFAC 4, FFAA Tech Release 2, GAO Title 2, OMB Circular A-11, OMB Circular A-110, OMB Circular A-123, OMB Circular A-127, OMB Circular A-134, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, TFM Vol 1 Part 2, TFM Vol 1 Part 3, APG, MFR, JFMIP FFMSR-8, JFMIP - MCAIG, JFMIP SR-99-4, JFMIP SR-99-5, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-02, OFFM-NO-0106, SFFBP, DoDD 4140.1, DoDD 8500.01E, DoDI 5000.64, DoDI 8500.2, DoDI 8510.01, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4140.1-R, DoD 5200.08-R, DoD 5400.11-R, DFARS.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Issue Program Decision Memorandum Law Policy Reg	ICOM Arrow	Issue Program Decision Memorandum is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 37, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 4120.24-M, DoD 5105.38-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 15, DoD 5400.11-R.	
IUID	ICOM Arrow	Item Unique Identification (IUID) is the strategic imperative for uniquely identifying tangible personal property items. Enable the accurate, timely recording of information on the location, movement, status and identity of equipment, materiel and supplies, to ensure accurate acquisition, repair, and deployment of items in an efficient and effective manner.	
JCCS	ICOM Arrow	Joint Contingency Contracting System (JCCS) is a real time contract data repository and reporting tool for reconstruction contracts in Iraq and Afghanistan. The goals of the system include 1) allow the posting of Iraqi and Afghani reconstruction solicitations, 2) the functionality to review vendor past performance, 3) provide a web-based location for vendors to submit proposals, 4) track all historical reconstruction data, 5) allow oversight of in-theatre contracts to monitor cost, schedule, performance, and vendor activities, and 6) track spend analysis for strategic sourcing and staffing.	
Joint Chief of Staff Feedback	ICOM Arrow	The Joint Staff conducts requirements analyses of the POM/PCP and assess the POM/PCPs impact and recommends a response to OSD.	
Joint Concept of Operations	ICOM Arrow	A living family of documents that forms the framework for future full-range military operations. It also encompasses and unifies subordinate operating, functional, and enabling concepts, as well as integrated capabilities. These documents describe how the joint force will operate in the next 15-20 years. Further, JOpsC describes how the joint force will employ those emerging capabilities and concepts, along with interagency and multinational coordination, to resolve war and crises situations.	
Joint Programming Guidance	ICOM Arrow	This document, issued by the SECDEF, provides firm guidance in the form of goals, priorities, and objectives, including fiscal constraints, for the development of the POM.	
Joint Tasks	ICOM Arrow	Actions or activities that involve forces of two or more Military Departments interacting with a combatant commander or subordinate joint force commander, (derived from an analysis of the mission and concept of operations) assigned to an individual or organization to provide a capability.	
Joint Vision 2020	ICOM Arrow	Provides in broad terms the human talent - the professional, well-trained, and ready force - and operational capabilities that will be required for the joint force to succeed across the full range of military operations and accomplish its mission in 2020 and beyond. In describing those capabilities, the vision provides a vector for the wide-ranging program of exercises and experimentation being conducted by the Services and combatant commands and the continuing evolution of the joint force.	
KBCRS	ICOM Arrow	A web-based, DITSCAP certified application that provides environmental program data to OSD for the entire Department. The Knowledge Based Corporate Reporting System (KBCRS) maintains environmental cost estimate data, related to environmental, safety, and occupational health (ESOH) solutions, that is extracted from DoD's Component organizations. It also performs validity checks on the information and consolidates various program areas' data for broader decision-making and reporting purposes. Current programs include Cleanup (Defense Environmental Restoration Program), the Military Munitions Response Program (MMRP), and Solid Waste reporting. KBCRS incorporates Cleanup action data from 1997 forward and MMRP data from 2001 inception forward. Some data is provided to the general public, but most detailed ESOH solution implementation information is reserved for authorized users within the DoD or its Components and authorized users from state and Federal EPA offices, Federal Land Managers, and selected Native American tribes. KBCRS includes predefined reports (many published in Annual Report to Congress) and a several user-selectable queries. A powerful ad hoc reporting tool exists for power users. It provides detailed appendices to the Environmental Management Annual Report to Congress and the ability to conduct analyses at the corporate level.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Labor Rights Issue Analysis Summary	ICOM Arrow	This includes summary information associated with the responses, following analysis, to civilian direct hire employees (e.g., civil service, Non Appropriated Fund (NAF) employees) labor rights issue requests. This information may be utilized by the chain of command for general analysis of labor agreements, morale and other issues. The information may include (but not be limited to) summary of submitter's personal information (e.g., number of anonymous notations, number of submissions with submitter name, list of cited organizations), summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), summary of narrative feedback details, dates of feedback vs dates of replies, summary of related feedback inputs received, summary of analysis narratives, summary of evaluation results narratives, summary of narratives for pending related procedural adjustments or other actions, narrative summary of implementation details).	
Labor Rights Issue Request	ICOM Arrow	This includes information associated with a civilian direct hire employee (e.g., civil service, Non Appropriated Fund (NAF) employees) submitting a request for resolution of a Labor Rights Management issue. Labor Rights Management refers to those actions undertaken to ensure that employees and employers are aware of and comply with all statutes and regulations concerning labor rights, including those pertaining to wages, benefits, safety and health, whistleblower, and non-discrimination policies. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization), union labor agreement authorized comments, summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), narrative request details, and date of request.	
Labor Rights Issue Response	ICOM Arrow	This includes information associated with the response to a civilian direct hire employee's (e.g. civil service, Non Appropriated Fund (NAF) employees) request for resolution of a labor rights issue. This information may be utilized by the chain of command for general analysis of labor agreements, morale and other issues. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization), union labor agreement authorized comments, summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), narrative request details, date of request, analysis narratives, summary of evaluation results narratives, narrative for pending related procedural adjustments or other actions, narrative summary of implementation details).	
Law and Regulation and Policy	ICOM Arrow	Laws and Regulations and Policies are the mandatory bodies of principles and rules that are imposed on DoD business activities and processes. Such compliance constraints are both federal-wide and/or DoD specific, and are not discretionary. BEA compliance constraints include those mandated by various offices within the Office of the Secretary of Defense (OSD) that apply to the entire enterprise and may be in the form of public laws (e.g., USC Title 10 - Armed Forces), regulations (e.g., OMB Circulars, Memorandums, Federal Acquisition Regulations, DoD Financial Management Regulation (FMR)), DoD Instructions or Directives, or Policies issued in memorandums or other issuances.	
Legal Personnel Programs Debt Disposition	ICOM Arrow	This is an overall flow of legal personnel programs debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Legislation	ICOM Arrow	This includes existing or newly enacted law that affects Human Resources Management policy and guidance. This information may include (but not be limited to) legislation date, legislation name, and legislation description.	
Liability Footnote Information	ICOM Arrow	This is information either explaining specific line items on a financial report or providing disclosure information for potential liabilities not reported in financial reports.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Line of Duty Appeal Decision	ICOM Arrow	This includes a decision made by an Approval Authority on a Line of Duty (LoD) appeal action. The information may include (but not be limited to) appeal decision date, appeal status, and appeal justification.	
Line of Duty Appeal Decision Notification	ICOM Arrow	This includes the notification of a decision made by an Approval Authority on a Line of Duty (LoD) appeal action. The information may include (but not be limited to) notification date and time, notification status, and appeal decision information (appeal date, appeal status, and appeal justification).	
Line of Duty Approval Authority	ICOM Arrow	This represents personnel who have decision-making authority to approve/disapprove Line of Duty (LoD) related personnel actions. The LoD-related personnel actions may include (but not be limited to) LoD decisions (e.g., interim and final) and appeals.	
Line of Duty Decision	ICOM Arrow	This information includes a Line of Duty (LoD) decision (e.g., interim and final). The information may include (but not be limited to) LoD decision results (e.g., in the line of duty, not in the line of duty- not due to Member's misconduct, not in the line of duty - due to Member's misconduct, not in the line of duty - existed prior to service), LoD decision date, LoD investigation date, LoD investigation findings, and LoD investigation officer.	
Line of Duty Decision Notification	ICOM Arrow	This includes the notification of a decision made by an Approval Authority determining if an incident occurred in the Line of Duty (LoD) or not in the LoD. The information may include (but not be limited to) LoD decision results (i.e., in line of duty or not in line of duty), LoD decision date, notification method (e.g., fax, email, phone, and post mail), and notification date and time.	
Line of Duty Determination Request	ICOM Arrow	This information includes a notification of a casualty incurred by a Member resulting in injury, disease, or death and a request to determine whether the incident occurred in the Line of Duty (LoD) or not in the LoD. The information may include (but not be limited to) request date and time, requestor name, and supporting documentation specific to the casualty.	
Line of Duty Information Request	ICOM Arrow	This includes a request for documentation to assist in a Line of Duty (LoD) investigation. This information may include (but not be limited to) request date and time, requested information, and requestor name.	
Line of Duty Legal Recommendation Documentation	ICOM Arrow	This includes the results of a legal review of documents concerning a Line of Duty (LoD) investigation and all associated information. The information may include (but not be limited to) review date and time, reviewer name, and review findings.	
Line of Duty Legal Review Information Request	ICOM Arrow	This includes a request for a legal review of documents concerning a Line of Duty (LoD) investigation and all associated information. The information may include (but not be limited to) request date and time, requested information, and requestor name.	
Line of Duty Profile Information	ICOM Arrow	This includes the Line of Duty (LoD) information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, duty status, LoD decision information, information related to incidents of misconduct, LoD appeal decision, assignment type, assignment start and stop date, and assignment location.	
Line of Duty Profile Update Information	ICOM Arrow	This includes the updated Line of Duty (LoD) information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, duty status, information related to incidents of misconduct, LoD appeal decision, assignment type, assignment start and stop date, and assignment location.	
Line of Duty Request Documentation	ICOM Arrow	This includes the requested documentation to assist in a Line of Duty (LoD) investigation. The information may include (but not be limited to) incident reports (e.g., federal, state, or local law enforcement), interviews, and other information regarding the determination of a LoD (in the line of duty, not in the line of duty- not due to Member's misconduct, not in the line of duty - due to Member's misconduct, not in the line of duty - existed prior to service).	
Line of Duty Specialist	ICOM Arrow	This represents personnel who perform non-decision activities (e.g., administrative processing, providing investigation recommendations, and distributing information to appropriate parties) associated with determining whether the circumstance of a Member's disease, injury, illness or death was in the Line of Duty (LoD) or not in the LoD. They are also responsible for documenting and updating LoD related information in a Member's profile.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Liquidated Penalty Administrative Fees and Interest Pro Forma Entries	ICOM Arrow	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the application of collections against penalties, administrative charges, and interest fees on overdue receivables.	
LMD	ICOM Arrow	Logistics Master Data (LMD) establishes a single integration point for Item, Vendor, and Customer Data. Currently, there are 10 different Logistics Master Data sources. Each emerging program builds unique interfaces to source systems resulting in duplication, lack of data synchronization, increased costs, and limiting Materiel Visibility. In collaboration with DLIS and DLA, the Logistics Master Data Initiative enables emerging systems to build a single interface for retrieving Item, Vendor and Customer data to support DoD to get the right item to the end customer that is both timely and accurate.	
Load Information	ICOM Arrow	The data that reflects the shipment details required to move cargo and personnel.	
Loan Pro Forma Entries	ICOM Arrow	The debit and credit affects of pro forma entries to proprietary, budgetary, or memorandum general ledger accounts resulting from business events related to the origination, performance, payment, collection and closeout of a direct loan or loan guarantee.	
Logistics Order	ICOM Arrow	A validated request for internally sourced goods or services requested by a DoD customer that contains information relative to the source, location, required delivery date, product or service description, and special handling requirements e.g. hazardous materiel, wounded and deceased casualty transport.	
Logistics Order Modification	ICOM Arrow	A modification to a previously submitted logistics order.	
Maintain Asset Information Law Policy Reg	ICOM Arrow	Maintain Asset Information is constrained by the following: USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 40, USC Title 42, USC Title 43, Executive Order 12906, Executive Order 13327, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 5, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 14, SFFAS 19, SFFAS 23, FFAA Tech Release 2, GAO Title 2, OMB Circular A-11, OMB Circular A-16, OMB Circular A-21, OMB Circular A-50, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP FFMSR-8, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-02-02, JFMIP SR-03-01, JFMIP SR 03-02, OFFM-NO-0106, DoDD 4140.1, DoDD 8320.03, DoDD 8500.01E, DoDI 4161.2, DoDI 4165.14, DoDI 5000.64, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD 4160.28-M Vol 1, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, ChargeCardGuide.	
Maintain Human Resources Record Law Policy Reg	ICOM Arrow	Maintain Human Resources Record is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.

Manage Personnel Casualty Law Policy Reg	ICOM Arrow	Manage Personnel Casualty: Laws and Regulations and Policies are the mandatory bodies of principles and rules that are imposed on DoD business activities and processes. Such compliance constraints are both federal-wide and/or DoD specific, and are not discretionary. BEA compliance constraints include those mandated by various offices within the Office of the Secretary of Defense (OSD) that apply to the entire enterprise and may be in the form of public laws (e.g., USC Title 10 - Armed Forces), regulations (e.g., OMB Circulars, Memorandums, Federal Acquisition Regulations, DoD Financial Management Regulation (FMR)), DoD Instructions or Directives, or Policies issued in memorandums or other issuances.

Manage Traveler Visibility Law Policy Reg	ICOM Arrow	Manage Traveler Visibility is constrained by the following: Public Law 103-356, Public Law 105-264, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, SFFAS 1, SFFAS 2, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 4, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, DoDD 4500.09E, DoDD 5124.02, Joint Pub 1-0, Joint Pub 3-0, DoDI 1300.18, DoDI 1332.38, DoD 6010.13-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-270.	
Manage Workforce Occupational Safety Analysis Law Policy Reg	ICOM Arrow	Manage Workforce Occupational Safety Analysis is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Management Report of Cash Accounting	ICOM Arrow	Form prepared by the deputy, agent, and cashier as a summary of the days cash transactions and receipts for cash and vouchers each time settlement occurs.	
Mandatory Retirement Projection Notification	ICOM Arrow	This includes a notification to the Member that he or she has been identified as involuntary retirement eligible and has been given the option to voluntarily retire. These reasons may include (but not be limited to) being passed over twice for promotion, medical (e.g., temporary/permanent disability), and years of service and age. If the Member does not choose to voluntarily retire, he or she will be involuntarily separated.	
Manpower Accounting Report	ICOM Arrow	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain the DoD Component strength information required to support personnel management and force readiness determination.	
Manpower Allocation Discrepancy List	ICOM Arrow	Manpower allocation discrepancies show the differences between the Manpower Allocation received and the Manpower Requirements submitted.	
Manpower Allocation Information	ICOM Arrow	Manpower allocation shows the distribution of manpower billets based on funding received.	
Manpower Budget Requirement	ICOM Arrow	These are the Manpower Budget Requirements that are submitted during the Planning, Programming, Budgeting, and Execution (PPBE) cycle. These requirements include the projections necessary to support DoD missions.	
Manpower Change Request	ICOM Arrow	This includes a change request from the bottom-up to change organization structure, position or Manpower information.	
Manpower Directive	ICOM Arrow	A Manpower directive is an official directive received to change the force structure. This includes both changes to the organizations structure as well as position attributes. A Manpower directive can include an increase or decrease in manpower. This change is requested from the top-down.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manpower Document	ICOM Arrow	A Current Manpower Document (e.g., Table of Distribution and Allowances, Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization's structure and the Authorized Full Time Support for the current fiscal year.	
Manpower Document Update Information for New Unit	ICOM Arrow	This includes the organization structure information which is needed when establishing a new unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Reorganized Unit	ICOM Arrow	This includes the organization structure information when there is a reorganization of a unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Updated Position	ICOM Arrow	This includes the updates to unit information to reflect the redesignating, inactivating, and reactivating of units. The information may include (but not be limited to) unit identifier, position occupation code, and unit position grade authorized strength level (number of positions authorized for a grade within a unit).	
Manpower Estimate	ICOM Arrow	An estimate of the number of personnel required to operate, maintain, support and train for the acquisition upon full operation deployment. Required for all ACAT I programs.	
Manpower Estimate Report	ICOM Arrow	The Manpower Estimate Report (MER) defines the proposed force structure. The manpower estimate shall report the total number of personnel needed to operate, maintain, support, and provide training for the program upon full operational deployment. It shall report the number of military (officer, warrant officer, and enlisted), DoD civilian, and contract manpower requirements for each fiscal year of the program beginning with initial fielding and ending with full operational deployment. A separate estimate shall be provided for each Component (for joint programs) and separately for the Active, Reserve, and National Guard forces.	
Manpower Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Manpower Budget Requirement, Manpower Input to Program Decision Memorandum, Manpower Input to Program Objective Memorandum, and Manpower Reclama.	
Manpower Information Request	ICOM Arrow	This includes any request for manpower data for reporting purposes.	
Manpower Input to Program Decision Memorandum	ICOM Arrow	This includes additional Manpower adjustments required as a result of the initial Manpower adjustments contained in the Program Objective Memorandum (POM).	
Manpower Input to Program Objective Memorandum	ICOM Arrow	This includes Manpower high level adjustments (e.g., Program Element Detail, Resource Identification Code) by Component to the Program Objective Memorandum (POM) baseline.	
Manpower Reclama	ICOM Arrow	Manpower reclama contains discrepancies from the requirements submitted versus the allocation received. These discrepancies are submitted to Budgeting for reconsideration.	
Manpower Report	ICOM Arrow	This includes both pre-defined automatically generated reports as well as ad-hoc reports. An example of such an aggregate report is the Defense Manpower Requirements Report (DMRR) input to DoD Performance and Accountability Report (PAR) input to the Annual Defense Report.	
Market Information	ICOM Arrow	Information gathered based on market research with the intent of developing or improving a strategic sourcing strategy. May include, but is not limited to, information on suppliers, pricing, volumes, quality of goods, and services.	
Master Product Hazard Data Information	ICOM Arrow	New or updated product hazard data (PHD) that is required to be associated with DoD asset information.	
Materiel and Forces Status Information	ICOM Arrow	Information that permits the monitoring of events across a supply chain. It tracks and traces inventory and forces globally on a line item/individual level and provides information such as item unique identification, location, condition, custody, and embedded items.	
Materiel Capability Need	ICOM Arrow	Changes required by materiel to fill a capability gap identified in the Functional Needs Analysis (FNA). Capability proposals may involve a mix of both Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel and Facilities (DOTMLPF) and materiel changes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Materiel Supply and Service Management	ICOM Arrow	Objectives: Supply chains for the provision of materiel supply to maintain readiness of non-deployed warfighters and for deployed warfighters to support operations at required Operational Tempo (OPTEMPO) levels with required responsiveness. The key elements of this CBM include all aspects associated with requesting, acquiring, sourcing, storing, transporting, and receiving and accepting all classes of supply, up to the point where those supplies are provided to operational units and deployed warfighters.	
MAX Data Structure	ICOM Arrow	Format for submitting data into the OMB MAX system to create a new account, process an apportionment, or submit a budget.	
Medical Evaluation Findings	ICOM Arrow	This includes documentation on the medical status and duty limitations of the Member. This may include (but not be limited to) a referral to the Physical Evaluation Board (PEB), doctor's narrative summary (NARSUM), and a recommendation from chain of command on whether a Member is fit or unfit to return to duty.	
Medical Provider Approval Authority	ICOM Arrow	This performer represents personnel who are U.S. military privileged (licensed) healthcare providers or U.S. privileged (licensed) healthcare providers employed by, or under contract/subcontract to the U.S. Government or U.S. Government contractor, who have privileges to make medical qualification decisions and is responsible for performing medical prescreenings, medical examinations, and determining medical qualification. The Medical Provider Approval Authority may include (but not be limited to) Chief Medical Officer, Assistant Chief Medical Officer, HQ/J-7/Medical Plans and Policy Directorate, or Command Surgeon.	
MEV	ICOM Arrow	Develop a capability to value and account for military equipment to achieve financial management improvements as called for in the President's Management Agenda. Achieving this financial management improvement achieves two objectives for DoD. First, it gives DoD decision makers reliable, accurate, and transparent information with which to determine the total acquisition cost of assets. Decision makers will get information that can be compared over time and between programs, which will allow better investment planning. Second, it will enhance the public's trust of DoD.	
Military Equipment Recovery Information	ICOM Arrow	This is the information that indicates that military equipment disposal action has occurred and installed military equipment has been recovered and sent to logistics for return or disposal.	
Military Experience and Training Discrepancies	ICOM Arrow	This includes all information related to discrepancies noted during transition assistance reviews within a Member's military experience and training information. This may include (but not be limited to) discrepancies in assignment dates, discrepancies in ranks held, discrepancies in promotion dates, or discrepancies in training activities.	
Military Interdepartmental Purchase Request	ICOM Arrow	The Military Interdepartmental Purchase Request (MIPR) is a method for transferring funds amongst U.S. military organizations. It allows for multi-organizational cooperative efforts to be performed, rather than limiting funding to a single organization.	
Military Lift Request	ICOM Arrow	Military Transportation resources scheduling inquiry for personnel movement (may include cargo specifications) within mission guidelines.	
MILS to EDI or XML	ICOM Arrow	Convert Military Standards (MILS) to commercially based EDI or XML transitions standards (MILS) to commercial standard sets of transactions (EDI or XML). Facilitate DoD directed migration of automated information systems (AISs) interfaces from Military Standards (MILS) 80 record position transactions to ANSI X12 Electronic Data Interchange (EDI) or Extensible Markup Language (XML) variable length transactions. Directed migration is in compliance with USD (AT&L) 22 Dec 03 memorandum "Migration to the Defense Logistics Management Standards (DLMS) and Elimination of the Military Standard Systems (MILS)".	
Mission OPTEMPO Information	ICOM Arrow	Information about the operational activity level at a given asset or installation due to mission variables.	
Mission OPTEMPO Information Request	ICOM Arrow	A request for information about the operational activity level at a given asset or installation due to mission variables.	
MOCAS	ICOM Arrow	Contract Management and Entitlement system for complex contracts (Administer Procurement Instrument).	
Modeling Services Procurement Request	ICOM Arrow	A requirement for technical and functional contracting support to analyze/define, develop, implement, execute and/or evaluate defense personnel related simulations that provide the capability to assess alternatives in personnel programs and corresponding force structure details.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Modification or Change Notification	ICOM Arrow	Information that triggers a change or modification in an agreement, contract or intragovernmental order after it has been operational and past performance trends indicate a need for its modification(s) to improve performance.	
Modified Accepted Letter of Offer and Acceptance Document	ICOM Arrow	A USG unilateral change to a case implemented in the Foreign Military Sales Trust Fund that has been approved by DSCA.	
Monitor and Support Program Deployment Law Policy Reg	ICOM Arrow	Monitor and Support Program Deployment is constrained by the following: DoDD 5000.01, CJCSI 3170.01, DoDI 8560.01, DoDI 8580.1.	
Monitor Payment Law Policy Reg	ICOM Arrow	Monitor Payment is constrained by the following: Public Law 112-194, NDAA 2013, OMB M-11-32, JFMIP SR-02-02, OFFM-NO-0106, DoD FMR Vol 01, DoD FMR Vol 10, DFARS, ChargeCardGuide, ICPS.	
Morale, Welfare and Recreation Program Usage Request	ICOM Arrow	This includes information related to a request to use a Morale, Welfare and Recreation (MWR) program. This may include (but not be limited to) request date, requester information (e.g., requester name, requester relationship to a qualified service Member), the reason for the request, and any special circumstances of the request. This may be a formal or informal request.	
Morale, Welfare and Recreation Program Usage Response	ICOM Arrow	This includes a response to a Morale, Welfare and Recreation (MWR) program usage request of a DoD member/employee, dependent or community member. This may include (but not be limited to) requester name, date, determination of entitlement to use a program or programs, and any comments concerning the usage request.	
Narrative Information	ICOM Arrow	This is the information used to build the post closing narrative. This information is derived from accumulated cost data, data used to build the working trial balance, mapped financial data, and mapped non-financial data. This is management's input to the financial statement consolidation process.	
National Defense Strategy	ICOM Arrow	The National Defense Strategy supports the National Security Strategy by establishing a set of overarching defense objectives that guide the Department's security activities and provide directions for the National Military Strategy. The National Defense Strategy objective serves as links between military activities and those of other government agencies in pursuit of national goals. The National Defense Strategy provides four guidelines for implementing the strategy: create an active defense-in-depth; conduct continuous transformation, adopt a capabilities-based approach; and manage risks.	
National Military Strategy	ICOM Arrow	An analysis of the National Security Strategy to determine Department of Defense resources required to support the National Security Strategy. Provides focus for military activities by defining a set of interrelated military objectives from which the Service Chiefs and combatant commanders identify desired capabilities and against which Chairman, Joint Chiefs of Staff (CJCS) assesses risk.	
National Security Strategy	ICOM Arrow	A document produced yearly by the National Security Council (NSC) and signed by the President. It provides grand strategy and overarching national security goals and objectives for the United State.	
Need for Additional Component Product Hazard Data Information	ICOM Arrow	A notification sent to the work unit that indicates the additional information required to process the Component request for product hazard data (PHD).	
Negotiate OMB Passback Law Policy Reg	ICOM Arrow	Negotiate OMB Passback is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Negotiated Labor Agreement	ICOM Arrow	This includes information contained in a binding legal agreement's documentation of the relationship between DoD and a represented group (Federal Labor Management Relations Program for all DoD civilian employees except those that the President has excluded from coverage by Executive Order) of direct hire employees (e.g., civil service, Non Appropriated Fund (NAF) employees). Relationships with unions representing non-U.S. citizens employed at DoD activities must remain consistent with pertinent intergovernmental agreements, local practices, customs, and DoD instructions. Relationships with unions representing non-U.S. citizens employed at DoD activities must be kept consistent with pertinent intergovernmental agreements, local practices, customs, and DoD instructions. The Defense Civilian Personnel Management Service (CPMS) must review and approve agreements pursuant to Title 5 Section 7114. The information may include (but not be limited to) signatory personal information (e.g., name, official title, organization), agreement narrative, date of final ratification.	
New Data Element Request	ICOM Arrow	As a result of responding to the customer's request, the cost accountant may identify the need for creating a new data element. This object represents the request that the new data element be created by the appropriate owner.	
NGRMS	ICOM Arrow	NGRMS is a system used to formulate, justify, present, and defend the DoD budget, including equipment maintenance support, software upgrades, and software licenses.	
Non DoD or Operational Threat Assessment Information	ICOM Arrow	Federal Agency, Joint Warfighter or scientific community threat assessment considerations and information.	
Non-Materiel Capability Need	ICOM Arrow	Changes required in doctrine, organization, training, leadership and education, personnel or facilities to satisfy identified functional capabilities.	
Non-validated Personnel Requisition	ICOM Arrow	This includes a non-validated personnel requirement request. This information may include (but not be limited to) decision date, decision reason, request date, request quantity, occupational code, and Unit Identification Code (UIC).	
Notification of Adjustment	ICOM Arrow	A notification of applied changes to the apportionment request sent to the components.	
Notification of Collection	ICOM Arrow	This is a notification that a collection has been processed. The information could include the associated deposit ticket or debit voucher and the associated cash collection voucher, administrative offsets.	
Notification of Foreign Military Sales Trust Fund Closure of Case	ICOM Arrow	Notification to the Implementing Agency that the case is closed in the Foreign Military Trust Fund.	
Notification of Funds Availability	ICOM Arrow	This is a notification that funds are available or not available for the commitment or obligation request.	
Notification of Insufficient Funds	ICOM Arrow	This includes information associated with a notification that funds are not available for the commitment or obligation request.	
Notification of Loss from Supplier	ICOM Arrow	Contractor notification to the government of loss of government property while in their custody.	
Notification of Requirement Status	ICOM Arrow	The notification of a proposal status from the Accounting Control Board. The requirement status may be: approved, declined, or tabled.	
Notification to Comptroller of New Requirement	ICOM Arrow	Notification sent to the Comptroller for the request of new requirements that will be used to establish a new policy or change an existing policy. Changes could affect the SFIS, Chart of Accounts, Pro-Forma entries, or the calendar.	
Notification to Re-examine	ICOM Arrow	Notification to re-examine proposal that has been tabled.	
Obligation Pro Forma Entry	ICOM Arrow	The debit and credit affects of obligation pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Obligation Request	ICOM Arrow	This is a signed contract or order that provides obligations or deobligations request.	
Occupation Competencies Deficiency	ICOM Arrow	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring Department of Defense (DoD) modification to DoD competencies identified for DoD funded development actions. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), competency development proposal, proposed relationship of competency to occupations or occupation families, intended operational result of proposed competency development.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Occupation Competencies Information	ICOM Arrow	This includes information associated with the Department of Defense (DoD) competencies approved for expenditure of DoD resources for DoD personnel development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) specific competency identification information related to DoD occupations (e.g., MOS, AFSC).	
Occupation Competencies Proposal	ICOM Arrow	This includes information associated with personnel identifying a problem (e.g., adjustment to the eligibility criteria, and related development activities, for a Department of Defense (DoD) competency is needed to resolve a safety problem identified from Safety incident reports) potentially requiring DoD modification to DoD competencies identified for DoD funded development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), competency development proposal, proposed relationship of competency to occupations or occupation families, intended operational result of proposed competency development.	
Occupation Competencies Proposal Assessment	ICOM Arrow	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, Department of Defense (DoD) competencies identified for DoD development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), specific competency identification information, proposal assessment information such as determination of related development actions to be further analyzed (within the context of development actions) for implementation details.	
Occupation Competency Testing Catalog Information	ICOM Arrow	This includes information associated with all Department of Defense (DoD) testing of a person's specific competency. The information may include (but not be limited to) specific test information (e.g., test identification information, test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information.	
Occupational Competency Testing Deficiency	ICOM Arrow	This includes information associated with personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring a modification to Department of Defense (DoD) testing of an individual's specific competency. The information may include (but not be limited to) specific test information (e.g., test identification information, requestor personal information (e.g., name, ID number, organization), test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information).	
Occupational Competency Testing Proposal	ICOM Arrow	This includes information associated with personnel identifying a proposal (e.g., adjustment to the specified metals to be used in the competency testing of underwater electric arc welding) potentially requiring a modification to a specific competency test. The information may include (but not be limited to) specific test information (e.g., test identification information, test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information.	
Occupational Competency Testing Proposal Assessment	ICOM Arrow	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, a specific competency test. The information may include (but not be limited to) specific test information (e.g., test identification information, requestor personal information (e.g., name, ID number, organization), test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, test scoring information, related assessment inputs received, analysis summary, evaluation results, proposal assessment information such as determination of related development actions to be further analyzed for implementation details, and projected actions).	
Occupational Safety Analysis Information	ICOM Arrow	Information from Workforce Occupational Safety Analysis supporting determination of Human Resources Management actions such as formulation of force structure and development of personnel.	
Officer Involuntary Retention Notification	ICOM Arrow	This includes the notification to appropriate parties (e.g., Member, commander) that a Member has been identified for involuntary retention.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Officer Involuntary Retention Waiver Request	ICOM Arrow	This includes a request to not extend the officer's military service past their current obligation date. This waiver request is filed by an officer that has been identified for retention.	
Official Congressional Position	ICOM Arrow	Official Congressional decision solicited from the congress stating the position on reprogramming of appropriated funds.	
Offset Pro Forma Entries	ICOM Arrow	The general ledger impact of offsetting the balance of an accounts payable with a previously recorded accounts receivable. Perhaps resulting from a contract overpayment.	
OMB Bulletin	ICOM Arrow	Supplements instructions for apportionment of CRAs and applies to any extensions of the CRA.	
OMB Decision	ICOM Arrow	A decision sent from OMB to the Comptroller responding to the request for additional continuing resolution act amount request from the Comptroller.	
OMB Feedback	ICOM Arrow	During the budget review, OMB provides feedback to OSD on the budget estimates submitted by the components. The feedback could be related to the outyear policy and baseline estimates that must be consistent with the economic assumptions provided by OMB. OMB's feedback could also be the enforcement on the compliance of the budget estimates with OMB's policies regarding mandatory and discretionary programs.	
OMB Passback	ICOM Arrow	This is a recommended change to DoD's proposed budget for inclusion in the Presidents Budget. Recommended changes could be based on the outyear policy and baseline estimates that must be consistent with economic assumptions (e.g. inflation).	
OMB Reprogramming Decision	ICOM Arrow	The decision by OMB to either approve or disapprove the reprogramming request from the Comptroller.	
OMB Transfer Decision	ICOM Arrow	Documentation that provides OMB's decision on DoD's request to transfer budgetary authority between statutory appropriations or Treasury accounts.	
Operational Experience Information	ICOM Arrow	This includes information representing an input into Human Resources Management, from the Warfighter, of a person's operational experience. Monthly operational duty (e.g., operational flying duty, operational submarine duty) experience is expressed in terms of hours, fractions of an hour, or minutes specified in standards for operational experience competencies. This information is used to determine years of operational duties required in the computation of pay entitlements (e.g., gates for comparison against years of service specified for minimum periods of operational aviation or submarine duty) authorized by law.	
Order Status Information	ICOM Arrow	This is current information containing details about an order or a shipment.	
Organization Change Request	ICOM Arrow	This includes a bottom-up request to change the current organizational structure. This request includes a Mission or Force Structure Change.	
Organization Level Manpower Document Update Information	ICOM Arrow	Identifies the changes from the current organization level Manpower document. A Manpower document (e.g., Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization structure.	
OSD Reprogramming Decision	ICOM Arrow	OSD's decision to approve or disapprove the reprogramming request after reviewing OMB's reprogramming request response.	
OSD Transfer Decision	ICOM Arrow	Documentation that provides OSD's decision on a request to transfer budgetary authority between statutory appropriations or Treasury accounts.	
Other Budget Decision	ICOM Arrow	Other budget decisions include both internal and external decisions that are not incorporated in a Program Budget Decision (e.g. Congressional Decision).	
Other Government Earned Value Information	ICOM Arrow	Cost, schedule, work anticipated, work completed, and performance information based on information from a non-DoD government source, used as internal management controls to monitor completion of contract activities.	
Other Receipts	ICOM Arrow	Any receipts other than those included with a Debit Voucher or those that are a collection against an open receivable (established when goods or services were provided).	
Out-Processing Departure Notification	ICOM Arrow	This includes a notification that captures the notification information to reflect the details of the departure of an individual from a duty station en route for a new temporary or permanent duty station. This notification may also include any changes made to assignment orders.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Oversight Assessment Information	ICOM Arrow	This is the result of the programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios. This includes results of analysis from Component Acquisition Executive (CAE) and Service Acquisition Executive (SAE).	
Passback Final Decision	ICOM Arrow	The passback final decision represents the agreement between OSD and OMB on the final DoD's budget for inclusion to the President's Budget submission. This decision will be incorporated in a new Program Budget Decision or other budget decision memorandum. The decision should reflect result of the following activities: Agreement on the deliberation on key issues within DoD and across all organizations; Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs; and results of negotiation with OMB on top-line considerations.	
Pay Profile Information	ICOM Arrow	This includes pay information (e.g., pay and allowances, allotments, deductions, reimbursements, garnishments, bankruptcies, duty participation and taxes) that is associated with a personnel/pay record. The information may include (but not be limited to) personnel agreement information (e.g., bonus, incentive, and agreement effective date), pay eligibility status, benefit election information (e.g., benefit type, benefit effective date, and benefit authorization), deduction information (e.g., deduction type, deduction amount, and deduction effective date), disbursing information, returned payment notice information, pay type, and pay start and stop date.	
Pay Profile Update Information	ICOM Arrow	This includes information associated with updated pay information (e.g., pay and allowances, deductions, reimbursement, and taxes) that is associated with a personnel/pay record. The information may include (but not be limited to) personnel agreement information (e.g., bonus, incentive, and agreement effective date), pay eligibility status, benefit election information (e.g., benefit type, benefit effective date, and benefit authorization), deduction information (e.g., deduction type, deduction amount, and deduction effective date), pay type, and pay start and stop date.	
Pay Statement Information	ICOM Arrow	This includes information associated with payroll and tax withholding information. This may include (but not be limited to) leave and earnings statement (LES), personal statement of military compensation, W-2 statement of wage, and payroll disbursement history.	
Payment Request	ICOM Arrow	A request for payment from a vendor or other party owed by the government. It describes an amount due for the acquisition of tangible goods or services as "billable events", which will include the pricing including freight, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition. Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Final Cost Vouchers, Performance-Based Payment Requests, Progress Payment Requests, Commercial Invoices, Fast-Pay Invoices, Direct Cost Vouchers, Grants, and Non-Direct Cost Vouchers.	
Payroll Reports	ICOM Arrow	The purpose of payroll reports is the reconciliation of human resources and payroll data within the systems, for comparison and reconciliation with that of disbursing, accounting, and other administrative systems/subsystems/modules to ensure accuracy, completeness, and data integrity. The purpose is also to satisfy requirements of Certifying Officer legislation.	
PBAS	ICOM Arrow	The Program Budget Accounting System (PBAS) is used by the DoD to control and distribute funds from the department level to the DFAS field Sites. PBAS performs the funds distribution electronically by allowing the user to create the funding documents on the PBAS system and transmitting receipts. PBAS prevents over distribution of funds from occurring by the use of system controls which limits the amount of funds distributed to the amount loaded into the PBAS system by the appropriated sponsor. The PBAS system controls also prevent over distribution of funds by restricting the dollar amount of the funds reprogrammed to the threshold amount determined by congressional programming rules.	
Penalties Administrative Fees and Interest Pro Forma Entries	ICOM Arrow	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with calculated penalties, administrative charges, and interest fees on overdue receivables.	

AV-2 Integrated Dictionary (BEA 11.1)

Perform Absence Administration Law Policy Reg	ICOM Arrow	Perform Absence Administration: Laws and Regulations and Policies are the mandatory bodies of principles and rules that are imposed on DoD business activities and processes. Such compliance constraints are both federal-wide and/or DoD specific, and are not discretionary. BEA compliance constraints include those mandated by various offices within the Office of the Secretary of Defense (OSD) that apply to the entire enterprise and may be in the form of public laws (e.g., USC Title 10 - Armed Forces), regulations (e.g., OMB Circulars, Memorandums, Federal Acquisition Regulations, DoD Financial Management Regulation (FMR)), DoD Instructions or Directives, or Policies issued in memorandums or other issuances.	
Perform Accession Shipping Law Policy Reg	ICOM Arrow	Perform Accession Shipping is constrained by the following: DoDI 1310.02, DoDI 6130.03, AR 601-222, AR 601-270.	
Perform Build and Make and Maintenance and Sustainment Law Policy Reg	ICOM Arrow	Perform Build and Make and Maintenance and Sustainment is constrained by the following: NDAA 2013, USC Title 31, USC Title 40, USC Title 42, CFR Title 48, Executive Order 12906, SFFAS 6, SFFAS 8, OMB Circular A-16, OMB Memo 04-04, OMB Memo 06-19, DoDD 4151.18, DoDD 4400.01E, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDD 8500.01E, DoDI 3000.04, DoDI 3110.06, DoDI 4151.19, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4160.21-M, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02B, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 11B, DoD FMR Vol 13, DoD 5200.08-R, DFARS, ICPS.	
Perform Build and Make and Maintenance and Sustainment Performance Information	ICOM Arrow	This is the narrative and metrics data that when aggregated describes the execution of Build and Make and Maintenance and Sustainment activities.	
Perform Cost Performance Analysis Law Policy Reg	ICOM Arrow	Perform Cost Performance Analysis is constrained by the following: Public Law 106-531, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 33, USC Title 37, USC Title 38, USC Title 40, CFR Title 31, SFFAS 4, SFFAS 9, SFFAS 18, SFFAS 29, SFFAS 35, SFFAS 40, SFFAC 1, SFFAC 2, SFFAC 3, SFFAC 4, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-127, JFMIP FFMSR-8, JFMIP - MCAIG, OFFM-NO-0106, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 08, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15.	
Perform ESOH Aspect Assessment Law Policy Reg	ICOM Arrow	Perform ESOH Aspect Assessment is constrained by the following: USC Title 33, USC Title 40, USC Title 42, CFR Title 40, Executive Order 12906, Executive Order 13045, Executive Order 13148, FFAA Tech Release 2, OMB Circular A-16, OMB Memo 04-04, OMB Memo 06-19, DoDD 4715.1E, DoDD 6055.9E, DoDD 8500.01E, DoDI 2000.18, DoDI 4140.62, DoDI 4145.26, DoDI 5000.02, DoDI 5000.61, DoDI 6050.05, DoDI 6055.1, DoDI 6055.04, DoDI 6055.05, DoDI 6055.06, DoDI 6055.07, DoDI 6055.08, DoDI 6055.11, DoDI 6055.12, DoDI 6055.15, DoDI 6055.16, DoDI 6055.17, DoDI 6490.03, DoDI 8500.2, DoDI 8510.01, DoD 4145.26-M, DoD 6055.05-M, DoD 6055.06-M, DoD 6055.09-M, DoD FMR Vol 04, MIL-STD-882D, MIL-STD-1472F, MIL-STD-1474D.	
Perform ESOH Aspect Identification Law Policy Reg	ICOM Arrow	Perform ESOH Aspect Identification is constrained by the following: USC Title 33, USC Title 40, USC Title 42, CFR Title 40, Executive Order 12906, Executive Order 13045, Executive Order 13148, FFAA Tech Release 2, OMB Circular A-16, OMB Memo 04-04, OMB Memo 06-19, DoDD 4715.1E, DoDD 6055.9E, DoDD 8500.01E, DoDI 2000.18, DoDI 4140.62, DoDI 4145.26, DoDI 5000.02, DoDI 5000.61, DoDI 6050.05, DoDI 6055.1, DoDI 6055.04, DoDI 6055.05, DoDI 6055.06, DoDI 6055.07, DoDI 6055.08, DoDI 6055.11, DoDI 6055.12, DoDI 6055.15, DoDI 6055.16, DoDI 6055.17, DoDI 6490.03, DoDI 8500.2, DoDI 8510.01, DoD 4145.26-M, DoD 6055.05-M, DoD 6055.06-M, DoD 6055.09-M, DoD FMR Vol 04, MIL-STD-882D, MIL-STD-1472F, MIL-STD-1474D.	
Perform Executive Level Planning Law Policy Reg	ICOM Arrow	Perform Executive Level Planning is constrained by the following: Public Law 103-62, Public Law 107-296, Public Law 107-347, Public Law 111-352, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 37, USC Title 40, USC Title 42, OMB Circular A-11, OMB Circular A-127, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, JFMIP SR-00-01, JFMIP SR-01-04, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 11B, DoD 5400.11-R, JFTR Vol 1.

Perform Workforce Budgeting Law Policy Reg	ICOM Arrow	Perform Workforce Budgeting is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Perform Workforce Planning and Programming Law Policy Reg	ICOM Arrow	Perform Workforce Planning and Programming is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Performance and Accountability Report	ICOM Arrow	Report that provides financial and performance information that enables the President and Congress, and the public to assess the effectiveness of DoD relative to its mission performance, program management, utilization of resources. The report includes Management's Discussion and Analysis, the Departments financial statements and auditors report, and discussion and analysis of fiscal year accomplishments.	
Performance Evaluation Appeal Request	ICOM Arrow	This includes official documentation of an individual's justification as to why an adverse performance evaluation should be changed. This occurs after the performance evaluation is made an official matter of record. The application is the trigger for the appeals process, which allows for the possible reversal of an adverse evaluation. This may include (but not be limited to) appeal date, appeal reason, and justification documentation.	
Performance Evaluation Development Plan	ICOM Arrow	This includes information needed to document a performance evaluation development plan. This may include (but not be limited to) evaluation comments, recommendations, evaluation start and stop date, and name of evaluator.	
Performance Evaluation Input	ICOM Arrow	This includes documented achievements and comments related to an individual's performance. This may include (but not be limited to) award name, award type, promotion information, training, and education.	
Performance Evaluation Profile Information	ICOM Arrow	This includes performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, evaluation status, evaluation start and stop date, performance composite scores, and comments from the evaluator.	
Performance Evaluation Profile Update Information	ICOM Arrow	This includes updated performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) evaluation status, evaluation start and stop date, performance composite scores, and comments from evaluator.	
Performance Evaluation Rating Chain	ICOM Arrow	This includes the list of raters for a specific Member. This may include (but not be limited to) name of the person being rated, name of raters, rank of raters, and grade of raters.	
Performance Evaluation Shell	ICOM Arrow	This includes a blank performance evaluation form that contains the information on the individual being rated. This may include (but not be limited to) name, SSN, rank, period of performance, rating scheme, and reason for evaluation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Performance Evidence	ICOM Arrow	Information provided to the buyer, confirming that the rendering of services or tendering of goods has been performed, including information for billing, collection and shipment planning. Order performance evidence is also used to update the Government supplier's asset record, to update goods in transit accounts, and to trigger the suppliers' receivables process for services.	
Performance Information	ICOM Arrow	This is the flow of actual performance data back into the control system so that actual performance can be compared with planned performance.	
Performance Information from Supplier	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOM: Performance Instrument Execution Information and Evidence of Goods Tendered and Services Rendered from External.	
Performance Parameter Information	ICOM Arrow	Those operational and support characteristics of the system that allow it to effectively and efficiently perform its assigned mission over time. The support characteristics of the system include both supportability of the design and the support elements for system operation. This includes Acquisition Program Baseline Information.	
Performance Summary	ICOM Arrow	This contains the results of analysis of actual performance against the financial and operational goals and objectives. Includes recommendation for modifications to the Resource and Performance Plan.	
Personnel Action Decision	ICOM Arrow	This includes all decisions made by an Approval Authority on a personnel action. The information will include documentation of a person's rights associated with the decision (e.g., right to appeal). The personnel action decision may include (but not be limited to) personnel action identifier, personnel action status, and personnel action status date and time.	
Personnel Action Decision Notification	ICOM Arrow	This includes the notification information to reflect the details of a decision made by an Approval Authority on a personnel action. The information may include (but not be limited to) decision recipient, notification date, personnel action identifier, and personnel action status.	
Personnel Allocation Information	ICOM Arrow	This is the current distribution of Personnel within the current organizational structure.	
Personnel Allocation Update Information	ICOM Arrow	This is the updated distribution of Personnel based on the current Manpower allocation.	
Personnel and Pay Debt Disposition Information	ICOM Arrow	This includes information associated with the execution of a debt disposition directing a waiver, remittance, partial payment for a personnel and pay related debt. This information may include (but not be limited to) debt type, debt amount, effective date of indebtedness, amount of to be written off from the original indebtedness. This information is the basis for an action in the Financial Visibility business area.	
Personnel Award Request	ICOM Arrow	This includes the award request information related to an award recipient, candidate or unit. The information may include (but not be limited to) award name, award recommendation, and award nominator.	
Personnel Classification Catalog Information	ICOM Arrow	This includes repository information associated with specifications and descriptions of all occupations or job families required to accomplish the mission taskings of the Department of Defense (DoD) within the overall context of the federal government. The information may include (but not be limited to) occupation identification information, job family information, eligibility specifications, service unique information (e.g., Air Force Specialty Code and Special Experience Identifiers, Army Military Occupation Specialty, Civilian Occupational Series) and related competencies.	
Personnel Classification Deficiency	ICOM Arrow	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring Department of Defense (DoD) modification to DoD occupations identified for a person. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), occupation proposal narrative, intended operational result of proposed competency development.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Classification Determination Request	ICOM Arrow	This includes information associated with personnel submitting a request for determination of a person's appropriate occupation family and occupation to be updated in the person's profile. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), Universal Joint Task List (UJTL) related item (e.g., Strategic Theater 1.1.2.6 Coordinate Joint Personnel Training and Tracking Activities, Strategic Theater 4.2.4 Establish and Coordinate Training of Joint and Combined Forces, narrative on exercise or combat operations related deficiency or problem, occupation identification information, job family information, eligibility specifications, service unique information (e.g., Air Force Specialty Code and Special Experience Identifiers, Army Military Occupation Specialty, Civilian Occupational Series) and related competencies. This request can based on personnel plan implementations needed to rebalance DoD human resources against evolving DoD mission requirements.	
Personnel Classification Proposal	ICOM Arrow	This includes information associated with personnel identifying a proposal potentially requiring Department of Defense (DoD) modification to DoD occupations identified for a person. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), occupation proposal narrative, intended operational result of proposed competency development.	
Personnel Development Catalog Information	ICOM Arrow	This includes bundled catalog information for personnel development (e.g., personnel classification catalog information, credential catalog information, individual training catalog information).	
Personnel Development Deficiency	ICOM Arrow	This includes bundled deficiency information for personnel development (e.g., personnel classification deficiency, credential deficiency, individual training deficiency).	
Personnel Development Plan	ICOM Arrow	This includes the personnel development plans (e.g., resource planning (classroom space, simulators, materials) and development requirements compared to operational competencies) that will aid in personnel development projections for future budget years.	
Personnel Development Profile Information	ICOM Arrow	This includes personnel development information that is associated with a personnel/pay record. The information may include (but not be limited to) specific course or test session information (e.g., location, projected seat identification, test identification information, test version identification) and records of management approvals of individual development actions and agreements as well as related retention agreements, assignment actions information and expense authorizations where required (e.g., foreign military, employees of other agencies), course results (e.g., course completion date, course withdrawal date, course withdrawal reason, course test scores, course honor designation (e.g., distinguished graduate, honor graduate)), formal training feedback, occupations, credentials, competencies, operational experience information, and service information.	
Personnel Development Profile Update Information	ICOM Arrow	This includes updated personnel development information that is associated with a personnel/pay record. The information may include (but not be limited to) specific course or test session information (e.g., location, projected seat identification, test identification information, test version identification) and records of management approvals of individual development actions and agreements as well as related retention agreements, assignment actions information and expense authorizations where required (e.g., foreign military, employees of other agencies), course results (e.g., student attendance information, course completion date, course withdrawal date, course withdrawal reason, course test scores, course honor designation (e.g., distinguished graduate, honor graduate)), formal training feedback, occupations, credentials, competencies, operational experience information, and service information.	
Personnel Development Proposal	ICOM Arrow	This includes bundled proposal information for personnel development (e.g., personnel classification proposal, credential proposal, individual training proposal).	
Personnel Development Proposal Assessment	ICOM Arrow	This includes bundled proposal assessment information for personnel development (e.g., personnel classification proposal assessment, credential proposal assessment, individual training proposal assessment).	
Personnel Distribution Approval Authority	ICOM Arrow	This includes personnel who perform activities associated with validating or non-validating personnel requirement requests.	
Personnel Distribution Guidance	ICOM Arrow	This includes personnel distribution guidance which is derived from warfighter personnel plans, budgetary, personnel, and manning guidance. The personnel distribution guidance is used in the creation of a personnel plans (e.g., personnel distribution plan).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Distribution Plan	ICOM Arrow	This includes a plan for the distribution of personnel resources against mission priorities. This information may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Personnel Distribution Specialist	ICOM Arrow	This includes personnel who perform activities associated with implementing the personnel distribution plan and processing personnel requirement requests.	
Personnel Grade Change Draft Order	ICOM Arrow	This includes information pertaining to a draft personnel grade change order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action.	
Personnel Grade Change Final Order	ICOM Arrow	This includes the information needed to document an approved order for a grade change personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decolmitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Personnel Grade Change Profile Information	ICOM Arrow	This includes the personnel grade change information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, promotion recommendations, promotion status, and demotion reasons, current and past assignments, awards and decorations, proficiency reports, performance/achievement, professional and technical knowledge, military proficiency, physical fitness and Service obligation.	
Personnel Grade Change Profile Update Information	ICOM Arrow	This includes updated personnel grade change information associated with a personnel/pay record. The information may include (but not be limited to) promotion recommendations, promotion status, and demotion reasons.	
Personnel Occupation Competency Information	ICOM Arrow	This includes occupation information associated with the competencies needed to sustain the classification structure specifications and descriptions of all occupations or job families required to accomplish the mission taskings of the Department of Defense (DoD) within the overall context of the federal government. The information may include (but not be limited to) competency identification information, related occupation and job family information, and competency performance specifications (e.g., ability to free fall, with full combat equipment, from altitudes in excess of 50,000 feet and deploy a parachute at altitudes of 5,000 feet and below; ability of a DoD civilian auditor to evaluate a DoD financial audit according to GAO standards for a clean audit, ability to execute federal common supplier contracting procedures).	
Personnel Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate an order. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Personnel Plan	ICOM Arrow	This includes the personnel plans (e.g., promotion, accession, retention, development, occupation) that will aid in personnel projections for future budget years.	
Personnel Plan Assessment	ICOM Arrow	This includes the personnel plans assessment feedback (e.g., promotion, accession, retention, development, occupation) that will aid in calculating the personnel projections for future budget years and related plan adjustments.	
Personnel Recovery Information	ICOM Arrow	This includes the aggregation of military, civil, and political efforts to recover captured, detained, evading, isolated or missing personnel from uncertain or hostile environments and denied areas. Personnel recovery may occur through military action, action by non-governmental organizations, other U.S. Government-approved action, and diplomatic initiatives, or through any combination of these options. This information may include (but not be limited to) date of mission, place of search, and any information relating to actions taken to find the person, including any evidence of the whereabouts and status of person arising from such actions.	
Personnel Recovery Request Information	ICOM Arrow	This includes a request to recover captured, detained, evading, isolated or missing personnel from uncertain or hostile environments and denied areas. This request may include (but not limited to) the aggregation of military, civil, and political efforts to recover place of search and any evidence of the whereabouts and status of person.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Requirement Request	ICOM Arrow	This includes a request for personnel implementing the requirements within the personnel distribution plan. This information may include (but not be limited to) request date, justification, recommendation, request quantity, occupational code, and Unit Identification Code (UIC).	
Personnel Requirement Request Response	ICOM Arrow	This includes any over or under requisitioning. This information may include (but not be limited to) requestor name, request date, requested quantity, discrepancy information, occupational code, Unit Identification Code (UIC), current authorization information, and current gain and loss information.	
Personnel Retention Profile Information	ICOM Arrow	This includes reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	
Personnel Retention Profile Update Information	ICOM Arrow	This includes updated reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	
Personnel Transfer Request	ICOM Arrow	This includes the request information related to a transfer. Transfer requests may be initiated by a Member or a gaining Service or component. Types of transfers may include interservice, intraservice, transfer between reserve categories, transfer between military personnel class (request to attend a commissioning source program (e.g., Service Academy, Officer Training School [OTS], Reserve Officers' Training Corp [OTC]), and transfer to and from active duty. The information on the transfer request may include (but not be limited to ) Member name, transfer type, current Service or component, desired Service or component, proof of eligibility for transfer, waiver request, and justification for transfer.)	
Physical Asset Inventory Information	ICOM Arrow	Information which indicates the physical inventory has been completed based on a temporal or ad hoc requirement. It is used to update the capital asset record that enables asset accountability either as an update to the capital asset record or the creation of the asset record, based on an inventory found event. This information also enables asset valuation.	
Physical Evaluation Appeal Disposition	ICOM Arrow	This includes an appeal decision on the Member's physical evaluation fit for duty disposition and/or physical evaluation severity rating disposition as a result of an appeal or mandatory review. The information may include (but not be limited to) Member name, current Service or component, appeal decision date, appeal status, and appeal justification.	
Physical Evaluation Appeal Request	ICOM Arrow	This includes official documentation of a Member's request for reconsideration of a fit for duty determination or disability severity rating disposition. The information may include (but not be limited to) the disposition being appealed, appeal request date, reason for request, and all documentation to support the appeal.	
Physical Evaluation Decision Notification	ICOM Arrow	This includes the documentation of a physical evaluation decision (e.g., physical evaluation fit for duty decision, physical performance evaluation disposition, physical evaluation severity rating disposition, and physical evaluation appeal disposition). The information may include (but not be limited to) the decision, decision date, notification date, and decision recipient.	
Physical Evaluation Fit for Duty Information	ICOM Arrow	This includes documentation (e.g., physical evaluation profile information, medical evaluation findings and continuation of service request) collected to support physical evaluation fit for duty decision. The information may include (but not be limited to) Member name, current Service or component, the decision, decision date, and justification for decision	
Physical Evaluation Profile Information	ICOM Arrow	This includes physical evaluation profile information associated with a personnel/pay record. This may include (but not be limited to) medical information (e.g., medical findings, history, exams, and tests), Physical Evaluation Board (PEB) information (e.g., PEB date and findings), personnel restriction information, duty status, line of duty determination, retirement documentation (e.g., official documents that record and report the temporary retirement of military personnel), benefit information (e.g., benefit type, start, and stop date), and duty information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Physical Evaluation Profile Update Information	ICOM Arrow	This includes updated physical evaluation profile information associated with a personnel/pay record. The information may include (but not be limited to) medical information (e.g., medical findings, history, exams, and tests), Physical Evaluation Board (PEB) information (e.g., PEB date and findings), personnel restriction information, duty status, line of duty determination, retirement documentation (e.g., official documents that record and report the temporary retirement of military personnel), benefit information (e.g., benefit type, start, and stop date), and duty information.	
Physical Evaluation Severity Rating Disposition	ICOM Arrow	This includes a decision made by an approval authority on a disability severity information for a Member found unfit for duty. The information may include (but not limited to) Member name, current Service or component, disability severity information updates, decision date, and justification for an update if applicable.	
Physical Performance Evaluation Disposition	ICOM Arrow	This includes personnel restriction information and the decision for the Member to be recommended for reclassification, restricted from performing certain duties, retained in current specialty, place on probation, or referred for a medical evaluation. The information may include (but not limited to) Member name, current Service or component, decision date, justification for decision, physical evaluation findings, and any other supporting documentation.	
Planning Communication from Supplier	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Communication from Supplier and Supplier Information.	
Plant Clearance Disposition	ICOM Arrow	The disposition of a contractor's request relative to property remaining at the end of contract performance.	
Plant Clearance Schedule	ICOM Arrow	The contractor notification to the government of property remaining at the end of performance of the contract.	
Populate Cost Performance Model Law Policy Reg	ICOM Arrow	Populate Cost Performance Model is constrained by the following: Public Law 106-531, USC Title 10, USC Title 31, USC Title 33, USC Title 37, SFFAS 4, SFFAS 9, SFFAS 18, SFFAS 30, SFFAS 35, SFFAC 1, SFFAC 2, SFFAC 3, SFFAC 4, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-127, JFMIP FFMSR-8, JFMIP - MCAIG, OFFM-NO-0106, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 08, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15.	
Populated Cost Performance Model	ICOM Arrow	Data accumulated by appropriate model element.	
Position Change Information	ICOM Arrow	This includes the position attribute modifications that occur due to changes to the organizational structure.	
Position Change Request	ICOM Arrow	A position change request is a bottom-up request (i.e., from the unit level to the Major Commands) to change number of positions or position attributes (i.e., grade change).	
Post to General Ledger Law Policy Reg	ICOM Arrow	Post to General Ledger is constrained by the following: Public Law 097-255, Public Law 101-576, Public Law 103-356, Public Law 104-208, Public Law 105-264, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, Executive Order 13327, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 5, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 11, SFFAS 12, SFFAS 13, SFFAS 16, SFFAS 18, SFFAS 19, SFFAS 23, SFFAS 24, SFFAS 25, SFFAS 27, SFFAS 29, SFFAS 31, SFFAS 35, SFFAC 1, SFFAC 2, SFFAC 3, SFFAC 4, FFAA Tech Release 2, GAO Title 2, OMB Circular A-11, OMB Circular A-50, OMB Circular A-110, OMB Circular A-123, OMB Circular A-127, OMB Circular A-134, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, TFM Vol 1 Part 2, TFM Vol 1 Part 3, TFM Vol 1 Part 5, TFM Vol 1 Part 6, APG, TFM Bulletin 2011-04, MFR, JFMIP FFMSR-8, JFMIP - MCAIG, JFMIP SR-99-4, JFMIP SR-99-5, JFMIP SR-99-8, JFMIP SR-99-9, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, JFMIP SR-03-02, OFFM-NO-0106, SFFBP, DoDD 8500.01E, DoDI 5000.64, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4140.1-R, DoD 5400.11-R.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Pre Payment Information	ICOM Arrow	The prepayment information to the seller. This is to notify the seller that a prepayment has been made before goods and/or services are received.	
Pre Payment Pro Forma Entries	ICOM Arrow	Prepayment pro forma entries are the general ledger transactions generated to record an expense that was paid in advance. These pro forma entries consist of using business information pertaining to prepaid expenses captured during operations to determine the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts).	
Pre Solicitation Notice	ICOM Arrow	Notification to the commercial marketplace of an existing or potential requirement.	
Prepaid Expense Adjustment	ICOM Arrow	As resources, for which a prepayment was previously recorded, are consumed, the amount of the prepaid asset is decreased and an actual expense is recorded. The resource consumption may be supported by a periodic journal voucher or an invoice or some other documentation provided by a service provider.	
Prepare Certified Business Partner Payment Law Policy Reg	ICOM Arrow	Prepare Certified Business Partner Payment is constrained by the following: CFR Title 48, DoD 5105.38-M.	
Prepare DoD Submission for President's Budget Law Policy Reg	ICOM Arrow	Prepare DoD Submission for President's Budget is constrained by the following: Public Law 101-576, Public Law 103-62, Public Law 103-356, Public Law 107-296, Public Law 107-347, USC Title 5, USC Title 10, USC Title 22, USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 38, USC Title 40, USC Title 42, USC Title 50, SFFAS 4, SFFAS 18, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-102, OMB Circular A-127, OMB Circular A-129, OMB Circular A-130, OMB Circular A-136, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP SR-00-01, JFMIP SR-01-04, JFMIP SR-02-02, JFMIP SR-03-01, OFFM-NO-0106, DoDD 8000.01, DoDD 8500.01E, CJCSI 3137.01, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD 5105.38-M, DoD FMR Vol 01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 14, DoD FMR Vol 15, DoD 5400.11-R, JFTR Vol 1.	
Prepared Testimony	ICOM Arrow	Prepared testimony are materials required to support the congressional budget review. A testimony could include a witness statement. The witness statement must include the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing. A biographical sketch of the witness should be included in the witness statement.	
Presidents Management Agenda	ICOM Arrow	The President's Management Agenda consists of the administration's strategy for improving the management of the Federal government. It focuses on five areas of management weakness across the government where improvements and the most progress can be made.	
Procurement Change Request	ICOM Arrow	A request for modification to a sourced procurement.	
Procurement Instrument Closure Information	ICOM Arrow	All information related to completion of the buyer's final procurement instrument closeout process including, but not limited to, closeout details and requesting decommitments, if necessary. This also includes any adjustments to closure information.	
Procurement Instrument Execution Information	ICOM Arrow	Data received from the supplier during the monitoring of contract processes based on the execution of services or providing of products stipulated in a contract, used to assess supplier performance and contract status.	
Procurement Instrument Execution Information from External	ICOM Arrow	Information from external sources such as audits (e.g. DCAA). Used in evaluating the vendor performance on the current contract.	
Procurement Instrument Performance Information	ICOM Arrow	Information on the vendor's performance against the contract to be used in evaluating their ability to perform future contracts.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Procurement Request	ICOM Arrow	<p>Document which describes the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.</p> <p>This is a parent ICOM composed of the following Children:</p> <ul style="list-style-type: none"> <li>Service Procurement Request (child)</li> <li>Transportation Procurement Request (child)</li> <li>Modeling Services Procurement Request (child)</li> <li>Benefit Procurement Request (child)</li> </ul>	
Product Hazard Data Deficiency Notification	ICOM Arrow	Notification that product hazard data (PHD) in the master product hazard data (MPHD) warehouse may have incorrect, incomplete or missing data. This notification requires the PHD to be reviewed and if necessary, corrected or updated.	
Product Hazard Data Request to Source	ICOM Arrow	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Product Hazard Data Requirement	ICOM Arrow	The product hazard data (PHD) that is required to complete a PHD data set that was found to be incomplete during validation.	
Product Hazard Data Response from Source	ICOM Arrow	A response (eg. email or letter) from a source (eg. manufacturer, supplier or vendor) to a DoD request for product hazard data (PHD). The response may include the requested PHD or an indication as to whether the PHD is available.	
Product Hazard Data Status Update	ICOM Arrow	The update on the status of the Component request for PHD that is sent to the requestor. This update may contain instructions on how to access the requested PHD, notification that the PHD is pending or notification that the PHD is not available.	
Product Surveillance Information	ICOM Arrow	Report of monitoring contractor performance to the delivery schedule of the contract.	
Program Analysis Information	ICOM Arrow	This is the corporate knowledge resulting from programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios.	
Program and Budget Information	ICOM Arrow	<p>Program and Budget Information include the following: On-year--DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year--The DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g.. cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.</p>	
Program and Budget Input Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: SECDEF Joint Programming Guidance Decision, SECDEF Budget Decision, Comptroller Update, Cancellation of Budgetary Resources, Approved Apportionment, Unapportioned Funds, Testimonial Document, Reprogramming Requirement, Reclama, Rebaseline Input, Detailed Justification Material, Continuing Resolution Act Estimate, Components Response, Component Feedback, Component Apportionment Request, Baseline Input, Appeal Material, Additional Program Information, and Additional Temporary Funding Requirement.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Program and Budget Output Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Unapproved Transfer Request, OSD Transfer Decision, OMB Transfer Decision, Impact Statement, Report of Programs, Baseline Report, Base for Programming, Work Schedule, Unapproved Reprogramming Requirement, Unapproved Reprogramming Request, Unapproved Additional Temporary Requirement, Technical Programming Guidance, Rebaseline Report, Program Decision Memorandum, Program Budget Decision, Other Budget Decision, Notification of Adjustment, Joint Programming Guidance, Fiscal Guidance, Draft Reconciled Report, Draft Budget Decision, Draft Baseline Report, Continuing Resolution Amount, Continuing Resolution Act Estimate Request, Congressional Tracking Report, Budget Planning Memorandum, Appeal Submission Instructions, and Additional Program Information Request.	
Program and Funding Document	ICOM Arrow	This document establishes legal and fiduciary responsibility of funds. This is an OSD released document that reflects OSD's approval of program funding levels. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Program Assessment	ICOM Arrow	This information provides program analysis regarding functional performance, cost effectiveness, contract instruments and interoperability (e.g. systems and services) for the purpose of managing the program portfolio.	
Program Budget Decision	ICOM Arrow	A budget decision document issued during the joint review of DoD Component budget submissions by analysts of the OSD and the OMB. PBDs reflect the decisions of the SECDEF as to appropriate program and funding to be included in the annual defense budget request which, in turn, is included in the President's Budget.	
Program Decision	ICOM Arrow	This is the outcome from the "Develop and Resolve Programmatic Issues" activity that addresses program issues across Component. It is the documentation produced after completing coordination within OSD and Components to reach agreements/resolution. After the issues are considered by the SLRG, the Deputy SECDEF makes a preliminary decision on each one as input to the PDM process.	
Program Decision Memorandum	ICOM Arrow	The Program Decision Memorandum formally documents the directives from the Deputy and Secretary of Defense to the Defense Components on issues raised during POM review. The issuance of the Program Decision Memorandum to DoD Components, the Chairman, Joint Chiefs of Staff, and OMB completes the Programming process.	
Program Deviation Reporting Information	ICOM Arrow	This is the information describing baseline deviations (also called breaches) to the Defense Acquisition Executives (DAEs) and Component Acquisition Executives (CAEs), and when appropriate to Congress.	
Program Information	ICOM Arrow	Program information consists of Operations and Maintenance TOA, Procurement TOA data, RDT&E TOA data and Military Construction TOA data which are used to update the FYDP.	
Program Objective Memorandum	ICOM Arrow	Issued during the even-numbered On-Budget years, contains recommended programming and resource allocations. Document includes the projected force structure and list of priorities. The Program Objective Memorandum (POM) includes the dollar amount. The POM (DoDI 7045.7): Annually, each Military Department and Defense Agency shall prepare and submit to the Secretary of Defense a POM that is consistent with the strategy and guidance, both programmatic and fiscal, as stated in the DPG. Major issues that are required to be resolved during the year of submission must be identified. Supporting information for POMs will be in accordance with the annual POM Preparation Instructions or requirements established by DoD Directive or Instruction.	
Program Requirement	ICOM Arrow	The need and/or demand for personnel, equipment, facilities, other resources, or services, by specified quantities for specific periods of time or at a specified time.	
Program Resource Analysis Information	ICOM Arrow	This is the corporate knowledge resulting from long range programmatic analysis of investment areas, affordability, acquisition alternatives, and funding controls.	
Program Review Analysis	ICOM Arrow	Program review analysis is the result of the review, analysis, and evaluation of submitted programs from components. The information could include the OSD/JCS assessment on the capabilities of the programs in executing approved strategies and policies. In addition, the review and analysis also includes the compliance to the guidelines and constraints set by OSD for the development of the component's POMs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Program Scope	ICOM Arrow	In project management, the scope of a project is the sum total of all of its products and their requirements or features (Guide to the PMBOK). Sometimes the term scope is used to mean the totality of work needed to complete a project. In traditional project management, the tools to describe a project's scope are the product breakdown structure and product descriptions. The primary tool to describe a project's scope (work) is the WBS.	
Program Work Breakdown Structure	ICOM Arrow	The WBS structure that encompasses an entire program. It consists of at least three levels of the program with associated definitions and is used by the government PM and contractor to develop and extend a CWBS. Examples of WBS for various items which may be used as a guide for acquisition programs are contained in Military Handbook (MIL-HDBK)881.	
Programmed Manpower Report	ICOM Arrow	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain information on Manpower authorizations to include the corresponding funding information.	
Project Approval Request	ICOM Arrow	This is information that is required when an architectural design has reached a certain milestone (currently 35% completion). This authorization request enables the technical, business and financial review of the engineering of architectural design to ensure it meets the stated objectives and requirements. If approved the design project can be completed. If the project is not approved the design may be deferred or cancelled.	
Project Approval Response	ICOM Arrow	This is documentation informing the executing agent that the design project has been approved and can be completed.	
Project Not Approved	ICOM Arrow	Documentation that the project has not been approved by Congress.	
Project Status Information	ICOM Arrow	This is information that identifies the status/ work-in progress such as budget, percentage of completion against the schedule of construction, installations support services, and disposal projects.	
Promotion Appeal Documentation	ICOM Arrow	This includes the appeals package which contains the appeals memorandum, as well as any supporting documentation. The information may include (but not be limited to) justification, recommendations, and appeal date.	
Promotion Criteria	ICOM Arrow	This includes promotion information that is needed to determine if a Member has satisfied the requirements for a promotion. The information may include (but not be limited to) composite score, test date, time in service, time in grade, and Service cutoff scores.	
Promotion List	ICOM Arrow	This includes the final approved promotion list which consists of Members that have been approved to receive a promotion. The information may include (but not be limited to) grade, rank, occupation code, and position.	
Promotion Notification	ICOM Arrow	This includes the notification information to reflect the details of a promotion decision. The information may include (but not be limited to) decision recipient, notification date, personnel action identifier, and promotion status.	
Promotion Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate a promotion order pertaining to personnel. The information may include (but not be limited to) promotion acceptance or declination, personnel action status, personnel action start date, and personnel action identifier.	
Promotion Requirement Results	ICOM Arrow	This includes the results associated with the completion of promotion requirements. The information may include (but not be limited to) Promotion Board or Special Selection Board outcomes and promotion test scores.	
Property Expense	ICOM Arrow	This represents expensed costs associated with both personal and real property assets or items. For real property, it includes costs that are expensed from the CIP account based on the cancellation of a construction design project. It also includes costs such as costs associated with federal dollars that are expended on non-federal constructed assets. These costs are posted to the general ledger.	
Property Information Request	ICOM Arrow	A communication to the property community to obtain authoritative property information needed for EL reconciliation with property assets.	
Proposal	ICOM Arrow	A legal offer from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided. For sole source, this includes cost or pricing data.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Proposal Decision	ICOM Arrow	Decision from the Control Board regarding the proposed changes to SFIS, Calendar, Chart of Accounts, and Pro Forma Entries.	
Proposed Human Resources Management Policy and Guidance	ICOM Arrow	This includes a proposed Human Resources Management (HRM) policy and guidance document that will be sent to the appropriate parties for coordination and final approval. Proposed HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, and policy change summary description.	
Proposed Personnel Requirement Request	ICOM Arrow	This includes a request for un-forecasted personnel requirements from appropriate parties. This information may include (but not be limited to) requestor name, request date, justification, request quantity, occupational code, and Unit Identification Code (UIC).	
Prospect Location Information	ICOM Arrow	This information includes location where prospect can be found (e.g., A schools, colleges, shopping centers, and areas of entertainment). This information may include (but not be limited to) school name, school address, date of visit, tier-level evaluation.

Provide Personnel Requirement Request Decision Law Policy Reg	ICOM Arrow	Provide Personnel Requirement Request Decision is constrained by the following: Public Law 107-296, NDAA 2013, USC Title 5, USC Title 10, USC Title 31, USC Title 32, USC Title 37, SFFAS 5, OMB Circular A-11, OMB Circular A-21, OMB Memo 04-04, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-01-01, JFMIP SR-02-02, DoDD 1322.18, DoDD 5124.02, DoDD 5158.04, DoDD 7730.65, DoDD 8320.02, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, JP 1_02, Joint Pub 3-0, DoDI 1120.11, DoDI 1300.18, DoDI 1300.19, DoDI 1304.12E, DoDI 1304.26, DoDI 1322.10, DoDI 1330.21, DoDI 1332.38, DoDI 4161.2, DoDI 5160.70, DoDI 5160.71, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 05, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Public Draft Request for Proposal	ICOM Arrow	This is a draft request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been made public for comment. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Purchase Card Holder Information Request	ICOM Arrow	This is a request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) request date and time, requested information, and requestor name.	
Purchase Card Holder Information Response	ICOM Arrow	This is a response to an information request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) response date and time and member's or government civilian's information.	
Purchase Card Log	ICOM Arrow	A log in which the card holder documents individual orders or purchases and screening for mandatory sources when using the purchase card and/or convenience checks. Entries in the purchase log may be supported by internal agency documentation (e.g., request for procurement document or e-mail request). The purchase card documentation should provide an audit trail supporting the decision to use the card and any required special approvals that were obtained. At a minimum, the log will contain the date on which the item(s) or service(s) were ordered, the merchant's name, the dollar amount of the transaction, a description of the item(s) or service(s) ordered, and the date and name of who accepted the item(s) or service(s).	
Purchase Card Requirement	ICOM Arrow	Purchase card requirements are for authorized government purchases, subject to established limitations on transaction amount, billing cycle amount, and merchant category codes (MCCs) which are defined in Department of Defense Government Charge Card Guidebook, Appendix I. Does not include Fuel, Fleet, or Travel Purchases.	
Purchase Card Transactions	ICOM Arrow	A listing of purchase card transactions transmitted from the Bank.	
Purchase Investment Request	ICOM Arrow	Request sent to the Department of U.S. Treasury to purchase Treasury certificates for investment.	
Purchase Request	ICOM Arrow	Document which describes the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
Purchase Request Information	ICOM Arrow	This parent ICOM is a combination of the following Children: Rejected Purchase Request Accepted Purchase Request	
QoL Approval Authority	ICOM Arrow	This represents personnel who perform decision-making activities (e.g., approving or disapproving program proposals, program plans, and program action decisions). This may also include (but not be limited to) personnel who approve or disapprove DoD personnel, their families, and other eligible individuals to participate in Quality of Life programs (e.g., Family Support programs, and Morale, Welfare and Recreation programs).	
QoL Information Request	ICOM Arrow	This includes a request for information about a Quality of Life (QoL) program(s). This may be specific or a request for aggregate information concerning QoL efforts.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
QoL Program Assessment Information	ICOM Arrow	This includes information pertaining to assessments and audits of Quality of Life (QoL) programs. This may include (but not be limited to) information used to improve program performance, proposed revisions to program standards, the recommendation to disestablish a QoL program (e.g., information about the financial and real property assets of the program, the disestablishment plan, cause of program termination, assessment history), and information used in a comparative analysis against other QoL programs and their assessments.	
QoL Program Assistance Notification	ICOM Arrow	This includes a notification to a Department of Defense (DoD) entity, non-DoD entity, or foreign government for assistance relating to delivering or coordinating Quality of Life (QoL) programs (e.g., coordination with customs when entertainment groups travel to installations overseas).	
QoL Program Assistance Response	ICOM Arrow	This includes a response to a Quality of Life (QoL) program assistance notification from a Department of Defense (DoD) entity, non-DoD entity, or foreign government relating to delivering or coordinating QoL programs.	
QoL Program Decision	ICOM Arrow	This includes the notification information to reflect the details of a decision made by an Approval Authority on a Quality of Life (QoL) program action. The information may include (but not be limited to) decision recipient, notification date, QoL program action identifier, and QoL program action status.	
QoL Program Decision Notification	ICOM Arrow	This includes the notification information to reflect the details of a decision made by an Approval Authority on a Quality of Life (QoL) program action. The information may include (but not be limited to) decision recipient, notification date, QoL program action identifier, and QoL program action status (e.g., approval or disapproval).	
QoL Program Evaluation Information	ICOM Arrow	This includes information relating to a Quality of Life program that may be used for program maintenance or evaluation. This information may include (but not be limited to) usage/enrollment information, funding metrics, use of resources, accessibility, effectiveness, and responsiveness to the needs of DoD personnel and their families and effects on readiness and retention.	
QoL Program Feedback Information	ICOM Arrow	This includes feedback information about the quality, effectiveness, or other comments or complaints about a Quality of Life (QoL) program or lack thereof. This information is used to assist in assessing the effectiveness of a QoL program and generating program assessment information, program standards feedback information, and QoL program reports. This feedback information may be informal (e.g., a comment captured by the program staff, suggested revisions to a program to improve effectiveness) or formal (e.g., a letter of complaint written to the appropriate command, survey results from QoL program participants and their families.).	
QoL Program Feedback Request	ICOM Arrow	This includes a request for feedback about the quality, effectiveness, or other comments or complaints about a Quality of Life (QoL) program or lack thereof. This information will be used to assist in assessing the effectiveness of a QoL program and generating program assessment information, program standards feedback information, and QoL program reports. Feedback may be requested informally (e.g., program staff capturing comments from program participants) or formally (e.g., sending out surveys to QoL program participants and their families).	
QoL Program Information	ICOM Arrow	This includes consolidated information about the status and performance of a Quality of Life (QoL) program or programs (e.g., fiscal information, resource utilization, and program history, effectiveness, and enrollment statistics).	
QoL Program Planning Document	ICOM Arrow	This includes information relating to Quality of Life (QoL) program plans. This information may include (but not be limited to) short and long-term plans for QoL programs (e.g., planned reviews of programs and financial resourcing ensuring that program delivery is consistent with the DoD Component and Military Services' goals and objectives, and information describing how to align program goals and objectives with resourcing, responsibilities, and implementation programming).	
QoL Program Proposal	ICOM Arrow	This includes information associated with a proposal for a modification to or the establishment of a specific Quality of Life (QoL) program. The information may include (but not be limited to) requestor personal information (e.g., name ID number, organization), narrative on the nature of the proposed modification or establishment, and data or projections related to the modified or new QoL program being proposed (e.g., projected usage numbers, expenses, revenues, future development plans).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
QoL Program Report	ICOM Arrow	This includes reporting information related to Quality of Life (QoL) programs. This may be a response to a QoL program information request, or it may be a report that is released at regularly scheduled intervals about the effectiveness of QoL programs (individually or in aggregate) at achieving mission goals and objectives.	
QoL Program Standards Document	ICOM Arrow	This includes standards information for Quality of Life (QoL) programs against which these programs are held accountable. This information is developed in an iterative manner through analysis of historically effective standards and current strategy and policy, and it may be specific to certain aspects of the programs (e.g., financial, performance, utilization).	
QoL Specialist	ICOM Arrow	This represents personnel who perform Quality of Life (QoL) program management activities (e.g., identifying a candidate QoL program, developing a QoL program, maintaining a QoL program, and assessing a QoL program) and administrative activities (e.g., performing enrollment processes, providing services, collecting and documenting information, performing follow-up, collecting feedback and producing reports) associated with developing and delivering Quality of Life programs (e.g., Family Support programs, and Morale, Welfare and Recreation programs).	
Quadrennial Defense Review	ICOM Arrow	A comprehensive examination of America's defense needs to include potential threats, strategy, force structure, readiness posture, military modernization programs, defense infrastructure, and information operations and intelligence that is conducted by law every 4 years at the beginning of a new administration. The Quadrennial Defense Review is strategy-driven, not budget-driven, so that the decision makers can assess the risk of not having the desired amount of resources to meet the requirements.	
Real Property and Installations Lifecycle Management	ICOM Arrow	The Real Property Installations Lifecycle Management Core Business Mission governs the execution of Real Property Construction, Restoration, Modernization, Sustainment, Installation Operations, Services, and Real Property Disposal to fulfill a business requirement.	
Real Property Asset Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used for maintaining asset information.	
Real Property Asset Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the process of maintaining asset information.	
Real Property Asset Geospatial Analysis Results	ICOM Arrow	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the process of maintaining asset information for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Asset Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed for a real property asset.	
Real Property Asset Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of maintaining asset information.	
Real Property Build and Maintenance Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used for real property construction and maintenance.	
Real Property Build and Maintenance Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Analysis Results	ICOM Arrow	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the processes supporting the building or maintaining of real property.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Real Property Build and Maintenance Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the processes supporting the building or maintaining of real property for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Build and Maintenance Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed to support the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during construction or maintenance of real property.	
Real Property Build and Maintenance Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of building and maintaining real property.	
Real Property Discrepancy Report	ICOM Arrow	Contains information regarding time and costs of correcting deficiencies.	
Real Property Disposal Requirement	ICOM Arrow	This is information regarding the method of disposal determined for a real property asset. This information is used to plan the execution of a real property disposal action.	
Real Property Information Request	ICOM Arrow	A request for real property information related to specific site(s) and / or facilities on those sites. The information will include, but is not limited to, the status of the site and / or facility.	
Real Property Information Response	ICOM Arrow	A response for real property information related to specific site(s) and / or facilities on those sites. The information will include, but is not limited to, the status of the site and / or facility.	
Real Property Installation Geo-enabled Visualized Information	ICOM Arrow	This is geo-enabled information needed for visualized products used for installation support.	
Real Property Installation Geospatial Analysis Requirements	ICOM Arrow	This is a request for geospatial analysis of information needed during the installation support processes.	
Real Property Installation Geospatial Analysis Results	ICOM Arrow	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the installation support processes.	
Real Property Installation Geospatial Data Package	ICOM Arrow	This is the geospatial information needed during the installation support processes for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Installation Geospatial Information Request	ICOM Arrow	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the installation support processes.	
Real Property Installation Geospatial Information Requirements	ICOM Arrow	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed for installation support.	
Real Property Installation Geospatial Product Request	ICOM Arrow	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed for installation support processes.	
Real Property Installation Geospatial Update Request	ICOM Arrow	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the installation support processes.	
Real Property Installed Equipment Recovered Information	ICOM Arrow	This is the information that indicates that a real property disposal action has occurred and real property installed equipment has been recovered and sent to logistics for return or disposal. For example, during a real property demolition action a Heating, Ventilation and Air Conditioning (HVAC) system may be recovered and provided to logistics for storage, maintenance, return to vendor, sale or destruction.	
Real Property Outgrant Executed Notification	ICOM Arrow	This is the information which indicates that a Real Property Outgrant transaction has been executed and the real property is available for use by the external customer or user.	
Real Property Placed in Service Information	ICOM Arrow	Information that a real property asset is available for use by DoD. This acknowledges that an interim Transfer and Acceptance of Military Real Property document is signed, title for assets listed on the acceptance form is transferred, and the punch list of additional work and certificate of occupancy by local authorities are attached to the acceptance form. This information confirms that the government assumes liability and the warranties begin for the asset to which DoD has received title.	
Reapportionment Request	ICOM Arrow	Request submitted to OMB within 10 days of appropriation or substantive act providing budget authority asking for apportionment of unapproved deferral or rescission funds.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Rebaseline Input	ICOM Arrow	Input sent from the components to the Comptroller for incorporation into the rebaseline report.	
Rebaseline Report	ICOM Arrow	Rebaseline report that incorporates components feedback for submission to the congress for approval. Once this rebaseline report is approved, a new baseline report will be generated.	
Receipt Account Trial Balance and Ledgers	ICOM Arrow	Receipt Account Trial Balance and Ledgers statement contains detailed receipt transactions and balances reported by the Department of Defense during the month. This statement discloses information related to balances forwarded, current month receipts and month end account totals. It also provides the receipt balances by fund account symbol and department and collections and/or deposits of funds in accounts that are not immediately available for expenditure.	
Receivable File	ICOM Arrow	Receivable file that includes the sale of the investment asset for recording accounts receivable and recognizing revenue associated with that receivable.	
Receivable Pro Forma Entries	ICOM Arrow	The debit and credit affects of receivable pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Receivable Schedule	ICOM Arrow	The receivable schedule represents the payment schedule agreed to by the customer.	
Receive and Accept Purchase Request Law Policy Reg	ICOM Arrow	Receive and Accept Purchase Request is constrained by the following: Public Law 112-194, NDAA 2013, CFR Title 48, DFARS, TCEES.	
Reclama	ICOM Arrow	A request to duly constituted authority to reconsider its decision or its proposed action. This information provides the components the opportunity to express their position in the budget decisions.	
Recognition Program Profile Information	ICOM Arrow	This includes the recognition information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, award type, unit identification code (UIC), and award start and stop date.	
Recognition Program Profile Update Information	ICOM Arrow	This includes updated recognition program information associated with a personnel/pay record. The information may include (but not be limited to) award type, unit identification code (UIC), and award start and stop date.	
Recommendation on Export Request	ICOM Arrow	This is the recommendation to Department of Commerce or the Department of State regarding the request for the export of DoD technology.	
Recommended Acquisition Program Baseline	ICOM Arrow	This is the submission of recommended key cost, schedule, performance parameters, and other cost constraints, objectives, or thresholds for program milestones for approval by the Milestone Decision Authority.	
Record Loans and Grants Law Policy Reg	ICOM Arrow	Record Loans and Grants is constrained by the following: USC Title 5, USC Title 10, USC Title 20, USC Title 22, USC Title 31, USC Title 33, USC Title 37, USC Title 38, USC Title 42, OMB Circular A-11, OMB Circular A-127, MFR, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 11A, DoD FMR Vol 12, DoD FMR Vol 15.	
Recovered Property Information	ICOM Arrow	This is information on property that has been recovered during a disposal action (e.g., demolition). This may include disposition of recovered real property installed equipment such as a Heating, Ventilation, and Air Conditioning (HVAC) system.	
Recoveries from Unobligated Balance	ICOM Arrow	Broad responsibility by Congress that Government agencies have the power to spend federal funds recovered from prior year obligations, both expired and unexpired. Congress can specify availability and criteria for spending these funds. Recoveries from unobligated balances includes the both actual and anticipated funds, regardless of whether expired and unexpired at the time of recovery.	
Recruitment Applicant Information	ICOM Arrow	This includes all the information necessary for a recruitment applicant to apply to the Department of Defense (DoD). This information may include (but not be limited to) personal information, school transcripts, resume, contact information, birth certificate, social security card and permanent resident card (i.e., green card).	
Recruitment Mitigation Plan	ICOM Arrow	This includes a mitigation plan for an applicant that failed any part of the recruiting or accession process. This information may include (but not be limited to) name, goals to be completed, and dates of goal completion.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Recruitment Profile Information	ICOM Arrow	This includes recruitment information that is associated with a personal/pay record. This may include (but not be limited to) personnel information on a recruit, information related to recruitment interview, eligibility information and waivers associated with the recruit.	
Recruitment Profile Update Information	ICOM Arrow	This includes updated recruitment information that is associated with a personal/pay record. This may include (but not be limited to) personnel information on a recruit, information related to recruitment interview, eligibility information and waivers associated with the recruit, accessions processing scheduling results, and information associated with the signed enlistment agreement (DD Form 4).	
Reduction in Force Information	ICOM Arrow	This includes information that states that the military force must be reduced by a certain amount or percentage. This information includes what criteria to select personnel for separation or transfer to reserve status. This information also includes what military components must reduce their force and how quickly the reduction must occur.	
Referred Debt	ICOM Arrow	This is the referral of debts to external sources for collection action. This includes referral of uncollected debts to Department of the Treasury, Department of Justice or private collection agencies.	
Reimbursable Bill	ICOM Arrow	The reimbursable bill is a request for payment for specific goods or services provided within the terms and conditions of the contract.	
Rejected Payment Request	ICOM Arrow	This information reflects a payment request that has failed one or more aspects of the matching process. The rejected payment request is sent back to the originating source for correction and resubmission.	
Rejected Purchase Request	ICOM Arrow	Document which has been reviewed by the procurement organization and found to not adequately describe the required supplies or services for a procurement to be initiated.	
Rejection of Goods or Services Notification	ICOM Arrow	Notification that goods or services have not been accepted.	
Release Order Signal	ICOM Arrow	An order issued by a logistics manager to a storage activity within the same supply distribution network to release and ship materiel, or to a transportation manager to move forces (i.e., personnel and materiel).	
Relieve Asset Valuation Law Policy Reg	ICOM Arrow	Relieve Asset Valuation is constrained by the following: USC Title 31, USC Title 32, USC Title 33, USC Title 37, USC Title 40, USC Title 42, USC Title 43, Executive Order 12906, Executive Order 13327, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 5, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 14, SFFAS 19, SFFAS 23, FFAA Tech Release 2, GAO Title 2, OMB Circular A-11, OMB Circular A-16, OMB Circular A-21, OMB Circular A-50, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP FFMSR-8, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-02-02, JFMIP SR-03-01, JFMIP SR 03-02, OFFM-NO-0106, DoDD 4140.1, DoDD 8500.01E, DoDI 4165.14, DoDI 5000.64, DoDI 8320.04, DoDI 8500.2, DoDI 8510.01, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, ICPS.	
Remittance Information	ICOM Arrow	This is information associated with remittance forwarded to the disbursing activity and may include copies of IPAC listings, checks, coupons, food stamp vouchers, WIC vouchers and various forms of correspondence.	
Renewable Energy Potential Mission Impact Information	ICOM Arrow	Information about impacts to installation mission requirements that may result from implementing a given renewable energy project.	
Renewable Energy Potential Mission Impact Information Request	ICOM Arrow	A request for information about impacts to installation mission requirements that may result from implementing a given renewable energy project.	
Renewable Energy Production and Purchase Information	ICOM Arrow	Information about the energy reporting category, renewable energy reporting, and renewable energy related goals that are required to manage renewable energy production and purchase.	
Renewable Energy Production and Purchase Management Information	ICOM Arrow	Information generated for program management of renewable energy production and purchase.	
Renewable Energy Project Approval Document	ICOM Arrow	Documentation of the authorization to, and the requirements (scope and desired outcomes) for, implementing a renewable energy project.	
Renewable Energy Project Execution Information	ICOM Arrow	Information needed to enter a contract to execute a renewable energy project.	
Replacement Financial Instrument Request	ICOM Arrow	This is the request for the issuance of a replacement check due to the original check being lost, stolen, mutilated or not received by the payee. This request will be processed by the disbursing activity resulting in the generation of a stop pay request to the Department of Treasury.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Replenishment Stock Request	ICOM Arrow	Demand that is generated at that point at which a stock replenishment requisition shall be submitted to maintain the predetermined or calculated stockage objective. For demand-based computations, the reorder point equals the sum of the safety level of supply, the level for ordering and shipping time, repair-cycle level (for reparable items), and authorized additive levels.	
Report of Programs	ICOM Arrow	The Report of Programs provides programs performance and cost information. The report of program breaks out of programs by appropriation groupings with performance measures based on the Department's missions and outputs.	
Reprogramming Action	ICOM Arrow	Realignment of budget authority from the purpose for which it was originally appropriated to finance another (usually emergent, unfunded) requirement. A necessary, desirable, and timely device during execution of Defense programs for achieving flexibility in the use of DoD funds provided in appropriation acts.	
Reprogramming Package	ICOM Arrow	Describes the Agency's requests and justifications to move funds among programs and may include more than one reprogramming.	
Reprogramming Request	ICOM Arrow	Reprogramming request sent to OMB to realign funds from one program to another.	
Reprogramming Request Response	ICOM Arrow	This is OMB's response on the department's reprogramming request.	
Reprogramming Requirement	ICOM Arrow	Reprogramming requirement to justify request for reprogramming actions.	
Request Approval from Accounting Control Board	ICOM Arrow	Interpreted general ledger structure change proposal is submitted to control board for approval or disapproval. Develop finalized cost assessment, impact statements and pros and or cons of making changes.	
Request Approved by Accounting Control Board	ICOM Arrow	As a result of the Cost And Revenue Performance Management domain identifying and approving a legitimate departure from organizational standards, this message communicates the Accounting Control Board's approval of the departure from organizational standards.	
Request Clarification of Anomaly	ICOM Arrow	This is a request to a data owner to clarify an anomaly that has been identified. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule.	
Request for Acquisition Information for Congressional and Federal Inquiry	ICOM Arrow	This is the request for acquisition information required to respond to inquiries from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Request for Additional Continuing Resolution Amount	ICOM Arrow	A request for additional continuing resolution act amount sent to OMB for review and comment.	
Request for Administrative Offset	ICOM Arrow	This includes information for an administrative offset against amounts payable to indebted parties. This would be a salary offset for employees or an administrative payable offset for vendors.	
Request for Corrective Action	ICOM Arrow	Request to DoD's functional area for recording correcting business event identified during initial Trial Balance analysis.	
Request for Disposition	ICOM Arrow	This is an inquiry into the terms and conditions of the contract and a request to receive weapons systems lifecycle guidance to determine if returns or disposals are warranted and to receive final settlement instructions.	
Request for DoD Technology Export	ICOM Arrow	This is a U.S. industry request from the Department of Commerce or the Department of State for threat evaluation and recommendation regarding the export of DoD technology.	
Request for Increased Reimbursable Authority	ICOM Arrow	A request for an increase of budgetary reimbursable authority to allow the government supplier to enter an intragovernmental transaction.	
Request for Narrative and Footnote Information	ICOM Arrow	Requests for information required for narrative disclosures that is not captured in the SGL or in the SFIS.	
Request for Non DoD or Operational Threat Assessment	ICOM Arrow	This is a request for threat assessment considerations and information from Federal Agency, Joint Warfighter or scientific community.	
Request for Proposal	ICOM Arrow	A request for a legal offer from the supplier to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided.	
Request for Refund	ICOM Arrow	Request for a refund payment to DoD due to overpayment or erroneous payment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Request for Supplemental Industry Information	ICOM Arrow	This is a request for additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Request to Cancel Case Implemented in Foreign Military Sales Trust Fund	ICOM Arrow	A request from either the purchaser or USG to cancel a case implemented in Foreign Military Sales Trust Fund.	
Request to Sell Investment	ICOM Arrow	Request sent from the Department to the U.S. Treasury initiating the sale of a Department owned Treasury security.	
Requirement Change from Sourcing	ICOM Arrow	The Identification of a requirement change from sourcing analysis.	
Rescinded Amount	ICOM Arrow	The amount of funds that are to be reduced from the budget authority due to an enacted rescission.	
Rescission Information	ICOM Arrow	This is a rescission enacted by Congress. This rescission will affect the baseline for reprogramming.	
Rescission Language	ICOM Arrow	The language used to complete the rescission report such as OMB identification code, agency and rescission proposal number.	
Rescission Proposal	ICOM Arrow	Proposal for rescission of appropriated budgetary resources to be withheld from availability.	
Rescission Report	ICOM Arrow	A rescission report to be submitted to OMB for inclusion on the President's special message to Congress regarding proposed rescission.	
Rescission, Cancellation and Deferral Pro Forma Entry	ICOM Arrow	The debit and credit affects of rescission, cancellation and deferral pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Research Information	ICOM Arrow	This is information resulting from internal DoD research for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services or identified as a result of an internal study. Examples of research include medical or human resources studies. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Research Information External	ICOM Arrow	This is information from external sources for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Response to Congressional and Federal Inquiry	ICOM Arrow	This is the response to a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Responsive Proposal	ICOM Arrow	A timely, responsive proposal from an offeror as defined in Federal Acquisition Regulation (FAR).	
Retirement Appeal Request	ICOM Arrow	This includes a request to appeal the retirement action decision. This information may include (but not be limited to) retirement date and retirement status.	
Retirement Checklist Action Completion Information	ICOM Arrow	This includes all necessary information related to the completion of a required action outside the boundaries of retirement activities (e.g., logistics asset management, resolution of MWR debts) in order to successfully complete a retirement. This may include (but not be limited to) action completion date, appropriate dispositions related to the action, or any additional activities and tasks to be completed by the Member.	
Retirement Checklist Action Requirement	ICOM Arrow	This includes all necessary information related to a requirement for a Member to perform activities outside the boundaries of retirement activities (e.g., logistics) in order to successfully complete a retirement. This may include (but not be limited to) retirement date, transition assistance eligibility, and a retirement medical review requirement.	
Retirement Draft Order	ICOM Arrow	This includes information pertaining to a draft retirement order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Retirement Eligibility Concurrence	ICOM Arrow	This includes the retirement request information along with the retirement eligibility information and any other recommendations and endorsements pertaining to it.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Retirement Eligibility Nonconcurrency	ICOM Arrow	This includes the retirement request information along with the retirement ineligible information along with reasons for denial.	
Retirement Final Clearance Notification	ICOM Arrow	This includes all information necessary to convey the final clearance of a retiring Member. This may include (but not be limited to) final retirement date and a Member's current duty station.	
Retirement Final Order	ICOM Arrow	This includes the information needed to document an approved order for a retirement personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decummitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Retirement Inquiry	ICOM Arrow	This includes the Member's documented inquiry indicating his or her intention of possible retirement in the near future. This inquiry initiates the evaluation of their retirement eligibility as well as modeling of various retirement scenarios (e.g., retirement pay or grade depending on retirement date).	
Retirement Inquiry Response	ICOM Arrow	This includes the response to the Member's inquiry into their retirement status. This response can answer the questions about the various retirement scenarios, and recommends whether or not to proceed with the retirement process.	
Retirement Order Acknowledgement	ICOM Arrow	This includes information necessary to acknowledge the receipt of a retirement order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Retirement Profile Information	ICOM Arrow	This includes retirement information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, Service obligation, current Service and component, retirement points information, and Members who have been identified as mandatory retirement candidates.	
Retirement Profile Update Information	ICOM Arrow	This includes updated retirement information associated with a personnel/pay record. The information may include (but not be limited to) retirement status, retirement points information, eligibility status, retirement date.	
Retirement Request	ICOM Arrow	This includes the request information related to a retirement. The information on the retirement request may include (but not be limited to) Member name, current Service or component, proof of eligibility for retirement, waiver request information, and the physical evaluation severity rating disposition for Members on the Temporary Duty Retirement List (TDRL) and Permanent Duty Retirement List (PDRL).	
Return Delivery Order	ICOM Arrow	Information concerning an authorized return to be used in coordinating delivery activity to include location, condition, required delivery date, destination, and special handling requirements.	
Return Information	ICOM Arrow	This documents the information on materiel which has been authorized for return. It includes item information, quantity, transportation information, condition, and shipment and arrival dates.	
Return Inventory Availability Information	ICOM Arrow	This is information regarding DoD materiel authorized for return and available for reuse, resale, or redistribution.	
Return of Unauthorized Absence Notification	ICOM Arrow	This includes a notification that a Member who was absent without authorization has been returned. This may include (but not be limited to) a notification of Return to Military Control (DD Form 553 "Report of Return of Absentee), or a summary of the facts leading the finding of an unauthorized absent Member.	
Return or Disposal Authorization	ICOM Arrow	A validated and approved return or disposal product authorization. Includes pertinent information necessary to execute the return or disposal (e.g. product location and ship to address).	
Return or Disposal Authorization Request	ICOM Arrow	A request for return or disposal product authorization.	
Return Plan	ICOM Arrow	Courses of action over specified time periods that represent the projected appropriation of required return resources and or assets to meet the return process requirements.	
Returned Payment	ICOM Arrow	This is information associated with a payment which has been returned. For check payments this could be due to improper mailing address information or perhaps a deceased payee. For Electronic Fund Transfer (EFT) payments this could be due to improper American Bankers Association (ABA) routing number, improper account number or the payment being rejected by the recipient.	
Returned Payment for Re-Disbursement	ICOM Arrow	A payment that has been returned due to incorrect disbursing information. After correction, the payment will be sent to disbursing.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Returned Payment for Rescheduling	ICOM Arrow	A payment that has been returned due to being rejected by the payee or an incorrect entitlement calculation.	
Returned Payment Notice	ICOM Arrow	This is a notification that a previously issued payment has been returned and the reason(s) why. The payment was returned for at least one of the following reasons: invalid account number, invalid routing transcript number, account closed, or rejected by payee.	
Revenue Data	ICOM Arrow	Revenue data includes gain on sale of asset, unearned revenue from collect, advance from a non-Department of Defense buyer, and net change in inventory.	
Reward or Reimbursement Eligibility Notification	ICOM Arrow	This includes the notification of the eligibility of persons or agencies for a reward or reimbursement for apprehending, detaining, or delivering absentees, or escaped military prisoners to military control.	
RFID	ICOM Arrow	Radio Frequency Identification (RFID) is a family of technologies, within the collective suite of Automatic Identification Technology (AIT) applications. RFID is a transformational technology and will play a vital role in achieving the DoD vision for implementing knowledge-enabled logistic support to the warfighter through fully automated visibility and management of assets. RFID enables hands-off processing of materiel transactions, streamlines business processes and allows DoD to reapportion critical manpower resources to warfighting functions.	
Role	ICOM Arrow		
Route Information	ICOM Arrow	Data concerning transportation networks for applicable modes of shipment including roads, sea lanes, rail. Includes nodal information such as availability and throughput.	
RPAD	ICOM Arrow	The Real Property Asset Database (RPAD) is the central repository of DoD real property inventory (RPI) data for the Office of the Secretary of Defense. RPAD is a Net-centric data warehouse with a multi-tiered Service Oriented Architecture (SOA). This system is being developed in response to an I&E Business Enterprise Integration study recommending DoD Real Property Inventory (RPI) data be near real-time data, Web assessable to known and unanticipated users, trustable (auditable), and support projected real property inventory requirements. RPAD will also be used to compute and report estimated facility-related operation, sustainment, and recapitalization costs on financial statements and to capture acquisition costs and assign to responsibility segments. RPAD uses the Military Departments' and WHS authoritative RPI databases as its data sources and is used to populate a variety of real property resourcing predictive models. It is also used to answer DoD senior leadership and Congressional RPI inquiries and is the data source for OSD RPI studies.	
RPAR	ICOM Arrow	The Real Property Acceptance Requirements (RPAR) initiative supports the Real Property Accountability Capability. This initiative is an extension of the Real Property Inventory Requirements initiative, the results of which will support the goals of accurate, timely and accessible real property portfolio information for effective management of assets. The initiative goal is to enable visibility (fiscal, physical, legal, environmental and geospatial) of the Department's real property acceptance activities through linkage with the integrated, 24x7 accessible and uniquely identified real property inventory in which DoD has a legal interest.	
RPCIPR	ICOM Arrow	The Real Property Construction in Progress (CIP) Requirements (RPCIPR) initiative will provide Enterprise-wide visibility to consistent processes and data for CIP from construction agents to Components; provide accurate and timely CIP information, notably project status and financial data; and comply with requirements for real-time visibility of certain financial information.	
RPILM Information Model	ICOM Arrow	The RPILM Information Models provide access to the business terms, all associated metadata, and the implementation rules as specified by the authoritative Communities of Interest that must be complied with by systems that create, read, update, or delete data while executing business processes within a net-centric environment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
RPIR	ICOM Arrow	<p>The Real Property Inventory Requirements (RPIR) initiative supports the Real Property Inventory Capability. Presently, the Services and Defense Agencies operate and maintain independent, disparate and redundant real property inventory systems that are non-integrated across both Warfighting and Business Mission Areas. As a result, accurate, timely and accessible real property portfolio information is not available for effective management. The primary purpose of this initiative is to describe a real property inventory that will meet the Department's future requirements. The real property accountability function for Defense needs to meet the following requirements:</p> <ul style="list-style-type: none"> <li>- Achieve total asset accountability</li> <li>- Provide useful data for local real property management</li> <li>- Provide reliable and timely data and information to higher headquarters for reporting and decision making</li> <li>- Ensure accessibility to current data to all relevant users</li> <li>- Eliminate duplication</li> <li>- Establish and enforce real property data standards department-wide to facilitate data integration and analyses</li> </ul>	
RPUIR	ICOM Arrow	<p>The Real Property Unique Identifier Registry (RPUIR) supports the Enterprise Capability requirement for a Real Property Inventory. Consistent with the Real Property Inventory Requirements processes and data standards, the system objective is to enable visibility of financial, physical (including environmental), and legal information on the Department's real property inventory through the assignment and tracking of site and real property unique identifiers. The RPUIR stores and maintains individual asset record information, including the physical, legal and financial information necessary to establish unique identities and maintain current status of real property assets throughout their lifecycle. The Registry thereby enables accurate consistent valuation of real property and ensures accountability. This net-centric, service-oriented, and secure information technology system also provides secure interfaces with Component real property and non-real property systems to distribute authoritative real property data throughout the DoD.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Safety and Occupational Health Policies and Standards	ICOM Arrow	The DoD Safety, Occupational Health & Emergency Management Policies and Standards are as follows: DoDD 4715.1 E, Environment, Safety, and Occupational Health (ESOH) DoDD 6055.9E, Explosives Safety Management and the DoD Explosives Safety Board; DoDI 2000.18, Department of Defense Installation Chemical, Biological, Radiological, Nuclear and High-Yield Explosive Emergency Response Guidelines; DoDI 4140.62, Material Potentially Presenting an Explosive Hazard; DoDI 4145.26, DoD Contractor's Safety Requirements for Ammunition and Explosives; DoDI 5000.02, Operation of the Defense Acquisition System; DoDI 6050.05, Hazard Communication (HAZCOM) Program; DoDI 6055.1, DoD Safety and Occupational Health (SOH) Program DoDI 6055.04, DoD Traffic Safety Program; DoDI 6055.05, Occupational and Environmental Health (OEH); DoDI 6055.06, DoD Fire and Emergency Services (F&ES) Program; DoDI 6055.07, Accident Investigation, Reporting, and Record Keeping; DoDI 6055.8, Occupational Radiation Protection Program; DoDI 6055.11, Protecting Personnel from Electromagnetic Fields; DoDI 6055.12, DoD Hearing Conservation Program (HCP); DoDI 6055.15, DoD Laser Protection Program; DoDI 6055.16, Explosives Safety Management Program; DoDI 6055.17, DoD Installation Emergency Management (IEM) Program; DoDI 6490.03, Implementation and Application of Joint Medical Surveillance for Deployments; DoD 4145.26-M, DOD Contractor's Safety Manual For Ammunition and Explosives DoD 6055.05-M; Occupational Medical Examinations and Surveillance Manual; DoD 6055.06-M, DoD Fire and Emergency Services Certification Program; DoD 6055.09-STD, DoD Ammunition and Explosives Safety Standards; Minimizing the Use of Hexavalent Chromium, April 8, 2009; Minimum Data Requirements for Mishap Reports, May 22, 2008; Environment, Safety and Occupational Health (ESOH) Risks from Engineered Nanomaterials, May 13, 2008; Zero Preventable Accidents, May 30, 2007; Injury Reporting Requirements, Feb 20, 2007; Reducing Preventable Accidents, Nov 21, 2006; Military Flight Operations Quality Assurance (MFOQA) Process Implementation, Oct 11, 2005; Legal Investigations of Accidents, May 25, 2004; Civilian Visitors Operating Military Equipment , Feb 22, 2001; Voice and Flight Data Recorders in Military Aircraft, Apr 9, 1996; Global Positioning Systems (GPS) in Military Aircraft, Apr 9, 1996; Military Lasers - FDA Exemption 76EL-01DOD 05-09, Jul 29, 1976; MIL-STD-1472F, Human Engineering; MIL-STD-1474D, Noise Limits; and MIL-STD-882D, System Safety.	
Sales Reimbursement Information	ICOM Arrow	This is reimbursement information from the sale of goods or services (e.g., commissary receipts, training).	
Schedule Information	ICOM Arrow	This is a sequential series of activities with milestones to be accomplished related to the development, production, testing and deployment of a system(s). This includes Acquisition Program Baseline Information.	
Schedule Return or Disposal Law Policy Reg	ICOM Arrow	Schedule Return or Disposal is constrained by the following: USC Title 32, USC Title 40, USC Title 42, USC Title 50, CFR Title 48, SFFAS 1, SFFAS 6, SFFAS 7, SFFAS 10, FFAA Tech Release 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-4, JFMIP SR-03-02, DoDD 4151.18, DoDD 4715.1E, DoDD 5000.01, DoDD 5160.65, DoDD 8190.1, DoDD 8320.03, DoDD 8500.01E, DoDI 3000.04, DoDI 3110.06, DoDI 4151.19, DoDI 4715.6, DoDI 5000.64, DoDI 5210.63, DoDI 6055.1, DoDI 8500.2, DoDI 8510.01, DLM 4000.25, DoD 4000.25-6-M, DoD 4000.25-8-M, DLM 4000.25-4, DoD 4100.39-M, DoD 4140.26-M, DoD 4140.27-M, DoD 4140.32-M, DoD 4160.21-M, DoD 5100.76-M, DoD 6055.09-M, DoD FMR Vol 02B, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R, DoD 5200.08-R, DFARS.	
Scheduled Disposal Information	ICOM Arrow	Information on the planned or scheduled disposal of property or material deemed excess or defective.	
Scheduled Payment	ICOM Arrow	A payment to vendor that has been scheduled within the constraints of the Prompt Payment Act.	
Scheduled Payment for Disbursement	ICOM Arrow	A payment to a vendor that has reached its scheduled payment date.	
SDI	ICOM Arrow	The Standard Disbursing Initiative (SDI) addresses current disbursing challenges by consolidating existing functionality to meet DFAS customer needs for enterprise and tactical disbursing. SDI encompasses all current and future disbursing systems operated by DoD. The target disbursing systems are ADS for enterprise and DDS for tactical. Legacy system SRD1 is being retired, while CDS is being merged with ADS. In addition, SDI supports the implementation of ERPs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Search and Rescue Assistance Notification	ICOM Arrow	This includes a notification to a law enforcement agency, military force, or search and rescue agency for assistance in finding or rescuing a Member (e.g., a lost hiker or mountain climber). This also includes attempts to establish liaisons in order to find or rescue these personnel more effectively.	
SECDEF Budget Decision	ICOM Arrow	The SECDEF will make his decision on the issues identified during the OMB/OSD budget hearing review. This decision will be incorporated in the Program Budget Decision.	
SECDEF Joint Programming Guidance Decision	ICOM Arrow	The SECDEF's review and approval of the Joint Programming Guidance.	
Selected Acquisition Reporting Information	ICOM Arrow	This is a standard, comprehensive, summary status information of a Major Defense Acquisition Program (MDAP) (Acquisition Category (ACAT) I) required for periodic submission to Congress. Includes key cost, schedule, and technical information.	
Selected ESOH Solution	ICOM Arrow	This is the solution that has been evaluated and has been determined as a course of action to pursue by the ESOH professional.	
Seller Cost Model	ICOM Arrow	A model that supports the agreed-upon methodology to be used by the seller to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Senate Appropriation Committee Report	ICOM Arrow	The U.S. Senate Committee on Appropriations is a standing committee of the United States Senate. It has jurisdiction over all discretionary spending legislation in the Senate. The Senate Appropriations Committee is the largest committee in the U.S. Senate, consisting of 28 members. Its role is defined by the U.S. Constitution, which requires "appropriations made by law" prior to the expenditure of any money from the Treasury, and is therefore one of the most powerful committees in the Senate.	
Senior Rater Profile	ICOM Arrow	This includes the evaluation history of the Senior Rater. This may include (but not be limited to) individuals rated, position, and evaluation scores.	
Separated or Terminated or Transferred Individual Debt Information	ICOM Arrow	This is information required to support a DoD Human Resources collection action on a delinquent person whose affiliation has been separated or terminated from Department of Defense or transferred to another federal entity. This information regards a dollar amount owed to the Department of Defense (e.g., this occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid, or has any other outstanding debt).	
Separation Appeal Request	ICOM Arrow	This includes a request to appeal the separation action decision. The information may include (but not be limited to) appeal date, appeal status, and appeal justification.	
Separation Checklist Action Completion Information	ICOM Arrow	This includes all information related to the completion of a required action outside the boundaries of separation activities (e.g., logistics asset management, resolution of morale, welfare, and recreation (MWR) debts) in order to successfully complete a separation. This may include (but not be limited to) action completion date, appropriate dispositions related to the action, and any additional activities and tasks to be completed by the Member.	
Separation Checklist Action Requirement	ICOM Arrow	This includes all information related to a requirement for an activity outside the boundaries of separation activities (e.g., logistics) to be performed in order to successfully complete a separation. This may include (but not be limited to) separation date, transition assistance eligibility, and a separation medical review requirement.	
Separation Documentation	ICOM Arrow	This includes the official documents that record and report the separation of military personnel from the Service. This may include (but not be limited to) information pertaining to the certificate of release from active duty.	
Separation Draft Order	ICOM Arrow	This includes information pertaining to a draft separation order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Separation Final Clearance Notification	ICOM Arrow	This includes all information necessary to convey the final clearance of a separating Member from a duty station. This may include (but not be limited to) final clearance date and a Member's current duty station.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Separation Final Order	ICOM Arrow	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area. The information may also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	
Separation Order Acknowledgement	ICOM Arrow	This includes information necessary to acknowledge a separation order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Separation Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate a separation order. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Separation Profile Information	ICOM Arrow	This includes separation information associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, Member name, promotion history information, enlisted agreement or officer obligation, adverse action information, separation reason, transfer information, and Member current Service and component.	
Separation Profile Update Information	ICOM Arrow	This includes updated separation information associated with a personnel/pay record. This may include (but not be limited to) Member name, character of service, Member contract, separation reason, any changes to the Member's Service obligation, and Member current Service and component.	
Service Medical Decision Information	ICOM Arrow	This includes information pertaining to the decision of the Services to accept or not accept a medical disqualifying condition, or if the Services is requesting additional medical information. This information may include (but not be limited to) applicant name, decision date, and decision results. This information may also include waiver information and a request for additional information.	
Service Procurement Request	ICOM Arrow	A document which describes the required services so that a procurement or a request for quote can be initiated.	
SFIS Funding Authorization Document	ICOM Arrow	A funding document containing information required for establishing funding controls for budget execution. The SFIS FAD includes a range of information such as budget authority and funding authorization.	
Shipping Documentation	ICOM Arrow	Documents which facilitate the delivery process and accompany a shipment as it moves through the delivery process.	
Shipping Status	ICOM Arrow	Advanced notification regarding shipments from a distribution location or storage activity (i.e., advance shipping notice).	
Signed Intragovernmental Agreement	ICOM Arrow	An agreement signed by the Government buyer that has not yet been accepted by the Government supplier. An agreement is a written instrument of understanding following negotiations between an agency buyer and agency supplier, where terms have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains terms and clauses applying to future orders between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future orders will incorporate by reference or attachment the required and applicable clauses in the agreement. An agreement is not a contract or order.	
Software Resources Data Report Information	ICOM Arrow	Information pertaining to development and upgrade of software whether performed under a commercial contract or internally by the government, obtained via the Software Resources Data Report.	
Solution Development Cost Information	ICOM Arrow	Details about the estimated work that will be performed during the development of an ESOH solution. This information supports estimates of environmental liability and is updated on a periodic basis to reflect changes in the cost of developing a solution.	
Source Product Hazard Data Submission	ICOM Arrow	The product hazard data (PHD) that has been received from an external non-DoD source (eg. manufacturer, supplier, vendor) and is submitted for validation and subsequent entry into the master product hazard data (MPHD) warehouse as a result of PHD made available by a PHD source.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Sourcing Planning Information Request	ICOM Arrow	A sources sought synopsis for market research purposes only containing the buyer's planning requirements and needs. This does not reflect a commitment by the buyer to issue a request for proposal, award a contract or otherwise pay for the information provided in response to the synopsis.	
Sourcing Planning Information Response	ICOM Arrow	Information provided by suppliers in response to Sourcing Planning Information Request (RFI) made by the DoD buyer for planning requirements or needs, including pricing, quantity, schedule and performance information.	
Spatial Data Standards for Facilities Infrastructure and Environment	ICOM Arrow	Applies to Sustainment of Ranges and Operating Areas, Executive Order 13470, Executive Order 12333, DoD 5715.16, Public Law 242 Chapter 330.	
Spending Authority from Offsetting Collections	ICOM Arrow	Broad responsibility by Congress that Government agencies have the power to spend federal funds received through offsetting collections. Congress can specify availability and criteria for spending these funds. Spending authority from offsetting collections includes earned collections and earned receivables from Federal sources, changes in unfilled customer orders, anticipated authority without an advance, and transfers from non-FMS trust funds and special funds.	
SPOT	ICOM Arrow	Synchronized Pre-deployment and Operational Tracker (SPOT) acts as the Joint Enterprise system for tracking contractors who deploy with the military. It's the only system that supports the DoDI 3020.41 requirements to relate contract level information with individual contingency contractor employee information. The system is populated by Company personnel via secure, Internet access and updated with current locations as individuals move throughout the area of responsibility. Government Agencies use SPOT to analyze available contract services and to support their mission needs, Defense Contractors use SPOT to process and track the individuals who deploy to provide required capabilities and Combatant Commanders use SPOT reports to maintain overall visibility of contractors within their area of responsibility and integrate contractor support into their operational plans.	
SPS	ICOM Arrow	Standard Procurement System (SPS) provides Enterprise-wide contract writing and management capabilities and is a key enabler providing visibility into materiel and services sourcing actions of the Department. It allows for a standard method for producing agreements with suppliers.	
Stakeholder Input	ICOM Arrow	This is input from groups such as a community advisory board, external stakeholders or other public groups as mandated by regulation.	
Standard Chart of Accounts	ICOM Arrow	The United States standard general ledger chart of accounts provides control over all financial transactions and resources balances, satisfies basic reporting requirements of Office of Management and Budget and United States Treasury Department, and integrates proprietary and budgetary accounting.	
Standard Financial Information Structure	ICOM Arrow	The Standard Financial Information Structure (SFIS) is the DoD's common business language that provides the ability to collect and summarize information along several dimensions to include Appropriation Account, Budget Program, Organization, Trading Partner, Transaction and Cost Accounting information. SFIS aligns and extends the Office of Management and Budget (OMB) Common Government-wide Accounting Code (CGAC). This information is used to support financial, cost, and managerial reporting requirements as well as provide insight into the strategic decision-making process at multiple levels in the government.	
Statement of Accountability	ICOM Arrow	Monthly report submitted from federal agency that outlines changes to the fund balance with Treasury should balance with FBWT.	
Statement of Difference	ICOM Arrow	Statement of Difference provides the discrepancies between disbursements and deposits generated by the Treasury. Differences resulting from deposits indicate there is a discrepancy between the monthly totals submitted through the banking system and the totals provided by the Department of Defense. Differences resulting from disbursement transactions reveal discrepancies between monthly totals reported by the Regional Financial Center and/or through On-line Payment and Collection System between the Department of Defense and other agencies disbursement transactions and/or report.	
Stop Loss Criteria	ICOM Arrow	This includes the criteria that specify which personnel need to be retained. This criteria may include (but not be limited to) military occupational specialty (MOS) and period of retention.	
Stop Loss Notification	ICOM Arrow	This includes information from the Service Headquarters identifying Members for involuntary retention based on Service specific criteria. The information may include (but not be limited to) notification recipient, notification date, and notification type.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Stop Payment Confirmation	ICOM Arrow	Confirmation received from DoD/Treasury confirming stop payment.	
Stop Payment Notification	ICOM Arrow	This is a message from the US Treasury confirming that a stop payment has occurred.	
Stop Payment Request	ICOM Arrow	This is the request for stop payment issued to the Department of Treasury associated with a check payment previously issued by the disbursing activity.	
Strategic Guidance	ICOM Arrow	Strategic Guidance represents internal and or external guidance which provides overarching strategic goals and objectives that will be a major consideration for the Department of Defense.	
Strategic Objectives	ICOM Arrow	Guidance from leadership that provides vision, goals, priorities, and desired performance outcomes for specified mission requirements.	
Strategic Planning Guidance	ICOM Arrow	Strategic Planning Guidance (SPG) is a single fiscally-informed document that replaced the policy/strategy sections of the Defense Planning Guidance. The draft is issued early in the Planning process to provide overall policy and strategy guidance to be used in developing the defense program. SPG provides DoD Components with direction on defense policy, strategy, force and resource planning, and fiscal matters for use in developing their Program Objective Memorandum (POM).	
Strength Authorization Information	ICOM Arrow	This is the specification of military manpower strength ceilings, within a specified fiscal year, authorized by Congress for each of the armed forces. This includes, but is not limited to, service end strength; specified limitations on the number of members of a reserve component permitted to be on active duty; and Dual Status Military Technician end strength for each reserve component of the Army and Air Force.	
Strength Planning Information	ICOM Arrow	This contains personnel resource estimates and requirements, including detailed strength planning with impacts within force restructuring programs (e.g., Stop Loss, mandated retraining, Reduction-in-Force).	
Student Admission Enrollment Request	ICOM Arrow	This includes information associated with requesting student admission into a Department of Defense (DoD) education program. This information may include (but not be limited to) student application paperwork, eligibility requirements met (if necessary), and signatures authorizing education request. This information also includes admission requests to external educational opportunities (e.g., college, law school, graduate school).	
Student Course Evaluation	ICOM Arrow	This includes information associated with the evaluation of Department of Defense (DoD) individual training courses and education programs. This information may include (but not be limited to) details of the feedback (course is sufficient, course has deficiencies, and proposals to make the course better) given by the student of that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific individual training and education program.	
Student Education Grade	ICOM Arrow	This includes information associated with the grading and evaluation of a student's performance in a Department of Defense (DoD) education program. This information may include (but not be limited to) an assessment of student performance in education courses against published objectives and other criteria, and recording of the same according to personnel performance.	
Student Enrollment Information	ICOM Arrow	This includes information associated with the enrollment information of students accepted to Department of Defense (DoD) individual training courses and/or education programs. This information may include (but not be limited to) student applications, acceptance or non-selection notifications, and signatures authorizing enrollment. This information also includes information for enrollment into external educational opportunities (e.g., college, law school, graduate school).	
Student Individual Training Course Grade	ICOM Arrow	This includes information associated with the grading and evaluation of a student's performance in a Department of Defense (DoD) individual training course. This information may include (but not be limited to) an assessment of student performance in individual training course against published objectives and other criteria, and recording of the same according to personnel performance.	
Summarized Balance of Accounts for Procurement	ICOM Arrow	This information is created from all transactions in the monitor payment portion of the Entitlement process and provides a summarized balance of accounts needed for administering the procurement instrument.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Supplemental Absence Information	ICOM Arrow	This includes supplemental information concerning a Member who is absent. This may be a response to a request for more information. This may include, but not be limited to, additional information about the duration and nature of the absence, the Member's intent, and any information concerning the current whereabouts of the Member. This may also include a report of the facts concerning personnel who cannot be located or who have been located but cannot be apprehended due to political or other reasons.	
Supplemental Appropriation Act	ICOM Arrow	An emergency adjustment to the current year appropriation act; usually for national defense contingencies and natural disaster emergencies.	
Supplemental Industry Information	ICOM Arrow	This is the submission of additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Supplemental Information Request	ICOM Arrow	This is the request for additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplemental Information Response	ICOM Arrow	This is the submission of additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplier Advance Ship Notice Information	ICOM Arrow	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity directly from the supplier. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail, including actual departure date/time, and provides an ordered flexibility to convey information.	
Supplier Information	ICOM Arrow	The collection of supplier information required to manage the supplier relationship and determine if a supplier is authorized to do business with the DoD. This includes, but is not limited to, general registration information, socio-economic information, and representations and certifications.	
Supply Plan	ICOM Arrow	A plan for a course of action over specified time periods that involves a projected appropriation of resources to meet product or supply requirements.	
Supply Request	ICOM Arrow	A request for supply support from any Component distribution system and from the GSA for requisitioning, issuing, lateral redistribution, and returning of DoD materiel.	
Support Congressional Budget Review Law Policy Reg	ICOM Arrow	Support Congressional Budget Review is constrained by the following: USC Title 10, USC Title 20, USC Title 31, USC Title 38, OMB Circular A-11, OMB Circular A-127, OMB Memo 04-04, OMB Memo 06-19, DoDD 8500.01E, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 12, DoD 5400.11-R.	
Sustainment Work Order Information	ICOM Arrow	This is information regarding the specific task list and scheduled completion time to sustain real property. This information could include Asset ID, Work Order ID, Work Order Description, Work Order Type, Work Order Diagnosis Type, Work Order Symptom Type, and Work Order Root Cause Type.	
System and Initiative	ICOM Arrow	Systems can be an information system, other than a national security system, operated by, for, or on behalf of the Department of Defense, including financial systems, mixed systems, financial data feeder systems, and information technology and information assurance infrastructure, used to support business activities, such as acquisition, financial management, logistics, strategic planning and budgeting, installations and environment, and human resources management. Initiatives can be systems, programs, projects, organizations, activities or a family of systems.	
Tax Reports	ICOM Arrow	The purpose of tax reports is to provide for tax deduction reporting, reconciling, and correction processing for each taxing authority.	
Technical Programming Guidance	ICOM Arrow	Technical Programming guidance is the program review instructions issued by OSD to supplement the JPG for the development of the Military Services and Defense Agencies POM. This guidance includes administrative instructions in submitting program data that will be included in the component's POM submission.	
Technical Surveillance for Service Information	ICOM Arrow	Report of the technical performance of the contractor in performing a service.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Testimonial Document	ICOM Arrow	This is in response to Congress's request to have Components provide Testimony on their portion of the proposed budgets submission. The testimony is coordinated with OSD Comptroller prior to submitting the Component's Testimony to Congress.	
Time and Materiel Surveillance Information	ICOM Arrow	Report of contractor performance on a time a material contract.	
Time, Absence, and Labor Approval Authority	ICOM Arrow	This represents personnel who perform activities (e.g., enabling payroll labor costs to be distributed and charged to appropriate cost centers, approving or disapproving absence or leave sell-back requests, categorization of unauthorized absence personnel, deciding the actions to be taken concerning unauthorized absences) associated with the certification and/or re-certification (for adjustments) of time, absence, and labor information. This may also include personnel who review missing person information, deliberate, and make recommendations for categorizing missing individuals.	
Time, Absence, and Labor Notification	ICOM Arrow	This includes notifications that it is time to either document or certify Time, Absence, and Labor information, or that documented Time, Absence, and Labor information is invalid and requires adjustment, or if the Time, Absence, and Labor information has been approved and certified.	
Time, Absence, and Labor Profile Information	ICOM Arrow	This includes the time, absence, and labor information (e.g., labor information, approved leave information, time worked information) that is associated with a personnel/pay and labor record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, leave balance, leave earned type, retirement points information, labor code, time worked amount, absence time amount, absence date and time, duty status, and information concerning personnel who are absent without authorization.	
Time, Absence, and Labor Profile Update Information	ICOM Arrow	This includes the updated time, absence, and labor information (e.g., labor information, approved leave information, time worked information) that is associated with a personnel/pay and labor record. The information may include (but not be limited to) leave balance, leave earned type, retirement points information, labor code, time worked amount, absence time amount, absence date and time, duty status and information concerning personnel who are absent without authorization.	
Time, Absence, and Labor Specialist	ICOM Arrow	This represents personnel who perform the administrative activities (e.g., counseling on excess leave, documenting labor allotted to specific tasks, projects and/or programs, verifying recorded or adjusted time worked) associated with authorized and unauthorized absence personnel actions, labor information, leave balance, absence or leave sell-back requests and updating the Member's record.	
Track Congressional Action Law Policy Reg	ICOM Arrow	Track Congressional Action is constrained by the following: USC Title 10, USC Title 31, USC Title 37, OMB Circular A-11, OMB Circular A-127, OMB Memo 04-04, OMB Memo 06-19, DoDD 8500.01E, CJCSI 8501.01, DoDI 8500.2, DoDI 8510.01, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD 5400.11-R.	
Transaction Confirmation	ICOM Arrow	Treasury confirmation of purchases, sales or redemption of Marketable, Non-marketable and Market Based securities held by Department of Defense components.	
Transfer Appeal Request	ICOM Arrow	This includes official documentation of a Member's justification as to why a denied transfer should be reconsidered. This may include (but not be limited to) appeal date, appeal reason, and justification documentation.	
Transfer Draft Order	ICOM Arrow	This includes information associated with the determination of the transfer order type and order action based on order requirements and associated transfer authorization information. The information may include (but not be limited to) order reason, order action, and order detail identifier.	
Transfer Eligibility Concurrence	ICOM Arrow	This includes an official determination that a Member is eligible for a transfer and that the affected Services or components concur with the transfer request. For approval to attend a commissioning program (i.e. a transfer between military personnel class), the transfer eligibility concurrence includes a determination that a Member meets minimum requirements to be considered for admission to a commissioning source or Warrant Officer program (e.g., 4 year college degree, time in service, time in grade). A transfer eligibility concurrence may also include (but not be limited to) Member information, date, and transfer type.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Transfer Eligibility Nonconcurrency	ICOM Arrow	This includes an official determination that the affected Services or components deem the Member ineligible for a transfer. A transfer eligibility nonconcurrency may include (but not be limited to) Member information, date, transfer type, and reasons for ineligibility.	
Transfer Final Order	ICOM Arrow	This includes the information needed to document an approved order for a transfer. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	
Transfer of Government Property	ICOM Arrow	Notification that government property in the custody of a contractor has been transferred to the government, to another contractor location or to a new contract.	
Transfer Order Acknowledgement	ICOM Arrow	This includes information necessary to acknowledge a transfer order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Transfer Order Requirement	ICOM Arrow	This includes information related to an official requirement to generate a transfer order. An official order requirement may include an action to modify (e.g., revoke, cancel) an existing order. Note: A commission program transfer order requirement may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Transfer Package	ICOM Arrow	Coordinated package documenting DoD's transfer request approved by OMB. This package includes all the information specific to the request such as transfer justification, amount of budgetary resources, appropriations, and/or treasury accounts. This package is sent to Congress for congressional action.	
Transfer Profile Information	ICOM Arrow	This includes transfer information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action information, Member name, Member obligation, Member contract, Member current Service and component; as well as information from the Officer Agreement Profile Information, Separation Profile Information and Enlistment Agreement Profile Information.	
Transfer Profile Update Information	ICOM Arrow	This includes updated transfer information associated with a personnel/pay record. The information may include (but not be limited to) Member name, Member obligation, Member contract, and Member current Service and component.	
Transfer Request	ICOM Arrow	Transfer request submitted to OMB to move budget authority between statutory appropriations or treasury accounts.	
Transfer Request Response	ICOM Arrow	OMB's decision to DoD's transfer request to move budget authority between statutory appropriations or treasury accounts.	
Transfer Requirements	ICOM Arrow	This is an initial document that identifies specific requirements with rational/justification for requesting a transfer of budget authority; either by a Warfighter, OSD, Executive Branch, OMB or Congress. It is a proposal to reduce budgetary authority from one statutory appropriation and increase budget authority by the same amount in another statutory appropriation; or a transfer between two Treasury accounts.	
Transport Materiel and Forces Law Policy Reg	ICOM Arrow	Transport Materiel and Forces is constrained by the following: DoDD 4500.09E, DoDD 4500.43, DoDD 5158.04, DoDI 4500.34, DoDI 4500.53, DoDI 8320.04, DLM 4000.25, DoD 4140.27-M, DoD 4140.1-R, DoD 4500.9-R, DoD 4515.13-R.	
Transportation Information	ICOM Arrow	Information pertaining to the physical shipment or actual transportation movement that is used to facilitate the processing of materiel at the delivery location or the arrival of forces at their destination (e.g. shipping label, manifest, customs information, bill of lading, or Materiel Safety Data Sheet (MSDS) information).	
Transportation Procurement Request	ICOM Arrow	This is the logistics requirement needed to accomplish a transportation obligation for an organization/customer.	
Transportation Schedule	ICOM Arrow	A movement plan for specific cargo or passengers. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (e.g., origin, destination), mode, etc.	
Travel Debt Bill Information	ICOM Arrow	This includes information associated with the execution of a debt disposition directing a waiver, remittance, partial payment for a travel related debt. This information may include (but not be limited to) debt type, debt amount, effective date of indebtedness, amount of to be written off from the original indebtedness. This information is the basis for an action in the Financial Visibility business area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Travel Debt Disposition	ICOM Arrow	This is an overall flow of travel debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Travel Order Response	ICOM Arrow	This includes a response to the Invitational Travel Order Requirement. Information may include (but not be limited to) name(s) of traveler(s), and specific travel information (e.g., mode(s) of transportation and travel itineraries).	
Travel Requirement	ICOM Arrow	This requirement defines an organization's or person's need for travel, including movement of goods, using the travel card (where authorized). It may be an unfunded or funded requirement.	
Travel Resource Information	ICOM Arrow	The information summary of the schedule, and related costs, for the travel modes and accommodations needed to accomplish travel. This information will support the evaluation of costs during the management of travel authorizations.	
Travel Resource Information Requirement	ICOM Arrow	This is the requirement for schedule and cost information for the travel modes and accommodations needed to accomplish travel. This information is needed to support the evaluation of costs during the management of travel authorizations.	
Travel Substantiation Information	ICOM Arrow	This is the auditable record of the details and related costs of a person's authorized travel.	
Treasury Certificate	ICOM Arrow	Certificate of ownership of Marketable, Non-marketable and Market Based securities held by DoD components	
Treasury Fund Balance	ICOM Arrow	The Fund Balance with Treasury (FBWT) is an asset account that reflects the available budget spending authority of federal agencies. Collections and disbursements by agencies will, correspondingly, increase or decrease the balance in the account. Agencies report changes to this account to the Financial Management Service (FMS), Department of Treasury through monthly reporting on Statements of Transactions (FMS 224, 1220, or SF 1221) and Statements of Accountability (FMS 1219 and SF 1218).	
Treasury Input Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Collection Confirmation, Disbursement Confirmation, Undisbursed Appropriation Account Ledger, Transaction Confirmation, Statement of Difference, Receipt Account Trial Balance and Ledgers, Offset Request, Debt Write-off Notification, Collection Receipts, Collection Activity Termination Notice, Foreign Currency Conversion, Interest Rate, Treasury Fund Balance, Treasury Certificate, and Treasury Warrant.	
Treasury Offset Request	ICOM Arrow	The Treasury Offset Program uses this process to match delinquent debtor files against payment files. When a match occurs, the payment is intercepted and the debt is offset up to the amount of the debt plus assessed administrative fees. Under the Treasury Offset Program, delinquent accounts are subject to administrative offset of United States Government funds due individuals from various sources such as Federal Income Tax refunds, federal salary offset, and payments from other Government agencies.	
Treasury Output Information	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Trial Balance Data and Statement of Transactions, Request to Sell Investment, Reimbursable Bill, Purchase Investment Request, Intragovernmental Payment Collection, Certified Financial Statement Information, Discharged Debt Tax Notification, Management Report of Cash Accounting, Referred Debt, Statement of Accountability, Reprogramming Action, and Withdraw Funds Information.	
Treasury Report on Receivables	ICOM Arrow	TROR provides public receivables and delinquencies information and statuses. This report is required by Treasury on a quarterly basis.	
Treasury Reports	ICOM Arrow	The purpose of Treasury reports is to supply data required by Treasury for member deductions, such as delinquent debts or Thrift Savings Plan deductions.	
Treasury Warrant	ICOM Arrow	The Treasury warrant is a financial control document, issued after enactment of the Appropriation Act by the Treasury Department. This document is the basis for reporting cash on the books authorized to be withdrawn from the central account maintained by the Treasury, essentially maintaining the bottom line for all appropriations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Trial Balance Data and Statement of Transactions	ICOM Arrow	The Trial Balance is the accumulation of all financial and accounting transactions captured in General Ledger Accounts that represent the financial position of the organization at any point in time, to include aging reports. This is the logical representation of the Trial Balance that is reviewed, certified and published. The Statement of Transactions is the central accounting document used to report monthly accounting activity to Treasury. This report provides Treasury with information on agency deposits and disbursements and captures data by appropriation, fund and receipt accounts.	
Unapportioned Funds	ICOM Arrow	These are the unapportioned funds that will be withdrawn based on congressional enactment of the proposed rescission.	
Unapproved Additional Temporary Requirement	ICOM Arrow	This is an Additional Temporary Requirement which has been denied after review of the requirements for additional authority request.	
Unapproved Deferred Funds	ICOM Arrow	These are the Unapproved Deferred funds based on congressional actions. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed deferrals, funds must be made available for obligation.	
Unapproved Reprogramming Request	ICOM Arrow	This is an unapproved deferred fund based on congressional action.	
Unapproved Reprogramming Requirement	ICOM Arrow	This is an unapproved reprogramming requirement.	
Unapproved Rescinded Funds	ICOM Arrow	These are the unapproved rescinded funds based on congressional action. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed rescission, funds must be made available for obligation.	
Unapproved Transfer Request	ICOM Arrow	Notification to the component that OMB did not approve the request to move budgetary resources between statutory appropriations or treasury accounts.	
Unauthorized Absence Information Request	ICOM Arrow	This includes a request for information on unauthorized absences (e.g., from Congress, Department of Justice).	
Unauthorized Absence Report	ICOM Arrow	This includes summary information of Members who are or have been absent without leave as well as public deserter information intended to prevent future desertions. This may include (but not be limited to) the "Desertion and Unauthorized Absence (AWOL) Semi-Annual Service Report".	
Undisbursed Appropriation Account Ledger	ICOM Arrow	Financial Management Service (FMS) provides this document for expenditure accounts that have monthly activity. FMS provides information about the appropriation warrants issued, non-expenditure transfers, and transactions reported by agencies on the Statement of Transactions.	
Unique Item Information	ICOM Arrow	Information provided by the vendor, program manager, or item manager about an item which includes item description, Unique Item Identifier (UII), original acquisition cost, and embedded item information. It is used to enable asset management, accountability, and valuation either as an update to the asset record or the creation of the initial asset record, based on receipt or a conditional update of the item.	
Unit Cost Reporting Information	ICOM Arrow	This covers both Program Acquisition Unit Cost and Procurement Unit Cost information for use as a metric that is related to the cost associated with a single unit of the product to include direct costs, indirect costs, traced costs and allocated costs. Program Acquisition Unit Cost with respect to a major defense acquisition program, means the amount equal to the total cost for development and procurement of, and system specific military construction for, the acquisition program, divided by the number of fully-configured end items to be produced for the acquisition program. Procurement Unit Cost, with respect to a major defense acquisition program, means the amount equal to the total of all funds programmed to be available for obligation for procurement for the program, divided by the number of fully-configured end items to be procured.	
Unsolicited Product Information	ICOM Arrow	Product information received from an external non-DoD source (eg. manufacturer, supplier, vendor) pertaining to a product that contains hazardous material. The product information has not been requested by the DoD.	
Update Asset Record Energy Information	ICOM Arrow	Facility energy performance information that updates asset records.

Update Human Resources Personal Information Law Policy Reg	ICOM Arrow	Update Human Resources Personal Information is constrained by the following: Public Law 099-603, Public Law 103-356, Public Law 104-191, Public Law 105-264, Public Law 107-347, USC Title 5, USC Title 10, USC Title 29, USC Title 31, USC Title 32, USC Title 37, USC Title 38, USC Title 42, Intergovernmental Personnel Act, SFFAS 1, SFFAS 2, SFFAS 4, SFFAS 5, SFFAS 7, SFFAS 10, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-87, OMB Circular A-110, OMB Circular A-129, OMB Bulletin 01-02, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 2, TFM Vol 1 Part 3, JFMIP SR-99-5, JFMIP SR-99-9, JFMIP SR-01-01, JFMIP SR-01-04, JFMIP SR-02-02, OFFM-NO-0106, IRS Publication 15, DoDD 1322.18, DoDD 1332.41, DoDD 1344.10, DoDD 1350.4, DoDD 3025.14, DoDD 4500.09E, DoDD 5124.02, DoDD 5145.04, DoDD 6485.02, DoDD 7730.65, DoDD 8500.01E, DoDD 8570.01, Joint Pub 1-0, Joint Pub 3-0, JP4, DoDI 1300.18, DoDI 1304.12E, DoDI 1304.26, DoDI 1310.02, DoDI 1320.12, DoDI 1320.14, DoDI 1332.38, DoDI 1342.19, DoDI 2310.4, DoDI 3020.41, DoDI 5160.70, DoDI 5160.71, DoDI 5525.11, DoDI 6130.03, DoDI 7280.03, DoDI 8500.2, DoDI 8510.01, DoD 6010.13-M, DoD 8570.01-M, DoD FMR Vol 01, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 07A, DoD FMR Vol 07B, DoD FMR Vol 08, DoD FMR Vol 09, DoD FMR Vol 10, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 14, DoD FMR Vol 15, DoD 4500.9-R, DoD 5200.1-R, DoD 5200.2-R, DoD 5400.11-R, JFTR Vol 1, JTR Vol 2, AR 601-222, AR 601-270.	
Updated Asset Information	ICOM Arrow	This is the aggregation of the physical, legal and financial characteristics of an asset (real and personal) under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information. This is a parent ICOM that represents a combination of the information provided by the following children ICOM: Updated Materiel Asset Information and Updated Real Property Asset Information.	
Updated Asset Valuation Information	ICOM Arrow	This is the information that establishes the updates to asset recorded costs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Updated Detail Justification Material	ICOM Arrow	Updated President's budget numbers in line item detail, both at direct and reimbursable level. These materials also include the update or adjustments or new justification materials to support DoD's budget submissions. It should include program performance indicators and goals, any proposed policies and strategies along with the amount of mandatory and discretionary spending. The justification should include personnel requirements, its relationship to the President Management Agenda, and additional funding needs in excess of the budget.	
Updated Geospatial Features	ICOM Arrow	Geospatial information that has been updated as a result of an external or internal trigger and requires review against a family of geospatial standards, guidance documents, and received requirements.	
Updated Liability Information	ICOM Arrow	Upon partial liquidation of a liability, the liability is recalculated to show new amount outstanding. For example, this information can be the aggregated financial information for environmental liabilities that has amortization factors applied as applicable.	
Updated Maintenance or Production Schedule	ICOM Arrow	This identifies changes to the workload plan resulting from the accomplishment of tasks.	
Updated Materiel Asset Information	ICOM Arrow	This is the aggregation of the physical, legal and financial characteristics of a materiel asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Updated Real Property Asset Information	ICOM Arrow	This is the aggregation of the physical, legal and financial characteristics of a real property asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Updated Receivable Balance	ICOM Arrow	Adjustments are made to bills under protest or through offers in compromise or installment. If the bill is issued and a protest is filed, action and review occurs. Approve protest, re-liquidate entry, and adjust down to original duty, and cancel 2nd bill. If adjustments are made for more than \$600, IRS Form 1099 must be issued. Adjustments will generate the appropriate general ledger transactions to include write-offs and waivers. This information allows DoD to monitor, review and approve adjustments (e.g., credit memos, debit memos, waivers, and write-offs) relative to receivables balances.	
USSGL Transaction Library	ICOM Arrow	The United States Standard General Ledger (USSGL) Transaction Library is based on Section I, II and III of the Treasury Financial Manual (TFM), USSGL Supplement. It provides both budgetary and proprietary entries for business and accounting events occurring throughout the DoD, at an enterprise level. In some cases a business or accounting event may require more than one transaction, therefore the USSGL Transaction Library provides business rules that govern such needs. Compilation of the USSGL Transaction Library, which also includes the identification of delineating data elements (DDE), can be found in the BEA Laws, Regulations, & Policies Repository. The transactions are grouped under the following categories: A 100-300 Funding Sources B 100-400 Disbursements and Payables C 100-300 Collections and Receivables D 100-800 Adjustments/Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections E 100-200 Memorandum Entries F 100-200 Year Pre-Closing and Closing Entries	
USXPORTS	ICOM Arrow	This system provides DoD with the capability to process electronic export license data more efficiently and effectively through: interagency and electronic data exchange; electronic dissemination to all review layers; auto-staffing of cases; identifying precedent cases; and end-user alerts for workflow management.	

AV-2 Integrated Dictionary (BEA 11.1)

Validate Product Hazard Data Law Policy Reg	ICOM Arrow	Validate Product Hazard Data is constrained by the following: USC Title 31, USC Title 32, USC Title 37, USC Title 40, USC Title 42, Executive Order 13327, SFFAS 1, SFFAS 2, SFFAS 3, SFFAS 4, SFFAS 5, SFFAS 6, SFFAS 7, SFFAS 8, SFFAS 10, SFFAS 14, SFFAS 19, SFFAS 23, GAO Title 2, OMB Circular A-11, OMB Circular A-21, OMB Circular A-50, OMB Circular A-110, OMB Memo 04-04, OMB Memo 06-19, TFM Vol 1 Part 1, JFMIP FFMSR-8, JFMIP SR-99-4, JFMIP SR-99-8, JFMIP SR-00-01, JFMIP SR-00-3, JFMIP SR-00-4, JFMIP SR-03-01, JFMIP SR-03-02, OFFM-NO-0106, DoDD 8500.01E, DoDI 4165.14, DoDI 5000.64, DoDI 8500.2, DoDI 8510.01, DoD 4000.25-2-M, DoD 4140.26-M, DoD 4160.21-M, DoD 4160.28-M Vol 1, DoD FMR Vol 02A, DoD FMR Vol 02B, DoD FMR Vol 03, DoD FMR Vol 04, DoD FMR Vol 05, DoD FMR Vol 06A, DoD FMR Vol 06B, DoD FMR Vol 11A, DoD FMR Vol 11B, DoD FMR Vol 12, DoD FMR Vol 13, DoD FMR Vol 15, DoD 4140.1-R.	
Validate Product Hazard Data Request Law Policy Reg	ICOM Arrow	This control specifies the laws and regulations that apply to Product Hazard Data Stewardship and includes; Federal Standard 313: Material Safety Data, Transportation Data and Disposal Data For Hazardous Materials Furnished To Government Activities; Occupational Safety and Health Administration (OSHA) Hazard Communication. 1910.1200 (Standards - 29 CFR); DoD Instruction 6050.05, DoD Hazard Communication (HAZCOM) Program; and Hazardous Material Process Controls and Information Management Requirements Business Process Reengineering.	
Validated ESOH Assessment Geospatial Information	ICOM Arrow	This is geospatial information needed during the process of assessing an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Identification Geospatial Information	ICOM Arrow	This is geospatial information needed during the process of identifying an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Development Geospatial Information	ICOM Arrow	This is geospatial information needed during the process of developing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Implementation Geospatial Information	ICOM Arrow	This is geospatial information needed during the process of implementing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Geospatial Information	ICOM Arrow	This activity is an acknowledgement by an authorized government official (e.g. Program Manager) that geospatial information meets requirements and conforms with standards, accuracy and enterprise data quality guidelines. This activity performs a technical review of created or updated geospatial features to ensure conformance with published I&E standards and guidance as well as specific project requirements. This is a Parent ICOM. The children are: (1) Validated ESOH Identification Geospatial Information (2) Validated ESOH Assessment Geospatial Information (3) Validated ESOH Solution Development Geospatial Information (4) Validated ESOH Solution Implementation Geospatial Information (5) Validated Real Property Installation Geospatial Information (6) Validated Real Property Build and Maintenance Geospatial Information (7) Validated Real Property Asset Geospatial Information	
Validated Personnel Requisition	ICOM Arrow	This includes a validated action request for assignment of personnel. This request includes all the validated requirements to fill authorized position vacancies and will be either advertised or unadvertised. This information may include (but not be limited to) requisition date, requisition quantity, occupational code, and Unit Identification Code (UIC).	
Validated Real Property Asset Geospatial Information	ICOM Arrow	This is geospatial information needed during the process of maintaining asset information that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Validated Real Property Build and Maintenance Geospatial Information	ICOM Arrow	This is geospatial information needed during the processes supporting the building or maintaining of real property that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Real Property Installation Geospatial Information	ICOM Arrow	This is geospatial information needed during the installation support processes that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Veterans Affairs Disability Severity Information	ICOM Arrow	This includes documentation related to the Veterans Affairs (VA) disability severity information for a Member. The information may include (but not limited to) Member name, current Service or component, and disability severity information.	
VIPS	ICOM Arrow	VIPS will modernize and automate the IT capabilities for qualifying Applicants into the Military Service during wartime, peacetime, and mobilization. VIPS will enable a responsive, flexible and efficient means to qualify Applicants to meet manpower resource requirements for the uniformed Services, Coast Guard, and National Guard routine and contingency operations. VIPS will be the future accessioning system to be used by the USMEPCOM which serves as the single entry point for determining the physical, aptitude, and conduct qualifications of candidates for enlistment. VIPS will provide the capability to electronically acquire, process, store, secure, and seamlessly share personnel data across the ACOI. When fully implemented, VIPS will reduce the cycle time required to induct enlistees to meet the needs of Homeland Defense, reduce the number of visits to the MEPS, reduce manual data entry errors, and reduce attrition through better pre-screening practices. The implementation of SOA technology will enable accession data to be securely available to applicants and ACOI partners such as Recruiting and Training Commands, DMDC, Military Health System, HRM, and DTMO. VIPS will support compliance with DoD direction for a net-centric environment and take advantage of automated data capture technology, such as medical equipment with the capability to capture and electronically transmit exam results. The accessioning system of the future will be location independent, virtually paper-free, and automated to assist with bringing the right people at the right time to operational commanders. On November 1, 2008, the BTA assumed program lead. Funds are being transferred to BTA starting in FY 2010.	
Visualize Geospatial Analysis Results Request	ICOM Arrow	This is a request for visualizing geospatial analytical results that is needed for presentation of geospatial analysis and serves a specific analytic requirement.	
Voluntary Separation Concurrence	ICOM Arrow	This includes an official determination that a Member is eligible for a voluntary separation and that the losing services and components concur with the voluntary separation request. This may include (but not be limited to) recommendations to further decision activities, the eligibility on any requested waivers, and the date of concurrence.	
Voluntary Separation Nonconcurrence	ICOM Arrow	This includes information associated with an official determination that the losing services and components do not concur with the voluntary separation request. This may include (but not be limited to) justification for ineligibility or areas where the voluntary separation request may have been inaccurate.	
Voluntary Separation Request	ICOM Arrow	This includes the request information related to a voluntary separation. Additionally, this may also include information related to any waivers that are part of the voluntary separation request. The information in this request may include (but not be limited to) Member name, current Service or component, proof of eligibility for a voluntary separation, and justification for voluntary separation.	
Wage Determination Information	ICOM Arrow	This is the salary information for an official contract, based on the Service Contract Act (SCA) and the Davis-Bacon Act (DBA).	
Waiver Pro Forma Entries	ICOM Arrow	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the waiver on overdue receivables.	
Warfighter Information to DoD	ICOM Arrow	This parent ICOM represents a combination of the information provided by the following children ICOMs: Anticipated Customer Requirements, Chairmans Program Assessment, Joint Chief of Staff Feedback, Personnel Distribution Requirement, and Strategic Objectives.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
WAWF	ICOM Arrow	Wide Area Workflow (WAWF) provides the Department and its suppliers the single point of entry to generate, capture, and process invoice, acceptance, and payments related documentation and data to support the DoD asset visibility, tracking, and payment processes. It provides the nexus of information related to acceptance of goods and services in support of the DoD supply chain.	
Weapon System Lifecycle Management	ICOM Arrow	Weapon System Lifecycle Management represents full lifecycle management, cradle-to-grave, of Defense acquisition of weapon systems and automated information systems to include requirements, technology, development, production, and sustainment.	
Wire Transfer Information	ICOM Arrow	Information that is provided to the U.S. Treasury for the wire transfer transaction. Information could include payee's name, bank account and routing number, amount of transfer, and transaction date.	
Withdraw Funds Information	ICOM Arrow	Information sent to the Treasury regarding the line item amount to be withdrawn from the agency's appropriation.	
Withhold or Holdback Payment	ICOM Arrow	The withhold of a portion of a payment to a contractor in accordance with the terms of the contract.	
Work Order Information	ICOM Arrow	This represents information indicating that a work order has been authorized and initiates execution. It contains details about all estimated costs to include labor, material, invoices, or utilities associated with the activities described therein. This could include a specific or blanket authorization to perform certain work - usually broader in scope than a job order.	
Work Schedule	ICOM Arrow	A program and budget work schedule will be forwarded by a separate memorandum at the beginning of each program and budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process. This augments program and budgeting guidance with more detailed and updated information.	
Workforce Analysis Information	ICOM Arrow	This includes the end result of workforce analysis to be utilized in the projection of force structure/authorizations, strength planning, force restructuring, force distribution, force leveling, and in all aspects of workforce planning (e.g., Stop Loss, war plan sustainability studies, mandated retraining, Reduction-in-Force, recruiting projections, reserve strengths including active duty tour requirements, current strength level, and strength projections at specified future dates).	
Workforce Analysis Request	ICOM Arrow	This includes a request for analysis of specified information (e.g., strength, authorization) within the context of modeling future scenarios. This information may include (but not be limited to) request date, requestor name, and request description.	
Workforce Communication Request	ICOM Arrow	This includes information related to a request for communications to the specified workforce on a HRM issue. Communications are between management, labor and all DoD supported personnel. The information may include (but not be limited to) requestor personal information (e.g., name, official title, organization), type(s) of communications (e.g., newsletters, e-mail and web pages, bulletin boards, official surveys, commander's call presentation materials, rosters, postal support materials), communications mediums (e.g., recruiting TV, radio, billboards and backpack advertising), communication facilitation requirements (e.g., recruiting leased space in shopping centers), designated workforce specifications ( e.g., occupations, occupation groups), date of request, projected effective date for communication, and narrative description of communication requested.	
Workforce Occupational Safety Issue Communication	ICOM Arrow	A communication to responsible authorities that an issue of actual or potential Occupational Safety concern exists. The communication may refer to a set of circumstances of interest to the ESOH community or may be a request for a process authorization. The communication will generally be identified as a result of an internal study or inspection. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
Workforce Occupational Safety Issue Information	ICOM Arrow	Information about an issue of actual or potential Occupational Safety concern. This information provides interim guidance for human resources planning while the identification and assessment of an ESOH aspect is underway. This information will be replaced with the ESOH Control Requirement once the ESOH Control Agreement is reached.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Workforce Planner	ICOM Arrow	This includes personnel who perform activities associated with projecting manpower requirements (both budgetary and executionary) and personnel inventory to support preparation of the DoD budget. This also includes personnel who perform activities associated with projecting end-strength based on budgeted funds, developing and publishing the personnel plans (e.g., personnel distribution plan).	
Workload Information	ICOM Arrow	The projected amount of labor (e.g., occupations, competencies, and labor categorization) needed to operate, maintain, and support a mission for a manpower requirement.	
Write-Off Pro Forma Entries	ICOM Arrow	The general ledger impact of writing off eligible debts and adjusting accounts receivable balance. This generates the appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the debt write offs.	
10 USC 2805	Information Exchange	This is documentation containing evidence of compliance to Title 10 of the United States Code, Section 2805. This section covers the statutory dollar limits for Unspecified Minor Construction.	
10 USC 2853	Information Exchange	This is documentation containing evidence of compliance to Title 10 of the United States Code, Section 2853. This Section specifies the cost variation limits Congress must approve if costs increase during construction.	
Absence Follow Up	Information Exchange	This includes a follow up for additional information concerning a Member who is absent. The information requested may include (but not be limited to) the date and duration of the absence, the location that the Member is absent from, information pertaining to the intent of the absent Member, and the current whereabouts of the absent Member.	
Absence Request	Information Exchange	This includes information associated with requesting an absence. This information may include (but not be limited to) the absence start date, the absence end date, the type of absence being requested (e.g., organization controlled absence (regular liberty/pass, special liberty/pass, administrative absence)) and the reason for the absence. This could also include information regarding the cancellation or rescinding of an absence (as identified as necessary from a commander or Member).	
Acceptable Discrepancies	Information Exchange	The information that identifies when discrepancies are at an acceptable level.	
Acceptance Evidence	Information Exchange	Documentation of the act of assuming ownership of legal title and accountability of goods tendered and services rendered, excluding Real Property Placed in Service Notification. This serves as proof that the deliverables received or services rendered have been provided fulfilling specified terms and conditions against the previously agreed upon obligating document, contract, and/or intragovernmental order between the supplier and the buyer.	
Acceptance Feedback Information	Information Exchange	The external acceptance evidence components are required to provide and send when performing receipt and acceptance outside of the enterprise.	
Acceptance Information	Information Exchange	Documentation that constructive acceptance has occurred or that ownership of legal title and accountability of goods and services has been transferred to the government buyer that allows the government supplier to record a receivable transaction.	
Acceptance Readiness Notification	Information Exchange	Notification that a real property asset is ready for either interim or final acceptance.	
Acceptance Results	Information Exchange	The documentation of the results of the evaluation of goods tendered or services rendered in accordance with the acceptance criteria.	
Accepted Intragovernmental Agreement	Information Exchange	An agreement signed by the government supplier and accepted by the government buyer. An agreement is a written instrument of understanding following negotiations between an agency and a government supplier, where terms such as pricing and/or discounts have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains terms and clauses applying to future orders between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future orders will incorporate by reference or attachment the required and applicable clauses agreed upon in the agreement.	
Accepted Intragovernmental Order	Information Exchange	An intragovernmental order that has been accepted by the government supplier that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accepted Letter of Offer and Acceptance Document	Information Exchange	Accepted Letter of Offer and Acceptance is a Foreign Military Sales Trust Fund case document that has been countersigned by USG and signed by the purchaser, if required, accepting terms and conditions of the offer. The document provides information necessary to execute the case in the Foreign Military Sales Trust Fund and is the official document for recording contract (budget) authority at the case level.	
Accepted Purchase Request	Information Exchange	Document which has been reviewed by the procurement organization and found to adequately describe the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
Accepting Officials List	Information Exchange	Contains name of Accepting Official(s).	
Accession Agreement Information	Information Exchange	This includes information related to the enlistment/reenlistment of an applicant (e.g., DD Form 4-series, DD Form 4 Annexes). This information may include (but not be limited to) identification data, agreements, certification and acceptance, confirmation of enlistment/reenlistment, approval, and acceptance by Service representative.	
Accession Eligibility Notification	Information Exchange	This includes a notification that captures the eligibility information of an applicant during accession processing. This information may include (but not be limited to) notification date and time, reasons why an applicant is not eligible, whether an applicant meets or does not meet standards, and scheduling guidance.	
Accession Enlistment Information	Information Exchange	This includes information related to an applicant's accession enlistment information. This may include (but not be limited to) applicant name, applicant unique identifier/social security number, whether the applicant chose to enlist, whether the applicant as taken the oath, Service commitment, delayed entry program (DEP) information, and ship-to destination information.	
Accession Meal Entitlement Information	Information Exchange	This includes accession meal entitlement information, including (but not limited to) accession shipping information and meal check information.	
Accession Processing Request	Information Exchange	This includes information related to an accession processing request (e.g., USMEPCOM 680-3A-E). This may include (but not be limited) to applicant name, applicant unique identifier/social security number, applicant date of birth, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifier, processing type, preferred location, date, time, processing requirements, and Service.	
Accession Processing Request Update	Information Exchange	This includes the updated information related to an accession processing request (e.g., USMEPCOM 680-3A-E). This may include (but not be limited) to applicant name, applicant unique identifier/social security number, applicant date of birth, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifier, processing type, preferred location, date, time, processing requirements, and Service.	
Accession Processing Scheduling Information	Information Exchange	This includes information related to an accession processing schedule (e.g., USMEPCOM 727-E). This may include (but not be limited to) applicant names, unique identifiers/social security numbers, applicants' date of birth, applicants' genders, Recruitment Specialists (e.g., Recruiter, Service Guidance Counselor/Liaison) and unique identifiers, processing date, lodging, transportation, location, Service, projection type, Special Category information, and comments/notes.	
Accession Profile Information	Information Exchange	This includes applicant information collected during the recruiting and accession processes. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), background screening information, accession information, accession disclosure information, and accession shipping information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accession Profile Update Information	Information Exchange	This includes the updated information collected from the applicant as a result of further inquiries. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), background screening information, accession information, accession disclosure information, and accession shipping information.	
Accession Shipping Arrangement Information	Information Exchange	This includes information related to shipping a Member or applicant, including (but not limited to) shipper name, shipper projections, and seat blocking requests.	
Accession Shipping Final Order	Information Exchange	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Accession Shipping Packet	Information Exchange	This includes the accession shipping/travel packet information, including (but not limited to) travel information (e.g., itinerary information, meal check information), accession and Service information.	
Accession Shipping Requirement	Information Exchange	This includes a requirement to ship a Member to their initial assignment or cancel an existing accession shipping order. This information may include (but not be limited to) personal information, accession shipping date and assignment location.	
Accession Shipping Reservation Information	Information Exchange	This includes reservation information related to shipping a Member or applicant, including (but not limited to) shipper name, shipping date, and travel information.	
Accession Testing Results Notification	Information Exchange	This includes information related to a notification of accession testing results (e.g., DD Form 1304-5). This may include (but not be limited to) applicant name, applicant unique identifier/social security number, tests taken, test scores, percentiles, and whether the applicant meets aptitude standards.	
Accounting Policy	Information Exchange	Policies and procedures that provide guidelines and assistance in accounting for assets, liabilities, revenues, and expenses within the Department of Defense.	
Accounts Payable	Information Exchange	A financial record of monies owed by the Department of Defense or a component of the Department.	
Accounts Payable Account	Information Exchange	A summary of general ledger accounts used for financial reporting. No entries are posted to this account. These accounts detail the amounts owed to federal or nonfederal entities for goods, and property ordered and received, and for services rendered by organizations or people other than employees.	
Accounts Payable Adjustments	Information Exchange	Adjustment made to outstanding payable that may result from payments made to vendor or credits received from vendor. It also includes adjustments to reflect discrepancies found during periodic account reconciliation.	
Accounts Payable Offset	Information Exchange	The amount a payment to a vendor, or other party owed by the government, should be offset to resolve any debts owed to the Government.	
Accounts Payable Offset Pro Forma Entries	Information Exchange	This is the general ledger impact of offsetting the balance of an accounts payable. Offsetting accounts payable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	
Accounts Payable Offset Request	Information Exchange	A request to compare the payment due to a vendor, or other party owed by the government, against any accounts receivable for the vendor or levies issued by the IRS to determine if the payment should be offset to resolve any debts owed to the Government.	
Accounts Payable Pro Forma Entries	Information Exchange	The debit and credit affects of accounts payable pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Accounts Receivable Offset Pro Forma Entries	Information Exchange	This is the general ledger impact of offsetting the balance of an accounts receivable. Offsetting accounts receivable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	
Accounts Receivable Principal Balance	Information Exchange	This is the receivable principal balance used to establish the initial amount of the accounts receivable for specific customer.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accounts Receivable Supporting Documentation	Information Exchange	Accounts Receivable supporting documentation supports the balance of a receivable account associated for a particular customer. The supporting documentation includes documentation of goods or services that have been provided to a customer for which the Department is due payment.	
Accrued Liabilities Pro Forma Entries	Information Exchange	The debit and credit affects of accrued liability pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Accrued Liability Cancellation Information	Information Exchange	Information associated with the cancellation of a previously accrued liability of the Department of Defense.	
Accrued Liability Information	Information Exchange	A financial record of expenses that are recognized when incurred regardless of the time the expense or liability is paid.	
Acknowledged Intragovernmental Order	Information Exchange	An intragovernmental order that has been accepted by the government supplier and subsequently acknowledged by the government buyer that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute. The intragovernmental order may contain the original or modified order that has been mutually agreed upon between the buyer and government supplier.	
Acquisition Decision Memorandum	Information Exchange	A memorandum signed by the Milestone Decision Authority (MDA) that documents decisions made as the result of a Milestone Decision Review (MDR) or Decision Review.	
Acquisition Information for Congressional and Federal Inquiry	Information Exchange	This is the acquisition information required to respond to inquiries from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Acquisition Program Baseline Revision	Information Exchange	Revision to the existing program baseline for cost, schedule, performance parameters, constraints, objectives and milestones. This information is developed by the Program Manager for submission to the Decision Authority for approval, which will then guide the PM in the execution of the acquisition program.	
Acquisition Program Projected Manpower	Information Exchange	The program objectives of a major acquisition program (e.g., Air Force Airborne Laser Program). This includes, but is not limited to, the projected quantity of labor necessary to support a mission.	
Acquisition Requirement	Information Exchange	An acquisition requirement is a clearly defined requirement critical for response to immediate and long-term capability needs of the warfighter that have been reviewed, validated, funded and fielded.	
Action Plan	Information Exchange	Proposed remedial action plan that requires agreement from the customer before determining whether the request can be revisited or not.	
Additional Accounts Payable Information	Information Exchange	Additional information that is required to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Accounts Payable Information Request	Information Exchange	Request additional information to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Disbursement and Collection Information Request	Information Exchange	This is a request to the functional area for additional disbursement and/or collections information that will help to explain and support resolving anomalies and/or discrepancies between DoD's fund balance and Treasury's records.	
Additional Information Request	Information Exchange	The form used to request additional financial or non-financial information to satisfy cost/performance requirements. Request includes, in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Additional Program Information	Information Exchange	Additional program information such as supplemental justification materials or other relevant program information to support the OSD/JCS program review.	
Additional Program Information Request	Information Exchange	Request for additional program information such as supplemental justification materials or other relevant program information to support the OSD/JCS program review.	
Additional Reconciliation Information	Information Exchange	Additional supporting documentation that describes the discrepancies between the Treasury and Department of Defense Fund Balance account.	
Additional Supporting Collection Information	Information Exchange	Additional Collection Information received from supply chain entitlement to analyze and identify where to apply the previously unidentified collection.	
Additional Temporary Funding Requirement	Information Exchange	A request for additional temporary funding requirement for the services or components to continue operating under CRA.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Adjustment to be Made	Information Exchange	The amount recorded by the Government for a change in the amount to be paid or owed by the commercial supplier. (Examples of causes for an adjustment include change in quantity ordered, Approved additional work, Adjustment to Contractor Bill Rates, etc.)	
Administrative Hold Notification	Information Exchange	This includes the notification that a hold/flag (e.g., medical, legal) has been placed on a personnel/pay profile which precludes a Member/employee from certain personnel actions (e.g., assignment, deployment, leave, and separation). This may include (but not be limited to) adverse information, medical information, Service obligation information, notification date and time.	
Administrative Procurement Change Request	Information Exchange	Requirement to modify a procurement instrument as a result of administering the contract.	
Advance Ship Notice Information	Information Exchange	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.	
Adverse Action Notification	Information Exchange	This includes the notification of an adverse action being charged, adverse action decision, or any other disciplinary actions needed to be taken.	
Adverse Action Profile Information	Information Exchange	This includes adverse action information that is associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action type, duration, administrative hold flag, adverse action process status, and specifics of the adverse action.	
Adverse Action Profile Update Information	Information Exchange	This includes updated adverse action information that is associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action type, duration, and specifics of the adverse action decision to be taken, or referral to court-martial.	
Adverse Action Response	Information Exchange	This includes the Member providing written matters for consideration in defense of themselves against the adverse action charged to them.	
Advice of Payment	Information Exchange	A detail explanation of a payment sent to the vendor, or other party owed by the government.	
Aggregated Spend Information	Information Exchange	Collected and consolidated historical spend data that includes what is purchased and from whom it is purchased that is used to identify strategic sourcing opportunities. Spend information includes post-award data such as total obligated amount per fiscal year, socio-economic information, or supplier concentration. Summarized Federal Procurement Information must be obtained from Contract Action Reports from the Federal Procurement Data System.	
Allowance for Loss on Accounts Receivable	Information Exchange	Estimated uncollectible accounts receivables from public debts that brings the receivables amount at their net realizable value. This records the expected expense for any loss due to the debtor's lack of ability to pay DoD for any legal or unforeseeable reasons. This provides DoD the information require to calculate the allowance for doubtful accounts on an annual basis. Appropriate levels of review and approval must be performed prior to recording the allowance for doubtful accounts to the general ledger.	
Alternate Means Product Hazard Data Information	Information Exchange	The product hazard data (PHD) which was pursued by alternate means from an external source is received.	
Alternate Means Product Hazard Data Request	Information Exchange	The product hazard data (PHD) which is needed is pursued by alternate means from an external source.	
Amortization and Interest	Information Exchange	The schedule and amount of investment premiums or discounts recognized on securities through the maturity date of the investment.	
Amortization Schedule	Information Exchange	Timing and amount of investment premiums or discounts and earned interest should be recognized on securities through the maturity date of the investment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Analytical Results	Information Exchange	The collection of one or more of the following: forecast, comparative analysis, trend analysis. A forecast might represent a prediction of future financial needs or trends based on analysis of available historical cost information and planned changes in capabilities. A comparative analysis might represent a comparison of how similar budget programs or business activities are executed by multiple organizations from a cost and performance management perspective. A trend analysis might represent how a single budget program or business activity has performed over multiple reporting periods. These analytical results will support many types of business decision making, to include planning, future years budget formulation, and other resource tradeoffs.	
Anomaly Detection Algorithms	Information Exchange	This is the set of criteria by which anomalies will be detected. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule. It is not limited to isolated variables; this may apply to multivariate analysis of data elements.	
Anticipated Adjustment	Information Exchange	The amount recorded by the Government for a change in the amount to be paid or owed by the Government supplier. (Examples of causes for an adjustment include change in quantity ordered, Approved additional work, etc.)	
Anticipated Customer Requirements	Information Exchange	Projected demand for products or services.	
Appeal Material	Information Exchange	Each year the actions taken by congressional committees during consideration of the DoD authorization and appropriation requests are reviewed by the DoD components and normally that review process results in the component submitting an appeal to the committee actions. Appeals may be made on the basis of dollars, quantities, manpower and/or language. The submission of appeal materials to the congressional committees involves a letter to the appropriate committee chairman (or chairmen in the case of appeals to joint conferees), which sets forth the department's position on the most significant programs/items impacted by congressional actions. This letter is prepared for the signature of the Secretary of Defense. Only the secretary will provide the department's position on appeal items. The sequence for submission of appeal material can vary each year and is primarily dependent upon the timing of each committee's actions on the budget request. The preparation of appeal items begins when the actions of the committees become known. Where feasible, the appeal material will be modified to reflect final floor action since amendments adopted on the floor can significantly change positions reported out by the committees. The appeal will be as close to the President's Budget as possible, while restricted to considering only the last two actions (assuming there have been two) within each separate process (i.e., authorization and appropriation).	
Appeal Submission Instructions	Information Exchange	Instructions prepared by OSD to be distributed to the components for the preparation of their appeal materials that will support the department's position to the congressional budget hearing.	
Applicant Additional Information Request	Information Exchange	This includes information related to a request for additional applicant information (e.g., personal information, aptitude results, medical information) in order to continue the accession process. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), accession shipping information, and reasons for incomplete applicant information.	
Applicant Additional Information Response	Information Exchange	This includes information related to a response to a request for additional applicant information (e.g., USMEPCOM Form 601-23-E). This information may include (but not be limited to) applicant name, applicant unique identifier/social security number, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison), date of response, missing applicant information, and any response information (e.g., medical, Service) addressing a request for additional information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Applicant External Organizational Check Information	Information Exchange	This includes information related to an external organizational check of an applicant for verifying identity, background screening, and investigation (e.g., FD-258). This may include (but not be limited to) individual personal information (e.g., social security number for Social Security Administration check, alien registration number U.S. Citizenship and Immigration check, fingerprints for Federal Bureau of Investigation and Office of Personnel Management check, and prior military service for Defense Manpower Data Center check).	
Applicant External Organizational Check Response	Information Exchange	This includes information related to a response to an external organizational check of an applicant's identity, background screening, and investigation (e.g., FD-258). This may include (but not be limited to) individual personal information (e.g., social security number for Social Security Administration check, alien registration number U.S. Citizenship and Immigration check, fingerprints for Federal Bureau of Investigation and Office of Personnel Management check, and prior military service for Defense Manpower Data Center check).	
Apportionment	Information Exchange	An apportionment is a distribution made by the Office of Management and Budget of amounts available for obligation in an appropriation. The apportioned amount limits the obligations that may be incurred. An apportionment may be further subdivided by an agency into allotments, sub allotments, and allocations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Apprehension Assistance Notification	Information Exchange	This includes a notification to a law enforcement agency, military force, or foreign government for assistance in apprehension of a Member that is classified as Unauthorized Absent (UA) or Deserter. This notification includes attempts to establish liaisons in the hope of increasing cooperation on this matter.	
Appropriation Act	Information Exchange	A provision of legal authority by an act from Congress that allows federal agencies to incur obligations. It is the most common means of providing budget authority.	
Approved Acquisition Program Baseline	Information Exchange	This information prescribes the key cost, schedule, performance parameters, and other cost constraints, objectives, or thresholds for the Acquisition Program Baseline as approved by the Milestone Decision Authority.	
Approved Adjustment	Information Exchange	Notification from supply chain entitlement process approving adjustments to accounts payables transactions.	
Approved Apportionment	Information Exchange	Approved apportionment is the notification from OMB that the DoD's apportionment request has been approved and available for distribution to the components and/or services.	
Approved Emergency Implementation	Information Exchange	The DSCA's approval to implement a case in the Foreign Military Sales Trust Fund prior to receipt of the amount due with acceptance. The emergency implementation action is taken only when the case document is in accepted status.	
Approved Government Purchase Card Statement	Information Exchange	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. For payment to Government Purchase Card providers, approval constitutes certification. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Cost Vouchers.	
Approved Payment Request	Information Exchange	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. For payment to Government Purchase Card providers, approval constitutes certification. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Cost Vouchers.	
Approved Proposal Notification	Information Exchange	Notification sent to the entity that the proposal for the new requirements has been approved.	
Approved Request for Proposal	Information Exchange	A request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been approved by a contracting officer for release to suppliers. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Approved Sourcing Plan	Information Exchange	A plan that is compliant with current DoD guidelines, instructions, and policy and identifies those milestones at which decisions should be made in order to support the attainment of the acquisition objectives. The plan must address all the sourcing and contracting considerations that will control the acquisition of goods and services.	
Approved Sourcing Plan Authorizing Micropurchase	Information Exchange	Approved sourcing plan providing authorization to use a purchase card for requirements for purchases under \$2,500.	
Approved Sourcing Plan Needing New Agreement	Information Exchange	Approved sourcing plan that will necessitate the establishment of a new agreement. The need for a new agreement is identified as part of a strategic sourcing process. A sourcing plan is compliant with current DoD guidelines, instructions, and policy and identifies those milestones at which decisions should be made in order to support the attainment of the acquisition objectives. The plan must address all the sourcing and contracting considerations that will control the acquisition of goods and services.	
Approved Sourcing Plan with Existing Agreement	Information Exchange	Approved sourcing plan that relies upon the use of an existing agreement, and does not require the establishment of a new agreement. A sourcing plan is compliant with current DoD guidelines, instructions, and policy and identifies those milestones at which decisions should be made in order to support the attainment of the acquisition objectives. The plan must address all the sourcing and contracting considerations that will control the acquisition of goods and services.	
Approved Trial Balance	Information Exchange	The approved and or certified Trial Balance with the accumulation of all financial and accounting transactions captured in General Ledger Accounts. The US General Ledger is the structure used in posting the Trial Balance and also includes subsidiary ledgers.	
Archived Intragovernmental Order	Information Exchange	Closed intragovernmental order that is filed and stored by the government supplier in compliance with best business practices.	
Archived Procurement Instrument	Information Exchange	Closed procurement instrument that is filed and stored by the buyer in compliance with statutory guidelines and best business practices.	
Arrival Information	Information Exchange	Acknowledgement of the arrival or delivery of passengers or cargo at a destination.	
Assessment Budget Request	Information Exchange	This is a request for appropriation funding to perform ESOH aspect assessment that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Assessment Cost Information	Information Exchange	Details about the estimated work that will be performed during an ESOH Aspect Assessment process. This information is used in the calculation of a cost estimate and is updated on a periodic basis to reflect changes in the cost of work to be completed.	
Assessment Results	Information Exchange	The information gathered and/or generated during an ESOH Aspect Assessment that will be used to determine whether an ESOH solution is needed. Examples include sampling analysis results, a risk finding, an explosive hazard ranking, and an ecological hazard index.	
Assessment Results and Risk Finding	Information Exchange	The documented results of ESOH aspect and/or risk assessment that is the primary input to developing an ESOH solution.	
Asset Hazardous Process Description	Information Exchange	Information that identifies a potential hazardous process(es) in a construction, maintenance or sustainment activity of an asset described to the level of granularity necessary to define effective ESOH controls.	
Asset Record	Information Exchange	This is the continuous aggregation of descriptive characteristics of an asset under Department of Defense accountability.	
Asset Recorded Cost Information	Information Exchange	This object represents the full cost of a constructed real property asset. It is triggered by the placed in service date of a constructed real property asset. These costs which are relieved from the construction in progress account are posted to the asset record to enable fiscal accountability.	
Asset Status Information	Information Exchange	This is the status of items necessary to provide or support asset accountability and valuation. Examples include: installation operations ceased, serviceable, excess, obsolete, or unserviceable.	
Assignment Draft Order	Information Exchange	This includes information pertaining to a draft assignment order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assignment Final Order	Information Exchange	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, accommodations), and order type. This information will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Management Business Area. The information will also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	
Assignment Final Order Update	Information Exchange	This includes the information needed to document an update to an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, accommodations), and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area. The information will also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	
Assignment Order Acknowledgement	Information Exchange	This includes information necessary to acknowledge the receipt of an order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Assignment Order Requirement	Information Exchange	This includes information related to an official requirement to generate an assignment order. An official order requirement may be initiated by an approved assignment action. The information may include (but not be limited to) personnel action status, assignment start and stop date, and personnel action identifier. The information contained in this ICOM will be the basis for a financial commitment and/or obligation of funds in the Financial Visibility Business Area.	
Assignment Profile Information	Information Exchange	This includes assignment information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, assignment type, assignment order information (assignment location, assignment start and stop date, order number, order effective date, and order status), arrival date, departure date, duty status and Service obligation.	
Assignment Profile Update Information	Information Exchange	This includes updated assignment information associated with a personnel/pay record. This may include (but not be limited to) assignment type, duty start and stop date, and duty location.	
Assignment Request	Information Exchange	This includes the career preferences and applicant data of potential candidates for an assignment. The information may include (but not be limited to) assignment preferences, career goals, and training.	
Audit Comments	Information Exchange	Comments from the internal Audit community on the draft financial statement package.	
Audit Report	Information Exchange	The results of the auditor's review of the draft financial statements are documented in an audit report. The audit report should be consistent with previously recommended audit adjustments that were coordinated with Department of Defense management.	
Authorization to Receive Financing Payment	Information Exchange	Authorization from the contracting officer or their representative for the contractor to submit financing payment requests.	
Award Draft Order	Information Exchange	This includes information pertaining to a draft award order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Award Final Order	Information Exchange	This includes the information needed to document an approved order for an award personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Award Order Requirement	Information Exchange	This includes information related to an official requirement to generate an award order. An official order requirement may include an approved award recommendation which requires an order. The information contained in this ICOM will be the basis for a financial commitment and/or obligation of funds in the Financial Visibility Business Area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Awarded Agreement	Information Exchange	An agreement awarded to a commercial supplier. An agreement is a written instrument of understanding following negotiations between an agency, contracting activity, or contracting office and a contractor, where terms, such as pricing and/or discounts have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains contract terms and clauses applying to future contracts between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future contracts or orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future contracts or orders will incorporate by reference or attachment the required and applicable clauses agreed upon in the agreement. An agreement is not a contract or order.	
Awarded Procurement Instrument or Supplemental Procurement Instrument	Information Exchange	A procurement instrument that has been awarded to an external supplier and is a mutually binding legal relationship obligating the supplier to furnish the goods or services (including construction) that can be invoiced, and the buyer to provide payment for those goods and services as agreed upon by the procurement instrument. The awarded procurement instrument may contain the original or modified procurement instrument that has been mutually agreed upon between the buyer and supplier. It includes all types of actions that obligate the DoD to an expenditure of funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, procurement instruments include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. Procurement Instruments could include Fixed-price, Cost-reimbursement, Incentive, Cooperative Agreements, Other Transactions, Indefinite-Delivery type orders, order against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules. A procurement instrument may be funded or unfunded and does not necessarily create an obligation of funds (an example of no funding would be a basic ordering agreement or a contract modification changing the period of performance).	
Base for Programming	Information Exchange	This information establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations, except those appropriations having no budget activity subdivisions in the budget document presentation.	
Base Operations Performance Information	Information Exchange	This is the narrative and metrics data that when aggregated describes the execution of Service Base Operations activities.	
Baseline Input	Information Exchange	Baseline input from the components to be incorporated for congressional review.	
Baseline Report	Information Exchange	Baseline report submitted to congress for review. This baseline report will be the initiating point for reprogramming actions.	
BCMR Hearing Notification	Information Exchange	This includes the notification information to reflect the time and place of the Board for Correction of Military Records hearing. This information may include (but not be limited to) the notification date, hearing date, hearing time, location of the hearing, and reason for the hearing.	
Below Threshold Reprogramming Actions	Information Exchange	Reprogramming actions that do not meet the criteria for prior approval or notification. They do not require approval by the Secretary or Deputy Secretary of Defense and are handled within the individual service. Congressional oversight of these reprogramming actions is through DoD's semiannual submission of report DD1416, which contains cumulative BTR actions for each line item.	
Benefit Administration Information	Information Exchange	This is information required by external organizations such as Veterans Affairs (VA) or Office of Personnel Management (OPM) to control participation in programs supporting Department of Defense Human Resources.	
Benefit Debt Disposition	Information Exchange	This is an overall flow of benefit debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Benefit Information	Information Exchange	This is data on a person, or related general population information, regarding benefit enrollment, costs, and benefit program availability.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Benefit Procurement Request	Information Exchange	This is a requirement that defines the need for benefit program related goods or services. It may be an unfunded or funded requirement.	
Benefit Profile Information	Information Exchange	This includes benefit information related to a personnel/pay record. The types of information captured may include (but not be limited to) benefit enrollment information, travel voucher information, family member information, individual development information, and information regarding submissions of benefit program proposals or deficiencies.	
Benefit Profile Update Information	Information Exchange	This includes updated benefit information related to a personnel/pay record. The types of information captured may include (but not be limited to) benefit enrollment information, travel voucher information, family member information, individual development information, and information regarding submissions of benefit program proposals or deficiencies.	
Billing Document	Information Exchange	Included in the billing document are debtor or responsible parties, amount owed, remittance terms and conditions and payment due date. Can be a statement, consolidated billing or payment coupons.	
Billing Requirement	Information Exchange	Billing requirements are negotiated with the customer and include agreement on the amount and timeliness of billing. Billing requirements also include terms associated with the application of penalties, administrative fees, and interest against overdue outstanding debts.	
Budget Authority	Information Exchange	This is the legal funding document that enables the component to incur obligations. In addition to the funding information, the document includes statutory limitations imposed on a particular appropriation or individual line item. The basis for the release is the program authority.	
Budget Information	Information Exchange	The comprehensive financial plan for a program. It includes the on-budget and off-budget amounts combined to derive a total of program fiscal activity. Also includes information related to operations for a fiscal period in terms of estimated costs, obligations and expenditures; source of funds for financing including anticipated reimbursements and other resources, and history and workload data for the projected program and activities.	
Budget Information Estimate	Information Exchange	Cost estimate prepared for inclusion in DoD budget to support acquisition programs.	
Budget Lookup Service Information	Information Exchange	Information about the last President's Budget, Current Estimate, and POM/BES submissions.	
Budget Lookup Service Information Request	Information Exchange	Request transaction data for Budget Lookup Service.	
Budget Planning Memorandum	Information Exchange	The USD(Comptroller) guidance memorandum, transmitted in June of each year will provide specialized instructions such as program basis for the estimates, key assumptions to be used, and special supporting material requirements. In addition, "supplementary instructions" memoranda issued on an "as needed" basis (usually in July/August) will be limited to specific instructions which amplify guidance included in the OUSD(Comptroller) memorandum and in this volume. The use of other memoranda to transmit program and budget guidance will be restricted to new or nonrecurring requirements. Included in this guidance will be budget material due dates and instructions for preparing estimates for the prior year (PY), current year (CY), budget years BY1, and BY2 (in the biennial budget year), and the outyears.	
Budget Policy	Information Exchange	Provides general guidance on the formulation and submission of budget requests to the Office of Secretary of Defense and also provides guidance on submission, presentation and justification to Congress. The policy will also include memoranda issued throughout the fiscal year regarding budget matters.	
Budget Review Analysis	Information Exchange	Budget review analysis reflects the result of the joint budget review between OMB and OSD on budget submissions from the components. The analysis should reflect the results of the following budget review activities: <ul style="list-style-type: none"> <li>- Open forum for deliberation on key issues within DoD and across all organizations</li> <li>- Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs</li> <li>- Review of budget submission that conforms with legal and regulatory guidance on budgetary resources</li> <li>- Review of budget submission that is well justified and balances mission requirements with available resources.</li> </ul>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Budgetary Resources Temporary not Available	Information Exchange	The identification of authority transferred to or from the General Fund of the Treasury that is identified as temporarily not available to incur obligations and expenditures. Congress can specify availability and criteria for spending these funds. Funds temporarily not available may include budgetary resources subject to the cancellation of expired and no-year accounts, enacted rescissions, capital transfers, budgetary resources issued pursuant to public law, and other authority withdrawn.	
Build Make Maintenance Sustainment Evidence	Information Exchange	This is information from the provider that documents the tendering of goods and rendering of services as it relates to building, making, maintaining or sustaining real property.	
Business System Approval or Disapproval	Information Exchange	Notification to the contractor that their business system has been approved or disapproved.	
Buyer Approved Intragovernmental Order	Information Exchange	An intragovernmental order that has been approved by the Government Buyer but not yet accepted by the Government Supplier. It includes terms and conditions between the Government supplier and the Government buyer and meets the requirements of applicable regulations, policy and statute.	
Buyer Planning Information	Information Exchange	Information provided to the supplier during the development of a sourcing strategy (i.e. demand forecast).	
Cancel Payment Notification	Information Exchange	Notification received by the disbursing officer from authorized official that certifies that a payment cancellation request has been received and processed.	
Cancel Payment Request	Information Exchange	Request from supply chain entitlement to financial management for cancellation of a payment due to invalid amount, appropriation, or payee.	
Cancel Payment Request Returned	Information Exchange	Rejected Cancel Payment Request. A cancel payment request cannot be processed if the payment has already occurred.	
Cancellation Notification	Information Exchange	Notification that a cancellation has occurred.	
Cancellation of Budgetary Resources	Information Exchange	Cancellation of budgetary resources proposed by the Executive Branch through OMB that is not subject to the requirements of Title X of the Congressional Budget and the Impoundment Control Act of 1974.	
Candidate Non-Selection Information	Information Exchange	Notification that a candidate has not been selected, has declined an offer, or has terminated processing for a position.	
Candidate Recruitment Information	Information Exchange	This includes all the initial information provided by the recruitment applicant to apply to the armed services. This information may include (but not be limited to) personal information, school transcripts, resume, contact information, birth certificate, social security card and permanent resident card (i.e., green card).	
Capital Asset Valuation Information	Information Exchange	This is the information that establishes the initial and updates to capital asset recorded costs. It includes the full cost incurred to bring an asset to form and location suitable for its intended use.	
Capital Lease Liability Information	Information Exchange	Information associated with the treatment of an asset under the terms of a capital lease. Includes information associated with the net present value of future payment for use of the asset.	
Career Path Action Request	Information Exchange	This includes information associated with personnel submitting a request for the generation of a tailored individual Career Path Plan. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization) and the requested completion date for the career plan.	
Career Path Information	Information Exchange	This includes information associated with a person's occupation, or occupation family, and career path. The information may include (but not be limited to) career plan recommended phase points (in terms of years of service) for development actions (e.g., training, education, or distributed learning courses) leading to specified competency levels, recommended credentials, and specified organizational levels (e.g., Major Command Staff Division Chief, Service HQ Action Officer) of assignment.	
Cash Disbursement Voucher	Information Exchange	Document granting authority for the Disbursing Officer to make cash payment for Government obligations. Includes both the amount to be paid as determined by the supply chain entitlement process and the associated payee information.	
Cash Receipt and Payment Information	Information Exchange	This is any supporting documentation related to remittance (i.e. copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cash Receipts	Information Exchange	This is any supporting documentation related to remittance for payments for goods or services (i.e. copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Casualty Assistance Delivery Request	Information Exchange	This includes the request for delivery of specific casualty assistance program selections. These selections are made from a group of options made available to a casualty Member's family.	
Casualty Assistance Program Feedback Request	Information Exchange	This includes the request for feedback on services offered to a casualty Member and/or their family through the casualty assistance program.	
Casualty Assistance Program Feedback Response	Information Exchange	This includes aggregated information from affected parties related to the casualty assistance program and delivery of casualty assistance program services. Affected parties may include (but not be limited to) family of casualty Members, casualty assistance representatives (e.g., Army Casualty Assistance Officer, Navy/Marine Corps Casualty Assistance Calls Officer), and vendors.	
Casualty Assistance Program Selections	Information Exchange	This includes (but is not limited to) initial and updated information from Member's Next of Kin (NOK) related to Casualty Assistance Program Selections (e.g., type of burial, type of casket or urn).	
Casualty Assistance Request	Information Exchange	This includes a request of casualty assistance for a casualty incident. This information may include (but not be limited to) request date and time, requested information, and requester name.	
Casualty Error Information	Information Exchange	This includes information regarding an error(s) related to the casualty incident. This may include (but not be limited to) information about the member/employee, details of the circumstance, place of casualty, others involved, or date/time of casualty.	
Casualty Incident Corrective Information	Information Exchange	This includes corrected information regarding an error(s) related to the casualty incident. The corrected information could include (but not be limited to) information about the member/employee, details of the circumstance, place of casualty, others involved, or date/time of casualty.	
Casualty Information Request	Information Exchange	This includes a request for documentation to assist in a Casualty investigation. This information may include (but not be limited to) request date and time, requested information, and requestor name.	
Casualty Legal Recommendation Information	Information Exchange	This includes the results of a request for a legal review of documents concerning a casualty investigation and all associated information. This information may include (but not be limited to) a review of all the evidence and facts from the investigation, observation of all official activities of the board during the proceedings, witness statements, and a recommendation on the deliberations of the Board of Inquiry.	
Casualty Legal Review Information Request	Information Exchange	This includes a request for a legal review of documents concerning a Casualty investigation and all associated information. The request may include (but not be limited to) a review of the evidence and facts from the investigation, observation of all official activities of the board during the proceedings, question witnesses, and monitor the deliberations of the Board of Inquiry.	
Casualty Mortuary Information	Information Exchange	This includes documentation collected and assembled to support the return of human remains and personal effects to the person authorized to direct disposition of human remains (PADD) and person eligible to receive effects (PERE) respectively. This may include (but not be limited to) search and recovery information, personal effects inventory list, and shipping information (e.g., origin, destination).	
Casualty Next of Kin Notification	Information Exchange	This includes initially notifying a member or employee's next-of-kin (e.g. the spouse, children not residing with the spouse, parents, the person authorized to direct disposition of human remains (PADD), emergency point of contact or other beneficiaries receiving survivor benefits or entitlements). The information in this notification may include (but not be limited to) incident date and time, place of incident, circumstances of the incident and any other relevant details.	
Casualty Report	Information Exchange	This includes a report (i.e. initial, supplemental or final) that is associated with documenting a casualty incident. This may include (but not limited to) background information on the incident, casualty information (e.g., casualty status, casualty type, casualty classification), medical information, assignment information, and the identification of casualty information which may be released to the media and next of kin (NOK).	
Casualty Response Information	Information Exchange	This includes a response related to an information request to assist in investigating facts related to a casualty incident. This information may include (but not be limited to) incident reports, information from interviews, medical statements and other supporting information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Categorized Requirement	Information Exchange	An aggregation of like enterprise requirements. The intent behind categorizing requirements is to be able to aggregate demand for goods and services so that DoD can implement strategic sourcing.	
Certified Business Partner Payment Information	Information Exchange	Generated as a result of the supply chain entitlement function that identifies the amount that should be paid to a specific payee. Includes scheduled payment date, and the net amount due that has been determined in accordance with the terms and conditions of the contract and in accordance with the Prompt Payment Act. Entitlements are only approved after proper authorization, verification of fund availability, and review for duplicate payment. The Certified Business Partner Payment is certified by the Certifying Officer in accordance with the Certifying Officer Legislation.	
Certified Business Partner Payment Rejection	Information Exchange	A vendor payment submitted to Disbursing that has been rejected and returned to Supply Chain Entitlement.	
Certified Financial Statement Information	Information Exchange	This is information derived from financial statements for external agencies that have been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Financial Statement Package	Information Exchange	This is the financial statement package for external agencies that has been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Human Resources Management Pay Information	Information Exchange	This includes information associated with the record, approved by a designated official, of gross pay earnings and Human Resource (HR) entitlements by category, less deductions (statutory and elective) that results in the net disbursement. This record also reflects active employee debt balance, and disbursement information. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Certified Investment Payment Request	Information Exchange	This is the record, approved by a designated official, detailing investment payment request.	
Certified Real Property Discrepancy Report	Information Exchange	Contains information on certification of real property discrepancies.	
Certified Reimbursement Information	Information Exchange	This includes information that is certified and related to reimbursement of expenses incurred or expenses expected to be incurred. This may include (but not be limited to) expense type, expense date, and expense amount. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Chairmans Program Assessment	Information Exchange	Provides the Chairman of the Joint Chiefs of Staff's personal appraisal on alternative program recommendations and budget proposals to the Secretary of Defense for consideration in refining the defense program and budget in accordance with 10 United States Code. The Chairman's program assessment comments on the risk associated with the programmed allocation of Defense resources and evaluates the conformance of program objective memoranda to the priorities established in strategic plans and combatant commanders' priority requirements. Also called CPA.	
Characterized ESOH Issue	Information Exchange	An issue, problem, concern, or aspect that is reviewed, scoped, analyzed, studied so that the nature and extent of the issue is properly characterized and understood. For example, a Characterized ESOH Issue within the context of a clean-up program may define the speed, direction, and contaminant content of a ground water plume. Within the context of a safety program effort, a Characterized ESOH Issue may define the hazards to be addressed. A fire response would identify the specific hazards (i.e., smoke, fire, potential for explosion), and the degree of hazard. (Note: This output also incorporates the ESOH Issue Description).	
Check Disbursement Voucher	Information Exchange	Document granting authority for the Disbursing Officer to make check payment for Government obligations. Includes both the amount to be paid as determined by the supply chain entitlement process and the associated payee information.	
Check Information	Information Exchange	Document containing information associated with check payments necessary to match the check payment to the associated Check Disbursement Voucher.	
Check Payment	Information Exchange	Document containing the actual check and associated Check Disbursement Voucher information that is passed on to the Federal Clearinghouse for distribution to the payee.	
Chemical and Regulatory Information	Information Exchange	Information on chemicals and hazardous material regulations that is received from a subscription service and maintained in the master product hazard data (MPHD) warehouse.	
CIP Cost Information	Information Exchange	This is information regarding capitalized costs accumulated in the Construction In Progress (CIP) account during the execution of a construction project.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Clinically Indicated Testing Request	Information Exchange	This includes information related to the request for consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) requestor, request date, request type, and additional comments.	
Clinically Indicated Testing Response	Information Exchange	This includes the results from the consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) response date, response type, and additional comments.	
Closed Intragovernmental Order	Information Exchange	An intragovernmental order that has been through the close-out process and is ready to be archived by the government supplier.	
Closed Procurement Instrument	Information Exchange	A procurement instrument that has been through the close-out process and is ready to be archived.	
Closeout Information from External Sources	Information Exchange	The required information from the External Source to perform instrument closeout process.	
Closeout Period Schedule Information	Information Exchange	A schedule sent to the DoD Components that indicates the dates that information must be submitted for closeout.	
Closeout Plan	Information Exchange	Contains information on the commissioning closeout plan.	
Closing Notification Request	Information Exchange	This is a management request to close the general ledger prior to generating financial reports.	
Closing or Signing Schedule	Information Exchange	Contains information regarding the closing/signing schedule.	
Closure Certificate for Case Implemented in Foreign Military Sales Trust Fund	Information Exchange	The Case Closure Certificate provides the information necessary for DFAS to close the case implemented in the Foreign Military Sales Trust Fund. The Certificate supports budgetary and/or proprietary impact in the general ledger to balance budget authority ceilings, cash receipts, total disbursements and the value of delivered articles and services for the case implemented in the Foreign Military Sales Trust Fund.	
Collection Activity Termination Notice	Information Exchange	This is the notification from an external entity that collection action related to a debt has been terminated.	
Collection and Payment History	Information Exchange	A report detailing the collection and payment information for an accounts receivable. Information could include payment amount, transaction date, payee's remittance information, form of payment, and outstanding receivable balance. The General Ledger Branch of Treasury also prepares and releases the status reports on Treasury's owned certificates outstanding and in circulation. Statement of Assets and Liabilities and Statement of Transactions details the payment and collection history of Treasury certificates.	
Collection Confirmation	Information Exchange	This is the confirmation of collections from Treasury which includes deposit number, confirmation date, deposit amount, etc. In addition, detailed information on Non Sufficient Funds (NSF) checks is provided.	
Collection Information	Information Exchange	This includes information associated with collections which have been processed to include payments to offset an individual's government indebtedness, intergovernmental collections made via the Intra-governmental Payment and Collection (IPAC) system and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository, which have been processed. This collection information encompasses the associated cash collection voucher, as well as the collection of debt and resolution of administrative offsets.	
Collection Pro Forma Entries	Information Exchange	The debit and credit affects of collection pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collection Receipts	Information Exchange	This is information associated with collections which have been processed to include intergovernmental collections made via Intra-governmental Payment and Collection and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository. Collection receipts could also include the associated deposit ticket, debit voucher, the associated cash collection voucher, administrative offsets, as well as the collection information for the debt management and accounting general ledger activities.	
Collection Voucher	Information Exchange	A form used to record collections that includes Disbursing office collection voucher number, Receiving office collection voucher number, period, name of remitter or description of remittance, detailed description of purpose for which collections were received, amount, and accounting classification.	
Collection Voucher Control Log	Information Exchange	Collection Voucher Control Log is prepared regularly by each functional area and/or branch disbursing office that summarizes regular collections, identifies payment mode (check, cash, Electronic File Transfer), and assures all voucher numbers are accounted for and all collection vouchers are entered in the accountability records.	
Comments to Public Draft Request for Proposal	Information Exchange	Suppliers' comments on the draft request for proposal that has been publicized to potential suppliers. These comments are incorporated where appropriate prior to final release of the request for proposal for approval.	
Comments to Request for Proposals	Information Exchange	Suppliers' comments on the request for proposal that has been publicized to potential suppliers.	
Commercial Banking Change Information	Information Exchange	This is a notice of change passed from the Federal Reserve Bank to the originating disbursing activity via Fedline. This notification includes information about changes which impact electronic funds transfer payments such as changes in a commercial bank's routing number.	
Commissioning Requirements List	Information Exchange	Contains information on the commissioning requirements list.	
Commitment	Information Exchange	An administrative reservation of funds based on firm procurement requests, unaccepted customer orders, Directives, and equivalent instruments.	
Commitment Modification Request	Information Exchange	A request to either increase or decrease the commitment amount needed to fulfill the requirement.	
Commitment Pro Forma Entry	Information Exchange	The debit and credit affects of commitment pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Commitment Request	Information Exchange	This is a request for a commitment or decommitment that has been approved based on the existence of available funding. This commitment/decommitment is an administrative reservation/dereservation of funds for a procurement request, order, directive, or equivalent instrument. This also identifies commitments that have been rejected due to insufficient funding or management discretion.	
Communication from Government Supplier	Information Exchange	Communications received from government suppliers as part of the contract and order monitoring process that may include requests by the government supplier for a change to the terms or conditions of the intragovernmental order and all information exchanges regarding discrepancy disputes, adjustments, and receivable and revenue bookings.	
Communication from Supplier	Information Exchange	Communications received from suppliers and transmitted through DoD logistics processes as part of the contract monitoring process, including requests by the Supplier for a change to the terms of the contract or order.	
Communication to Government Supplier	Information Exchange	Any official, written, addressed communication between a DoD organization, a DoD employee, or other DoD agent and a government supplier regarding the execution of the supplier's intragovernmental order, including requests by the internal end user, or contracting officer, for a change to the terms or conditions of the order such as changes to delivery date, specifications, and cost and all information exchanges regarding discrepancy disputes, adjustments, and payable and expense bookings. This may also include notice to the government supplier acknowledging that goods or services have been received, which starts the clock for constructive acceptance.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Communication to Supplier	Information Exchange	Any official, written, addressed communication between a DoD organization, a DoD employee, or other DoD agent and an internal or external supplier regarding the execution of the supplier's contract, including requests by the internal end user, or contracting officer, for a change to the terms of the contract or order such as changes to delivery date, specifications, and cost.	
Compensation Eligibility Notification	Information Exchange	This includes information used to notify an employee/Member that they are no longer eligible or are eligible for compensation.	
Competency Testing Request	Information Exchange	This includes the request for competency testing to be performed on the applicant (e.g., Armed Services Vocational Aptitude Battery (ASVAB) testing and special testing) to determine qualification for induction into the Armed Services. This information may include (but not be limited to) applicant's name, date of request, and type of testing required.	
Competency Testing Results	Information Exchange	This includes the results of the competency tests performed on the applicant (e.g., Armed Services Vocational Aptitude Battery (ASVAB) testing, and special testing) to determine qualification for induction into the Armed Services. This also includes a recommendation for a waiver submittal. This information may include (but not be limited to) ASVAB test scores and special testing scores.	
Competency Testing Results Report	Information Exchange	This includes a summary report of Armed Services Vocational Aptitude Battery (ASVAB) scores taken by applicants. This information may include (but not be limited to) name, date of test, location of test, and ASVAB test score.	
Compliance Determination	Information Exchange	This is a decision of program compliance based on the findings of fact.	
Component Apportionment Request	Information Exchange	Request from the components for the distribution of funds to be available for obligation. The request could include components spending plan such as specified time periods, activities, projects, objects or combination thereof. The spending plan included in the apportionment request should be consistent with the Appropriation Act and general provisions.	
Component Feedback	Information Exchange	Feedback from the components to be considered before the Report of Program is published.	
Component Product Hazard Data Request	Information Exchange	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Component Product Hazard Data Request Additional Information	Information Exchange	Additional information that is received in order to complete a Component product hazard data (PHD) request.	
Component Product Hazard Data Request Status Update	Information Exchange	Notification about the status of a Component request for product hazard data (PHD) that is sent to the requestor at the work unit.	
Component Product Hazard Data Submission	Information Exchange	The product hazard data (PHD) that has been received from a DoD Component and is submitted for validation and subsequent entry into the master product hazard data (MPHD) warehouse as a result of PHD provided with the Component Product Hazard Data Request for entry into the MPHD warehouse.	
Components Response	Information Exchange	Components response is the acceptance or comments on the draft budget decision as a result of the OMB and OSD joint budget reviews.	
Comptroller Feedback	Information Exchange	Feedback from the comptroller regarding the new requirement(s) that will affect existing DoD policies. Changes could affect the SFIS, Chart of Accounts, Pro-Forma entries, or the calendar.	
Comptroller Update	Information Exchange	Comptroller's updates that include prior year updates of accounting actuals, congressional actions, or other miscellaneous adjustments (e.g. corrections) that will be used to generate other budget decisions.	
Conference Report	Information Exchange	This is a Congressional committee conference report.	
Confirmation of Physically Complete Procurement Instrument or IGT Order	Information Exchange	Confirmation that a procurement instrument or intragovernmental order is physically complete based on meeting the terms and conditions for delivery or performance of services rendered as specified in the procurement instrument or intragovernmental order.	
Confirmation of Reimbursable Bill	Information Exchange	Confirmation of a reimbursable bill is provided by the U.S. Treasury. This confirmation acknowledges that a reimbursable bill has been transmitted to the intragovernmental customer.	
Confirmed Collection Cross Servicing	Information Exchange	A confirmed collection received from Treasury Cross Servicing that has been verified and interpreted to accurately record the collection to the general ledger account and liquidate the outstanding receivable.	
Confirmed Collection TOP	Information Exchange	A confirmed collection received from Treasury Offset Program that has been verified and interpreted to accurately record the collection to the general ledger account and liquidate the outstanding receivable.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Confirmed Contract Fulfillment	Information Exchange	Document received by Contracting Officer that confirms the completion or fulfillment of contractual obligations.	
Confirmed Payment	Information Exchange	Confirmation received by accounts payables department that provide confirmation of payment on outstanding accounts payable.	
Congressional Action	Information Exchange	This is a Congressional enactment to deferrals and rescissions. The enactment determines the compliance to the Impoundment Act.	
Congressional and Federal Inquiry	Information Exchange	This is a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Congressional Enactment	Information Exchange	The DoD portion of the President's Budget, is the basis for the DoD congressional enactment process. In the following nine months (February - October) the President's Budget will be closely scrutinized, serving as guidance for two major pieces of defense-related legislation: the National Defense Authorization Bill and the Defense/Military Construction Appropriations Bills. Of all the legislative matters before Congress, none is more important nor more political than the review of the President's Budget. It will be examined by 535 members of Congress and hundreds of congressional staffers, each of whom possess their own agendas and priorities. The end product of the enactment process is the Authorization and Appropriations Bills.	
Congressional Feedback	Information Exchange	Congressional feedback or position in the proposed baseline for reprogramming actions.	
Congressional Inquiry	Information Exchange	Congressional inquiry includes request for supplemental budget documentation, testimony, appeal materials, and witnesses.	
Congressional Tracking Report	Information Exchange	A report documenting the changes at the line item level for all unexpired years. This includes supplementals and rescissions, spreads of Congressional undistributed adjustments, general provisions, below threshold reprogramming, and actions dictated by other laws.	
Consolidated Appeal Material	Information Exchange	The consolidated appeal materials sets forth the Department's position on the most significant programs/items impacted by congressional actions.	
Consolidated Budget Change Proposals	Information Exchange	During an Off-Year Budget Change Proposals are collect by OSD from the components and consolidated.	
Consolidated Budget Estimate Submission	Information Exchange	This is a consolidation of all BES submitted during the On Year budget planning and submission. It is the primary document used by the services and agencies to submit budget estimates. It is based on the program and fiscal guidance contained in the POM.	
Consolidated Program Change Proposal	Information Exchange	This activity consists of the consolidated PCP which is a collaboration of all the PCP documents.	
Consolidated Program Objective Memorandum	Information Exchange	The Consolidated Program Objective Memorandum (POM) is the collaboration of the primary documents used by the services to submit programming proposals. The Program Objective Memorandum includes an analysis of missions, objectives, alternative methods to accomplish objectives, and allocation of resources.	
Consolidated Real Property Discrepancy List	Information Exchange	Contains information on validated real property discrepancies including recommended corrective actions.	
Construction Requirement	Information Exchange	The requirement to further plan and source a construction agent to execute a construction, restoration or modernization action based on the completion, review and approval of a design project under a design bid build contract type.	
Contingency Information	Information Exchange	Information about the liability that is difficult to quantify or may not come to pass such as an outstanding lawsuit.	
Continuation of Service Request	Information Exchange	This includes the Member's request to continue service before or after a fit for duty determination. The information may include (but not be limited to) Member name, current Service or component, date of request, and justification for the request.	
Continuing Resolution Act Estimate	Information Exchange	An amount and information estimate received from the components in anticipation of CRA.	
Continuing Resolution Act Estimate Request	Information Exchange	An amount and information estimate request to the components in anticipation of CRA.	
Continuing Resolution Amount	Information Exchange	Calculated amount available for execution under the Continuing Resolution Act.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Continuing Resolution Pro Forma Entry	Information Exchange	The debit and credit affects of continuing resolution pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Contract Action Report	Information Exchange	Report on all Federal Acquisition Regulation (FAR) contract actions as required by FAR 4.6. This includes information that identifies the type of report and reporting activity, the transaction, the type of contract, and the business size and socio-economic program data.	
Contract Cost Data Report Information	Information Exchange	Actual or projected cost information, contractually required and reported by DoD Contractors, resulting from participation in an acquisition program.	
Contract Debt Information	Information Exchange	This is an overall flow of debt information to the reporting function. Information includes account balance information, collection activity, demand letter issuance, debtor response information and results of debt adjudication proceedings. The information includes both vendor and individual debt information: Vendor debt information includes dollar amount owed to the Department of Defense by a vendor. This is due to an overpayment caused by previously processed advanced or financing payments, as well as contract modification actions which were processed after payment had been made.	
Contract Funds Status Report Information	Information Exchange	DoD contract funding data contractually required, obtained via the Contract Funds Status Report (CFSR), that includes forecasted contract fund requirements, planned funding changes, justification for funding changes, budget estimates, determination of excess contract funds, and estimates of termination costs.	
Contract Holdback Account	Information Exchange	Subsidiary account created for each vendor whose contract has a contract holdback clause.	
Contract Holdback Account (Reclassified)	Information Exchange	General ledger account that is used for the amount of payment that is held back in a contract until contract completion. The adjustment is a result of journal entry made to record amount held back or the amount paid upon completion.	
Contract Holdback Account Information	Information Exchange	Information necessary to create a subsidiary account for each vendor whose contract has a contract holdback clause. A predetermined amount or percentage of a contract is withheld from payment until final completion of the contract.	
Contract Holdback Requirement	Information Exchange	Clause inserted in the contract establishing amounts to be withheld from contractors pending the completion of the contract.	
Contract Lookup Service Information	Information Exchange	EV Contract data Information for MDAPs	
Contract Lookup Service Request	Information Exchange	Request information to the Contract Lookup Service.	
Contract Modification	Information Exchange	Contract Modification is any written change in the terms of a contract including bilateral and unilateral modifications. A bilateral modification (supplemental agreement) is a contract modification that is signed by the contractor and the contracting officer. Bilateral modifications are used to make negotiated equitable adjustments resulting from the issuance of a change order; define letter contracts; and reflect other agreements of the parties modifying the terms of contracts. A unilateral modification is a contract modification that is signed only by the contracting officer. Unilateral modifications are used, for example, to make administrative changes; issue change orders; make changes authorized by clauses other than a changes clause (e.g., Property clause, Options clause, or Suspension of Work clause); and issue termination notices.	
Contract Performance Report Information	Information Exchange	Cost and schedule performance information submitted by DoD Contractors in the form of a Contract Performance Report that describes fulfillment of an acquisition contract.	
Contract Specification	Information Exchange	Final recommendations developed after source selection that constitute the preliminary information used to develop a contract.	
Contractor Receipt of Government Furnished Property	Information Exchange	Contractor acknowledgement that they have received government property on the performance of the contract.	
Cooperative Agreement	Information Exchange	This is information that reflects a unique document that captures a federal and non-federal relationship.	
Coordinated Agreement	Information Exchange	An existing, awarded, or accepted agreement that has been coordinated with a potential supplier prior to obligation of funds.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Coordination Request	Information Exchange	A request to the supplier for data that includes seller's Business Partner Network (BPN) Identifier (if not previously provided), available and projected inventory levels, pricing information (includes surcharge), delivery availability, timing, projected capacity, and statutory authority, if any.	
Correcting Pro Forma Entries	Information Exchange	Document contains all financial information needed to post and update the general ledger based on the anomalies correction business event, including the specific general ledger accounts that should be debited or credited and other financial information needed to support general ledger requirements.	
Correction of Military Record Information Request	Information Exchange	This includes information associated with a request to gather additional information (e.g., pertinent evidence, new evidence, or report of investigation) before a correction of military record request can be accepted.	
Correction of Military Record Information Response	Information Exchange	This includes information associated with a response to a request to gather additional information (e.g., pertinent evidence, new evidence, or report of investigation) before a correction of military record request can be accepted.	
Correction of Military Record Request	Information Exchange	This includes information associated with a person submitting a request to correct an error within, or remove an injustice from a military record. Corrections will be made under the procedures established by the Secretary concerned. The information may include (but not be limited to) requester and individual personal information (e.g., name, ID number, organization), narrative request details, date of request, narrative decision (e.g., correction actions, notations on perceived problems or injustices, and potential for future actions), and date of decision.	
Correction of Military Record Return Notification	Information Exchange	This includes the notification information to reflect the details of returning a correction of military record request that does not meet the established criteria for acceptance. This information may include (but not be limited to) a brief statement of the grounds for denial if the Member/Requester does not meet the established criteria (e.g., Member/Requester fails to complete and sign the application, has not exhausted all other administrative remedies, the Board for Correction of Military Records does not have jurisdiction to grant the requested relief, there is insufficient evidence, no new evidence was submitted with a request for reconsideration, or the application was not timely filed).	
Corrective Action Plan	Information Exchange	Contains information about the required corrective action needed to eliminate real property discrepancies.	
Cost Allocation Guidance	Information Exchange	Guidelines that define how cost will be allocated between direct labor, direct material, contract, and overhead/indirect labor and indirect material costs.	
Cost Analysis Action Plan	Information Exchange	The action plan may include project schedule and milestones, resources, assumptions, data sets (timeframe, category, source, units of measure, etc.), constraints, and deliverables.	
Cost Information	Information Exchange	Cost Information from the internal or external customer that includes: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Cost Model	Information Exchange	A model that supports the agreed-upon methodology to be used to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Cost Model Template	Information Exchange	A cost model template that will be used to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Cost Model Template Request	Information Exchange	A request for a template that is used to accumulate the costs of performance for all orders.	
Cost Performance Information Request	Information Exchange	The form used by internal or external customers to request cost/performance information. Request includes in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cost Performance Model Requirements Agreement	Information Exchange	This object includes the terms and conditions of how the model will meet the customer's requirements. This contains the delivery schedule and specific requirements, such as the expected results, accuracy, and assumptions contained in the model.	
Court-Martial Proceeding Information	Information Exchange	This includes detailed results of a Member's court-martial. This may include (but not be limited to) evidence gathered from the investigation, court-martial proceeding outcome (guilt or innocence), charges preferred if applicable, validated punishment, and appeals information.	
Court-Martial Referral Information	Information Exchange	This includes the referral by a Commander to court-martial when an adverse action is deemed severe enough, or should a Member decide to exercise their right for court-martial.	
Create Geospatial Features Request	Information Exchange	This is a listing of criteria, combined with specific analysis requirements, that are sufficient for creating new geospatial information content (e.g. geometry, attribution, accuracy, precision and quality) to be used in geospatial analysis.	
Credential Catalog Information	Information Exchange	This includes repository information associated with all Department of Defense (DoD)-utilized credentials (e.g., Washington D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber) and civilian-acquired skills (e.g., firefighter, police detective, certified public accountant) identified as DoD mission related. The information may include (but not be limited to) specific credential information (e.g., credential identification information, credential version identification (e.g., Washington, D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian-acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential renewal periods (e.g., 2 years from date of issue, lifetime).	
Credential Deficiency	Information Exchange	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring a modification to Department of Defense (DoD) analysis and capture of any person's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), Universal Joint Task List (UJTL) related item (e.g., Strategic Theater 4.2 Coordinate Support for Forces in Theater, Strategic Theater 4.2.3 Reconstitute Theater Forces), narrative on exercise or combat operations-related deficiency or problem, credential version identification (e.g., Washington, DC Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Virginia certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential expiration or renewal date.	
Credential Proposal	Information Exchange	This includes information associated with personnel identifying a proposal (e.g., adjustment to the specified metals to be used in the competency testing of underwater electric arc welding) potentially requiring a modification to Department of Defense (DoD) analysis and capture of an individual's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), credential version identification (e.g., Washington, D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential related competencies, specified DoD competency testing, credential mediums such as paper or electronic, and credential expiration or renewal date.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Credential Proposal Assessment	Information Exchange	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, a specific Department of Defense (DoD) credential. This includes information associated with the response to a perceived deficiency of, or proposal for a modification to DoD analysis and capture of a person's specific credential information. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor personal information (e.g., name, ID number, organization), proposal assessment information, credential version identification (e.g., Washington, DC Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Virginia certified Master Plumber), civilian acquired skills (e.g., firefighter, police detective, accountant), credential related competencies, specified DoD competency testing, credential mediums such as paper or electronic, credential expiration or renewal date, related assessment inputs received, analysis summary, evaluation results, proposal assessment information such as determination of related development actions to be further analyzed (within the context of development actions) for implementation details, and projected actions.	
Credit Memo	Information Exchange	Notification issued to the customer informing the customer that they have overpaid on a debt to the Department.	
Critical Technology Lookup Service Information	Information Exchange	Information about unclassified Key Performance Parameter data for MDAPs	
Critical Technology Lookup Service Information Request	Information Exchange	Request information to the Critical Technology Lookup Service.	
Current Working Estimate Report	Information Exchange	This is a comprehensive cost-estimating report that accounts for site procurement, design, construction, project supervision, construction security, value-added taxes, and any other project costs.	
Custodial Liability Information	Information Exchange	Information associated with the treatment of a likely future financial outflow recorded on behalf of another Federal entity for which the Department of Defense is acting as a custodian.	
Customer and Vendor Information	Information Exchange	This is information about people and organizations to whom payments will be made. Information includes full name, mailing address, bank account information, SSN, DUNS, DUNS+4 and if an organization, an indication of whether the organization is a public or private sector entity.	
Customer Communication	Information Exchange	This includes the flow of narratives from management to all DoD supported personnel. This may include direct communications (e.g., newsletters, e-mail and web pages, bulletin boards, commander's calls, rosters), official surveys, as well as managing publications and postal support.	
Customer Feedback	Information Exchange	Receive feedback and or agreement from the customer for the proposed remedial action plan.	
Data Vocabulary	Information Exchange	The compendium of all data terms, expressions, and synonyms used within DoD operations to support information requirements. Includes the data dictionary.	
Debit Voucher Information	Information Exchange	This is information associated with the debit vouchers debiting a disbursing activity. This information includes agency location code, amount, date and the debit voucher number.	
Debt Adjudication Decision	Information Exchange	This is information regarding the results of debt adjudication proceedings to include request for waiver, debt determination proceedings, or other administrative hearings conducted within the Component.	
Debt Compromise	Information Exchange	This is the notification to the originator of a debt that a debt is to be reduced in part or in whole due to the establishment of a debt compromise agreement.	
Debt Correspondence	Information Exchange	This is a variety of debt related correspondence going to external entities. Examples of documents include: responses to inquiries, responses to US bankruptcy court requests, and schedule of payments.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Debt Disposition	Information Exchange	This is an overall flow of debt disposition (either via a write-off or a closeout) for both vendor and individual debts. For individual debt closeouts, this is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties. For individual debt write-offs, this is information detailing an agreed-upon partial payment of a debt made by an individual or employee allowing for a Department of Defense (DoD) write-off to occur in lieu of paying the full amount of the debt. For vendor debt closeouts, this is a notification that a debt case has been closed out and no further collection action will be pursued relative to the associated claims receivable. For vendor debt write-offs, this is the notification to accounting that collection action related to a debt has been terminated and the associated receivable is to be written off.	
Debt Referral Information	Information Exchange	Referred debt information based upon the type of debt, amount and age. Information would include account balance, collection activity to date, demand letter issuance, debtor response information and results of debt adjudication proceedings.	
Debt Write-off Notification	Information Exchange	This is an overflow of debt disposition (either via a write-off or a closeout) for both vendor and individual debts. For individual debt closeout, this is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties. For individual debt write-offs, this is information detailing an agreed-upon partial payment of a debt made by an individual or employee allowing for a Department of Defense write-off to occur in lieu of paying the full amount of the debt. For vendor debt closeouts, this is a notification that a debt case has been closed out and no further collection action will be pursued relative to the associated claims receivable. For vendor debt write-offs, this is the notification to accounting that collection action related to a debt has been terminated and the associated receivable is to be written off.	
Debtor Response	Information Exchange	This is the debtor's response to a demand letter or notice of administrative offset. This may request the debt be satisfied through installment payments or via salary offset. The request may also request an installment payment schedule, waiver, debt determination consideration or administrative hearing within the Component.	
Deduction Information	Information Exchange	This includes information concerning amounts to be deducted from gross pay and distribution of net pay. This may include (but not be limited to) statutory deductions, garnishments, and withholding for state and federal income taxes, collections, and reductions.	
Deduction Update Notification	Information Exchange	This includes information associated with a notification that alerts an employee/Member that there has been an initiation or change to amount or terms of a deduction or reduction of pay. This includes effective date of the change, reason for the change, new deduction or reduction amount.	
Defense Acquisition Executive Summary Information	Information Exchange	The information required to track programs between milestone reviews.	
Defense Contract Cost Analysis Information	Information Exchange	Cost data for a particular contract activity including work accomplished by contractors and total program cost (awarded and future). Information is used to estimate total Defense Acquisition Program Cost in support of cost and price analysis.	
Defense Planning Scenarios	Information Exchange	Provides a depiction of a threat to international security, a corresponding mission for U.S. military forces, and a strategic-level concept of operation for carrying out that mission. The SECDEF approves a single set of scenarios intended to serve as a standard by which the senior leadership of the Department can gauge the sufficiency of the Defense Program. A single set of scenarios ensures DOD consistency for studies, war games, and experimentation.	
Deferral Proposal	Information Exchange	Proposal for deferral of appropriated budgetary resources to be temporarily withheld from obligation.	
Deferral Report	Information Exchange	Report submitted to the OMB containing a detailed description of the amount, affected accounts, project, government functions involved, reasons for deferral, effects of the deferrals, and any other relevant facts supporting the deferral decision.	
Deferred Amount	Information Exchange	Deferred amount approved through congressional action in response to the Impoundment Act.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Delinquent Debt Information	Information Exchange	This is an overall flow of debt information to the reporting function. Information includes account balance information, collection activity, demand letter issuance, debtor response information and results of debt adjudication proceedings. The information includes both vendor and individual debt information: Vendor debt information includes regarding a dollar amount owed to the Department of Defense by a vendor. This is due to an overpayment caused by previously processed advanced or financing payments, as well as contract modification actions which were processed after payment had been made. Individual debt information includes information required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from the Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid.	
Deliver Metrics Information	Information Exchange	This is the narrative and metrics data that when aggregated describes the execution of distribution activities.	
Deliver Plan	Information Exchange	A plan for a course of action over specified time periods that involves a projected appropriation of resources to meet delivery requirements.	
Deliver Return Metrics Information	Information Exchange	This is the narrative and metrics data that when aggregated describes the execution of delivery activities associated with a return.	
Demand Information	Information Exchange	This object consists of a Demand UID linked to the associated Allocation Unique Identifier (AUID). The DUID is established as the customers demand is associated with an AUID, representing the funds intended to fulfill the demand. The DUID serves as a reference throughout the process of fulfilling the demand and satisfying any associated financial transactions, e.g., commitment, obligation, disbursement.	
Demand Letter	Information Exchange	Demand letter provides information about eligible accounts receivable that is dunned at the first applicable and subsequent time intervals. Accounts are dunned at periodic intervals (e.g., 30-day intervals). Delinquent accounts should be dunned based on Federal statutes such as the Debt Collection Act of 1982 and the DCIA. Federal regulations on debt collection, such as the Federal Claims Collection Standards, government-wide debt collection guidance such as OMB Circular A-129, Treasury's Managing Federal Receivables, and DoD policies and procedures.	
Demotion Order Requirement	Information Exchange	This includes information related to an official requirement to generate a demotion order pertaining to personnel. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Department of Defense Fund Balance	Information Exchange	The Department of Defense Fund Balance is the authoritative source for all funds information, including execution transactions and funds availability. A Department of Defense Fund Balance is based on the general ledger data and provides the current balance of funds available for use associated with a specific budget program or any subdivision of a budget program. This information also contains funds availability within a particular program by comparing the fund request with fund balance of the activity providing the goods or services to ensure that the seller has the funding authority to incur the costs that will be associated with providing the buyer's request. In addition, the Department of Defense Fund Balance includes funding originally appropriated, apportioned, allotted, or otherwise distributed and any subsequent execution activity that has occurred, including commitments, obligations, and expenditure activity. This information is also comprised of many views of financial information at various levels of detail.	
Deployed ESOH Solution	Information Exchange	This result of the assessment action outlines the actual solution that has been implemented. This may include any details of variances in the actual implementation from the planned implementation, and any requirements for future monitoring or action.	
Deployment Information	Information Exchange	Passenger list or numbers and associated materiel and equipment related to a force movement. Includes updated and validated Unit Deployment List (UDL) and Unit Equipment List (UEL).	
Deposit Information	Information Exchange	This is information associated with the deposit of funds creditable to a disbursing activity. This information includes agency location code, amount, date of deposit and the deposit ticket number.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Depreciation and Amortization Information	Information Exchange	This represents depreciation and amortization information from the physical asset record, to the fiscal asset record to update asset values based on the depreciation schedule.	
Depreciation or Amortization Schedule	Information Exchange	Schedule of the depreciation expense over the life of the asset. Schedule of the amortization that details the amount of interest earned or interest expense for each period.	
Detailed Budget Information	Information Exchange	The detailed budget information as found in budget exhibits (e.g. M-1, R-1, P-1). This information identifies types of levels for specific budget requirements that will be used to update FYDP. The level and type of budget information vary depending on appropriation and major programs. Some examples are as follows: <ul style="list-style-type: none"> <li>- Appropriation</li> <li>- Program Element</li> <li>- Budget Line Number</li> <li>- Project</li> <li>- Force Resource Identification</li> <li>- Manpower Resource Identification</li> </ul>	
Detailed Justification Material	Information Exchange	President's budget numbers in line item detail, both at direct and reimbursable level. These materials also include documentation that supports the budget estimates submitted by the components. It should include program performance indicators and goals, any proposed policies and strategies along with the amount of mandatory and discretionary spending. The justification should include personnel requirements, its relationship to the President Management Agenda, and additional funding needs in excess of the budget.	
Developed Proposal	Information Exchange	Document that outlines the implementation approach for the new policy or changes to the existing policy.	
Development Competencies Catalog Information	Information Exchange	This includes information associated with all Department of Defense (DoD) competencies identified for DoD development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) specific competency identification information related to DoD occupations (e.g., MOS, AFSC) requiring the specified competencies.	
Disapproved Payment Requests	Information Exchange	Payment request where payment is based on approval of a government official and the request has been disapproved. A governmental official may approve, may approve for a lesser amount or disapprove the payment request. The Approved Payment Requests will then go to the Entitlement process. Disapproved requests go back to the vendor.	
Disbursement Confirmation	Information Exchange	This is the confirmation of disbursements from Treasury. Schedule number, Control totals, Confirm date, range of tracer numbers, payment medium. In addition, detailed information on cancelled checks is provided.	
Disbursement In-Transit Pro Forma Entries	Information Exchange	Disbursements In-Transit Pro Forma entry represents the specific debit and credit effects to the general ledger. This entry reflects outlays transmitted to a designated disbursing office or the Treasury that have not been received and/or processed as outlays prior to the reporting period.	
Disbursement Log	Information Exchange	A daily log prepared and maintained by the Disbursing Officer to record all the disbursing information which has been processed to include intergovernmental payments made via Intra-governmental Payment and Collection and commercial payments processed via electronic funds transfer and Treasury Check.	
Disbursement Pro Forma Entries	Information Exchange	The debit and credit affects of disbursement pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Disbursing Information	Information Exchange	This is information associated in processing disbursements that includes intragovernmental payments made via IPAC and commercial payments processed via electronic funds transfer and Treasury checks. This information also contains prepayments to record an expense that was paid in advance and disbursements In-Transit that have been processed by DoD but not yet confirmed by the Treasury. In addition, this information includes the payment instrument to include notification of the final invoice payment and the associated disbursement voucher, as well as disbursement information for the supply chain entitlement and accounting general ledger activities.	
Disbursing Reports	Information Exchange	The purpose of disbursing reports is to provide disbursement voucher data for verification and certification of the payroll process and to satisfy requirements of Certifying Officer legislation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Discharged Debt Tax Notification	Information Exchange	This is the issuance of the IRS Form 1099-C documenting that delinquent debt has been closed out and should thus be treated as taxable income of the recipient.	
Discrepancy Dispute Resolution	Information Exchange	The disposition of a discrepancy report.	
Discrepancy Report Information	Information Exchange	Report generated upon either Receipt or Acceptance documenting any variance from the terms and conditions of the agreement, Procurement Instrument or intragovernmental order with the supplier.	
Disposal Evidence	Information Exchange	Evidence of Real and Personal Property disposed.	
Disposal Hazardous Process Description	Information Exchange	Information that identifies a potential hazardous process(es) in a property disposal activity described to the level of granularity necessary to define effective ESOH controls.	
Disposal Metrics Information	Information Exchange	This is the narrative and metrics data that when aggregated describes the execution of Dispose activities.	
Disposition Information	Information Exchange	This is information on the disposition of government property as dictated by contract terms and conditions or weapon systems lifecycle guidance. This parent ICOM represents a combination of the information provided by the following children ICOMs: Transfer of Government Property Disposition of Loss Plant Clearance Disposition Recovered Property Information	
Disposition of Loss	Information Exchange	Disposition of a contractor's notice of loss.	
Distributed Appropriation Line Item Amount	Information Exchange	The line item amount of the appropriation which has been identified and distributed.	
DoD Apportionment Request	Information Exchange	DoD Apportionment request contain all funding request from the services/components to be submitted to OMB for approval. This apportionment request is the department's request to make funding available for obligation as stated in the Appropriation Act and general provisions.	
DoD Budget Submission for President's Budget	Information Exchange	On-year--DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year--The DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g.. cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.	
DoD Government Earned Value Information	Information Exchange	DoD developed cost, schedule, work anticipated, work completed, and performance information used as internal management controls to monitor completion of contract activities.	
DoD Response to Congressional Action	Information Exchange	DoD's position and response to the congressional action regarding the department's proposed reprogramming actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
DoD Strategic Plan	Information Exchange	<p>No later than September 30, 1997, the head of each agency shall submit to the Director of the Office of Management and Budget and to the Congress a strategic plan for program activities. Such plan shall contain</p> <ul style="list-style-type: none"> <li>(1) a comprehensive mission statement covering the major functions and operations of the agency;</li> <li>(2) general goals and objectives, including outcome related goals and objectives, for the major functions and operations of the agency;</li> <li>(3) a description of how the goals and objectives are to be achieved, including a description of the operational processes, skills and technology, and the human, capital, information, and other resources required to meet those goals and objectives;</li> <li>(4) a description of how the performance goals included in the plan required by section 1115(a) of title 31 shall be related to the general goals and objectives in the strategic plan;</li> <li>(5) an identification of those key factors external to the agency and beyond its control that could significantly affect the achievement of the general goals and objectives; and</li> <li>(6) a description of the program evaluations used in establishing or revising general goals and objectives, with a schedule for future program evaluations.</li> </ul> <p>The strategic plan shall cover a period of not less than five years forward from the fiscal year in which it is submitted, and shall be updated and revised at least every three years. The performance plan required by section 1115 of title 31 shall be consistent with the agency's strategic plan. A performance plan may not be submitted for a fiscal year not covered by a current strategic plan under this section. When developing a strategic plan, the agency shall consult with the Congress, and shall solicit and consider the views and suggestions of those entities potentially affected by or interested in such a plan. The functions and activities of this section shall be considered to be inherently Governmental functions. The drafting of strategic plans under this section shall be performed only by Federal employees. For purposes of this section the term 'agency' means an Executive agency defined under section 105, but does not include the Central Intelligence Agency, the General Accounting Office, the Panama Canal Commission, the United States Postal Service, and the Postal Rate Commission.</p>	
DoD Topline Passback Response	Information Exchange	<p>The DoD's response to OMB contains the comments and feedback from the Department on OMB's topline passback. The response reflects the results of the previous negotiations on key issues within DoD and realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs.</p>	
Draft Acquisition Program Baseline	Information Exchange	<p>Draft of program cost, schedule, performance parameters, constraints, objectives, and milestones. This information is developed by the Program Manager for submission to the Decision Authority for approval. The program baseline guides the PM in the execution of the acquisition program.</p>	
Draft Agreement	Information Exchange	<p>An agreement that is in draft form that is provided to the supplier for review and comment. An agreement is a written instrument of understanding following negotiations between an agency, contracting activity, or contracting office and a contractor, where terms, such as pricing and/or discounts have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains contract terms and clauses applying to future contracts between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future contracts or orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future contracts or orders will incorporate by reference or attachment the required and applicable clauses agreed upon in the agreement. An agreement is not a contract or order.</p>	
Draft Baseline Report	Information Exchange	<p>A draft baseline report sent to the components for feedback or comments. This report will be used as a baseline for reprogramming actions.</p>	
Draft Budget Decision	Information Exchange	<p>Draft budget decision is the result of the joint review between OSD/OMB. This is submitted to the components for review, acceptance and/or comments.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Draft Contract	Information Exchange	A draft contract that is intended to be a mutually binding legal relationship obligating the external supplier to furnish the goods or services (including construction) and the buyer to provide payment for those goods or services as agreed upon by the contract. The draft contract is sent to the supplier for coordination and revisions prior to the draft being finalized. Contracts include all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; orders such as purchase orders, under which the contract becomes effective by written acceptance or performance; and bilateral contract modifications.	
Draft Contract or Order Modification	Information Exchange	A contract or intragovernmental order that contains draft updated or modified information along with the original contract or intragovernmental order information. If applicable, the modification may include an additional funds certification. Modifications include any written change in the terms of a contract or order including bilateral and unilateral modifications. A bilateral modification (supplemental agreement) is a modification that is signed by the contractor and the contracting officer. Bilateral modifications are used to make negotiated equitable adjustments resulting from the issuance of a change order; definitize letter contracts; and reflect other agreements of the parties modifying the terms of contracts. A unilateral modification is a modification that is signed only by the contracting officer. Unilateral modifications are used, for example, to make administrative changes; issue change orders; make changes authorized by clauses other than a changes clause (e.g., Property clause, Options clause, or Suspension of Work clause); and issue termination notices.	
Draft Human Resources Management Policy and Guidance	Information Exchange	This includes a draft of the Human Resources Management (HRM) policy and guidance document that will be sent for collaboration with the appropriate parties for their input. Draft HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, and policy change summary description.	
Draft Human Resources Management Policy and Guidance Input	Information Exchange	This includes comments and/or recommendations to the draft Human Resources Management policy and guidance from the appropriate parties. This information may include (but not be limited to) input date, input provider name and organization, and input description.	
Draft Period End or On Demand Financial Statement	Information Exchange	Draft trial balance from approved and or certified trial balance information.	
Draft Populated Cost Model	Information Exchange	Draft populated cost model with accumulated data for analysis.	
Draft Procurement Instrument Information	Information Exchange	A draft contract that is intended to be a mutually binding legal relationship obligating the external supplier to furnish the goods or services (including construction) and the buyer to provide payment for those goods or services as agreed upon by the contract. The draft contract is finalized following negotiations and revisions in coordination with the supplier. Contracts include all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; orders such as purchase orders, under which the contract becomes effective by written acceptance or performance; and bilateral contract modifications. A contract is not effective until it has been awarded to the supplier.	
Draft Rebaseline Report	Information Exchange	A draft rebaseline report sent to the components for feedback or comments. This rebaseline will require congressional action to update the initial baseline report.	
Draft Reconciled Report	Information Exchange	Draft program report that has been reconciled against financial accounting balances.	
Earned Investment Revenue	Information Exchange	Interest earned from investment activity that is posted to general ledger as investment revenue.	
Earned Value Management Information	Information Exchange	Actual contractor cost, schedule, work anticipated, work completed, and performance from an approved accounting system used as internal management controls to monitor completion of contract activities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Earnings Information	Information Exchange	This includes information associated with determining if personnel are eligible for and authorized to receive a particular pay type and/or allowance. Determination of pay eligibility may include in part the pay amount (e.g., bonus, incentive, allowance) established as part of a personnel agreement, indication that personnel have performed a certain duty (e.g., submarine, flying, and diving), pay grade, and years of service.	
Earnings Update Notification	Information Exchange	This includes information used to notify an employee/Member that they are no longer eligible or that they have become eligible.	
Education Course Catalog Information	Information Exchange	This includes repository information associated with the list of all education programs (these programs could be implemented by resident or distributed learning). The information may include (but not be limited to) eligibility specifications, administration, operations support, and course information needed for the management of higher education (degree granting) programs (Department of Defense (DoD) funded at both DoD and civilian institutions), DoD Education Activity programs, DoD Programs with Industry and schools covered within the National Defense University (i.e., National War College, the Industrial College of the Armed Forces, the Joint Advanced Warfighting School, and the Joint Forces Staff College), and the Services' Command and Staff colleges and War Colleges.	
Education Course Curriculum Information	Information Exchange	This includes information associated with newly developed or modified Department of Defense (DoD) education program curriculums. This information may include (but not be limited to) prerequisites, educational goals and objectives, plans, tests, course evaluation methods, and associated courseware.	
Education Course Deficiency	Information Exchange	This includes identified mission related problems, from the warfighter community involved with operations, potentially requiring a modification to a specific education program. This information may include (but not be limited to) requestor name, organization, Universal Joint Task List (UJTL) related item (e.g., Strategic Theater item), request date, deficiency information and recommendation.	
Education Course Proposal	Information Exchange	This includes any proposal information from inside or outside the Department of Defense (DoD) for the creation or modification of an education program. This information may include (but not be limited to) requestor name, organization, eligibility specifications, safety analysis information, course information, request date, proposal information and recommendations based on instructor and student evaluations.	
Education Course Proposal Assessment	Information Exchange	This includes response to a submitted deficiency or proposal for a creation or modification of an education program. This information may include (but not be limited to) requestor name, organization, analysis summary, evaluation results, proposal assessment information, evaluator name, and assessment date.	
Education Course Scheduling Information	Information Exchange	This includes information associated with the location and education class session information within a specified time frame (e.g., 120 days at a specific education facility), for all Department of Defense (DoD) education programs.	
Education Instructor Course Evaluation	Information Exchange	This includes information associated with evaluating Department of Defense (DoD) education programs. This information may include (but not be limited to) details of the feedback (e.g., course is sufficient, course has deficiencies, and proposals to make the course better) given by the instructor for that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific education program.	
Education Requirements Information	Information Exchange	This includes information associated with education requirements used to create or update a Department of Defense (DoD) education program. This information may include (but not be limited to) new or updated education requirements, deficiencies, and requirement proposals used to create or update DoD and Service education program curriculum to meet current or future DoD and Service education needs.	
Education Resource Availability Information	Information Exchange	This includes information associated with the availability of Department of Defense (DoD) resources for education programs (e.g., equipment, facilities, faculty, and other support personnel). This information may include (but not be limited to) what resources are currently available, resources on standby, and resources that may be made available in the future.	
Education Resource Requirements Information	Information Exchange	This includes information associated with resource requirements for Department of Defense (DoD) and Service education programs. This information may include (but not be limited to) resources required to deliver the developed education program (e.g., funds, equipment, facilities, faculty, and other support personnel).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Education Student Course Evaluation	Information Exchange	This includes information associated with the evaluation of Department of Defense (DoD) education programs. This information may include (but not be limited to) details of the feedback (course is sufficient, course has deficiencies, and proposals to make the course better) given by the student of that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific education program.	
Electronic Fund Transfer Payment Information	Information Exchange	Electronic Fund Transfer provides for electronic payments and collections. The information needed to process an Electronic Fund Transfer transaction is the payee's name, all relevant bank identifying information, amount and invoice information.	
Eligible Receivables	Information Exchange	Eligible receivables are delinquent debts greater than 90 days to be referred to Treasury for further collection actions.	
Energy Conservation Measure Approval Document	Information Exchange	Documentation of the authorization to, and the requirements (scope and desired outcomes) for, implementing an energy conservation measure.	
Energy Conservation Measure Potential Mission Impact Information	Information Exchange	Information about impacts on mission requirements that may result from implementing an energy conservation measure.	
Energy Conservation Measure Potential Mission Impact Information Request	Information Exchange	A request for information about impacts to installation mission requirements that may result from implementing a given energy conservation measure.	
Energy Project Execution Information	Information Exchange	Information needed to enter a contract to execute an energy project.	
Enlistment Extension Appeal	Information Exchange	This includes a request by the Member to appeal the extension decision of the Approval Authority. The information may include (but not be limited to) appeal date, appeal status, and appeal justification.	
Environmental Liability Footnote Information	Information Exchange	The financial and non-financial information that is used to build the financial statement narrative and footnotes as they relate to environmental liabilities.	
Environmental Liability Information (Updated)	Information Exchange	This is the aggregated financial information for environmental liabilities that has amortization factors applied as applicable, and is posted to the general ledger and reported on financial statements.	
Environmental Liability Information Rejected	Information Exchange	This is the aggregated financial information for environmental liabilities that has been rejected based on various factors and not applied as applicable. It is not posted to the general ledger, and may be disclosed as a footnote on the financial statements.	
Environmental Liability Site or Item Information	Information Exchange	Information about an environmental liability and the property affected by the EL that is needed for EL inventory maintenance and reconciliation with property assets.	
Environmental Liability Transaction Information	Information Exchange	This is the financial information for environmental liabilities that will provide the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts) when posted to the general ledger.	
ESOH Assessment Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used in the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Analysis Results	Information Exchange	This is a set of information needed during the process of assessing an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Assessment Geospatial Data Package	Information Exchange	This is the geospatial information needed during the process of assessing an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Assessment Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Information Requirements	Information Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to assess an ESOH aspect.	
ESOH Assessment Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Service Request	Information Exchange	Information required to request the provision of contract services to perform an approved ESOH Aspect Assessment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Control Requirement	Information Exchange	This is the required set of operational controls implemented by a mission activity to comply with environment, safety, and occupational health legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by agreement between stakeholders such as the owner or operator of the mission activity; supporting environment, safety, and occupational health organizations; permitting agencies; and the public. A documented terms and conditions agreement might be a: process authorization, permit, license, exemption, explosives safety site plan and management decision or operating exception. Environment, safety, and occupational health controls influence the doctrine, organization, training, materiel, leadership and education, personnel and facilities (DOTMLPF) of mission activities. They may also define standard operating procedures, specify safety requirements, detail experience levels and training requirements, prescribe monitoring and reporting requirements, or specify other required activities.	
ESOH Identification Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used in the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Results	Information Exchange	This is a set of information needed during the process of identifying an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Identification Geospatial Data Package	Information Exchange	This is the geospatial information needed during the process of identifying an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Identification Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product -- such as a map or 'distance to' measurements -- that is needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of identifying an ESOH aspect.	
ESOH Issue Communication	Information Exchange	A communication to responsible authorities that an issue of actual or potential ESOH concern exists. The communication may describe an event such as an accident or spill, refer to a set of circumstances of interest to the ESOH community (e.g., paint fumes, archeological discovery) or may be a request for a process authorization. The communication may be from the public, regulatory notices from authorities, or be identified as a result of an internal study or inspection or explosives safety management and site plan review request. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
ESOH Issue Description	Information Exchange	This is a narrative that details the problem, issue, or concern. Example components include: statement of understanding, process parameters, issue location, work function, identified hazard, and ESOH issue profile. This output also feeds the environmental inventory.	
ESOH Issue Profile	Information Exchange	This is a description of the area of interest and the suspected issue or the aspect associated with a specified location, activity or service. The issue profile can be used to determine if an aspect or issue of interest requires further investigation or may be used as the basic information in beginning the detailed assessment. Example attributes: Area Name Area Location Activity Performed Suspected Issue Materials Used	
ESOH Solution Development Request	Information Exchange	Information required to request the provision of contract services to perform an approved ESOH Solution development.	
ESOH Solution Development Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used in the process of developing an ESOH solution.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Solution Development Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Analysis Results	Information Exchange	This is a set of information needed during the process of developing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Development Geospatial Data Package	Information Exchange	This is the geospatial information needed during the process of developing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Solution Development Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Information Requirements	Information Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to develop an ESOH solution.	
ESOH Solution Development Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of developing an ESOH solution.	
ESOH Solution Implementation Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used in the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Results	Information Exchange	This is a set of information needed during the process of implementing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Implementation Geospatial Data Package	Information Exchange	This is the geospatial information needed during the process of implementing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Solution Implementation Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of implementing an ESOH solution.	
ESOH Solution Scope Change Information	Information Exchange	Information that describes change(s) in quantitative and qualitative parameters that define the estimated level of effort for implementing an ESOH solution. This information will be used to develop an updated solution implementation plan.	
ESOH Solution Service Request	Information Exchange	Information required to request the provision of contract services to perform an approved ESOH Solution implementation plan.	
Estimate at Completion	Information Exchange	The estimated total cost for all authorized work. Equal to the sum of actual costs to date (including all allocable indirect costs), plus the estimated costs to completion (estimate to complete).	
Estimates of Corrective Actions	Information Exchange	Contains information about the time and resources required to eliminate real property discrepancies.	
Evidence of Goods Tendered	Information Exchange	Information from supplier that documents tendering of goods to the DoD Buyer.	
Evidence of Goods Tendered and Services Rendered	Information Exchange	Information from Government suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for billing, collection and shipment planning, and product hazard or material safety information as appropriate.	
Evidence of Goods Tendered and Services Rendered from External	Information Exchange	Information from commercial suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for collection and shipment planning, and product hazard or material safety information as appropriate.	
Excess Real Property Declaration	Information Exchange	Information on a real property asset that is declared excess due to overcapacity, natural disaster, or manmade disaster event, or when an asset is deemed unserviceable. The excess real property asset is subsequently disposed through sale, transfer, demolition or donation.	
Executive Order 13327	Information Exchange	This documentation provides guidance regarding Federal Real Property Asset Management reforms.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Explained Anomaly	Information Exchange	This is an anomaly that has been clarified by its data owner. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule.	
External Carrier Information	Information Exchange	A movement plan for specific cargo or passengers. Includes the Manifest document that details the passengers or items carried for a specific destination. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (origin, destination), mode - to include (a) inland surface transportation (rail, road, and inland waterway); (b) sea transport (coastal and ocean); and (c) air transportation. Information concerning commercial or organic transportation mode availability and contract rates and tariffs from carriers by commodity, lane, and mode for shipments including ports, airlift, sealift, railway, highway, customs, and traffic management. Used to track the identity, status, and location of DoD units and non-unit cargo and passengers, medical patients, and personal property from origin to consignee or destination across the range of military logistics operations. (Defense Transportation Regulation -DTR Part I-IV).	
External Energy Goal Information	Information Exchange	Information about energy goals issued by an entity other than DoD.	
External Energy Reporting Information	Information Exchange	Information generated in response to a requirement to report DoD energy information to an entity other than DoD.	
External Energy Reporting Requirements	Information Exchange	Information about DoD energy that must be reported to an entity other than DoD.	
External Shipping Information	Information Exchange	Legal documentation of the contents of a shipment from an external source provider.	
Extraordinary Request Information	Information Exchange	This includes information related to a request from a Casualty Member or Member's family which exceeds an established threshold, or contains Casualty Assistance Program selections (e.g., urns, caskets, travel requests) which are not typically available as DoD offerings.	
Facility Energy Conservation Information	Information Exchange	Information about the energy reporting category, conservation reporting, and conservation related goals that are required to manage facility energy conservation.	
Facility Energy Conservation Management Information	Information Exchange	The information generated for program management of facility energy conservation.	
Facility Energy Consumption Analysis Results	Information Exchange	The outcome of DoD Component analysis of energy consumption data.	
Facility Energy Consumption Information	Information Exchange	Information about the energy reporting category, consumption reporting, and consumption related goals that are required to manage facility energy consumption.	
Facility Energy Consumption Management Information	Information Exchange	Information generated for program management of facility energy consumption.	
Facility Energy Information	Information Exchange	Programmatic information needed for facility energy analytics, goal tracking, and reporting.	
Facility Energy Management Information	Information Exchange	Information about the energy reporting requirements, goal information, and energy analytics that the Components need to manage facility energy consumption, conservation, and renewable energy production and purchase.	
Family Care Completion Report	Information Exchange	This includes an aggregated report which may contain (but not be limited to) information related to the times, dates, and locations of Casualty Assistance Program service deliveries. This may also include feedback related to issues related to vendors and casualty assistance offerings.	
Family of Joint Future Concepts	Information Exchange	Used to underpin investment decisions leading to the development of new capabilities beyond the Five-Year Defense Plan. New capability requirements, materiel or non-materiel, must relate directly to capabilities identified through the Family of Joint Future Concepts, whose hierarchical nature and deliberate process require close examination of needed capabilities through an iterative process of assessment.	
Family Support Coordination Assistance Request	Information Exchange	This includes information related to a family support coordination assistance request. The request is made to Department of Defense (DoD) entity or non-DoD entity (e.g., other federal, local or state government establishment, non-profits or other private organization), for coordination assistance (e.g., medical, legal, housing, travel) related to providing Family Support services. This information may include (but not be limited to) requestor name, request date and explanation of the request.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Family Support Coordination Assistance Response	Information Exchange	This includes information related to a response from a Department of Defense (DoD) entity or non-DoD entity (e.g., other federal, local or state government establishment, non-profits or other private organization) to a Family Support coordination assistance request related to providing Family Support services. This information may include (but not be limited to) responder name, response date, and explanation of the response.	
Family Support Information Request	Information Exchange	This includes information related to a request to gather information on Department of Defense (DoD) personnel or family member for Family Support services. This information may include (but not be limited to) request date, type of information being requested (e.g., presented problem, benefit, medical, contact and personal), feedback regarding provided services, and Family Support program information (e.g., recommendations, referrals and enrollment information).	
Family Support Information Response	Information Exchange	This includes information related to a response to an information request to gather information on Department of Defense (DoD) personnel or family member for Family Support services. This information may include (but not be limited to) personal information, contact information, medical information, benefit information, needs assessment information, and feedback regarding services provided.	
Family Support Needs Assessment Information	Information Exchange	This includes information regarding the support needs of Department of Defense (DoD) personnel and families requesting assistance. This information will serve to inform the personnel and families about the support recommendations and referrals. This information may include (but not be limited to) case number, assessment of problem presented, primary services recommended (e.g., personal counseling, relocation counseling, family counseling, family advocacy), referrals (e.g., legal, chaplain, housing, child care center), and any other recommendations (e.g., books, pamphlets, classes).	
Family Support Needs Assessment Information Update	Information Exchange	This includes updating the information for any additional family support needs identified (e.g., medical, legal, housing, travel, etc.) after evaluating initially requested Family Support needs. This information may include (but not be limited to) evaluation date, indication of whether goals are being met, feedback information regarding provided services, needs assessment information, resolution of issues associated with particular needs, and identification of Department of Defense (DoD) personnel or family members who need additional services or no longer require Family Support services.	
Family Support Program Usage Notification	Information Exchange	This includes a notification of usage (e.g., registration, enrollment or disenrollment) for a Family Support program or service. This information may include (but not be limited to) case number, name, program/service information, and any comments concerning registration, enrollment or disenrollment.	
Family Support Service Evaluation Information	Information Exchange	This includes information regarding the evaluation of a Family Support needs assessment. This information may include (but not be limited to) evaluation date, indication of whether goals are being met, feedback information regarding provided services, needs assessment information, resolution of issues associated with particular needs, and identification of Department of Defense (DoD) personnel or family members who need additional services or no longer require Family Support services.	
Family Support Service Ineligibility Notification	Information Exchange	This includes a notification of ineligibility for family support services. This may include (but not be limited to) personal information about the requestor (e.g., name, date of request, reason for ineligibility).	
Family Support Service Request	Information Exchange	This includes information related to a request for Family Support program services. This may include (but not be limited to) personal information about requester and requester family members (e.g., name, marital status, contact information, education, age, employer/assignment information) request date, type of case (i.e., individual, couple, family), source of referral (e.g., self, legal, command, medical) and problem presented.	
Federal Bureau of Investigation Deserter Information	Information Exchange	This includes information in the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) database. The NCIC is a computerized index of criminal justice information (e.g., criminal record history information, fugitives, stolen properties, missing persons) that is available to Federal, state, local law enforcement and other criminal justice agencies. The information in this database includes identification details of a person (e.g., name, sex, race, date of birth, Social Security Number, and driver's license number).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Federal Bureau of Investigation Deserter Update Information	Information Exchange	This includes an update to information in the Federal Bureau of Investigation's (FBI) National Crime Information Center (NCIC) database. The NCIC is a computerized index of criminal justice information (e.g., criminal record history information, fugitives, stolen properties, missing persons) that is available to Federal, state, local law enforcement and other criminal justice agencies. The information in this database includes identification details of a person (e.g., name, sex, race, date of birth, Social Security Number, and driver's license number).	
Federal Performance Information	Information Exchange	Stakeholder, supplier, internal/external vendor feedback, fulfillment execution information, and contract execution information (e.g. www.ppirs.gov).	
Final Foreign Military Sales Trust Fund Bill	Information Exchange	Upon closing of the Case implemented in Foreign Military Sales Trust Fund, DoD sends the Final Case Bill to the purchaser.	
Final Government Export License Decision	Information Exchange	Notification of final determination of the Federal government's position regarding export application for DoD technology.	
Final Human Resources Management Policy and Guidance	Information Exchange	This includes a final Human Resources Management (HRM) policy and guidance document which has been fully approved and is disseminated to the appropriate parties. Final HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, policy change summary description, and approval authority signature.	
Final Intragovernmental Order Costs	Information Exchange	A determination of the final cost of an intragovernmental order that must be reconciled prior to close out.	
Final Performance Evaluation	Information Exchange	This includes official documentation of the individual's performance evaluation. This is the updated Performance Evaluation Shell that was provided at the beginning of the process that includes the individual's administrative information (e.g., name, social security number (SSN), rank), ranking criteria, and comment section.	
Final Procurement Instrument Costs	Information Exchange	A determination of the final cost of a procurement instrument that is not firm fixed price and must be reconciled prior to contract close out.	
Final Unapproved Trial Balance	Information Exchange	After correcting business events have been applied to the general ledger, a final unapproved trial balance is generated.	
Financial Management Policy Request	Information Exchange	A request to evaluate the impact of a change in financial management law, guidance, or policy on DoD specific financial management policy, the chart of general ledger accounts, or the Standard Financial Information Structure.	
Financial Position	Information Exchange	Status of a firm's assets, liabilities, and equity accounts as of a certain time, as shown in its trial balance or financial statement.	
Financial Statement Certification	Information Exchange	The Financial Statement Certification is a statement by management affirming that the financial statements fairly represent entity's results of business operations in all material respects.	
Financial Statement Narrative Information	Information Exchange	This is the information used to build the post closing narrative. This information is derived from accumulated cost data, data used to build the working trial balance, mapped financial data, and mapped non-financial data. This is the result of having compiled management's narrative information input into a formal Financial Statement narrative product.	
Financial Transaction Report	Information Exchange	The Financial Statement Data shall include, financial results, narrative and or footnote information, value added analysis in order to provide management with a final assessment of the financial condition of the Department of Defense.	
Fiscal Guidance	Information Exchange	Annual guidance consistent with Strategic Planning Guidance (SPG). Provides fiscal constraints that must be observed by DoD Components in the formulation of force structures and by the Office of the Secretary of Defense (OSD) and joint staff in reviewing proposed programs.	
Focus Area	Information Exchange	Focus Areas to analyze, evaluate, and provide alternative plans, programs, and budgets for DoD's objectives, projected threats, allied contributions, estimated costs, and resource constraints. This information is also used for synthesizing strategic documents and prioritizing programming.	
Footnote Information	Information Exchange	Detailed information used to build the financial statement narrative and supporting footnotes. This information is derived from accumulated cost and performance information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Force and Simulation Modeling Information	Information Exchange	Force and Simulation Modeling Information is used to represent a mission in order to provide guidance on the numbers and kinds of manpower requirements/personnel needed to perform a group of specific functions.	
Force List	Information Exchange	This includes a deployment equipment list or a unit deployment list or similar list; or a list of forces required by an operations plan, including assigned forces, augmentation forces, and other forces to be employed in support of the plan.	
Forecasted Requirements	Information Exchange	Future projections of DoD-wide enterprise requirements for goods and services.	
Foreign Currency Conversion	Information Exchange	Disbursing officer reports the amount of currency available for conversion to foreign currency or to US currency.	
Foreign Military Sales Trust Fund Expenditure Authority Request	Information Exchange	This is a request for expenditure authority associated with a payment which cites a case implemented in the Foreign Military Sales Trust Fund. No payments citing a case implemented in the Foreign Military Sales Trust Fund will be released for disbursement processing prior to receipt of expenditure authority.	
Foreign Military Sales Trust Fund Expenditure Authority Response	Information Exchange	This is a response regarding a submitted request for permission to disburse payments against a line on a case implemented in the Foreign Military Sales Trust Fund. Responses include approved, denied, and in-process.	
Form and Content Guidance	Information Exchange	Form and Content Guidance provides specific guidance regarding the format and required content of the financial statements, footnotes, and management discussion and analysis.	
Full Time Support Manpower Report	Information Exchange	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain Reserve position information to include the corresponding funding information.	
Funded Position Identification	Information Exchange	This includes an extraction of selected detailed force structure attributes that identifies which billets (e.g., slots) can have human resources assignments within available budget allocations.	
Funding Status	Information Exchange	The aggregate amount of funds in the DoD's accounts with Treasury for which the DoD is authorized to make expenditures and pay liabilities. Fund balance includes balance of funds collected, funds disbursed, and funds with Treasury. Any differences between funds with Treasury and Funds with DoD are considered undistributed collections and undistributed disbursements.	
Funds Availability Request	Information Exchange	This is a request for Notification of Funds Availability.	
Funds Distribution Reporting Information	Information Exchange	Information generated during the funds distribution process for reporting (both internal and external). Examples of the types of information that may be created are: ODS Dashboard data, DD 1002 Funds Distribution Data, SF 133 Funds Distribution Data and Summary Distribution Data.	
Future Years Defense Program	Information Exchange	The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a 6-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.	
Gain or Loss on Sale of Investment	Information Exchange	Upon the sale of an investment, the gain or loss data is posted to the general ledger as other revenues and expenses.	
General Ledger Account Balance	Information Exchange	The balance or dollar amount associated with a general ledger account. This could be a positive or negative balance and could represent beginning of year, current point in time, or end of year.	
General Ledger Closing Pro Forma Entries	Information Exchange	At the end of the accounting period, the balances in temporary accounts are transferred to an income summary account and a retained earnings account using pro forma entries, thereby resetting the balance of the temporary accounts to zero to begin the next accounting period.	
General Ledger Correcting Pro Forma Entries	Information Exchange	The debit and credit affects of correcting pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
General Ledger Detail Transaction Report	Information Exchange	The General Ledger Detail Transaction Report provides general ledger account information and balances to support the review and research of all activities relative to a specific USSGL account including general ledger account reconciliation, analysis, and reporting.	
General Ledger Transactions	Information Exchange	The General Ledger Transaction includes amounts, United States Standard General Ledger accounts, attributes, posting date, current and or future accounting period required by the general ledger.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
General Program Level Information	Information Exchange	This is the information regarding a defined acquisition effort funded by appropriations with the express objective of providing a new or improved capability in response to a stated mission need or deficiency. This includes Program Manager narrative comments regarding the program and may include discussions of current estimates, program management documentation and other information.	
General Provision	Information Exchange	This is a General Provision spread to individual appropriations.	
Geographic Requirement	Information Exchange	Geographic requirements identify the requirements needed for a specific geographic location. This includes the number of positions and equipment that can be accommodated in a location or needed in a location. This list is updated quarterly but submitted yearly to the Office of Management and Budget (OMB).	
Geospatial Features	Information Exchange	Created geospatial information that requires review against a family of geospatial standards, guidance documents and received requirements.	
Goods and Services Acknowledgement	Information Exchange	The confirmation by receiver that goods were tendered or services were provided. Acknowledgement includes quantifiable delivery information on time, quantity, date of delivery or performance and completeness of Procurement Instrument or Intragovernmental Order deliverables at the line item level. This information may be adequate to document a receivable transaction.	
Government Furnished Materiel Request	Information Exchange	This is a request for equipment in the possession of, or directly acquired by, the Government.	
Government Solicitation	Information Exchange	Notification to the government source of an existing or potential requirement.	
Government Solicitation Response	Information Exchange	Government suppliers' response to a solicitation notifying the buyer that requested requirements can or cannot be met.	
Government Source Selection Documentation	Information Exchange	Notification documentation that has been developed in coordination with the government supplier to serve as the basis for a draft agreement or draft intragovernmental order.	
Government Supplier Response	Information Exchange	Government supplier's comments on the draft intragovernmental order provided by the buyer during the negotiation and revision process prior to the draft order being finalized and sent to the government supplier for review and acceptance.	
Grant Pro Forma Entries	Information Exchange	The debit and credit affects of pro forma entries to proprietary, budgetary, or memorandum general ledger accounts resulting from business events related to the award, performance, payment and closeout of a grant.	
Hazardous Process Description from External	Information Exchange	Information that identifies potential hazardous processes in a warfighting mission activity described to the level of granularity necessary to define effective ESOH controls.	
Healthcare Referral Information	Information Exchange	The specific healthcare information necessary to refer beneficiaries to the appropriate services, level of care and location. This information is subject to and contingent upon confidentiality restrictions.	
Healthcare Services Support Request	Information Exchange	This includes information related to a healthcare services support request (e.g. in relation to providing Family Support Services, Recovery Coordination Program services, assessments and evaluations for an individual or group of people, etc.). The reasons for this request may include (but not be limited to) healthcare support for a recovering service member (RSM) or a victim of abuse. The request is made to the Department of Defense (DoD) healthcare entity and may include (but not be limited to) information such as the requestor name, request date and explanation of the request.	
Healthcare Services Support Response	Information Exchange	This includes information related to a healthcare services support request (e.g. acknowledgement that a request has been received, confirmation a health services support request was completed, etc.). The response from Department of Defense's (DoD) healthcare entity may also include (but not be limited to) information such as the responder's name, response date and status (e.g., completed, received, referred, etc).	
Historical Cost Information	Information Exchange	Previously accumulated cost information associated with a specific cost object. For example, this might represent cost information associated with a program, project, activity, asset, or environmental liability. This information is used to support forecasting and other financial analysis.	
Historical Return Rate Information	Information Exchange	Information accumulated based upon the return history that is analogous to a present situation, such as the return history on a similar product, and using the past pattern to predict future returns.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
House Appropriation Committee Report	Information Exchange	Jurisdiction of the Committee on Appropriations Rule X of the Rules of the House vests in the Committee on Appropriations broad responsibility over the Federal budget. Specifically the Rule defines the Committee's jurisdiction, as follows: "Rule X clause (b). Committee on Appropriations. (1) Appropriation of the revenue for the support of the Government. (2) Rescissions of appropriations contained in appropriations Acts. (3) Transfers of unexpected balances. (4) Bills and joint resolutions reported by other committees that provide new entitlement authority as defined in section 3(9) of the Congressional Budget Act of 1974.	
Housing Entitlement Notification	Information Exchange	This is a person's validated requirement for DoD housing with mission impact information to be utilized in priority determinations.	
Human Resources Disposition Information	Information Exchange	This includes captured personal Human Resources Information (i.e., Human Resources Profile and Human Resources Record) no longer needed for current DoD business. This information may include (but not be limited to) disposition date, disposition actions, disposition status, and retention period.	
Human Resources Hazardous Process Description	Information Exchange	A description of a potential hazardous process, related to human resources, described to the level of granularity necessary to define effective ESOH controls.	
Human Resources Information	Information Exchange	This is an extraction of selected data related to a human resources application and human resources profile request.	
Human Resources Information Request	Information Exchange	This includes a request from components external to Human Resources Management to extract selected data related to a human resources application and human resources information. This information may include (but not be limited to) requestor's name, request date, and requested human resources information.	
Human Resources Management Policy and Guidance Request	Information Exchange	This includes a request to develop a new policy or modify an existing one or a response to an inquiry. This information may include (but not be limited to) request date, requestor name and organization, policy name, request description and inquiry response.	
Human Resources Management Policy and Guidance Request Inquiry	Information Exchange	This includes a request for additional information or clarification concerning the request received for development or modification of policy and guidance. This information may include (but not be limited to) request date, requestor name, policy name, request description, inquirer name and organization, and inquiry description.	
Human Resources Management Policy and Guidance Review	Information Exchange	This includes a review of the proposed Human Resources Management policy and guidance from appropriate parties. This also includes comments and/or recommendations from workforce communications (e.g., publishers of the policy and guidance) as the final reviewer. This information may include (but not be limited to) policy date, policy name, policy description, appropriate parties signatures, review date, reviewer name and organization, and review description.	
Human Resources Personal Information Change Request	Information Exchange	This includes information that is needed to request a change to personal information found in the Human Resources Profile. The information may include (but not be limited to) specific information that has only the person as a source and can only be subjected to very general edits (e.g., local address, email address, local phone number, allotment start / modification, savings bond start / modification, casualty notification information update, documentation that an individual is a military dependent for the purpose of receiving military medical care) needed to support DoD missions.	
Human Resources Profile Information	Information Exchange	This includes captured personal, professional, and pay information related to the processes of administering manpower and staffing, human resources, personnel development, benefits, medical services, and pay. The Human Resources Profile is for Human Resources Management (HRM) internal use only. This information is subject to and contingent upon confidentiality restrictions.	
Human Resources Record Information	Information Exchange	This includes information pertaining to the "Record of Military Processing" (DD Form 1966/1), the member's enlistment/reenlistment document (DD Form 4), training documentation, education documentation, performance, discipline related information, decorations and awards, assignments and duties, casualty documentation, separation/retirement related information, compensation, physical condition, entry and separation physical examinations, biometrics, personal documents and non-service related documents (if deemed necessary and appropriate by the military Service). This may also include additional service-specific information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Identification Budget Request	Information Exchange	This is a request for appropriation funding to perform ESOH aspect identification that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Identified Correction	Information Exchange	As anomalies are identified during the analysis of the draft financial statements modifications may be necessary at the financial statement level. The modifications are transmitted as Identified Corrections.	
Impact Statement	Information Exchange	Impact statement details the information of what the potential impact to the current resources due to the proposed cancellation of budget authority.	
Implement Solution Budget Request	Information Exchange	This is a request for appropriation funding to implement an ESOH solution that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Implementation Cost Information	Information Exchange	Details about the estimated work that will be performed during implementation of an ESOH solution. This information is used in the calculation of a cost estimate and is updated on a periodic basis to reflect changes in the cost of an work to be completed.	
Implemented Case in Foreign Military Sales Trust Fund	Information Exchange	The information necessary to establish the initial budget authority and funds control to implement the case in the Foreign Military Sales Trust Fund.	
Implemented Case Line Budget Authority in Foreign Military Sales Trust Fund	Information Exchange	The Foreign Military Sales Trust Fund budget authority released to the Implementing Agency for execution of the case implemented in the Foreign Military Sales Trust Fund. This records the actual distribution of budget authority to the Implementing Agency at case line level.	
Incident Notification	Information Exchange	This includes information (e.g. documents, phone calls, messages) about a death, missing status, injury, or illness incurred by a member or employee. The information may include (but not be limited to) incident date and time, place of incident, others involved, and details of the incident.	
Incomplete Delivery	Information Exchange	Failure confirmation that a contract performed service or provided product is not physically complete and contract closeout procedures cannot continue. Terms and conditions may not have been met as agreed upon and require additional communication between the buyer and the supplier to bring to resolution.	
Indebtedness Due Process Notification	Information Exchange	This includes information associated with a notification that alerts a member that there has been a government indebtedness initiated against their pay and providing them with their rights in regard to the collection action. This may include (but not be limited to) effective date of the indebtedness, reason for the indebtedness, period of indebtedness, total amount of the indebtedness, and request for a members desired repayment schedule. This notification will be the basis for a receivable being created by Financial Visibility.	
Individual Allotment Information	Information Exchange	This includes information associated with establishing, changing or stopping an allotment of pay. This information may include (but not be limited to) allotment type, allotment amount, allotment effective date, and allotment recipient.	
Individual Assignment Response	Information Exchange	This includes a response to an approved assignment action. The information may include (but not be limited to) an acceptance or declination of an assignment, response date, and response status.	
Individual Credential Request	Information Exchange	This includes information associated with personnel submitting a request for the verification and capture of a person's specific credential. The information may include (but not be limited to) specific credential information (e.g., credential identification information, requestor and individual personal information (e.g., name, ID number, organization), credential version identification (e.g., Washington D.C. Bar Admission for Criminal Law, Board Certified Brain Surgeon, State of Maryland certified Master Plumber), civilian-acquired skills (e.g., firefighter, police detective, accountant), credential-related competencies, specified Department of Defense (DoD) competency testing, credential mediums such as paper or electronic, credential expiration or renewal date, and the requested effective date for the credential's capture.	
Individual Debt Information	Information Exchange	Individual debt information includes information required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from the Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Individual Enlistment Extension Response	Information Exchange	This includes any reversal of intentions by the Member. The Member may, up until the enlistment extension contract is signed, choose not to extend. The information may include (but not be limited to) Member's decision to extend, extension status, and decision date.	
Individual Human Resources Information	Information Exchange	This includes information used as an input into Human Resources Management activities from a person. This may include (but not be limited to) travel voucher information, family member information update, and individual development information.	
Individual Indebtedness Acknowledgement	Information Exchange	This includes information associated with an acknowledgement of the indebtedness with a requested repayment amount or schedule.	
Individual In-Service Indebtedness Information	Information Exchange	This includes information associated with an individual in-service indebtedness. It includes information required to support a collection action against an employee/Member's pay. The type of indebtedness that are a source for action include, but are not limited to, damage to government property, over weight shipment of household goods. The information included in the indebtedness source documents may include (but not be limited to) the payee or originator of the collection action, dollar amount to be collected, period of indebtedness, and reason for indebtedness.	
Individual In-Service Indebtedness Notification	Information Exchange	This includes information associated with the facts supporting a collection action that has been initiated against an employee/Member's pay based on a substantiated indebtedness action. This notification may include (but not be limited to) the type of indebtedness initiated, reason for the indebtedness, period of indebtedness, the total amount of indebtedness, and a request for an indebtedness repayment schedule.	
Individual Promotion Response	Information Exchange	This includes the Member's acceptance or declination of a promotion. This may include (but not limited to) acceptance or declination date.	
Individual Reenlistment Response	Information Exchange	This includes any reversal of intentions by the Member. The Member may, up until the reenlistment contract is signed, choose not to reenlist. The information may include (but not be limited to) Member's decision to reenlist, reenlistment status, and decision date.	
Individual Reimbursement Request	Information Exchange	This includes information associated with a reimbursement request for an expense incurred by an employee/Member while performing official duty or for an expense that the government has agreed to reimburse. The types of reimbursements can include those associated with official government travel, adoption expenses, clothing items generally issued but currently unavailable for issue, student loans. This information may include (but not be limited to) reimbursement type, period expense was incurred, reason expense was incurred, total amount of expense incurred, itemized expenses incurred, and itemized expense amount.	
Individual Tax Levy Information	Information Exchange	This includes information associated with a request to start, stop, cancel or update a voluntary repayment of a tax levy. (Involuntary collections of a tax levy will be processed as a Salary Offset) This information may include Tax Levy effective date, Tax Levy total amount, Tax Levy periodic collection amount, payment recipient and payment address.	
Individual Training and Education Procurement Request	Information Exchange	This includes information that is a requirement which defines the need for an individual training course, education program, goods, or services. It may be an unfunded or funded requirement.	
Individual Training Catalog Information	Information Exchange	This repository includes information associated with all Training programs. The information may include (but not be limited to) eligibility specifications, administration, operations support, and course information needed for management of Department of Defense (DoD) formal classroom, on-the-job and correspondence training courses.	
Individual Training Course Deficiency	Information Exchange	This includes identified mission related problems, from the warfighter community involved with operations, potentially requiring a modification to a specific individual training course. This information may include (but not be limited to) requestor name, organization, Universal Joint Task List (UJTL) related item (e.g., Strategic Theater item), request date, deficiency information and recommendation.	
Individual Training Course Information	Information Exchange	This includes information associated with newly developed or modified Department of Defense (DoD) individual training courses. This information may include (but not be limited to) prerequisites, educational goals and objectives, plans, tests, course evaluation methods, and associated courseware.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Individual Training Course Proposal	Information Exchange	This includes any proposal information from inside or outside Department of Defense (DoD) for the creation or modification of an individual training course. This information may include (but not be limited to) requestor name, organization, eligibility specifications, safety analysis information, course information, request date, proposal information and recommendations based on instructor and student evaluations.	
Individual Training Course Proposal Assessment	Information Exchange	This includes response to a submitted deficiency or proposal for a creation or modification of an individual training course. This information may include (but not be limited to) requestor name, organization, analysis summary, evaluation results, proposal assessment information, evaluator name, and assessment date.	
Individual Training Course Requirements Information	Information Exchange	This includes information associated with individual training course requirements used to create or update a Department of Defense (DoD) individual training program. This information may include (but not be limited to) new or updated individual training requirements, deficiencies, and requirement proposals used to create or update DoD individual training course curriculum to meet current or future DoD individual training needs.	
Individual Training Course Resource Requirements Information	Information Exchange	This includes information associated with resource requirements for Department of Defense (DoD) individual training courses. This information may include (but not be limited to) resources required to deliver the developed individual training course (e.g., funds, equipment, facilities, faculty, and other support personnel).	
Individual Training Course Resources Availability Information	Information Exchange	This includes information associated with the availability of Department of Defense (DoD) individual training resources for individual training courses (e.g., equipment, facilities, faculty, and other support personnel). This information may include (but not be limited to) what resources are currently available, resources on standby, and resources that may be made available in the future.	
Individual Training Course Scheduling Information	Information Exchange	This includes information associated with individual training course session information. This information may include (but not be limited to) location of training, resident versus distributed learning, instructor's name, and length of individual training course.	
Individual Training Course Student Enrollment Request	Information Exchange	This includes information associated with requesting student admission into a Department of Defense (DoD) individual training course. This information may include (but not be limited to) student application paperwork, eligibility requirements met (if necessary), and signatures authorizing individual training course request.	
Individual Transfer Response	Information Exchange	This includes the Member's acceptance or declination of a transfer. This may include (but not be limited to) acceptance or declination date.	
Individual Travel Authorization	Information Exchange	This includes the authorization for physical relocation and related funds obligation of a person in support of DoD business and/or operations. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Information Assurance Technology Self Assessment	Information Exchange	This is the annual documentation developed in order to satisfy the requirements of 44 U.S.C., Chapter 35 Subchapter III, Information Security: Federal Information Security Management Act of 2002 (FISMA) and other Information Assurance requirements.	
Information Assurance Technology Self Assessment Report	Information Exchange	This is the annual report developed to satisfy the reporting requirements of 44 U.S.C., Chapter 35 Subchapter III, Information Security: "Federal Information Security Management Act of 2002" (FISMA), Risk Assessments, and other Information Assurance reporting requirements.	
Information for Assessment	Information Exchange	The organized information regarding functional performance, cost effectiveness, contract instruments and interoperability for selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of conducting acquisition assessment.	
Initial Asset Valuation Information	Information Exchange	This is the information that establishes the initial asset recorded costs.	
Initial Human Resources Profile Information	Information Exchange	This includes the personal information that the Candidate provides when they are first accessed and any agreement requirements. This information may include (but not be limited to) personal and employment documentation, examination results information, candidate's qualification, eligibility and suitability information, and accession agreement information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Initial Human Resources Record Information	Information Exchange	This includes initial information pertaining to the member's accession information, agreement requirements, enlistment document (DD Form 4), training documentation, education documentation, compensation, physical condition, entry physical examinations, biometrics, and personal documents.	
Initial Investigation Report	Information Exchange	This includes the initial documentation of information related to an initial investigation.	
Initial Report of Offense	Information Exchange	This includes a documentation of the offense(s) committed by the accused Member. This may include (but not be limited to) police reports, performance evaluations, disciplinary actions, non-judicial punishments, court-martial information, or unauthorized absence offenses.	
Initial Trial Balance	Information Exchange	Initial trial balance that includes closing transactions posted and before financial report level review, analysis, and financial report reconciliation and adjustment.	
In-Processing Arrival Notification	Information Exchange	This includes a notification that captures the notification information to reflect the details of the arrival of an individual to a new temporary or permanent duty station. This notification may include (but not be limited to) any changes made to assignment orders.	
Inspected Goods and Services Evidence with Discrepancies	Information Exchange	Documentation that service provided or goods received have not passed inspection.	
Inspected Goods and Services Evidence with no Discrepancies	Information Exchange	Documentation that service was provided (examples include: service acceptance form, service inspection form, work order and task orders as acknowledged by receiver) or goods received have passed inspection. This evidence is used to update asset and accountability records.	
Inspection and Verification Participants	Information Exchange	Contains information on the organizations and entities for inspection and verification of services rendered.	
Inspection and Verification Schedule	Information Exchange	Contains information on the inspection and verification schedule including O&M data and As-Builts.	
Inspection Report	Information Exchange	Contains information on the "turnover" inspection(s) including facility systems testing results.	
Inspection Report for Goods and Services	Information Exchange	Documentation of the results of the inspection of service provided or goods received. This includes quantifiable quality performance information on procurement instruments or intragovernmental orders, at the line item level. Any discrepancies from the requirements of the procurement instrument or intragovernmental orders are fully documented.	
Inspection Request	Information Exchange	This is an examination of the property or building to determine condition or quality for a particular purpose.	
Inspection Results Information	Information Exchange	This is a record created from the real property inspection. Data included would be the original inspection specification, specific task identified, Asset ID, Work Order ID, Work Order Description, Work Order Type, Work Order Diagnosis Type, Work Order Symptom Type, and Work Order Root Cause Type.	
Installation Support Hazardous Process Description	Information Exchange	Information that identifies a potential hazardous process(es) in an installation support activity described to the level of granularity necessary to define effective ESOH controls.	
Instructor Course Evaluation	Information Exchange	This includes information associated with evaluating Department of Defense (DoD) individual training courses and education programs. This information may include (but not be limited to) details of the feedback (e.g., course is sufficient, course has deficiencies, and proposals to make the course better) given by the instructor for that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific individual training and education program.	
Integrated Architectures	Information Exchange	Architectures consisting of multiple views (Operational View, Systems View and Technical View) that facilitates integration and promotes interoperability across capabilities and among related architectures. See Operational View (OV), Systems View (SV), and Technical View (TV).	
Integrated Master Schedule	Information Exchange	The Integrated Master Schedule (IMS) is an integrated schedule containing the detailed tasks necessary to ensure successful program execution, and is linked to the Integrated Master Plan. The IMS is used to verify attainability of contract objectives, to evaluate progress toward meeting program objectives, and to integrate the program schedule activities with all related components.	
Integrated Plan and Roadmap	Information Exchange	This is the information used to conduct capability assessments, guide systems development and define the associated investment plans as a basis for aligning resources.	
Integrated Program and Budget Information	Information Exchange	The information that represents the integration of program decision and data to the Program Budget Decision or other budget decisions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Intent To Vacate Notification	Information Exchange	This is a customer notice that indicated the use of space assigned will no longer be required or the terms of the contract have or are about to expire, or the space assigned no longer meets the customer's requirement.	
Interest Rate	Information Exchange	This is the interest rate established by the Department of Treasury as published in the Federal Register used to calculate the amount of interest needed to apply to the outstanding debt.	
Interfund Bill	Information Exchange	Interfund Bills are transactions that represent the payments from one fund group (either Federal or trust funds) to the other fund group.	
Interfund Billing Acknowledgement	Information Exchange	Automated confirmation from the interfund customer that confirms the receipt of an interfund billing.	
Interim Title Opinion	Information Exchange	Contains interim title information.	
Internal Comments	Information Exchange	After reviewing draft financial statements, internal stakeholders provide feedback for updates.	
Intragovernmental Order Closure Authorization	Information Exchange	Confirmation from the government supplier to the government buyer that an intragovernmental order can be closed and archived.	
Intragovernmental Order Closure Information	Information Exchange	All information related to completion of the government supplier's final intragovernmental order closeout process including all necessary closeout details required. This also includes any adjustments to closure information.	
Intragovernmental Order Closure Notice	Information Exchange	Notification from the government buyer to the government supplier that an intragovernmental order is ready to be closed and archived.	
Intra-Governmental Payment and Collection Information	Information Exchange	Document granting authority for the Disbursing Officer to make payment for government obligations associated with interagency activities. Includes both the amount to be paid as determined by the supply chain entitlement process and the associated payee information.	
Intragovernmental Payment Collection	Information Exchange	Document containing the intra-governmental payment and payee information that is passed on to the U.S. Treasury for distribution to the payee.	
Inventory Availability Information	Information Exchange	This is information on those stocks or items on hand used to support production (raw materials and work in process items), supporting activities (maintenance, repairs, and operating supplies), and customer service (finished goods and spare parts).	
Investigating Officer Request	Information Exchange	This includes request for appointment of an investigating officer In Accordance With (IAW) installation host procedures. Request can be made to the chief of a central installation authority or to a individual installation unit commander who is next on an installation rotation schedule for appointment of an investigating officer. The information may include (but not be limited to) requestor personal information (e.g., name, official title, organization), required attributes of the investigating officer (e.g., field grade vs. company grade military officer or civilian equivalent, competencies required), narrative nature of the investigation, and required time parameters for the investigation.	
Investment Asset Record	Information Exchange	This is the continuous aggregation of the U.S. Treasury certificates or securities under Department of Defense accountability.	
Investment Payment Request	Information Exchange	This is a request for payment to the U.S. Treasury when purchasing Securities (e.g. Treasury Notes and/or Government Bonds) for investment. It normally is executed as cash management when there is a surplus and/or idle cash on hand.	
Invitational Travel Order Requirement	Information Exchange	This includes the request to fulfill the invitational travel order requirement in accordance with a casualty Member's family selections. The invitational travel order may be offered in (but not be limited to) casualty cases categorized as ill/injured (e.g., travel to medical treatment facility to visit casualty Member), and casualty cases categorized as death (e.g., travel to Port Mortuary to observe dignified transfer of Member remains).	
Involuntary Separation Nonconcurrency	Information Exchange	This includes information associated with an official determination that the request for involuntary separation is invalid, inaccurate, or otherwise has been erroneously submitted. This may include (but not be limited to) the areas of the request that were invalid and the date of nonconcurrency.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Involuntary Separation Notification	Information Exchange	This includes information associated with a notification that an involuntary separation has been initiated against a Member. This may include (but not be limited to) current Service or component, proof of eligibility for a specific involuntary separation action, cause for separation, and justification for involuntary separation.	
Involuntary Separation Notification Acknowledgement	Information Exchange	This includes information related to a Member's response to a notification of involuntary separation. This may include (but not be limited to) a Member's concurrence on their Statement of Service, a written response to the involuntary separation recommendation, or a decision to seek legal counsel.	
Involuntary Separation Request	Information Exchange	This includes the request information related to an involuntary separation. Additionally, this may also include information related to any waivers that are part of the involuntary separation request. The information in this request may include (but not be limited to) Member name, current Service or component, proof of eligibility for a specific involuntary separation action, cause for separation, and justification for involuntary separation.	
Issue Books	Information Exchange	Single page narratives prepared by OSD staff, DoD Components, and OMB that contains all the issues identified and documented in the Issue Papers.	
Joint Chief of Staff Feedback	Information Exchange	The Joint Staff conducts requirements analyses of the POM/PCP and assess the POM/PCPs impact and recommends a response to OSD.	
Joint Concept of Operations	Information Exchange	A living family of documents that forms the framework for future full-range military operations. It also encompasses and unifies subordinate operating, functional, and enabling concepts, as well as integrated capabilities. These documents describe how the joint force will operate in the next 15-20 years. Further, JOpsC describes how the joint force will employ those emerging capabilities and concepts, along with interagency and multinational coordination, to resolve war and crises situations.	
Joint Programming Guidance	Information Exchange	This document, issued by the SECDEF, provides firm guidance in the form of goals, priorities, and objectives, including fiscal constraints, for the development of the POM.	
Joint Tasks	Information Exchange	Actions or activities that involve forces of two or more Military Departments interacting with a combatant commander or subordinate joint force commander, (derived from an analysis of the mission and concept of operations) assigned to an individual or organization to provide a capability.	
Joint Vision 2020	Information Exchange	Provides in broad terms the human talent - the professional, well-trained, and ready force - and operational capabilities that will be required for the joint force to succeed across the full range of military operations and accomplish its mission in 2020 and beyond. In describing those capabilities, the vision provides a vector for the wide-ranging program of exercises and experimentation being conducted by the Services and combatant commands and the continuing evolution of the joint force.	
Labor Rights Issue Analysis Summary	Information Exchange	This includes summary information associated with the responses, following analysis, to civilian direct hire employees (e.g., civil service, Non Appropriated Fund (NAF) employees) labor rights issue requests. This information may be utilized by the chain of command for general analysis of labor agreements, morale and other issues. The information may include (but not be limited to) summary of submitter's personal information (e.g., number of anonymous notations, number of submissions with submitter name, list of cited organizations), summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), summary of narrative feedback details, dates of feedback vs dates of replies, summary of related feedback inputs received, summary of analysis narratives, summary of evaluation results narratives, summary of narratives for pending related procedural adjustments or other actions, narrative summary of implementation details).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Labor Rights Issue Request	Information Exchange	This includes information associated with a civilian direct hire employee (e.g., civil service, Non Appropriated Fund (NAF) employees) submitting a request for resolution of a Labor Rights Management issue. Labor Rights Management refers to those actions undertaken to ensure that employees and employers are aware of and comply with all statutes and regulations concerning labor rights, including those pertaining to wages, benefits, safety and health, whistleblower, and non-discrimination policies. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization), union labor agreement authorized comments, summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), narrative request details, and date of request.	
Labor Rights Issue Response	Information Exchange	This includes information associated with the response to a civilian direct hire employee's (e.g. civil service, Non Appropriated Fund (NAF) employees) request for resolution of a labor rights issue. This information may be utilized by the chain of command for general analysis of labor agreements, morale and other issues. The information may include (but not be limited to) requestor and individual personal information (e.g., name, ID number, organization), union labor agreement authorized comments, summary of general legal basis of the feedback (e.g., citation of specific civilian employee labor rights guaranteed by the Federal government such as Fair Labor Standards Act, Family Medical Leave Act, Occupational Health and Safety Act ), narrative request details, date of request, analysis narratives, summary of evaluation results narratives, narrative for pending related procedural adjustments or other actions, narrative summary of implementation details).	
Legal Personnel Programs Debt Disposition	Information Exchange	This is an overall flow of legal personnel programs debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Legislation	Information Exchange	This includes existing or newly enacted law that affects Human Resources Management policy and guidance. This information may include (but not be limited to) legislation date, legislation name, and legislation description.	
Liability Footnote Information	Information Exchange	This is information either explaining specific line items on a financial report or providing disclosure information for potential liabilities not reported in financial reports.	
Line of Duty Appeal Decision	Information Exchange	This includes a decision made by an Approval Authority on a Line of Duty (LoD) appeal action. The information may include (but not be limited to) appeal decision date, appeal status, and appeal justification.	
Line of Duty Appeal Decision Notification	Information Exchange	This includes the notification of a decision made by an Approval Authority on a Line of Duty (LoD) appeal action. The information may include (but not be limited to) notification date and time, notification status, and appeal decision information (appeal date, appeal status, and appeal justification).	
Line of Duty Decision	Information Exchange	This information includes a Line of Duty (LoD) decision (e.g., interim and final). The information may include (but not be limited to) LoD decision results (e.g., in the line of duty, not in the line of duty- not due to Member's misconduct, not in the line of duty - due to Member's misconduct, not in the line of duty - existed prior to service), LoD decision date, LoD investigation date, LoD investigation findings, and LoD investigation officer.	
Line of Duty Decision Notification	Information Exchange	This includes the notification of a decision made by an Approval Authority determining if an incident occurred in the Line of Duty (LoD) or not in the LoD. The information may include (but not be limited to) LoD decision results (i.e., in line of duty or not in line of duty), LoD decision date, notification method (e.g., fax, email, phone, and post mail), and notification date and time.	
Line of Duty Determination Request	Information Exchange	This information includes a notification of a casualty incurred by a Member resulting in injury, disease, or death and a request to determine whether the incident occurred in the Line of Duty (LoD) or not in the LoD. The information may include (but not be limited to) request date and time, requestor name, and supporting documentation specific to the casualty.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Line of Duty Information Request	Information Exchange	This includes a request for documentation to assist in a Line of Duty (LoD) investigation. This information may include (but not be limited to) request date and time, requested information, and requestor name.	
Line of Duty Legal Recommendation Documentation	Information Exchange	This includes the results of a legal review of documents concerning a Line of Duty (LoD) investigation and all associated information. The information may include (but not be limited to) review date and time, reviewer name, and review findings.	
Line of Duty Legal Review Information Request	Information Exchange	This includes a request for a legal review of documents concerning a Line of Duty (LoD) investigation and all associated information. The information may include (but not be limited to) request date and time, requested information, and requestor name.	
Line of Duty Profile Information	Information Exchange	This includes the Line of Duty (LoD) information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, duty status, LoD decision information, information related to incidents of misconduct, LoD appeal decision, assignment type, assignment start and stop date, and assignment location.	
Line of Duty Profile Update Information	Information Exchange	This includes the updated Line of Duty (LoD) information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, duty status, information related to incidents of misconduct, LoD appeal decision, assignment type, assignment start and stop date, and assignment location.	
Line of Duty Request Documentation	Information Exchange	This includes the requested documentation to assist in a Line of Duty (LoD) investigation. The information may include (but not be limited to) incident reports (e.g., federal, state, or local law enforcement), interviews, and other information regarding the determination of a LoD (in the line of duty, not in the line of duty- not due to Member's misconduct, not in the line of duty - due to Member's misconduct, not in the line of duty - existed prior to service).	
Liquidated Penalty Administrative Fees and Interest Pro Forma Entries	Information Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the application of collections against penalties, administrative charges, and interest fees on overdue receivables.	
Load Information	Information Exchange	The data that reflects the shipment details required to move cargo and personnel.	
Loan Pro Forma Entries	Information Exchange	The debit and credit affects of pro forma entries to proprietary, budgetary, or memorandum general ledger accounts resulting from business events related to the origination, performance, payment, collection and closeout of a direct loan or loan guarantee.	
Logistics Order	Information Exchange	A validated request for internally sourced goods or services requested by a DoD customer that contains information relative to the source, location, required delivery date, product or service description, and special handling requirements e.g. hazardous materiel, wounded and deceased casualty transport.	
Logistics Order Modification	Information Exchange	A modification to a previously submitted logistics order.	
Management Report of Cash Accounting	Information Exchange	Form prepared by the deputy, agent, and cashier as a summary of the days cash transactions and receipts for cash and vouchers each time settlement occurs.	
Management Representation Statements	Information Exchange	Required management representations from external stakeholders responsible for review and certification of statements.	
Mandatory Retirement Projection Notification	Information Exchange	This includes a notification to the Member that he or she has been identified as involuntary retirement eligible and has been given the option to voluntarily retire. These reasons may include (but not be limited to) being passed over twice for promotion, medical (e.g., temporary/permanent disability), and years of service and age. If the Member does not choose to voluntarily retire, he or she will be involuntarily separated.	
Manpower Accounting Report	Information Exchange	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain the DoD Component strength information required to support personnel management and force readiness determination.	
Manpower Allocation Discrepancy List	Information Exchange	Manpower allocation discrepancies show the differences between the Manpower Allocation received and the Manpower Requirements submitted.	
Manpower Allocation Information	Information Exchange	Manpower allocation shows the distribution of manpower billets based on funding received.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manpower Budget Requirement	Information Exchange	These are the Manpower Budget Requirements that are submitted during the Planning, Programming, Budgeting, and Execution (PPBE) cycle. These requirements include the projections necessary to support DoD missions.	
Manpower Change Information	Information Exchange	The Manpower change information includes requests, proposals, changes to, and discrepancies in the organization structure, position or Manpower information.	
Manpower Directive	Information Exchange	A Manpower directive is an official directive received to change the force structure. This includes both changes to the organizations structure as well as position attributes. A Manpower directive can include an increase or decrease in manpower. This change is requested from the top-down.	
Manpower Document	Information Exchange	A Current Manpower Document (e.g., Table of Distribution and Allowances, Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization's structure and the Authorized Full Time Support for the current fiscal year.	
Manpower Document Update Information for New Unit	Information Exchange	This includes the organization structure information which is needed when establishing a new unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Reorganized Unit	Information Exchange	This includes the organization structure information when there is a reorganization of a unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Updated Position	Information Exchange	This includes the updates to unit information to reflect the redesignating, inactivating, and reactivating of units. The information may include (but not be limited to) unit identifier, position occupation code, and unit position grade authorized strength level (number of positions authorized for a grade within a unit).	
Manpower Estimate	Information Exchange	An estimate of the number of personnel required to operate, maintain, support and train for the acquisition upon full operation deployment. Required for all ACAT I programs.	
Manpower Estimate Report	Information Exchange	The Manpower Estimate Report (MER) defines the proposed force structure. The manpower estimate shall report the total number of personnel needed to operate, maintain, support, and provide training for the program upon full operational deployment. It shall report the number of military (officer, warrant officer, and enlisted), DoD civilian, and contract manpower requirements for each fiscal year of the program beginning with initial fielding and ending with full operational deployment. A separate estimate shall be provided for each Component (for joint programs) and separately for the Active, Reserve, and National Guard forces.	
Manpower Information Request	Information Exchange	This includes any request for manpower data for reporting purposes.	
Manpower Input to Program Decision Memorandum	Information Exchange	This includes additional Manpower adjustments required as a result of the initial Manpower adjustments contained in the Program Objective Memorandum (POM).	
Manpower Input to Program Objective Memorandum	Information Exchange	This includes Manpower high level adjustments (e.g., Program Element Detail, Resource Identification Code) by Component to the Program Objective Memorandum (POM) baseline.	
Manpower Reclama	Information Exchange	Manpower reclama contains discrepancies from the requirements submitted versus the allocation received. These discrepancies are submitted to Budgeting for reconsideration.	
Market Information	Information Exchange	Information gathered based on market research with the intent of developing or improving a strategic sourcing strategy. May include, but is not limited to, information on suppliers, pricing, volumes, quality of goods, and services.	
Master Product Hazard Data Information	Information Exchange	New or updated product hazard data (PHD) that is required to be associated with DoD asset information.	
Materiel and Forces Status Information	Information Exchange	Information that permits the monitoring of events across a supply chain. It tracks and traces inventory and forces globally on a line item/individual level and provides information such as item unique identification, location, condition, custody, and embedded items.	
Materiel Capability Need	Information Exchange	Changes required by materiel to fill a capability gap identified in the Functional Needs Analysis (FNA). Capability proposals may involve a mix of both Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel and Facilities (DOTMLPF) and materiel changes.	
Materiel or Service Requirement	Information Exchange	This is a requirement for goods or services that exceeds the current plan or strategy.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
MAX Data Structure	Information Exchange	Format for submitting data into the OMB MAX system to create a new account, process an apportionment, or submit a budget.	
Medical Evaluation Findings	Information Exchange	This includes documentation on the medical status and duty limitations of the Member. This may include (but not be limited to) a referral to the Physical Evaluation Board (PEB), doctor's narrative summary (NARSUM), and a recommendation from chain of command on whether a Member is fit or unfit to return to duty.	
Milestone Lookup Service Information	Information Exchange	Information about Milestone.	
Milestone Lookup Service Request	Information Exchange	Request information to the Milestone Lookup Service.	
Military Equipment Recovery Information	Information Exchange	This is the information that indicates that military equipment disposal action has occurred and installed military equipment has been recovered and sent to logistics for return or disposal.	
Military Experience and Training Discrepancies	Information Exchange	This includes all information related to discrepancies noted during transition assistance reviews within a Member's military experience and training information. This may include (but not be limited to) discrepancies in assignment dates, discrepancies in ranks held, discrepancies in promotion dates, or discrepancies in training activities.	
Military Interdepartmental Purchase Request	Information Exchange	The Military Interdepartmental Purchase Request (MIPR) is a method for transferring funds amongst U.S. military organizations. It allows for multi-organizational cooperative efforts to be performed, rather than limiting funding to a single organization.	
Military Lift Request	Information Exchange	Military Transportation resources scheduling inquiry for personnel movement (may include cargo specifications) within mission guidelines.	
Mission OPTEMPO Information	Information Exchange	Information about the operational activity level at a given asset or installation due to mission variables.	
Mission OPTEMPO Information Request	Information Exchange	A request for information about the operational activity level at a given asset or installation due to mission variables.	
Modeling Services Procurement Request	Information Exchange	A requirement for technical and functional contracting support to analyze/define, develop, implement, execute and/or evaluate defense personnel related simulations that provide the capability to assess alternatives in personnel programs and corresponding force structure details.	
Modification or Change Notification	Information Exchange	Information that triggers a change or modification in an agreement, contract or intragovernmental order after it has been operational and past performance trends indicate a need for its modification(s) to improve performance.	
Modification or Change Requirement	Information Exchange	Requirement to modify a Procurement Instrument or intragovernmental order to meet conditions before closeout. Modifications may be necessary to ensure that commitments and obligations are properly recorded before closeout.	
Modified Accepted Letter of Offer and Acceptance Document	Information Exchange	A USG unilateral change to a case implemented in the Foreign Military Sales Trust Fund that has been approved by DSCA.	
Modified Draft Request for Proposal	Information Exchange	Modified solicitation document based on vendor comments or development of request for proposal prior to issuance.	
Morale, Welfare and Recreation Program Usage Request	Information Exchange	This includes information related to a request to use a Morale, Welfare and Recreation (MWR) program. This may include (but not be limited to) request date, requester information (e.g., requester name, requester relationship to a qualified service Member), the reason for the request, and any special circumstances of the request. This may be a formal or informal request.	
Morale, Welfare and Recreation Program Usage Response	Information Exchange	This includes a response to a Morale, Welfare and Recreation (MWR) program usage request of a DoD member/employee, dependent or community member. This may include (but not be limited to) requester name, date, determination of entitlement to use a program or programs, and any comments concerning the usage request.	
Narrative and or Footnote Information	Information Exchange	Receive narrative information required to clarify financial report balances and satisfy financial statement footnote disclosure requirements.	
Narrative Information	Information Exchange	This is the information used to build the post closing narrative. This information is derived from accumulated cost data, data used to build the working trial balance, mapped financial data, and mapped non-financial data. This is management's input to the financial statement consolidation process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
National Defense Strategy	Information Exchange	The National Defense Strategy supports the National Security Strategy by establishing a set of overarching defense objectives that guide the Department's security activities and provide directions for the National Military Strategy. The National Defense Strategy objective serves as links between military activities and those of other government agencies in pursuit of national goals. The National Defense Strategy provides four guidelines for implementing the strategy: create an active defense-in-depth; conduct continuous transformation, adopt a capabilities-based approach; and manage risks.	
National Military Strategy	Information Exchange	An analysis of the National Security Strategy to determine Department of Defense resources required to support the National Security Strategy. Provides focus for military activities by defining a set of interrelated military objectives from which the Service Chiefs and combatant commanders identify desired capabilities and against which Chairman, Joint Chiefs of Staff (CJCS) assesses risk.	
National Security Strategy	Information Exchange	A document produced yearly by the National Security Council (NSC) and signed by the President. It provides grand strategy and overarching national security goals and objectives for the United State.	
Need for Additional Component Product Hazard Data Information	Information Exchange	A notification sent to the work unit that indicates the additional information required to process the Component request for product hazard data (PHD).	
Negotiated Labor Agreement	Information Exchange	This includes information contained in a binding legal agreement's documentation of the relationship between DoD and a represented group (Federal Labor Management Relations Program for all DoD civilian employees except those that the President has excluded from coverage by Executive Order) of direct hire employees (e.g., civil service, Non Appropriated Fund (NAF) employees). Relationships with unions representing non-U.S. citizens employed at DoD activities must remain consistent with pertinent intergovernmental agreements, local practices, customs, and DoD instructions. Relationships with unions representing non-U.S. citizens employed at DoD activities must be kept consistent with pertinent intergovernmental agreements, local practices, customs, and DoD instructions. The Defense Civilian Personnel Management Service (CPMS) must review and approve agreements pursuant to Title 5 Section 7114. The information may include (but not be limited to) signatory personal information (e.g., name, official title, organization), agreement narrative, date of final ratification.	
New Cost Model	Information Exchange	The model consists of the following information: 1. data requirements (necessary data elements, source of data elements, detailed characteristics of the data, availability of the data), 2. structured organization and relationships of model elements, 3. criteria for detecting business anomalies, 4. methodology for tracing inputs to model components, and 5. Model type and intended purpose Model Structure: The model structure reflects the organization and relationships of responsibility segments and cost objects. It also incorporates attributes which may support grouping, sorting, and reporting in ways not possible with pre-defined organizational and cost object structures. For example, if the cost object being reviewed is a geographic location (i.e., Baltimore), this attributing may provide the ability to view information not only by geographic location, but also by type (i.e., seaport, land port, airport), function, size, jurisdiction, etc. Responsibility Segments - A responsibility segment is a component of a reporting entity that is responsible for carrying out a mission, conducting a major line of activity or producing one or a group of related products or services. In addition, responsibility segments usually possess the following characteristics: 1. Their managers report to the entity's top management directly; and 2. Their resources and results of operations can be clearly distinguished from those of other segments of the entity. These two characteristics differentiate responsibility segments from cost objects. A cost object can be at any level of an organization and may not report to the top management directly. A responsibility segment can contain cost objects within itself. Cost Object - This is an activity or item whose cost is to be measured. In a broad sense, a cost object can be an organizational division, geographical area (e.g., district, region, etc.), cost center, program, activity, task, product, service, customer or asset. Cost objects may be decomposed into lower level cost objects to the extent required. As an example, the purpose of cost accounting by a responsibility segment is to measure the costs of its outputs. These outputs may be the services or products that the segment produces and delivers, the missions or tasks that the segment performs, or the customers or markets that the responsibility segment serves. There may be intermediate cost objects that are used in the course of the cost assignment process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
New Customer Information	Information Exchange	In order to set up an account receivable for a new customer, new customer information must be provided to the accounting office. New customer information includes the name, address, identification, credit worthiness, and details regarding goods or services to be provided, along with agreed to billing requirements.	
New Data Element Request	Information Exchange	As a result of responding to the customer's request, the cost accountant may identify the need for creating a new data element. This object represents the request that the new data element be created by the appropriate owner.	
Non DoD or Operational Threat Assessment Information	Information Exchange	Federal Agency, Joint Warfighter or scientific community threat assessment considerations and information.	
Non-Materiel Capability Need	Information Exchange	Changes required in doctrine, organization, training, leadership and education, personnel or facilities to satisfy identified functional capabilities.	
Non-validated Personnel Requisition	Information Exchange	This includes a non-validated personnel requirement request. This information may include (but not be limited to) decision date, decision reason, request date, request quantity, occupational code, and Unit Identification Code (UIC).	
Notification of Adjustment	Information Exchange	A notification of applied changes to the apportionment request sent to the components.	
Notification of Billing	Information Exchange	Notification generated and transmitted by a billing office to the accountant communicating that a bill has been generated for a receivable. This notification triggers the update of a specific amount of the receivable to be denoted as "billed".	
Notification of Collection	Information Exchange	This is a notification that a collection has been processed. The information could include the associated deposit ticket or debit voucher and the associated cash collection voucher, administrative offsets.	
Notification of Correcting Pro Forma Entries	Information Exchange	Notification of pro forma entries consisting of correcting business information pertaining to anomaly corrections captured during operations to determine the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts).	
Notification of Disbursement	Information Exchange	This is a notification from the supply chain entitlement that a disbursement has been processed. The information could include preparation and distribution of the payment instrument and the associated disbursement voucher.	
Notification of Final Delivery	Information Exchange	Information needed to trigger confirmation of physical completion of contract or intragovernmental order.	
Notification of Foreign Military Sales Trust Fund Closure of Case	Information Exchange	Notification to the Implementing Agency that the case is closed in the Foreign Military Trust Fund.	
Notification of Funds Availability	Information Exchange	This is a notification that funds are available or not available for the commitment or obligation request.	
Notification of Insufficient Funds	Information Exchange	This includes information associated with a notification that funds are not available for the commitment or obligation request.	
Notification of Loss from Supplier	Information Exchange	Contractor notification to the government of loss of government property while in their custody.	
Notification of Payment Cancellation	Information Exchange	Notification received by the contracting officer from authorized official that certifies that a payment cancellation request has been received and processed.	
Notification of Rejected Collection	Information Exchange	Notification received from a collecting activity or organization that a previously recorded collection has been rejected or returned to entitlement after determining that the available information cannot satisfy the requirements to properly identify the collection.	
Notification of Requirement Status	Information Exchange	The notification of a proposal status from the Accounting Control Board. The requirement status may be: approved, declined, or tabled.	
Notification to Comptroller of New Requirement	Information Exchange	Notification sent to the Comptroller for the request of new requirements that will be used to establish a new policy or change an existing policy. Changes could affect the SFIS, Chart of Accounts, Pro-Forma entries, or the calendar.	
Notification to Re-examine	Information Exchange	Notification to re-examine proposal that has been tabled.	
Obligation Pro Forma Entry	Information Exchange	The debit and credit affects of obligation pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Obligation Request	Information Exchange	This is a signed contract or order that provides obligations or deobligations request.	
Occupation Competencies Deficiency	Information Exchange	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring Department of Defense (DoD) modification to DoD competencies identified for DoD funded development actions. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), competency development proposal, proposed relationship of competency to occupations or occupation families, intended operational result of proposed competency development.	
Occupation Competencies Information	Information Exchange	This includes information associated with the Department of Defense (DoD) competencies approved for expenditure of DoD resources for DoD personnel development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) specific competency identification information related to DoD occupations (e.g., MOS, AFSC).	
Occupation Competencies Proposal	Information Exchange	This includes information associated with personnel identifying a problem (e.g., adjustment to the eligibility criteria, and related development activities, for a Department of Defense (DoD) competency is needed to resolve a safety problem identified from Safety incident reports) potentially requiring DoD modification to DoD competencies identified for DoD funded development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), competency development proposal, proposed relationship of competency to occupations or occupation families, intended operational result of proposed competency development.	
Occupation Competencies Proposal Assessment	Information Exchange	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, Department of Defense (DoD) competencies identified for DoD development actions (e.g., Education, Training, Distributed Learning, Competency Testing, Credential management). The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), specific competency identification information, proposal assessment information such as determination of related development actions to be further analyzed (within the context of development actions) for implementation details.	
Occupation Competency Testing Catalog Information	Information Exchange	This includes information associated with all Department of Defense (DoD) testing of a person's specific competency. The information may include (but not be limited to) specific test information (e.g., test identification information, test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information.	
Occupational Competency Testing Deficiency	Information Exchange	This includes information associated with personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring a modification to Department of Defense (DoD) testing of an individual's specific competency. The information may include (but not be limited to) specific test information (e.g., test identification information, requestor personal information (e.g., name, ID number, organization), test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information).	
Occupational Competency Testing Proposal	Information Exchange	This includes information associated with personnel identifying a proposal (e.g., adjustment to the specified metals to be used in the competency testing of underwater electric arc welding) potentially requiring a modification to a specific competency test. The information may include (but not be limited to) specific test information (e.g., test identification information, test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, and test scoring information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Occupational Competency Testing Proposal Assessment	Information Exchange	This includes information associated with the response to a perceived deficiency of, or proposal for a modification to, a specific competency test. The information may include (but not be limited to) specific test information (e.g., test identification information, requestor personal information (e.g., name, ID number, organization), test version identification, test mediums such as paper or electronic, test classification level, test eligibility requirements), testing facility requirements including specified locations and equipment, test scoring information, related assessment inputs received, analysis summary, evaluation results, proposal assessment information such as determination of related development actions to be further analyzed for implementation details, and projected actions).	
Occupational Safety Analysis Information	Information Exchange	Information from Workforce Occupational Safety Analysis supporting determination of Human Resources Management actions such as formulation of force structure and development of personnel.	
Officer Involuntary Retention Appeal	Information Exchange	This includes an appeal to not extend the officer's military service past their current obligation date. This appeal is filed by an officer that has been identified for retention.	
Officer Involuntary Retention Notification	Information Exchange	This includes the notification to appropriate parties (e.g., Member, commander) that a Member has been identified for involuntary retention.	
Officer Involuntary Retention Waiver Request	Information Exchange	This includes a request to not extend the officer's military service past their current obligation date. This waiver request is filed by an officer that has been identified for retention.	
Official Congressional Position	Information Exchange	Official Congressional decision solicited from the congress stating the position on reprogramming of appropriated funds.	
Offset Pro Forma Entries	Information Exchange	The general ledger impact of offsetting the balance of an accounts payable with a previously recorded accounts receivable. Perhaps resulting from a contract overpayment.	
OMB Bulletin	Information Exchange	Supplements instructions for apportionment of CRAs and applies to any extensions of the CRA.	
OMB Decision	Information Exchange	A decision sent from OMB to the Comptroller responding to the request for additional continuing resolution act amount request from the Comptroller.	
OMB Feedback	Information Exchange	During the budget review, OMB provides feedback to OSD on the budget estimates submitted by the components. The feedback could be related to the outyear policy and baseline estimates that must be consistent with the economic assumptions provided by OMB. OMB's feedback could also be the enforcement on the compliance of the budget estimates with OMB's policies regarding mandatory and discretionary programs.	
OMB Passback	Information Exchange	This is a recommended change to DoD's proposed budget for inclusion in the Presidents Budget. Recommended changes could be based on the outyear policy and baseline estimates that must be consistent with economic assumptions (e.g. inflation).	
OMB Reprogramming Decision	Information Exchange	The decision by OMB to either approve or disapprove the reprogramming request from the Comptroller.	
OMB Transfer Decision	Information Exchange	Documentation that provides OMB's decision on DoD's request to transfer budgetary authority between statutory appropriations or Treasury accounts.	
Operational Experience Information	Information Exchange	This includes information representing an input into Human Resources Management, from the Warfighter, of a person's operational experience. Monthly operational duty (e.g., operational flying duty, operational submarine duty) experience is expressed in terms of hours, fractions of an hour, or minutes specified in standards for operational experience competencies. This information is used to determine years of operational duties required in the computation of pay entitlements (e.g., gates for comparison against years of service specified for minimum periods of operational aviation or submarine duty) authorized by law.	
Order Status Information	Information Exchange	This is current information containing details about an order or a shipment.	
Organization Change Request	Information Exchange	This includes a bottom-up request to change the current organizational structure. This request includes a Mission or Force Structure Change.	
Organization Level Manpower Document Update Information	Information Exchange	Identifies the changes from the current organization level Manpower document. A Manpower document (e.g., Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization structure.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
OSD Reprogramming Decision	Information Exchange	OSD's decision to approve or disapprove the reprogramming request after reviewing OMB's reprogramming request response.	
OSD Transfer Decision	Information Exchange	Documentation that provides OSD's decision on a request to transfer budgetary authority between statutory appropriations or Treasury accounts.	
Other Budget Decision	Information Exchange	Other budget decisions include both internal and external decisions that are not incorporated in a Program Budget Decision (e.g. Congressional Decision).	
Other Government Earned Value Information	Information Exchange	Cost, schedule, work anticipated, work completed, and performance information based on information from a non-DoD government source, used as internal management controls to monitor completion of contract activities.	
Other Real Property Acquisition Information	Information Exchange	This is information regarding real property acquisition instruments. This includes acquisition types such as purchase, ingrats, outgrants, leases, condemnation, gifts and donation, and withdrawal from public domain.	
Other Receipts	Information Exchange	Any receipts other than those included with a Debit Voucher or those that are a collection against an open receivable (established when goods or services were provided).	
Out-Processing Departure Notification	Information Exchange	This includes a notification that captures the notification information to reflect the details of the departure of an individual from a duty station en route for a new temporary or permanent duty station. This notification may also include any changes made to assignment orders.	
Outstanding Accounts Payable Balance	Information Exchange	The current or period end general ledger balance that details all outstanding accounts payable due to vendors and/or employees.	
Outstanding Debt	Information Exchange	The outstanding net receivable balance due and payable at a specific point in time to a DoD entity by an external entity or person including a DoD employee.	
Oversight Assessment Information	Information Exchange	This is the result of the programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios. This includes results of analysis from Component Acquisition Executive (CAE) and Service Acquisition Executive (SAE).	
Paid Disbursement Voucher	Information Exchange	The Paid Disbursement Voucher is a means to communicate sufficient information to enable the audit of the transactions of certifying and disbursing officers, as required by law, for all disbursements, whether in cash, by check, or by electronic payments drawn on the U.S. Treasury or designated depository banks, for authorized and lawful payments and/or refunds of amounts collected.	
Passback Final Decision	Information Exchange	The passback final decision represents the agreement between OSD and OMB on the final DoD's budget for inclusion to the President's Budget submission. This decision will be incorporated in a new Program Budget Decision or other budget decision memorandum. The decision should reflect result of the following activities: Agreement on the deliberation on key issues within DoD and across all organizations; Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs; and results of negotiation with OMB on top-line considerations.	
Pay Profile Information	Information Exchange	This includes pay information (e.g., pay and allowances, allotments, deductions, reimbursements, garnishments, bankruptcies, duty participation and taxes) that is associated with a personnel/pay record. The information may include (but not be limited to) personnel agreement information (e.g., bonus, incentive, and agreement effective date), pay eligibility status, benefit election information (e.g., benefit type, benefit effective date, and benefit authorization), deduction information (e.g., deduction type, deduction amount, and deduction effective date), disbursing information, returned payment notice information, pay type, and pay start and stop date.	
Pay Profile Update Information	Information Exchange	This includes information associated with updated pay information (e.g., pay and allowances, deductions, reimbursement, and taxes) that is associated with a personnel/pay record. The information may include (but not be limited to) personnel agreement information (e.g., bonus, incentive, and agreement effective date), pay eligibility status, benefit election information (e.g., benefit type, benefit effective date, and benefit authorization), deduction information (e.g., deduction type, deduction amount, and deduction effective date), pay type, and pay start and stop date.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Pay Statement Information	Information Exchange	This includes information associated with payroll and tax withholding information. This may include (but not be limited to) leave and earnings statement (LES), personal statement of military compensation, W-2 statement of wage, and payroll disbursement history.	
Payment Request	Information Exchange	A request for payment from a vendor or other party owed by the government. It describes an amount due for the acquisition of tangible goods or services as "billable events", which will include the pricing including freight, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition. Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Final Cost Vouchers, Performance-Based Payment Requests, Progress Payment Requests, Commercial Invoices, Fast-Pay Invoices, Direct Cost Vouchers, Grants, and Non-Direct Cost Vouchers.	
Payroll Reports	Information Exchange	The purpose of payroll reports is the reconciliation of human resources and payroll data within the systems, for comparison and reconciliation with that of disbursing, accounting, and other administrative systems/subsystems/modules to ensure accuracy, completeness, and data integrity. The purpose is also to satisfy requirements of Certifying Officer legislation.	
Penalties Administrative Fees and Interest Pro Forma Entries	Information Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with calculated penalties, administrative charges, and interest fees on overdue receivables.	
Penalties Administrative Interest Adjustments	Information Exchange	As the outstanding receivable is managed, adjustments to penalties, administrative fees, and interest are calculated. These adjustments include amount, date, rationale, and any other information necessary to update the associated receivable balance.	
Perform Build and Make and Maintenance and Sustainment Performance Information	Information Exchange	This is the narrative and metrics data that when aggregated describes the execution of Build and Make and Maintenance and Sustainment activities.	
Performance and Accountability Report	Information Exchange	Report that provides financial and performance information that enables the President and Congress, and the public to assess the effectiveness of DoD relative to its mission performance, program management, utilization of resources. The report includes Management's Discussion and Analysis, the Departments financial statements and auditors report, and discussion and analysis of fiscal year accomplishments.	
Performance Evaluation Appeal Request	Information Exchange	This includes official documentation of an individual's justification as to why an adverse performance evaluation should be changed. This occurs after the performance evaluation is made an official matter of record. The application is the trigger for the appeals process, which allows for the possible reversal of an adverse evaluation. This may include (but not be limited to) appeal date, appeal reason, and justification documentation.	
Performance Evaluation Development Plan	Information Exchange	This includes information needed to document a performance evaluation development plan. This may include (but not be limited to) evaluation comments, recommendations, evaluation start and stop date, and name of evaluator.	
Performance Evaluation Input	Information Exchange	This includes documented achievements and comments related to an individual's performance. This may include (but not be limited to) award name, award type, promotion information, training, and education.	
Performance Evaluation Profile Information	Information Exchange	This includes performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, evaluation status, evaluation start and stop date, performance composite scores, and comments from the evaluator.	
Performance Evaluation Profile Update Information	Information Exchange	This includes updated performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) evaluation status, evaluation start and stop date, performance composite scores, and comments from evaluator.	
Performance Evaluation Rating Chain	Information Exchange	This includes the list of raters for a specific Member. This may include (but not be limited to) name of the person being rated, name of raters, rank of raters, and grade of raters.	
Performance Evaluation Shell	Information Exchange	This includes a blank performance evaluation form that contains the information on the individual being rated. This may include (but not be limited to) name, SSN, rank, period of performance, rating scheme, and reason for evaluation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Performance Evidence	Information Exchange	Information provided to the buyer, confirming that the rendering of services or tendering of goods has been performed, including information for billing, collection and shipment planning. Order performance evidence is also used to update the Government supplier's asset record, to update goods in transit accounts, and to trigger the suppliers' receivables process for services.	
Performance Information	Information Exchange	This is the flow of actual performance data back into the control system so that actual performance can be compared with planned performance.	
Performance Parameter Information	Information Exchange	Those operational and support characteristics of the system that allow it to effectively and efficiently perform its assigned mission over time. The support characteristics of the system include both supportability of the design and the support elements for system operation. This includes Acquisition Program Baseline Information.	
Performance Summary	Information Exchange	This contains the results of analysis of actual performance against the financial and operational goals and objectives. Includes recommendation for modifications to the Resource and Performance Plan.	
Personnel Accounting Information	Information Exchange	Information which can be used for cost and performance management, including but not limited to pay, benefits, travel, medical and other personnel expenses.	
Personnel Action Decision	Information Exchange	This includes all decisions made by an Approval Authority on a personnel action. The information will include documentation of a person's rights associated with the decision (e.g., right to appeal). The personnel action decision may include (but not be limited to) personnel action identifier, personnel action status, and personnel action status date and time.	
Personnel Action Decision Notification	Information Exchange	This includes the notification information to reflect the details of a decision made by an Approval Authority on a personnel action. The information may include (but not be limited to) decision recipient, notification date, personnel action identifier, and personnel action status.	
Personnel Allocation Information	Information Exchange	This is the current distribution of Personnel within the current organizational structure.	
Personnel Allocation Update Information	Information Exchange	This is the updated distribution of Personnel based on the current Manpower allocation.	
Personnel and Pay Debt Disposition Information	Information Exchange	This includes information associated with the execution of a debt disposition directing a waiver, remittance, partial payment for a personnel and pay related debt. This information may include (but not be limited to) debt type, debt amount, effective date of indebtedness, amount of to be written off from the original indebtedness. This information is the basis for an action in the Financial Visibility business area.	
Personnel Award Request	Information Exchange	This includes the award request information related to an award recipient, candidate or unit. The information may include (but not be limited to) award name, award recommendation, and award nominator.	
Personnel Classification Catalog Information	Information Exchange	This includes repository information associated with specifications and descriptions of all occupations or job families required to accomplish the mission taskings of the Department of Defense (DoD) within the overall context of the federal government. The information may include (but not be limited to) occupation identification information, job family information, eligibility specifications, service unique information (e.g., Air Force Specialty Code and Special Experience Identifiers, Army Military Occupation Specialty, Civilian Occupational Series) and related competencies.	
Personnel Classification Deficiency	Information Exchange	This includes information associated with warfighter personnel identifying a problem (e.g., warfighter request based on operational problem potential short term solution) potentially requiring Department of Defense (DoD) modification to DoD occupations identified for a person. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), occupation proposal narrative, intended operational result of proposed competency development.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Classification Determination Request	Information Exchange	This includes information associated with personnel submitting a request for determination of a person's appropriate occupation family and occupation to be updated in the person's profile. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), Universal Joint Task List (UJTL) related item (e.g., Strategic Theater 1.1.2.6 Coordinate Joint Personnel Training and Tracking Activities, Strategic Theater 4.2.4 Establish and Coordinate Training of Joint and Combined Forces, narrative on exercise or combat operations related deficiency or problem, occupation identification information, job family information, eligibility specifications, service unique information (e.g., Air Force Specialty Code and Special Experience Identifiers, Army Military Occupation Specialty, Civilian Occupational Series) and related competencies. This request can based on personnel plan implementations needed to rebalance DoD human resources against evolving DoD mission requirements.	
Personnel Classification Proposal	Information Exchange	This includes information associated with personnel identifying a proposal potentially requiring Department of Defense (DoD) modification to DoD occupations identified for a person. The information may include (but not be limited to) requestor personal information (e.g., name, ID number, organization), occupation proposal narrative, intended operational result of proposed competency development.	
Personnel Development Plan	Information Exchange	This includes the personnel development plans (e.g., resource planning (classroom space, simulators, materials) and development requirements compared to operational competencies) that will aid in personnel development projections for future budget years.	
Personnel Development Profile Information	Information Exchange	This includes personnel development information that is associated with a personnel/pay record. The information may include (but not be limited to) specific course or test session information (e.g., location, projected seat identification, test identification information, test version identification) and records of management approvals of individual development actions and agreements as well as related retention agreements, assignment actions information and expense authorizations where required (e.g., foreign military, employees of other agencies), course results (e.g., course completion date, course withdrawal date, course withdrawal reason, course test scores, course honor designation (e.g., distinguished graduate, honor graduate)), formal training feedback, occupations, credentials, competencies, operational experience information, and service information.	
Personnel Distribution Guidance	Information Exchange	This includes personnel distribution guidance which is derived from warfighter personnel plans, budgetary, personnel, and manning guidance. The personnel distribution guidance is used in the creation of a personnel plans (e.g., personnel distribution plan).	
Personnel Distribution Plan	Information Exchange	This includes a plan for the distribution of personnel resources against mission priorities. This information may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Personnel Grade Change Draft Order	Information Exchange	This includes information pertaining to a draft personnel grade change order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action.	
Personnel Grade Change Final Order	Information Exchange	This includes the information needed to document an approved order for a grade change personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Personnel Grade Change Profile Information	Information Exchange	This includes the personnel grade change information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, promotion recommendations, promotion status, and demotion reasons, current and past assignments, awards and decorations, proficiency reports, performance/achievement, professional and technical knowledge, military proficiency, physical fitness and Service obligation.	
Personnel Grade Change Profile Update Information	Information Exchange	This includes updated personnel grade change information associated with a personnel/pay record. The information may include (but not be limited to) promotion recommendations, promotion status, and demotion reasons.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Occupation Competency Information	Information Exchange	This includes occupation information associated with the competencies needed to sustain the classification structure specifications and descriptions of all occupations or job families required to accomplish the mission taskings of the Department of Defense (DoD) within the overall context of the federal government. The information may include (but not be limited to) competency identification information, related occupation and job family information, and competency performance specifications (e.g., ability to free fall, with full combat equipment, from altitudes in excess of 50,000 feet and deploy a parachute at altitudes of 5,000 feet and below; ability of a DoD civilian auditor to evaluate a DoD financial audit according to GAO standards for a clean audit, ability to execute federal common supplier contracting procedures).	
Personnel Order	Information Exchange	This includes information related to a personnel order. The information may include (but not be limited to) order date, order number, award type, and order type.	
Personnel Order Requirement	Information Exchange	This includes information related to an official requirement to generate an order. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Personnel Plan Assessment	Information Exchange	This includes the personnel plans assessment feedback (e.g., promotion, accession, retention, development, occupation) that will aid in calculating the personnel projections for future budget years and related plan adjustments.	
Personnel Recovery Information	Information Exchange	This includes the aggregation of military, civil, and political efforts to recover captured, detained, evading, isolated or missing personnel from uncertain or hostile environments and denied areas. Personnel recovery may occur through military action, action by non-governmental organizations, other U.S. Government-approved action, and diplomatic initiatives, or through any combination of these options. This information may include (but not be limited to) date of mission, place of search, and any information relating to actions taken to find the person, including any evidence of the whereabouts and status of person arising from such actions.	
Personnel Recovery Request Information	Information Exchange	This includes a request to recover captured, detained, evading, isolated or missing personnel from uncertain or hostile environments and denied areas. This request may include (but not limited to) the aggregation of military, civil, and political efforts to recover place of search and any evidence of the whereabouts and status of person.	
Personnel Requirement Request	Information Exchange	This includes a request for personnel implementing the requirements within the personnel distribution plan. This information may include (but not be limited to) request date, justification, recommendation, request quantity, occupational code, and Unit Identification Code (UIC).	
Personnel Requirement Request Response	Information Exchange	This includes any over or under requisitioning. This information may include (but not be limited to) requestor name, request date, requested quantity, discrepancy information, occupational code, Unit Identification Code (UIC), current authorization information, and current gain and loss information.	
Personnel Requisition	Information Exchange	This includes information used to identify the need for personnel to fill a validated permanent or temporary position requirement. The information may include (but not be limited to) personnel requisition fill priority, personnel requisition identifier, and personnel requisition status.	
Personnel Retention Profile Information	Information Exchange	This includes reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	
Personnel Retention Profile Update Information	Information Exchange	This includes updated reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Transfer Request	Information Exchange	This includes the request information related to a transfer. Transfer requests may be initiated by a Member or a gaining Service or component. Types of transfers may include interservice, intraservice, transfer between reserve categories, transfer between military personnel class (request to attend a commissioning source program (e.g., Service Academy, Officer Training School [OTS], Reserve Officers' Training Corp [OTC]), and transfer to and from active duty. The information on the transfer request may include (but not be limited to ) Member name, transfer type, current Service or component, desired Service or component, proof of eligibility for transfer, waiver request, and justification for transfer.)	
Physical Asset Inventory Information	Information Exchange	Information which indicates the physical inventory has been completed based on a temporal or ad hoc requirement. It is used to update the capital asset record that enables asset accountability either as an update to the capital asset record or the creation of the asset record, based on an inventory found event. This information also enables asset valuation.	
Physical Evaluation Appeal Disposition	Information Exchange	This includes an appeal decision on the Member's physical evaluation fit for duty disposition and/or physical evaluation severity rating disposition as a result of an appeal or mandatory review. The information may include (but not be limited to) Member name, current Service or component, appeal decision date, appeal status, and appeal justification.	
Physical Evaluation Appeal Request	Information Exchange	This includes official documentation of a Member's request for reconsideration of a fit for duty determination or disability severity rating disposition. The information may include (but not be limited to) the disposition being appealed, appeal request date, reason for request, and all documentation to support the appeal.	
Physical Evaluation Decision Notification	Information Exchange	This includes the documentation of a physical evaluation decision (e.g., physical evaluation fit for duty decision, physical performance evaluation disposition, physical evaluation severity rating disposition, and physical evaluation appeal disposition). The information may include (but not be limited to) the decision, decision date, notification date, and decision recipient.	
Physical Evaluation Fit for Duty Information	Information Exchange	This includes documentation (e.g., physical evaluation profile information, medical evaluation findings and continuation of service request) collected to support physical evaluation fit for duty decision. The information may include (but not be limited to) Member name, current Service or component, the decision, decision date, and justification for decision	
Physical Evaluation Profile Information	Information Exchange	This includes physical evaluation profile information associated with a personnel/pay record. This may include (but not be limited to) medical information (e.g., medical findings, history, exams, and tests), Physical Evaluation Board (PEB) information (e.g., PEB date and findings), personnel restriction information, duty status, line of duty determination, retirement documentation (e.g., official documents that record and report the temporary retirement of military personnel), benefit information (e.g., benefit type, start, and stop date), and duty information.	
Physical Evaluation Profile Update Information	Information Exchange	This includes updated physical evaluation profile information associated with a personnel/pay record. The information may include (but not be limited to) medical information (e.g., medical findings, history, exams, and tests), Physical Evaluation Board (PEB) information (e.g., PEB date and findings), personnel restriction information, duty status, line of duty determination, retirement documentation (e.g., official documents that record and report the temporary retirement of military personnel), benefit information (e.g., benefit type, start, and stop date), and duty information.	
Physical Evaluation Severity Rating Disposition	Information Exchange	This includes a decision made by an approval authority on a disability severity information for a Member found unfit for duty. The information may include (but not limited to) Member name, current Service or component, disability severity information updates, decision date, and justification for an update if applicable.	
Physical Inventory Methodology and Plan	Information Exchange	The documentation of the technique and processes by which the inspection of inventory will be conducted.	
Physical Performance Evaluation Disposition	Information Exchange	This includes personnel restriction information and the decision for the Member to be recommended for reclassification, restricted from performing certain duties, retained in current specialty, place on probation, or referred for a medical evaluation. The information may include (but not limited to) Member name, current Service or component, decision date, justification for decision, physical evaluation findings, and any other supporting documentation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Plant Clearance Disposition	Information Exchange	The disposition of a contractor's request relative to property remaining at the end of contract performance.	
Plant Clearance Schedule	Information Exchange	The contractor notification to the government of property remaining at the end of performance of the contract.	
Populated Cost Performance Model	Information Exchange	Data accumulated by appropriate model element.	
Position Change Information	Information Exchange	This includes the position attribute modifications that occur due to changes to the organizational structure.	
Position Change Request	Information Exchange	A position change request is a bottom-up request (i.e., from the unit level to the Major Commands) to change number of positions or position attributes (i.e., grade change).	
Pre Payment Information	Information Exchange	The prepayment information to the seller. This is to notify the seller that a prepayment has been made before goods and/or services are received.	
Pre Payment Pro Forma Entries	Information Exchange	Prepayment pro forma entries are the general ledger transactions generated to record an expense that was paid in advance. These pro forma entries consist of using business information pertaining to prepaid expenses captured during operations to determine the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts).	
Pre Solicitation Notice	Information Exchange	Notification to the commercial marketplace of an existing or potential requirement.	
Prepaid Expense Adjustment	Information Exchange	As resources, for which a prepayment was previously recorded, are consumed, the amount of the prepaid asset is decreased and an actual expense is recorded. The resource consumption may be supported by a periodic journal voucher or an invoice or some other documentation provided by a service provider.	
Prepared Testimony	Information Exchange	Prepared testimony are materials required to support the congressional budget review. A testimony could include a witness statement. The witness statement must include the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing. A biographical sketch of the witness should be included in the witness statement.	
Presidents Management Agenda	Information Exchange	The President's Management Agenda consists of the administration's strategy for improving the management of the Federal government. It focuses on five areas of management weakness across the government where improvements and the most progress can be made.	
Prior Business System Approval or Disapproval	Information Exchange	Previous notification to the contractor that their business system has been approved or disapproved. This notice was sent in the past and is now coming back into the activity as the "Prior" Business System Approval or Disapproval.	
Pro Forma Entries	Information Exchange	The debit and credit affects of pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Procurement Change Request	Information Exchange	A request for modification to a sourced procurement.	
Procurement Evidence	Information Exchange	Documentation serving as proof that the deliverables received of services rendered have been delivered fulfilling specified terms and conditions against the previously agreed upon contract between the supplier and the DoD buyer. It also must include information necessary for Asset Valuation (e.g., capitalize vs. expense determinations).	
Procurement Instrument Closure Information	Information Exchange	All information related to completion of the buyer's final procurement instrument closeout process including, but not limited to, closeout details and requesting decommitments, if necessary. This also includes any adjustments to closure information.	
Procurement Instrument Execution Information	Information Exchange	Data received from the supplier during the monitoring of contract processes based on the execution of services or providing of products stipulated in a contract, used to assess supplier performance and contract status.	
Procurement Instrument Execution Information from External	Information Exchange	Information from external sources such as audits (e.g. DCAA). Used in evaluating the vendor performance on the current contract.	
Procurement Instrument Performance Information	Information Exchange	Information on the vendor's performance against the contract to be used in evaluating their ability to perform future contracts.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Procurement Request	Information Exchange	<p>Document which describes the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.</p> <p>This is a parent ICOM composed of the following Children:</p> <ul style="list-style-type: none"> <li>Service Procurement Request (child)</li> <li>Transportation Procurement Request (child)</li> <li>Modeling Services Procurement Request (child)</li> <li>Benefit Procurement Request (child)</li> </ul>	
Product Hazard Data Deficiency Notification	Information Exchange	Notification that product hazard data (PHD) in the master product hazard data (MPHD) warehouse may have incorrect, incomplete or missing data. This notification requires the PHD to be reviewed and if necessary, corrected or updated.	
Product Hazard Data Request to Source	Information Exchange	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Product Hazard Data Requirement	Information Exchange	The product hazard data (PHD) that is required to complete a PHD data set that was found to be incomplete during validation.	
Product Hazard Data Response from Source	Information Exchange	A response (eg. email or letter) from a source (eg. manufacturer, supplier or vendor) to a DoD request for product hazard data (PHD). The response may include the requested PHD or an indication as to whether the PHD is available.	
Product Hazard Data Status Update	Information Exchange	The update on the status of the Component request for PHD that is sent to the requestor. This update may contain instructions on how to access the requested PHD, notification that the PHD is pending or notification that the PHD is not available.	
Product Surveillance Information	Information Exchange	Report of monitoring contractor performance to the delivery schedule of the contract.	
Program Analysis Information	Information Exchange	This is the corporate knowledge resulting from programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios.	
Program and Budget Information	Information Exchange	<p>Program and Budget Information include the following: On-year--DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year--The DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g.. cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.</p>	
Program and Funding Document	Information Exchange	This document establishes legal and fiduciary responsibility of funds. This is an OSD released document that reflects OSD's approval of program funding levels. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Program and Funds Action Tracking	Information Exchange	Documentation of changes at the line item level of all unexpired years. This includes supplemental and rescissions. Also included are the spread of Congressional undistributed adjustments, general provisions, below threshold reprogramming, and actions dictated by other laws.	
Program Assessment	Information Exchange	This information provides program analysis regarding functional performance, cost effectiveness, contract instruments and interoperability (e.g. systems and services) for the purpose of managing the program portfolio.	
Program Budget Decision	Information Exchange	A budget decision document issued during the joint review of DoD Component budget submissions by analysts of the OSD and the OMB. PBDs reflect the decisions of the SECDEF as to appropriate program and funding to be included in the annual defense budget request which, in turn, is included in the President's Budget.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Program Decision	Information Exchange	This is the outcome from the "Develop and Resolve Programmatic Issues" activity that addresses program issues across Component. It is the documentation produced after completing coordination within OSD and Components to reach agreements/resolution. After the issues are considered by the SLRG, the Deputy SECDEF makes a preliminary decision on each one as input to the PDM process.	
Program Decision Memorandum	Information Exchange	The Program Decision Memorandum formally documents the directives from the Deputy and Secretary of Defense to the Defense Components on issues raised during POM review. The issuance of the Program Decision Memorandum to DoD Components, the Chairman, Joint Chiefs of Staff, and OMB completes the Programming process.	
Program Deviation Reporting Information	Information Exchange	This is the information describing baseline deviations (also called breaches) to the Defense Acquisition Executives (DAEs) and Component Acquisition Executives (CAEs), and when appropriate to Congress.	
Program Information	Information Exchange	Program information consists of Operations and Maintenance TOA, Procurement TOA data, RDT&E TOA data and Military Construction TOA data which are used to update the FYDP.	
Program Lookup Service Information	Information Exchange	Information about Program for MDAPs	
Program Lookup Service Information Request	Information Exchange	Request information to the Program Lookup Service	
Program Objective Memorandum	Information Exchange	Issued during the even-numbered On-Budget years, contains recommended programming and resource allocations. Document includes the projected force structure and list of priorities. The Program Objective Memorandum (POM) includes the dollar amount. The POM (DoDI 7045.7): Annually, each Military Department and Defense Agency shall prepare and submit to the Secretary of Defense a POM that is consistent with the strategy and guidance, both programmatic and fiscal, as stated in the DPG. Major issues that are required to be resolved during the year of submission must be identified. Supporting information for POMs will be in accordance with the annual POM Preparation Instructions or requirements established by DoD Directive or Instruction.	
Program Requirement	Information Exchange	The need and/or demand for personnel, equipment, facilities, other resources, or services, by specified quantities for specific periods of time or at a specified time.	
Program Resource Analysis Information	Information Exchange	This is the corporate knowledge resulting from long range programmatic analysis of investment areas, affordability, acquisition alternatives, and funding controls.	
Program Review Analysis	Information Exchange	Program review analysis is the result of the review, analysis, and evaluation of submitted programs from components. The information could include the OSD/JCS assessment on the capabilities of the programs in executing approved strategies and policies. In addition, the review and analysis also includes the compliance to the guidelines and constraints set by OSD for the development of the component's POMs.	
Program Scope	Information Exchange	In project management, the scope of a project is the sum total of all of its products and their requirements or features (Guide to the PMBOK). Sometimes the term scope is used to mean the totality of work needed to complete a project. In traditional project management, the tools to describe a project's scope are the product breakdown structure and product descriptions. The primary tool to describe a project's scope (work) is the WBS.	
Program Work Breakdown Structure	Information Exchange	The WBS structure that encompasses an entire program. It consists of at least three levels of the program with associated definitions and is used by the government PM and contractor to develop and extend a CWBS. Examples of WBS for various items which may be used as a guide for acquisition programs are contained in Military Handbook (MIL-HDBK)881.	
Programmed Manpower Report	Information Exchange	This includes both pre-defined automatically generated reports as well as ad-hoc reports. These reports contain information on Manpower authorizations to include the corresponding funding information.	
Project Approval Request	Information Exchange	This is information that is required when an architectural design has reached a certain milestone (currently 35% completion). This authorization request enables the technical, business and financial review of the engineering of architectural design to ensure it meets the stated objectives and requirements. If approved the design project can be completed. If the project is not approved the design may be deferred or cancelled.	
Project Approval Response	Information Exchange	This is documentation informing the executing agent that the design project has been approved and can be completed.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Project Cancellation Evidence	Information Exchange	This is evidence that the project has been canceled or has not been approved by Congress.	
Project Cancellation Notice	Information Exchange	This is documentation informing the executing agent that the project has been cancelled.	
Project Information	Information Exchange	This is a quantitative and qualitative profile of the design and or construction project. It is a collection of data elements and information which uniquely identifies and provides information on the nature and context of the work to be performed. It consists of information such as the location of the work to be performed, source of funds, controlling agencies, current working estimate, the approval state or status of the project, and a signed Certificate of Compliance for Critical Planning Actions. Current examples of information that can be captured in the project information include the information represented on the DD Form 1391.	
Project Not Approved	Information Exchange	Documentation that the project has not been approved by Congress.	
Project Status Information	Information Exchange	This is information that identifies the status/ work-in progress such as budget, percentage of completion against the schedule of construction, installations support services, and disposal projects.	
Promotion Appeal Documentation	Information Exchange	This includes the appeals package which contains the appeals memorandum, as well as any supporting documentation. The information may include (but not be limited to) justification, recommendations, and appeal date.	
Promotion Criteria	Information Exchange	This includes promotion information that is needed to determine if a Member has satisfied the requirements for a promotion. The information may include (but not be limited to) composite score, test date, time in service, time in grade, and Service cutoff scores.	
Promotion List	Information Exchange	This includes the final approved promotion list which consists of Members that have been approved to receive a promotion. The information may include (but not be limited to) grade, rank, occupation code, and position.	
Promotion Notification	Information Exchange	This includes the notification information to reflect the details of a promotion decision. The information may include (but not be limited to) decision recipient, notification date, personnel action identifier, and promotion status.	
Promotion Order Requirement	Information Exchange	This includes information related to an official requirement to generate a promotion order pertaining to personnel. The information may include (but not be limited to) promotion acceptance or declination, personnel action status, personnel action start date, and personnel action identifier.	
Promotion Requirement Results	Information Exchange	This includes the results associated with the completion of promotion requirements. The information may include (but not be limited to) Promotion Board or Special Selection Board outcomes and promotion test scores.	
Property Expense	Information Exchange	This represents expensed costs associated with both personal and real property assets or items. For real property, it includes costs that are expensed from the CIP account based on the cancellation of a construction design project. It also includes costs such as costs associated with federal dollars that are expended on non-federal constructed assets. These costs are posted to the general ledger.	
Property Information Request	Information Exchange	A communication to the property community to obtain authoritative property information needed for EL reconciliation with property assets.	
Property Operation and Management Information	Information Exchange	Contains design analysis schedules warranties other technical such as including nameplate data and software. All information required to support maintenance management.	
Proposal	Information Exchange	A legal offer from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided. For sole source, this includes cost or pricing data.	
Proposal Decision	Information Exchange	Decision from the Control Board regarding the proposed changes to SFIS, Calendar, Chart of Accounts, and Pro Forma Entries.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Proposed Human Resources Management Policy and Guidance	Information Exchange	This includes a proposed Human Resources Management (HRM) policy and guidance document that will be sent to the appropriate parties for coordination and final approval. Proposed HRM policy and guidance may include (but not be limited to) accession policy, compensation policy, enlisted and officer personnel management policy. This information may include (but not be limited to) policy effective date, policy name, policy description, and policy change summary description.	
Proposed Personnel Requirement Request	Information Exchange	This includes a request for un-forecasted personnel requirements from appropriate parties. This information may include (but not be limited to) requestor name, request date, justification, request quantity, occupational code, and Unit Identification Code (UIC).	
Prospect Location Information	Information Exchange	This information includes location where prospect can be found (e.g., A schools, colleges, shopping centers, and areas of entertainment). This information may include (but not be limited to) school name, school address, date of visit, tier-level evaluation.	
Public Draft Request for Proposal	Information Exchange	This is a draft request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been made public for comment. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Public Law 91-646 Acknowledgement	Information Exchange	Contains evidence of compliance to PL91-646.	
Purchase Card Holder Information Request	Information Exchange	This is a request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) request date and time, requested information, and requestor name.	
Purchase Card Holder Information Response	Information Exchange	This is a response to an information request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) response date and time and member's or government civilian's information.	
Purchase Card Log	Information Exchange	A log in which the card holder documents individual orders or purchases and screening for mandatory sources when using the purchase card and/or convenience checks. Entries in the purchase log may be supported by internal agency documentation (e.g., request for procurement document or e-mail request). The purchase card documentation should provide an audit trail supporting the decision to use the card and any required special approvals that were obtained. At a minimum, the log will contain the date on which the item(s) or service(s) were ordered, the merchant's name, the dollar amount of the transaction, a description of the item(s) or service(s) ordered, and the date and name of who accepted the item(s) or service(s).	
Purchase Card Requirement	Information Exchange	Purchase card requirements are for authorized government purchases, subject to established limitations on transaction amount, billing cycle amount, and merchant category codes (MCCs) which are defined in Department of Defense Government Charge Card Guidebook, Appendix I. Does not include Fuel, Fleet, or Travel Purchases.	
Purchase Card Transactions	Information Exchange	A listing of purchase card transactions transmitted from the Bank.	
Purchase Investment Request	Information Exchange	Request sent to the Department of U.S. Treasury to purchase Treasury certificates for investment.	
Purchase Request	Information Exchange	Document which describes the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
QoL Information Request	Information Exchange	This includes a request for information about a Quality of Life (QoL) program(s). This may be specific or a request for aggregate information concerning QoL efforts.	
QoL Program Assessment Information	Information Exchange	This includes information pertaining to assessments and audits of Quality of Life (QoL) programs. This may include (but not be limited to) information used to improve program performance, proposed revisions to program standards, the recommendation to disestablish a QoL program (e.g., information about the financial and real property assets of the program, the disestablishment plan, cause of program termination, assessment history), and information used in a comparative analysis against other QoL programs and their assessments.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
QoL Program Assistance Notification	Information Exchange	This includes a notification to a Department of Defense (DoD) entity, non-DoD entity, or foreign government for assistance relating to delivering or coordinating Quality of Life (QoL) programs (e.g., coordination with customs when entertainment groups travel to installations overseas).	
QoL Program Assistance Response	Information Exchange	This includes a response to a Quality of Life (QoL) program assistance notification from a Department of Defense (DoD) entity, non-DoD entity, or foreign government relating to delivering or coordinating QoL programs.	
QoL Program Decision	Information Exchange	This includes the notification information to reflect the details of a decision made by an Approval Authority on a Quality of Life (QoL) program action. The information may include (but not be limited to) decision recipient, notification date, QoL program action identifier, and QoL program action status.	
QoL Program Decision Notification	Information Exchange	This includes the notification information to reflect the details of a decision made by an Approval Authority on a Quality of Life (QoL) program action. The information may include (but not be limited to) decision recipient, notification date, QoL program action identifier, and QoL program action status (e.g., approval or disapproval).	
QoL Program Evaluation Information	Information Exchange	This includes information relating to a Quality of Life program that may be used for program maintenance or evaluation. This information may include (but not be limited to) usage/enrollment information, funding metrics, use of resources, accessibility, effectiveness, and responsiveness to the needs of DoD personnel and their families and effects on readiness and retention.	
QoL Program Feedback Information	Information Exchange	This includes feedback information about the quality, effectiveness, or other comments or complaints about a Quality of Life (QoL) program or lack thereof. This information is used to assist in assessing the effectiveness of a QoL program and generating program assessment information, program standards feedback information, and QoL program reports. This feedback information may be informal (e.g., a comment captured by the program staff, suggested revisions to a program to improve effectiveness) or formal (e.g., a letter of complaint written to the appropriate command, survey results from QoL program participants and their families.).	
QoL Program Feedback Request	Information Exchange	This includes a request for feedback about the quality, effectiveness, or other comments or complaints about a Quality of Life (QoL) program or lack thereof. This information will be used to assist in assessing the effectiveness of a QoL program and generating program assessment information, program standards feedback information, and QoL program reports. Feedback may be requested informally (e.g., program staff capturing comments from program participants) or formally (e.g., sending out surveys to QoL program participants and their families).	
QoL Program Information	Information Exchange	This includes consolidated information about the status and performance of a Quality of Life (QoL) program or programs (e.g., fiscal information, resource utilization, and program history, effectiveness, and enrollment statistics).	
QoL Program Planning Document	Information Exchange	This includes information relating to Quality of Life (QoL) program plans. This information may include (but not be limited to) short and long-term plans for QoL programs (e.g., planned reviews of programs and financial resourcing ensuring that program delivery is consistent with the DoD Component and Military Services' goals and objectives, and information describing how to align program goals and objectives with resourcing, responsibilities, and implementation programming).	
QoL Program Proposal	Information Exchange	This includes information associated with a proposal for a modification to or the establishment of a specific Quality of Life (QoL) program. The information may include (but not be limited to) requestor personal information (e.g., name ID number, organization), narrative on the nature of the proposed modification or establishment, and data or projections related to the modified or new QoL program being proposed (e.g., projected usage numbers, expenses, revenues, future development plans).	
QoL Program Report	Information Exchange	This includes reporting information related to Quality of Life (QoL) programs. This may be a response to a QoL program information request, or it may be a report that is released at regularly scheduled intervals about the effectiveness of QoL programs (individually or in aggregate) at achieving mission goals and objectives.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
QoL Program Standards Document	Information Exchange	This includes standards information for Quality of Life (QoL) programs against which these programs are held accountable. This information is developed in an iterative manner through analysis of historically effective standards and current strategy and policy, and it may be specific to certain aspects of the programs (e.g., financial, performance, utilization).	
Quadrennial Defense Review	Information Exchange	A comprehensive examination of America's defense needs to include potential threats, strategy, force structure, readiness posture, military modernization programs, defense infrastructure, and information operations and intelligence that is conducted by law every 4 years at the beginning of a new administration. The Quadrennial Defense Review is strategy-driven, not budget-driven, so that the decision makers can assess the risk of not having the desired amount of resources to meet the requirements.	
Real Property Acceptance Checklist	Information Exchange	Contains information for Real Property Accountable Officer on what data is required for acceptance.	
Real Property Acceptance Evidence	Information Exchange	Occupancy Agreement Deed Court Order Lease.	
Real Property Acceptance Package	Information Exchange	Contains information for Real Property Accountable Officer such as RPIR data for completing the property record.	
Real Property Acquisition Documents	Information Exchange	Contains appraisal purchase contract negotiators statement, interim title, policy, leases, and contract construction in place project costs.	
Real Property Asset Condition Update	Information Exchange	This is information concerning the current condition, physical, and/or quality, of an existing real property asset with regard to the mission it supports.	
Real Property Asset Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used for maintaining asset information.	
Real Property Asset Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the process of maintaining asset information.	
Real Property Asset Geospatial Analysis Results	Information Exchange	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Data Package	Information Exchange	This is the geospatial information needed during the process of maintaining asset information for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Asset Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Information Requirements	Information Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed for a real property asset.	
Real Property Asset Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of maintaining asset information.	
Real Property Asset Valuation Information	Information Exchange	The value of the asset, which includes original procurement cost, depreciation and or amortization expense, gain and or loss on disposal, net realizable value, cost of capital improvement.	
Real Property Build and Maintenance Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used for real property construction and maintenance.	
Real Property Build and Maintenance Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Analysis Results	Information Exchange	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Data Package	Information Exchange	This is the geospatial information needed during the processes supporting the building or maintaining of real property for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Real Property Build and Maintenance Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Information Requirements	Information Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed to support the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during construction or maintenance of real property.	
Real Property Build and Maintenance Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of building and maintaining real property.	
Real Property Discrepancy Report	Information Exchange	Contains information regarding time and costs of correcting deficiencies.	
Real Property Disposal Requirement	Information Exchange	This is information regarding the method of disposal determined for a real property asset. This information is used to plan the execution of a real property disposal action.	
Real Property Graphic Information	Information Exchange	Contains information such as site survey flood plain information plat maps, CADD, and As-Builts.	
Real Property Information Request	Information Exchange	A request for real property information related to specific site(s) and / or facilities on those sites. The information will include, but is not limited to, the status of the site and / or facility.	
Real Property Information Response	Information Exchange	A response for real property information related to specific site(s) and / or facilities on those sites. The information will include, but is not limited to, the status of the site and / or facility.	
Real Property Installation Geo-enabled Visualized Information	Information Exchange	This is geo-enabled information needed for visualized products used for installation support.	
Real Property Installation Geospatial Analysis Requirements	Information Exchange	This is a request for geospatial analysis of information needed during the installation support processes.	
Real Property Installation Geospatial Analysis Results	Information Exchange	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the installation support processes.	
Real Property Installation Geospatial Data Package	Information Exchange	This is the geospatial information needed during the installation support processes for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Installation Geospatial Information Request	Information Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the installation support processes.	
Real Property Installation Geospatial Information Requirements	Information Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed for installation support.	
Real Property Installation Geospatial Product Request	Information Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed for installation support processes.	
Real Property Installation Geospatial Update Request	Information Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the installation support processes.	
Real Property Installed Equipment Recovered Information	Information Exchange	This is the information that indicates that a real property disposal action has occurred and real property installed equipment has been recovered and sent to logistics for return or disposal. For example, during a real property demolition action a Heating, Ventilation and Air Conditioning (HVAC) system may be recovered and provided to logistics for storage, maintenance, return to vendor, sale or destruction.	
Real Property Installed Equipment Recovered Notification	Information Exchange	This is equipment that is recovered from a real property asset during a disposal event. This equipment or materiel is either returned back into logistics inventory for re-use or sold.	
Real Property Operation Ceased Notification	Information Exchange	Information that a real property asset has been identified as closed with an excess declaration and disposal action to be processed.	
Real Property Outgrant Evidence	Information Exchange	Real property asset agreement or contract information (easement, lease, license, permit or use agreement) that documents the use of a Department of Defense managed real property asset to either a government agency or private entity for a specified consideration (rent or other remuneration).	
Real Property Outgrant Executed Notification	Information Exchange	This is the information which indicates that a Real Property Outgrant transaction has been executed and the real property is available for use by the external customer or user.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Real Property Placed in Service Information	Information Exchange	Information that a real property asset is available for use by DoD. This acknowledges that an interim Transfer and Acceptance of Military Real Property document is signed, title for assets listed on the acceptance form is transferred, and the punch list of additional work and certificate of occupancy by local authorities are attached to the acceptance form. This information confirms that the government assumes liability and the warranties begin for the asset to which DoD has received title.	
Real Property Placed in Service Notification	Information Exchange	Notification that a real property asset is available for use by DoD. This acknowledges that an interim Transfer and Acceptance of Military Real Property document is signed, title for assets listed on the acceptance form is transferred, and the punch list of additional work and certificate of occupancy by local authorities are attached to the acceptance form. This information confirms that the government assumes liability and the warranties begin for the asset to which DoD has received title.	
Reapportionment Request	Information Exchange	Request submitted to OMB within 10 days of appropriation or substantive act providing budget authority asking for apportionment of unapproved deferral or rescission funds.	
Rebaseline Input	Information Exchange	Input sent from the components to the Comptroller for incorporation into the rebaseline report.	
Rebaseline Report	Information Exchange	Rebaseline report that incorporates components feedback for submission to the congress for approval. Once this rebaseline report is approved, a new baseline report will be generated.	
Receipt Account Trial Balance and Ledgers	Information Exchange	Receipt Account Trial Balance and Ledgers statement contains detailed receipt transactions and balances reported by the Department of Defense during the month. This statement discloses information related to balances forwarded, current month receipts and month end account totals. It also provides the receipt balances by fund account symbol and department and collections and/or deposits of funds in accounts that are not immediately available for expenditure.	
Receivable File	Information Exchange	Receivable file that includes the sale of the investment asset for recording accounts receivable and recognizing revenue associated with that receivable.	
Receivable Information	Information Exchange	Receivable information extracted from a receivable record to determine requirements.	
Receivable Pro Forma Entries	Information Exchange	The debit and credit affects of receivable pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Receivable Schedule	Information Exchange	The receivable schedule represents the payment schedule agreed to by the customer.	
Receiving Report Information	Information Exchange	Receiving Report Information includes a description of the goods or services, purchase authorization information, date of delivery or performance, date of acceptance, and appropriate signatures.	
Reclama	Information Exchange	A request to duly constituted authority to reconsider its decision or its proposed action. This information provides the components the opportunity to express their position in the budget decisions.	
Recognition Program Profile Information	Information Exchange	This includes the recognition information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, award type, unit identification code (UIC), and award start and stop date.	
Recognition Program Profile Update Information	Information Exchange	This includes updated recognition program information associated with a personnel/pay record. The information may include (but not be limited to) award type, unit identification code (UIC), and award start and stop date.	
Recommendation on Export Request	Information Exchange	This is the recommendation to Department of Commerce or the Department of State regarding the request for the export of DoD technology.	
Recommended Acquisition Program Baseline	Information Exchange	This is the submission of recommended key cost, schedule, performance parameters, and other cost constraints, objectives, or thresholds for program milestones for approval by the Milestone Decision Authority.	
Reconciliation Results	Information Exchange	An internal documentation of the reconciliation procedures performed, adjustments required, and resulting conclusions. This is prepared and signed by the party responsible for the performance of the reconciliation.	
Recovered Property Information	Information Exchange	This is information on property that has been recovered during a disposal action (e.g., demolition). This may include disposition of recovered real property installed equipment such as a Heating, Ventilation, and Air Conditioning (HVAC) system.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Recoveries from Unobligated Balance	Information Exchange	Broad responsibility by Congress that Government agencies have the power to spend federal funds recovered from prior year obligations, both expired and unexpired. Congress can specify availability and criteria for spending these funds. Recoveries from unobligated balances includes the both actual and anticipated funds, regardless of whether expired and unexpired at the time of recovery.	
Recruitment Mitigation Plan	Information Exchange	This includes a mitigation plan for an applicant that failed any part of the recruiting or accession process. This information may include (but not be limited to) name, goals to be completed, and dates of goal completion.	
Recruitment Profile Information	Information Exchange	This includes recruitment information that is associated with a personal/pay record. This may include (but not be limited to) personnel information on a recruit, information related to recruitment interview, eligibility information and waivers associated with the recruit.	
Recruitment Profile Update Information	Information Exchange	This includes updated recruitment information that is associated with a personal/pay record. This may include (but not be limited to) personnel information on a recruit, information related to recruitment interview, eligibility information and waivers associated with the recruit, accessions processing scheduling results, and information associated with the signed enlistment agreement (DD Form 4).	
Reduction in Force Information	Information Exchange	This includes information that states that the military force must be reduced by a certain amount or percentage. This information includes what criteria to select personnel for separation or transfer to reserve status. This information also includes what military components must reduce their force and how quickly the reduction must occur.	
Reduction of Budget Authority	Information Exchange	The approved reduction of budget authority based on congressional enactment on the proposed cancellation of budgetary resources.	
Referred Debt Cross Servicing	Information Exchange	This is the referral of debts to external sources for collection action. This includes referral of uncollected debts to Department of the Treasury Cross Servicing.	
Referred Debt TOP	Information Exchange	This is the referral of debts to external sources for collection action. This includes referral of uncollected debts to Department of the Treasury Offset Program.	
Refined Requirement	Information Exchange	Acquisition requirements that have been combined together and/or further decomposed based on enterprise level analysis.	
Regulatory Requirements Documents	Information Exchange	Contains documents such as NEPA, CERCLA, EIS, Licenses, and Permits.	
Reimbursable Bill	Information Exchange	The reimbursable bill is a request for payment for specific goods or services provided within the terms and conditions of the contract.	
Rejected Intragovernmental Order	Information Exchange	A draft intragovernmental order that has been rejected by the government supplier and must be further reviewed and revised by the government buyer and supplier.	
Rejected Payment Request	Information Exchange	This information reflects a payment request that has failed one or more aspects of the matching process. The rejected payment request is sent back to the originating source for correction and resubmission.	
Rejected Purchase Request	Information Exchange	Document which has been reviewed by the procurement organization and found to not adequately describe the required supplies or services for a procurement to be initiated.	
Rejection of Goods or Services Notification	Information Exchange	Notification that goods or services have not been accepted.	
Release Order Signal	Information Exchange	An order issued by a logistics manager to a storage activity within the same supply distribution network to release and ship materiel, or to a transportation manager to move forces (i.e., personnel and materiel).	
Remittance Information	Information Exchange	This is information associated with remittance forwarded to the disbursing activity and may include copies of IPAC listings, checks, coupons, food stamp vouchers, WIC vouchers and various forms of correspondence.	
Renewable Energy Potential Mission Impact Information	Information Exchange	Information about impacts to installation mission requirements that may result from implementing a given renewable energy project.	
Renewable Energy Potential Mission Impact Information Request	Information Exchange	A request for information about impacts to installation mission requirements that may result from implementing a given renewable energy project.	
Renewable Energy Production and Purchase Information	Information Exchange	Information about the energy reporting category, renewable energy reporting, and renewable energy related goals that are required to manage renewable energy production and purchase.	
Renewable Energy Production and Purchase Management Information	Information Exchange	Information generated for program management of renewable energy production and purchase.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Renewable Energy Project Approval Document	Information Exchange	Documentation of the authorization to, and the requirements (scope and desired outcomes) for, implementing a renewable energy project.	
Renewable Energy Project Execution Information	Information Exchange	Information needed to enter a contract to execute a renewable energy project.	
Replacement Financial Instrument Request	Information Exchange	This is the request for the issuance of a replacement check due to the original check being lost, stolen, mutilated or not received by the payee. This request will be processed by the disbursing activity resulting in the generation of a stop pay request to the Department of Treasury.	
Replenishment Stock Request	Information Exchange	Demand that is generated at that point at which a stock replenishment requisition shall be submitted to maintain the predetermined or calculated stockage objective. For demand-based computations, the reorder point equals the sum of the safety level of supply, the level for ordering and shipping time, repair-cycle level (for reparable items), and authorized additive levels.	
Report of Programs	Information Exchange	The Report of Programs provides programs performance and cost information. The report of program breaks out of programs by appropriation groupings with performance measures based on the Department's missions and outputs.	
Reprogramming Action	Information Exchange	Realignment of budget authority from the purpose for which it was originally appropriated to finance another (usually emergent, unfunded) requirement. A necessary, desirable, and timely device during execution of Defense programs for achieving flexibility in the use of DoD funds provided in appropriation acts.	
Reprogramming Package	Information Exchange	Describes the Agency's requests and justifications to move funds among programs and may include more than one reprogramming.	
Reprogramming Request	Information Exchange	Reprogramming request sent to OMB to realign funds from one program to another.	
Reprogramming Request Response	Information Exchange	This is OMB's response on the department's reprogramming request.	
Reprogramming Requirement	Information Exchange	Reprogramming requirement to justify request for reprogramming actions.	
Request Approval from Accounting Control Board	Information Exchange	Interpreted general ledger structure change proposal is submitted to control board for approval or disapproval. Develop finalized cost assessment, impact statements and pros and or cons of making changes.	
Request Approved by Accounting Control Board	Information Exchange	As a result of the Cost And Revenue Performance Management domain identifying and approving a legitimate departure from organizational standards, this message communicates the Accounting Control Board's approval of the departure from organizational standards.	
Request Cancellation	Information Exchange	Notification provided to the customer that the cost performance manager is currently unable to satisfy the requirements outlined in the customer's Cost Information Request.	
Request Clarification of Anomaly	Information Exchange	This is a request to a data owner to clarify an anomaly that has been identified. An anomaly is defined by a deviation or departure from the normal or common order, form, or rule.	
Request for Acquisition Information for Congressional and Federal Inquiry	Information Exchange	This is the request for acquisition information required to respond to inquiries from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Request for Additional Continuing Resolution Amount	Information Exchange	A request for additional continuing resolution act amount sent to OMB for review and comment.	
Request for Additional Supporting Collection Information	Information Exchange	Formal request for additional information needed to identify proper account to post previously unidentified collections.	
Request for Administrative Offset	Information Exchange	This includes information for an administrative offset against amounts payable to indebted parties. This would be a salary offset for employees or an administrative payable offset for vendors.	
Request for Billing	Information Exchange	Request from accounts receivable to generate billing outlying the type of billing required (i.e., Interfund, Interagency Payment and Collection, etc.).	
Request for Corrective Action	Information Exchange	Request to DoD's functional area for recording correcting business event identified during initial Trial Balance analysis.	
Request for Disposition	Information Exchange	This is an inquiry into the terms and conditions of the contract and a request to receive weapons systems lifecycle guidance to determine if returns or disposals are warranted and to receive final settlement instructions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Request for DoD Technology Export	Information Exchange	This is a U.S. industry request from the Department of Commerce or the Department of State for threat evaluation and recommendation regarding the export of DoD technology.	
Request for Increased Reimbursable Authority	Information Exchange	A request for an increase of budgetary reimbursable authority to allow the government supplier to enter an intragovernmental transaction.	
Request for Narrative and Footnote Information	Information Exchange	Requests for information required for narrative disclosures that is not captured in the SGL or in the SFIS.	
Request for Non DoD or Operational Threat Assessment	Information Exchange	This is a request for threat assessment considerations and information from Federal Agency, Joint Warfighter or scientific community.	
Request for Non DoD Threat Assessment Information	Information Exchange	This is a request for threat assessment considerations and information from Federal Agency or scientific community.	
Request for Proposal	Information Exchange	A request for a legal offer from the supplier to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided.	
Request for Refund	Information Exchange	Request for a refund payment to DoD due to overpayment or erroneous payment.	
Request for Supplemental Industry Information	Information Exchange	This is a request for additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Request for Supplier Inventory Availability	Information Exchange	Request for information on those stocks or items on hand in the supplier's inventory used to fulfill the mission or requirement.	
Request to Cancel Case Implemented in Foreign Military Sales Trust Fund	Information Exchange	A request from either the purchaser or USG to cancel a case implemented in Foreign Military Sales Trust Fund.	
Request to Sell Investment	Information Exchange	Request sent from the Department to the U.S. Treasury initiating the sale of a Department owned Treasury security.	
Required Accounts Payable Adjustments	Information Exchange	Document received (i.e., change order) requiring adjustment to original order or payable.	
Required Eliminations	Information Exchange	Identified balances that result from intra-agency transactions that should be eliminated during the financial statement consolidation process.	
Required Inspections and Verifications	Information Exchange	Contains information about real property assets that will be inspected and verified.	
Requirement Change from Sourcing	Information Exchange	The Identification of a requirement change from sourcing analysis.	
Rescinded Amount	Information Exchange	The amount of funds that are to be reduced from the budget authority due to an enacted rescission.	
Rescission Information	Information Exchange	This is a rescission enacted by Congress. This rescission will affect the baseline for reprogramming.	
Rescission Language	Information Exchange	The language used to complete the rescission report such as OMB identification code, agency and rescission proposal number.	
Rescission Proposal	Information Exchange	Proposal for rescission of appropriated budgetary resources to be withheld from availability.	
Rescission Report	Information Exchange	A rescission report to be submitted to OMB for inclusion on the President's special message to Congress regarding proposed rescission.	
Rescission, Cancellation and Deferral Pro Forma Entry	Information Exchange	The debit and credit affects of rescission, cancellation and deferral pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Research Information	Information Exchange	This is information resulting from internal DoD research for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services or identified as a result of an internal study. Examples of research include medical or human resources studies. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Research Information External	Information Exchange	This is information from external sources for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Response to Congressional and Federal Inquiry	Information Exchange	This is the response to a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Responsive Proposal	Information Exchange	A timely, responsive proposal from an offeror as defined in Federal Acquisition Regulation (FAR).	
Retirement Appeal Request	Information Exchange	This includes a request to appeal the retirement action decision. This information may include (but not be limited to) retirement date and retirement status.	
Retirement Checklist Action Completion Information	Information Exchange	This includes all necessary information related to the completion of a required action outside the boundaries of retirement activities (e.g., logistics asset management, resolution of MWR debts) in order to successfully complete a retirement. This may include (but not be limited to) action completion date, appropriate dispositions related to the action, or any additional activities and tasks to be completed by the Member.	
Retirement Checklist Action Requirement	Information Exchange	This includes all necessary information related to a requirement for a Member to perform activities outside the boundaries of retirement activities (e.g., logistics) in order to successfully complete a retirement. This may include (but not be limited to) retirement date, transition assistance eligibility, and a retirement medical review requirement.	
Retirement Draft Order	Information Exchange	This includes information pertaining to a draft retirement order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Retirement Eligibility Concurrence	Information Exchange	This includes the retirement request information along with the retirement eligibility information and any other recommendations and endorsements pertaining to it.	
Retirement Eligibility Nonconcurrence	Information Exchange	This includes the retirement request information along with the retirement ineligible information along with reasons for denial.	
Retirement Final Clearance Notification	Information Exchange	This includes all information necessary to convey the final clearance of a retiring Member. This may include (but not be limited to) final retirement date and a Member's current duty station.	
Retirement Final Order	Information Exchange	This includes the information needed to document an approved order for a retirement personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Retirement Inquiry	Information Exchange	This includes the Member's documented inquiry indicating his or her intention of possible retirement in the near future. This inquiry initiates the evaluation of their retirement eligibility as well as modeling of various retirement scenarios (e.g., retirement pay or grade depending on retirement date).	
Retirement Inquiry Response	Information Exchange	This includes the response to the Member's inquiry into their retirement status. This response can answer the questions about the various retirement scenarios, and recommends whether or not to proceed with the retirement process.	
Retirement Order Acknowledgement	Information Exchange	This includes information necessary to acknowledge the receipt of a retirement order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Retirement Profile Information	Information Exchange	This includes retirement information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, Service obligation, current Service and component, retirement points information, and Members who have been identified as mandatory retirement candidates.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Retirement Profile Update Information	Information Exchange	This includes updated retirement information associated with a personnel/pay record. The information may include (but not be limited to) retirement status, retirement points information, eligibility status, retirement date.	
Retirement Request	Information Exchange	This includes the request information related to a retirement. The information on the retirement request may include (but not be limited to) Member name, current Service or component, proof of eligibility for retirement, waiver request information, and the physical evaluation severity rating disposition for Members on the Temporary Duty Retirement List (TDRL) and Permanent Duty Retirement List (PDRL).	
Return Delivery Order	Information Exchange	Information concerning an authorized return to be used in coordinating delivery activity to include location, condition, required delivery date, destination, and special handling requirements.	
Return Information	Information Exchange	This documents the information on materiel which has been authorized for return. It includes item information, quantity, transportation information, condition, and shipment and arrival dates.	
Return Inventory Availability Information	Information Exchange	This is information regarding DoD materiel authorized for return and available for reuse, resale, or redistribution.	
Return of Unauthorized Absence Notification	Information Exchange	This includes a notification that a Member who was absent without authorization has been returned. This may include (but not be limited to) a notification of Return to Military Control (DD Form 553 "Report of Return of Absentee), or a summary of the facts leading the finding of an unauthorized absent Member.	
Return or Disposal Authorization	Information Exchange	A validated and approved return or disposal product authorization. Includes pertinent information necessary to execute the return or disposal (e.g. product location and ship to address).	
Return or Disposal Authorization Request	Information Exchange	A request for return or disposal product authorization.	
Return Plan	Information Exchange	Courses of action over specified time periods that represent the projected appropriation of required return resources and or assets to meet the return process requirements.	
Returned Payment	Information Exchange	This is information associated with a payment which has been returned. For check payments this could be due to improper mailing address information or perhaps a deceased payee. For Electronic Fund Transfer (EFT) payments this could be due to improper American Bankers Association (ABA) routing number, improper account number or the payment being rejected by the recipient.	
Returned Payment for Re-Disbursement	Information Exchange	A payment that has been returned due to incorrect disbursing information. After correction, the payment will be sent to disbursing.	
Returned Payment for Rescheduling	Information Exchange	A payment that has been returned due to being rejected by the payee or an incorrect entitlement calculation.	
Returned Payment Notice	Information Exchange	This is a notification that a previously issued payment has been returned and the reason(s) why. The payment was returned for at least one of the following reasons: invalid account number, invalid routing transcript number, account closed, or rejected by payee.	
Revenue Data	Information Exchange	Revenue data includes gain on sale of asset, unearned revenue from collect, advance from a non-Department of Defense buyer, and net change in inventory.	
Revised Draft Agreement	Information Exchange	An agreement that has been revised by the government supplier and is ready to be signed by the appropriate contracting officer.	
Reward or Reimbursement Eligibility Notification	Information Exchange	This includes the notification of the eligibility of persons or agencies for a reward or reimbursement for apprehending, detaining, or delivering absentees, or escaped military prisoners to military control.	
Route Information	Information Exchange	Data concerning transportation networks for applicable modes of shipment including roads, sea lanes, rail. Includes nodal information such as availability and throughput.	
Sales Reimbursement Information	Information Exchange	This is reimbursement information from the sale of goods or services (e.g., commissary receipts, training).	
Schedule Information	Information Exchange	This is a sequential series of activities with milestones to be accomplished related to the development, production, testing and deployment of a system(s). This includes Acquisition Program Baseline Information.	
Scheduled Disposal Information	Information Exchange	Information on the planned or scheduled disposal of property or material deemed excess or defective.	
Scheduled Payment	Information Exchange	A payment to vendor that has been scheduled within the constraints of the Prompt Payment Act.	
Scheduled Payment for Disbursement	Information Exchange	A payment to a vendor that has reached its scheduled payment date.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Search and Rescue Assistance Notification	Information Exchange	This includes a notification to a law enforcement agency, military force, or search and rescue agency for assistance in finding or rescuing a Member (e.g., a lost hiker or mountain climber). This also includes attempts to establish liaisons in order to find or rescue these personnel more effectively.	
SECDEF Budget Decision	Information Exchange	The SECDEF will make his decision on the issues identified during the OMB/OSD budget hearing review. This decision will be incorporated in the Program Budget Decision.	
SECDEF Joint Programming Guidance Decision	Information Exchange	The SECDEF's review and approval of the Joint Programming Guidance.	
Selected Acquisition Reporting Information	Information Exchange	This is a standard, comprehensive, summary status information of a Major Defense Acquisition Program (MDAP) (Acquisition Category (ACAT) I) required for periodic submission to Congress. Includes key cost, schedule, and technical information.	
Selected ESOH Solution	Information Exchange	This is the solution that has been evaluated and has been determined as a course of action to pursue by the ESOH professional.	
Seller Cost Model	Information Exchange	A model that supports the agreed-upon methodology to be used by the seller to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Senate Appropriation Committee Report	Information Exchange	The U.S. Senate Committee on Appropriations is a standing committee of the United States Senate. It has jurisdiction over all discretionary spending legislation in the Senate. The Senate Appropriations Committee is the largest committee in the U.S. Senate, consisting of 28 members. Its role is defined by the U.S. Constitution, which requires "appropriations made by law" prior to the expenditure of any money from the Treasury, and is therefore one of the most powerful committees in the Senate.	
Senior Rater Profile	Information Exchange	This includes the evaluation history of the Senior Rater. This may include (but not be limited to) individuals rated, position, and evaluation scores.	
Separated or Terminated or Transferred Individual Debt Information	Information Exchange	This is information required to support a DoD Human Resources collection action on a delinquent person whose affiliation has been separated or terminated from Department of Defense or transferred to another federal entity. This information regards a dollar amount owed to the Department of Defense (e.g., this occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid, or has any other outstanding debt).	
Separation Appeal Request	Information Exchange	This includes a request to appeal the separation action decision. The information may include (but not be limited to) appeal date, appeal status, and appeal justification.	
Separation Checklist Action Completion Information	Information Exchange	This includes all information related to the completion of a required action outside the boundaries of separation activities (e.g., logistics asset management, resolution of morale, welfare, and recreation (MWR) debts) in order to successfully complete a separation. This may include (but not be limited to) action completion date, appropriate dispositions related to the action, and any additional activities and tasks to be completed by the Member.	
Separation Checklist Action Requirement	Information Exchange	This includes all information related to a requirement for an activity outside the boundaries of separation activities (e.g., logistics) to be performed in order to successfully complete a separation. This may include (but not be limited to) separation date, transition assistance eligibility, and a separation medical review requirement.	
Separation Documentation	Information Exchange	This includes the official documents that record and report the separation of military personnel from the Service. This may include (but not be limited to) information pertaining to the certificate of release from active duty.	
Separation Draft Order	Information Exchange	This includes information pertaining to a draft separation order based on order requirements. The information may include (but not be limited to) draft order date, order effective date, order type, and order action. The information contained in this ICOM will be the basis for a financial commitment of funds in the Financial Visibility Business Area.	
Separation Final Clearance Notification	Information Exchange	This includes all information necessary to convey the final clearance of a separating Member from a duty station. This may include (but not be limited to) final clearance date and a Member's current duty station.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Separation Final Order	Information Exchange	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area. The information may also contain personnel requisition details that will be used to update or modify the Manage Personnel Distribution.	
Separation Order Acknowledgement	Information Exchange	This includes information necessary to acknowledge a separation order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Separation Order Requirement	Information Exchange	This includes information related to an official requirement to generate a separation order. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Separation Profile Information	Information Exchange	This includes separation information associated with a personnel/pay record. This may include (but not be limited to) personnel restriction information, administrative action reason information, Member name, promotion history information, enlisted agreement or officer obligation, adverse action information, separation reason, transfer information, and Member current Service and component.	
Separation Profile Update Information	Information Exchange	This includes updated separation information associated with a personnel/pay record. This may include (but not be limited to) Member name, character of service, Member contract, separation reason, any changes to the Member's Service obligation, and Member current Service and component.	
Service Medical Decision Information	Information Exchange	This includes information pertaining to the decision of the Services to accept or not accept a medical disqualifying condition, or if the Services is requesting additional medical information. This information may include (but not be limited to) applicant name, decision date, and decision results. This information may also include waiver information and a request for additional information.	
Service Procurement Request	Information Exchange	A document which describes the required services so that a procurement or a request for quote can be initiated.	
Shipping Documentation	Information Exchange	Documents which facilitate the delivery process and accompany a shipment as it moves through the delivery process.	
Shipping Status	Information Exchange	Advanced notification regarding shipments from a distribution location or storage activity (i.e., advance shipping notice).	
Signed Intragovernmental Agreement	Information Exchange	An agreement signed by the Government buyer that has not yet been accepted by the Government supplier. An agreement is a written instrument of understanding following negotiations between an agency buyer and agency supplier, where terms have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains terms and clauses applying to future orders between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future orders will incorporate by reference or attachment the required and applicable clauses in the agreement. An agreement is not a contract or order.	
Software Resources Data Report Information	Information Exchange	Information pertaining to development and upgrade of software whether performed under a commercial contract or internally by the government, obtained via the Software Resources Data Report.	
Solicitation Quote	Information Exchange	A quote from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost and within a specified schedule based on appropriate funding limitations. It may include proposed contract terms and conditions under which the goods or services will be provided.	
Solution Development Cost Information	Information Exchange	Details about the estimated work that will be performed during the development of an ESOH solution. This information supports estimates of environmental liability and is updated on a periodic basis to reflect changes in the cost of developing a solution.	
Source Product Hazard Data Submission	Information Exchange	The product hazard data (PHD) that has been received from an external non-DoD source (eg. manufacturer, supplier, vendor) and is submitted for validation and subsequent entry into the master product hazard data (MPHD) warehouse as a result of PHD made available by a PHD source.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Source Selection Documentation	Information Exchange	Source Selection Documentation may include the following: Proposed Agreement, Source Selection Decision Document, Proposal Analysis Report (PAR), Responsibility Determination, Price Negotiation Memorandum, Draft Sourcing Vehicle(s), Trade-Off Analyses, Briefings for Source Selection Authority, Briefings for Approval Authorities, etc.	
Sourcing Planning Information Request	Information Exchange	A sources sought synopsis for market research purposes only containing the buyer's planning requirements and needs. This does not reflect a commitment by the buyer to issue a request for proposal, award a contract or otherwise pay for the information provided in response to the synopsis.	
Sourcing Planning Information Response	Information Exchange	Information provided by suppliers in response to Sourcing Planning Information Request (RFI) made by the DoD buyer for planning requirements or needs, including pricing, quantity, schedule and performance information.	
Spend Information	Information Exchange	Historical spend information of DoD past purchases. Spend information includes post-award data used to identify strategic sourcing opportunities. For example, total obligated amount per fiscal year, socio-economic information, supplier concentration.	
Spend Reports	Information Exchange	Report that analyzes aggregated enterprise spend information to support development of enterprise sourcing plans. The intent being to gather past spend data to better leverage DoD economies of scale for sourcing.	
Spending Authority from Offsetting Collections	Information Exchange	Broad responsibility by Congress that Government agencies have the power to spend federal funds received through offsetting collections. Congress can specify availability and criteria for spending these funds. Spending authority from offsetting collections includes earned collections and earned receivables from Federal sources, changes in unfilled customer orders, anticipated authority without an advance, and transfers from non-FMS trust funds and special funds.	
Stakeholder Input	Information Exchange	This is input from groups such as a community advisory board, external stakeholders or other public groups as mandated by regulation.	
Standard Chart of Accounts	Information Exchange	The United States standard general ledger chart of accounts provides control over all financial transactions and resources balances, satisfies basic reporting requirements of Office of Management and Budget and United States Treasury Department, and integrates proprietary and budgetary accounting.	
Standard Financial Information Structure	Information Exchange	The Standard Financial Information Structure (SFIS) is the DoD's common business language that provides the ability to collect and summarize information along several dimensions to include Appropriation Account, Budget Program, Organization, Trading Partner, Transaction and Cost Accounting information. SFIS aligns and extends the Office of Management and Budget (OMB) Common Government-wide Accounting Code (CGAC). This information is used to support financial, cost, and managerial reporting requirements as well as provide insight into the strategic decision-making process at multiple levels in the government.	
Statement of Accountability	Information Exchange	Monthly report submitted from federal agency that outlines changes to the fund balance with Treasury should balance with FBWT.	
Statement of Difference	Information Exchange	Statement of Difference provides the discrepancies between disbursements and deposits generated by the Treasury. Differences resulting from deposits indicate there is a discrepancy between the monthly totals submitted through the banking system and the totals provided by the Department of Defense. Differences resulting from disbursement transactions reveal discrepancies between monthly totals reported by the Regional Financial Center and/or through On-line Payment and Collection System between the Department of Defense and other agencies disbursement transactions and/or report.	
Statistical Reporting Delivery Information	Information Exchange	Quantifiable on-time delivery performance data on contracts or orders valued at less than one million dollars. This data is used to classify each supplier's performance by Federal Supply Code (FSC).	
Statistical Reporting Quality Information	Information Exchange	Quantifiable quality performance data on contracts or orders, at the line item level, valued at less than one million dollars. This data is used to classify each supplier's performance by Federal Supply Code (FSC).	
Stop Loss Criteria	Information Exchange	This includes the criteria that specify which personnel need to be retained. This criteria may include (but not be limited to) military occupational specialty (MOS) and period of retention.	
Stop Loss Notification	Information Exchange	This includes information from the Service Headquarters identifying Members for involuntary retention based on Service specific criteria. The information may include (but not be limited to) notification recipient, notification date, and notification type.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Stop Payment Confirmation	Information Exchange	Confirmation received from DoD/Treasury confirming stop payment.	
Stop Payment Notification	Information Exchange	This is a message from the US Treasury confirming that a stop payment has occurred.	
Stop Payment Request	Information Exchange	This is the request for stop payment issued to the Department of Treasury associated with a check payment previously issued by the disbursing activity.	
Strategic Objectives	Information Exchange	Guidance from leadership that provides vision, goals, priorities, and desired performance outcomes for specified mission requirements.	
Strategic Planning Guidance	Information Exchange	Strategic Planning Guidance (SPG) is a single fiscally-informed document that replaced the policy/strategy sections of the Defense Planning Guidance. The draft is issued early in the Planning process to provide overall policy and strategy guidance to be used in developing the defense program. SPG provides DoD Components with direction on defense policy, strategy, force and resource planning, and fiscal matters for use in developing their Program Objective Memorandum (POM).	
Strength Authorization Information	Information Exchange	This is the specification of military manpower strength ceilings, within a specified fiscal year, authorized by Congress for each of the armed forces. This includes, but is not limited to, service end strength; specified limitations on the number of members of a reserve component permitted to be on active duty; and Dual Status Military Technician end strength for each reserve component of the Army and Air Force.	
Strength Planning Information	Information Exchange	This contains personnel resource estimates and requirements, including detailed strength planning with impacts within force restructuring programs (e.g., Stop Loss, mandated retraining, Reduction-in-Force).	
Student Admission Enrollment Request	Information Exchange	This includes information associated with requesting student admission into a Department of Defense (DoD) education program. This information may include (but not be limited to) student application paperwork, eligibility requirements met (if necessary), and signatures authorizing education request. This information also includes admission requests to external educational opportunities (e.g., college, law school, graduate school).	
Student Course Evaluation	Information Exchange	This includes information associated with the evaluation of Department of Defense (DoD) individual training courses and education programs. This information may include (but not be limited to) details of the feedback (course is sufficient, course has deficiencies, and proposals to make the course better) given by the student of that particular course. This information will be used to evaluate perceived deficiencies of, or a proposal for a modification to, a specific individual training and education program.	
Student Education Grade	Information Exchange	This includes information associated with the grading and evaluation of a student's performance in a Department of Defense (DoD) education program. This information may include (but not be limited to) an assessment of student performance in education courses against published objectives and other criteria, and recording of the same according to personnel performance.	
Student Enrollment Information	Information Exchange	This includes information associated with the enrollment information of students accepted to Department of Defense (DoD) individual training courses and/or education programs. This information may include (but not be limited to) student applications, acceptance or non-selection notifications, and signatures authorizing enrollment. This information also includes information for enrollment into external educational opportunities (e.g., college, law school, graduate school).	
Student Individual Training Course Grade	Information Exchange	This includes information associated with the grading and evaluation of a student's performance in a Department of Defense (DoD) individual training course. This information may include (but not be limited to) an assessment of student performance in individual training course against published objectives and other criteria, and recording of the same according to personnel performance.	
Subcontracting Report	Information Exchange	Documentation of contractors' subcontracting plans that includes the dollars awarded to the following classifications of businesses: Small, Small Disadvantaged, Small HUBZone, Women-Owned Small Businesses, Historically Black Colleges and Minority Institutions, Veteran-Owned Small Businesses, Service Disabled Veteran-Owned Small Businesses (Standard Form 295 Only).	
Subsidy Liability Information	Information Exchange	Information about the subsidy liability.	
Summarized Balance of Accounts for Procurement	Information Exchange	This information is created from all transactions in the monitor payment portion of the Entitlement process and provides a summarized balance of accounts needed for administering the procurement instrument.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Supplemental Absence Information	Information Exchange	This includes supplemental information concerning a Member who is absent. This may be a response to a request for more information. This may include, but not be limited to, additional information about the duration and nature of the absence, the Member's intent, and any information concerning the current whereabouts of the Member. This may also include a report of the facts concerning personnel who cannot be located or who have been located but cannot be apprehended due to political or other reasons.	
Supplemental Appropriation Act	Information Exchange	An emergency adjustment to the current year appropriation act; usually for national defense contingencies and natural disaster emergencies.	
Supplemental Industry Information	Information Exchange	This is the submission of additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Supplemental Information Request	Information Exchange	This is the request for additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplemental Information Response	Information Exchange	This is the submission of additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplier Advance Ship Notice Information	Information Exchange	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity directly from the supplier. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail, including actual departure date/time, and provides an ordered flexibility to convey information.	
Supplier Coordination Information	Information Exchange	Includes supplier's business partner network (BPN) identifier (if not previously provided), available and projected inventory levels, pricing information (includes surcharge), delivery availability, timing, projected capacity, and statutory authority, if any.	
Supplier Information	Information Exchange	The collection of supplier information required to manage the supplier relationship and determine if a supplier is authorized to do business with the DoD. This includes, but is not limited to, general registration information, socio-economic information, and representations and certifications.	
Supplier Inventory Information	Information Exchange	Those stocks or items on hand in the suppliers' inventory used to fulfill the mission or requirement.	
Supplier Planning Information	Information Exchange	Planning data provided by the Supplier in response to Buyer Planning Information sent to the Supplier. It is used to support the development or refinement of a sourcing plan. This includes information on requirements, performance specifications, pricing, and quantities and is more detailed than general market research and could be proprietary.	
Supplier Product Hazard Information	Information Exchange	This is the product hazard or material safety information provided by the supplier or manufacturer of a product; such as information that may be provided on a Material Safety Data Sheet (MSDS) or in Nuclear Regulatory Commission permit information.	
Supplier Response	Information Exchange	Supplier comments on the draft contract or agreement provided to the supplier during coordination to reach further clarifications and/or exchange information additional required prior to awarding the contract or agreement.	
Supply Plan	Information Exchange	A plan for a course of action over specified time periods that involves a projected appropriation of resources to meet product or supply requirements.	
Supply Request	Information Exchange	A request for supply support from any Component distribution system and from the GSA for requisitioning, issuing, lateral redistribution, and returning of DoD materiel.	
Sustainment Work Order Information	Information Exchange	This is information regarding the specific task list and scheduled completion time to sustain real property. This information could include Asset ID, Work Order ID, Work Order Description, Work Order Type, Work Order Diagnosis Type, Work Order Symptom Type, and Work Order Root Cause Type.	
Tabled Requirements Notification	Information Exchange	Notification sent to the customer that the proposal for the new requirements has been set aside due to questions and or concerns and needs to be re-examined.	
Tax Reports	Information Exchange	The purpose of tax reports is to provide for tax deduction reporting, reconciling, and correction processing for each taxing authority.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Technical Programming Guidance	Information Exchange	Technical Programming guidance is the program review instructions issued by OSD to supplement the JPG for the development of the Military Services and Defense Agencies POM. This guidance includes administrative instructions in submitting program data that will be included in the component's POM submission.	
Technical Surveillance for Service Information	Information Exchange	Report of the technical performance of the contractor in performing a service.	
Testimonial Document	Information Exchange	This is in response to Congress's request to have Components provide Testimony on their portion of the proposed budgets submission. The testimony is coordinated with OSD Comptroller prior to submitting the Component's Testimony to Congress.	
Time and Attendance Information	Information Exchange	This is a person's number of hours worked, attendance, and leave information for a specific pay cycle.	
Time and Materiel Surveillance Information	Information Exchange	Report of contractor performance on a time a material contract.	
Time, Absence, and Labor Notification	Information Exchange	This includes notifications that it is time to either document or certify Time, Absence, and Labor information, or that documented Time, Absence, and Labor information is invalid and requires adjustment, or if the Time, Absence, and Labor information has been approved and certified.	
Time, Absence, and Labor Profile Information	Information Exchange	This includes the time, absence, and labor information (e.g., labor information, approved leave information, time worked information) that is associated with a personnel/pay and labor record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, leave balance, leave earned type, retirement points information, labor code, time worked amount, absence time amount, absence date and time, duty status, and information concerning personnel who are absent without authorization.	
Time, Absence, and Labor Profile Update Information	Information Exchange	This includes the updated time, absence, and labor information (e.g., labor information, approved leave information, time worked information) that is associated with a personnel/pay and labor record. The information may include (but not be limited to) leave balance, leave earned type, retirement points information, labor code, time worked amount, absence time amount, absence date and time, duty status and information concerning personnel who are absent without authorization.	
Training Certifications	Information Exchange	Contains documentation attesting to successful completion of training.	
Transaction Confirmation	Information Exchange	Treasury confirmation of purchases, sales or redemption of Marketable, Non-marketable and Market Based securities held by Department of Defense components.	
Transfer Appeal Request	Information Exchange	This includes official documentation of a Member's justification as to why a denied transfer should be reconsidered. This may include (but not be limited to) appeal date, appeal reason, and justification documentation.	
Transfer Draft Order	Information Exchange	This includes information associated with the determination of the transfer order type and order action based on order requirements and associated transfer authorization information. The information may include (but not be limited to) order reason, order action, and order detail identifier.	
Transfer Eligibility Concurrence	Information Exchange	This includes an official determination that a Member is eligible for a transfer and that the affected Services or components concur with the transfer request. For approval to attend a commissioning program (i.e. a transfer between military personnel class), the transfer eligibility concurrence includes a determination that a Member meets minimum requirements to be considered for admission to a commissioning source or Warrant Officer program (e.g., 4 year college degree, time in service, time in grade). A transfer eligibility concurrence may also include (but not be limited to) Member information, date, and transfer type.	
Transfer Eligibility Nonconcurrence	Information Exchange	This includes an official determination that the affected Services or components deem the Member ineligible for a transfer. A transfer eligibility nonconcurrence may include (but not be limited to) Member information, date, transfer type, and reasons for ineligibility.	
Transfer Final Order	Information Exchange	This includes the information needed to document an approved order for a transfer. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Transfer of Government Property	Information Exchange	Notification that government property in the custody of a contractor has been transferred to the government, to another contractor location or to a new contract.	
Transfer Order Acknowledgement	Information Exchange	This includes information necessary to acknowledge a transfer order. The information may include (but not be limited to) individual notification, acknowledgement status, individual notification acknowledgement status date, and individual notification acknowledgement time limit.	
Transfer Order Requirement	Information Exchange	This includes information related to an official requirement to generate a transfer order. An official order requirement may include an action to modify (e.g., revoke, cancel) an existing order. Note: A commission program transfer order requirement may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
Transfer Package	Information Exchange	Coordinated package documenting DoD's transfer request approved by OMB. This package includes all the information specific to the request such as transfer justification, amount of budgetary resources, appropriations, and/or treasury accounts. This package is sent to Congress for congressional action.	
Transfer Profile Information	Information Exchange	This includes transfer information associated with a personnel/pay record. The information may include (but not be limited to) personnel restriction information, administrative action reason information, adverse action information, Member name, Member obligation, Member contract, Member current Service and component; as well as information from the Officer Agreement Profile Information, Separation Profile Information and Enlistment Agreement Profile Information.	
Transfer Profile Update Information	Information Exchange	This includes updated transfer information associated with a personnel/pay record. The information may include (but not be limited to) Member name, Member obligation, Member contract, and Member current Service and component.	
Transfer Request	Information Exchange	Transfer request submitted to OMB to move budget authority between statutory appropriations or treasury accounts.	
Transfer Request Response	Information Exchange	OMB's decision to DoD's transfer request to move budget authority between statutory appropriations or treasury accounts.	
Transfer Requirements	Information Exchange	This is an initial document that identifies specific requirements with rational/justification for requesting a transfer of budget authority; either by a Warfighter, OSD, Executive Branch, OMB or Congress. It is a proposal to reduce budgetary authority from one statutory appropriation and increase budget authority by the same amount in another statutory appropriation; or a transfer between two Treasury accounts.	
Transportation Information	Information Exchange	Information pertaining to the physical shipment or actual transportation movement that is used to facilitate the processing of materiel at the delivery location or the arrival of forces at their destination (e.g. shipping label, manifest, customs information, bill of lading, or Materiel Safety Data Sheet (MSDS) information).	
Transportation Procurement Request	Information Exchange	This is the logistics requirement needed to accomplish a transportation obligation for an organization/customer.	
Transportation Schedule	Information Exchange	A movement plan for specific cargo or passengers. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (e.g., origin, destination), mode, etc.	
Travel Debt Bill Information	Information Exchange	This includes information associated with the execution of a debt disposition directing a waiver, remittance, partial payment for a travel related debt. This information may include (but not be limited to) debt type, debt amount, effective date of indebtedness, amount of to be written off from the original indebtedness. This information is the basis for an action in the Financial Visibility business area.	
Travel Debt Disposition	Information Exchange	This is an overall flow of travel debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Travel Order Response	Information Exchange	This includes a response to the Invitational Travel Order Requirement. Information may include (but not be limited to) name(s) of traveler(s), and specific travel information (e.g., mode(s) of transportation and travel itineraries).	
Travel Requirement	Information Exchange	This requirement defines an organization's or person's need for travel, including movement of goods, using the travel card (where authorized). It may be an unfunded or funded requirement.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Travel Resource Information	Information Exchange	The information summary of the schedule, and related costs, for the travel modes and accommodations needed to accomplish travel. This information will support the evaluation of costs during the management of travel authorizations.	
Travel Resource Information Requirement	Information Exchange	This is the requirement for schedule and cost information for the travel modes and accommodations needed to accomplish travel. This information is needed to support the evaluation of costs during the management of travel authorizations.	
Travel Substantiation Information	Information Exchange	This is the auditable record of the details and related costs of a person's authorized travel.	
Treasury Certificate	Information Exchange	Certificate of ownership of Marketable, Non-marketable and Market Based securities held by DoD components	
Treasury Fund Balance	Information Exchange	The Fund Balance with Treasury (FBWT) is an asset account that reflects the available budget spending authority of federal agencies. Collections and disbursements by agencies will, correspondingly, increase or decrease the balance in the account. Agencies report changes to this account to the Financial Management Service (FMS), Department of Treasury through monthly reporting on Statements of Transactions (FMS 224, 1220, or SF 1221) and Statements of Accountability (FMS 1219 and SF 1218).	
Treasury Offset Request	Information Exchange	The Treasury Offset Program uses this process to match delinquent debtor files against payment files. When a match occurs, the payment is intercepted and the debt is offset up to the amount of the debt plus assessed administrative fees. Under the Treasury Offset Program, delinquent accounts are subject to administrative offset of United States Government funds due individuals from various sources such as Federal Income Tax refunds, federal salary offset, and payments from other Government agencies.	
Treasury Report on Receivables	Information Exchange	TROR provides public receivables and delinquencies information and statuses. This report is required by Treasury on a quarterly basis.	
Treasury Reports	Information Exchange	The purpose of Treasury reports is to supply data required by Treasury for member deductions, such as delinquent debts or Thrift Savings Plan deductions.	
Treasury Warrant	Information Exchange	The Treasury warrant is a financial control document, issued after enactment of the Appropriation Act by the Treasury Department. This document is the basis for reporting cash on the books authorized to be withdrawn from the central account maintained by the Treasury, essentially maintaining the bottom line for all appropriations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Trial Balance Data and Statement of Transactions	Information Exchange	The Trial Balance is the accumulation of all financial and accounting transactions captured in General Ledger Accounts that represent the financial position of the organization at any point in time, to include aging reports. This is the logical representation of the Trial Balance that is reviewed, certified and published. The Statement of Transactions is the central accounting document used to report monthly accounting activity to Treasury. This report provides Treasury with information on agency deposits and disbursements and captures data by appropriation, fund and receipt accounts.	
Unapportioned Funds	Information Exchange	These are the unapportioned funds that will be withdrawn based on congressional enactment of the proposed rescission.	
Unapproved Additional Temporary Requirement	Information Exchange	This is an Additional Temporary Requirement which has been denied after review of the requirements for additional authority request.	
Unapproved Deferred Funds	Information Exchange	These are the Unapproved Deferred funds based on congressional actions. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed deferrals, funds must be made available for obligation.	
Unapproved Draft Request for Proposal	Information Exchange	A rejected Request for Proposal that needs to be modified.	
Unapproved Proposal Notification	Information Exchange	Notification sent to internal customer when proposal has been not been approved.	
Unapproved Reprogramming Request	Information Exchange	This is an unapproved deferred fund based on congressional action.	
Unapproved Reprogramming Requirement	Information Exchange	This is an unapproved reprogramming requirement.	
Unapproved Rescinded Funds	Information Exchange	These are the unapproved rescinded funds based on congressional action. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed rescission, funds must be made available for obligation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Unapproved Transfer Request	Information Exchange	Notification to the component that OMB did not approve the request to move budgetary resources between statutory appropriations or treasury accounts.	
Unauthorized Absence Information Request	Information Exchange	This includes a request for information on unauthorized absences (e.g., from Congress, Department of Justice).	
Unauthorized Absence Report	Information Exchange	This includes summary information of Members who are or have been absent without leave as well as public deserter information intended to prevent future desertions. This may include (but not be limited to) the "Desertion and Unauthorized Absence (AWOL) Semi-Annual Service Report".	
Undisbursed Appropriation Account Ledger	Information Exchange	Financial Management Service (FMS) provides this document for expenditure accounts that have monthly activity. FMS provides information about the appropriation warrants issued, non-expenditure transfers, and transactions reported by agencies on the Statement of Transactions.	
Undisbursed Appropriation Account Trial Balance	Information Exchange	Financial Management Service (FMS) provides information about the appropriation warrants issued and non-expenditure transfers to prepare the trial balance at the end of the period. The trial balance details the ending balances from the undisbursed appropriation account ledgers. The trial balance is used to prepare statements for submittal to Treasury.	
Undistributed Appropriation Line Item Amount	Information Exchange	The line item amount of the appropriation which has been identified but not distributed.	
Unearned Revenue Accrued Liability	Information Exchange	The amount of revenue that has been received by DoD but has not been earned.	
Unique Item Information	Information Exchange	Information provided by the vendor, program manager, or item manager about an item which includes item description, Unique Item Identifier (UII), original acquisition cost, and embedded item information. It is used to enable asset management, accountability, and valuation either as an update to the asset record or the creation of the initial asset record, based on receipt or a conditional update of the item.	
Unit Cost Lookup Service Request	Information Exchange	Request information to the Unit Cost Lookup Service.	
Unit Cost Lookup Service Information	Information Exchange	Nunn-McCurdy Unit Cost Information.	
Unit Cost Reporting Information	Information Exchange	This covers both Program Acquisition Unit Cost and Procurement Unit Cost information for use as a metric that is related to the cost associated with a single unit of the product to include direct costs, indirect costs, traced costs and allocated costs. Program Acquisition Unit Cost with respect to a major defense acquisition program, means the amount equal to the total cost for development and procurement of, and system specific military construction for, the acquisition program, divided by the number of fully-configured end items to be produced for the acquisition program. Procurement Unit Cost, with respect to a major defense acquisition program, means the amount equal to the total of all funds programmed to be available for obligation for procurement for the program, divided by the number of fully-configured end items to be procured.	
Unsolicited Product Information	Information Exchange	Product information received from an external non-DoD source (eg. manufacturer, supplier, vendor) pertaining to a product that contains hazardous material. The product information has not been requested by the DoD.	
Update Asset Record Energy Information	Information Exchange	Facility energy performance information that updates asset records.	
Update Asset Valuation Information	Information Exchange	Information that establishes the updates to asset recorded costs.	
Updated Asset Valuation Information	Information Exchange	This is the information that establishes the updates to asset recorded costs.	
Updated Detail Justification Material	Information Exchange	Updated President's budget numbers in line item detail, both at direct and reimbursable level. These materials also include the update or adjustments or new justification materials to support DoD's budget submissions. It should include program performance indicators and goals, any proposed policies and strategies along with the amount of mandatory and discretionary spending. The justification should include personnel requirements, its relationship to the President Management Agenda, and additional funding needs in excess of the budget.	
Updated Geospatial Features	Information Exchange	Geospatial information that has been updated as a result of an external or internal trigger and requires review against a family of geospatial standards, guidance documents, and received requirements.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Updated Liability Information	Information Exchange	Upon partial liquidation of a liability, the liability is recalculated to show new amount outstanding. For example, this information can be the aggregated financial information for environmental liabilities that has amortization factors applied as applicable.	
Updated Maintenance or Production Schedule	Information Exchange	This identifies changes to the workload plan resulting from the accomplishment of tasks.	
Updated Materiel Asset Information	Information Exchange	This is the aggregation of the physical, legal and financial characteristics of a materiel asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Updated Real Property Asset Information	Information Exchange	This is the aggregation of the physical, legal and financial characteristics of a real property asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Updated Receivable Balance	Information Exchange	Adjustments are made to bills under protest or through offers in compromise or installment. If the bill is issued and a protest is filed, action and review occurs. Approve protest, re-liquidate entry, and adjust down to original duty, and cancel 2nd bill. If adjustments are made for more than \$600, IRS Form 1099 must be issued. Adjustments will generate the appropriate general ledger transactions to include write-offs and waivers. This information allows DoD to monitor, review and approve adjustments (e.g., credit memos, debit memos, waivers, and write-offs) relative to receivables balances.	
USSGL Transaction Library	Information Exchange	The United States Standard General Ledger (USSGL) Transaction Library is based on Section I, II and III of the Treasury Financial Manual (TFM), USSGL Supplement. It provides both budgetary and proprietary entries for business and accounting events occurring throughout the DoD, at an enterprise level. In some cases a business or accounting event may require more than one transaction, therefore the USSGL Transaction Library provides business rules that govern such needs. Compilation of the USSGL Transaction Library, which also includes the identification of delineating data elements (DDE), can be found in the BEA Laws, Regulations, & Policies Repository. The transactions are grouped under the following categories: A 100-300 Funding Sources B 100-400 Disbursements and Payables C 100-300 Collections and Receivables D 100-800 Adjustments/Accruals/Non-Budgetary Transfers Other Than Disbursements and Collections E 100-200 Memorandum Entries F 100-200 Year Pre-Closing and Closing Entries	
Validated ESOH Assessment Geospatial Information	Information Exchange	This is geospatial information needed during the process of assessing an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Identification Geospatial Information	Information Exchange	This is geospatial information needed during the process of identifying an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Development Geospatial Information	Information Exchange	This is geospatial information needed during the process of developing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Implementation Geospatial Information	Information Exchange	This is geospatial information needed during the process of implementing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Personnel Requisition	Information Exchange	This includes a validated action request for assignment of personnel. This request includes all the validated requirements to fill authorized position vacancies and will be either advertised or unadvertised. This information may include (but not be limited to) requisition date, requisition quantity, occupational code, and Unit Identification Code (UIC).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Validated Real Property Asset Geospatial Information	Information Exchange	This is geospatial information needed during the process of maintaining asset information that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Real Property Build and Maintenance Geospatial Information	Information Exchange	This is geospatial information needed during the processes supporting the building or maintaining of real property that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Real Property Installation Geospatial Information	Information Exchange	This is geospatial information needed during the installation support processes that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Valuation Template	Information Exchange	This is information that is required for identifying rules and requirements to be used in valuing assets. The rules and requirements taken into consideration include the types of funding, the types of costs, types of assets, the useful lives of end-items and major components, salvage value, depreciation type and which costs are to be aggregated into the end item cost, which items are to be valued separately, expensed costs, and whether there is government furnished material or government furnished labor being provided to the contractor.	
Valuation Template Request	Information Exchange	This is a request for information that is required for identifying rules and requirements to be used in valuing assets. The rules and requirements taken into consideration include the types of funding, the types of costs, types of assets, the useful lives of end-items and major components, salvage value, depreciation type and which costs are to be aggregated into the end item cost, which items are to be valued separately, expensed costs, and whether there is government furnished material or government furnished labor being provided to the contractor.	
Veterans Affairs Disability Severity Information	Information Exchange	This includes documentation related to the Veterans Affairs (VA) disability severity information for a Member. The information may include (but not limited to) Member name, current Service or component, and disability severity information.	
Visualize Geospatial Analysis Results Request	Information Exchange	This is a request for visualizing geospatial analytical results that is needed for presentation of geospatial analysis and serves a specific analytic requirement.	
Voluntary Separation Concurrence	Information Exchange	This includes an official determination that a Member is eligible for a voluntary separation and that the losing services and components concur with the voluntary separation request. This may include (but not be limited to) recommendations to further decision activities, the eligibility on any requested waivers, and the date of concurrence.	
Voluntary Separation Nonconcurrence	Information Exchange	This includes information associated with an official determination that the losing services and components do not concur with the voluntary separation request. This may include (but not be limited to) justification for ineligibility or areas where the voluntary separation request may have been inaccurate.	
Voluntary Separation Request	Information Exchange	This includes the request information related to a voluntary separation. Additionally, this may also include information related to any waivers that are part of the voluntary separation request. The information in this request may include (but not be limited to) Member name, current Service or component, proof of eligibility for a voluntary separation, and justification for voluntary separation.	
Wage Determination Information	Information Exchange	This is the salary Information for an official contract, based on the Service Contract Act (SCA) and the Davis-Bacon Act (DBA).	
Waiver Pro Forma Entries	Information Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the waiver on overdue receivables.	
WIP Cost Information	Information Exchange	This is information regarding the costs accumulated in the Work In Progress (WIP) account. For real property construction projects, this represents the cost information accumulated by the construction agent to be billed to the sponsoring entity. The billed costs are recorded in the corresponding Construction In Progress (CIP) account.	
Wire Transfer Information	Information Exchange	Information that is provided to the U.S. Treasury for the wire transfer transaction. Information could include payee's name, bank account and routing number, amount of transfer, and transaction date.	
Withdraw Funds Information	Information Exchange	Information sent to the Treasury regarding the line item amount to be withdrawn from the agency's appropriation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Withhold or Holdback Payment	Information Exchange	The withhold of a portion of a payment to a contractor in accordance with the terms of the contract.	
Work Order	Information Exchange	A contract or order that has been awarded to a supplier/contractor and is a mutually binding legal relationship obligating the supplier to furnish the supplies or services (including construction) that can be invoiced, and the buyer to pay for them. It includes all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. The contract will contain at least the following: price, quantity, delivery date, ship-to, bill-to other terms and conditions, specification and charge code. Contracts or orders could include Fixed-price, Cost-reimbursement, Incentive, Grants, Cooperative Agreements, Other Transactions, Interagency Procurements Under the Economy Act, Intra-agency order, Indefinite-Delivery type orders, orders against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules.	
Work Order Information	Information Exchange	This represents information indicating that a work order has been authorized and initiates execution. It contains details about all estimated costs to include labor, material, invoices, or utilities associated with the activities described therein. This could include a specific or blanket authorization to perform certain work - usually broader in scope than a job order.	
Work Order Requirement	Information Exchange	This information indicates that a work order has been authorized. It contains details about all estimated costs to include labor, material, invoices, or utilities associated with the activities described therein.	
Work Request	Information Exchange	This is a request for a contract or order that will be awarded to a supplier/contractor and will be a mutually binding legal relationship obligating the supplier to furnish the supplies or services (including construction) that can be invoiced, and the buyer to pay for them. It will include all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. The contract will contain at least the following: price, quantity, delivery date, ship-to, bill-to other terms and conditions, specification and charge code. Contracts or orders could include Fixed-price, Cost-reimbursement, Incentive, Grants, Cooperative Agreements, Other Transactions, Interagency Procurements Under the Economy Act, Intra-agency order, Indefinite-Delivery type orders, orders against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules.	
Work Schedule	Information Exchange	A program and budget work schedule will be forwarded by a separate memorandum at the beginning of each program and budget formulation cycle. This schedule will show the dates to be used for planning the various phases involved in the formulation process. This augments program and budgeting guidance with more detailed and updated information.	
Workforce Analysis Information	Information Exchange	This includes the end result of workforce analysis to be utilized in the projection of force structure/authorizations, strength planning, force restructuring, force distribution, force leveling, and in all aspects of workforce planning (e.g., Stop Loss, war plan sustainability studies, mandated retraining, Reduction-in-Force, recruiting projections, reserve strengths including active duty tour requirements, current strength level, and strength projections at specified future dates).	
Workforce Analysis Request	Information Exchange	This includes a request for analysis of specified information (e.g., strength, authorization) within the context of modeling future scenarios. This information may include (but not be limited to) request date, requestor name, and request description.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Workforce Communication Request	Information Exchange	This includes information related to a request for communications to the specified workforce on a HRM issue. Communications are between management, labor and all DoD supported personnel. The information may include (but not be limited to) requestor personal information (e.g., name, official title, organization), type(s) of communications (e.g., newsletters, e-mail and web pages, bulletin boards, official surveys, commander's call presentation materials, rosters, postal support materials), communications mediums (e.g., recruiting TV, radio, billboards and backpack advertising), communication facilitation requirements (e.g., recruiting leased space in shopping centers), designated workforce specifications ( e.g., occupations, occupation groups), date of request, projected effective date for communication, and narrative description of communication requested.	
Workforce Occupational Safety Issue Communication	Information Exchange	A communication to responsible authorities that an issue of actual or potential Occupational Safety concern exists. The communication may refer to a set of circumstances of interest to the ESOH community or may be a request for a process authorization. The communication will generally be identified as a result of an internal study or inspection. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
Workforce Occupational Safety Issue Information	Information Exchange	Information about an issue of actual or potential Occupational Safety concern. This information provides interim guidance for human resources planning while the identification and assessment of an ESOH aspect is underway. This information will be replaced with the ESOH Control Requirement once the ESOH Control Agreement is reached.	
Workload Information	Information Exchange	The projected amount of labor (e.g., occupations, competencies, and labor categorization) needed to operate, maintain, and support a mission for a manpower requirement.	
Write-Off Pro Forma Entries	Information Exchange	The general ledger impact of writing off eligible debts and adjusting accounts receivable balance. This generates the appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the debt write offs.	
1.1.1 Percent variance in AC End Strength	Measure		
1.1.2 Percent variance in RC End Strength	Measure		
1.1.3 Percent Tier 1 (HSDG) non-PS AC Accessions	Measure		
1.1.4 Percent Tier 1 (HSDG) non-PS RC Accessions	Measure		
1.1.5 Percent Cat I-III non-PS AC Accessions	Measure		
1.1.6 Percent Cat I-III non-PS RC Accessions	Measure		
1.1.7 Percent Cat IV non-PS AC Accessions	Measure		
1.1.8 Percent Cat IV non-PS RC Accessions	Measure		
1.2.1 Civilian Readiness	Measure		
1.3.1 Special Forces Increase	Measure		
2.1.1 Percent DoD SBR validated	Measure		
2.1.2 Percent DoD Funds Balance with Treasury validated	Measure		
2.1.3 Percent DoD SBR Appropriations Received (line 3A) validated	Measure		
2.1.4 Percent DoD mission critical assets validated for existence and complete	Measure		
3.1.1 Reduce data centers by 18% 4QFY12 and additional 12% in 4QFY13	Measure		

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
3.1.2 Reduce networks by 10% in 4QFY 12 and additional 10% in 4QFY13	Measure		
3.1.3 Percent Service transitioned to, or designed as, Enterprise Services	Measure		
3.2.1 Percent compliance with network architecture and standards	Measure		
3.3.1 Create and maintain strong boundary defenses across DoD NIPRNet Perimeter	Measure		
3.3.2 Enforce Cryptographic Logon with PKI Hardware Tokens on SIPRNet	Measure		
3.3.2 NIPRNet Hardening allowing robust protection capabilities	Measure		
3.3.4 Reduce time to effect DoD network configuration changes	Measure		
4.1.1 Mandate affordability for all ACAT I programs	Measure		
4.2.1 Drive productivity establish Should Cost tgts as tools for ACAT I programs	Measure		
4.2.2 Ensure contracts > \$1B can achieve improvements and efficiencies	Measure		
4.2.3 Make production rates economical and hold stable	Measure		
4.2.4 Percent enterprise IT soft/hardware deployed within 18 months	Measure		
4.2.5 Number MAIS significant breaches	Measure		
4.2.6 Number MAIS critical breaches	Measure		
4.3.1 Percent contract obligations competitively awarded	Measure		
4.3.2 100 percent (i.e., at each ACAT Program Milestone review)	Measure		
4.4.1 Increase percentage of MDAP items procured	Measure		
4.5.1 Percent of completing demonstration programs transitioning each year	Measure		
4.6.1 Complete 1st phase S2T2 effort	Measure		
4.6.2 Ident and correct hi vis deficiencies for critical weapon sys components	Measure		
4.6.3 Create clearing house and repository of industrial base analyses for DoD	Measure		
4.7.1 Incl incentive strategy behind fee strategy for ACAT 1D programs	Measure		
4.7.2 Increase use of FPIF contracts	Measure		
4.8.1 Demonstrate prog at reversing trend to increasing unit costs in end items	Measure		
5.1.1 Increase number of facilities with installed meters	Measure		
5.2.1 Percent enterprise energy systems utilizing 1st module of EEIM solution	Measure		

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
5.3.1 Define/begin reporting standards for important energy security attributes	Measure		
5.4.1 Number of leased/purchased PEVs and charging stations	Measure		
5.5.1 Percent 3rd party financed energy efficiency and renewable energy projects	Measure		
5.6.1 Estab op energy baseline for DoD based on credible, verifiable POU data	Measure		
5.6.2 Establish/execute energy reduction targets/timelines	Measure		
6.1.1 POF percentage for DLA stocked items	Measure		
6.1.2 Army Customer Wait Time	Measure		
6.1.3 Navy Customer Wait Time	Measure		
6.1.4 Air Force Customer Wait Time	Measure		
6.2.1 Number days for external civilian hiring	Measure		
6.3.1 Percent Defense Business Systems/Services represented in DITPR and BEA	Measure		
6.3.2 Percent Defense Business Systems/Services represented in SNAP-IT and BEA	Measure		
6.3.3 Percent Defense Business Systems/Services reporting to OMB through BEA	Measure		
6.4.1 Complete mapping of H2R + P2P E2E processes by end FY12	Measure		
6.4.2 Determine next 2 E2E business processes to be completed by Jun 2013	Measure		
6.4.3 Complete mapping of E2E processes	Measure		
6.4.4 Determine next 2 E2E processes to be completed by end FY14	Measure		
7.1.1 Percent geographic COCOM plans reviewed/analyzed for OCO Equities	Measure		
7.1.2 Percent contracts and contractor population properly registered in SPOT	Measure		
7.2.1 Percent system traceability for DOD funds obligated in theater	Measure		
7.3.1 Percent Afghan vendors vetted	Measure		
Automatic Payment of Invoices (API)	Measure	Evaluate the number of invoices presented for API processing either manually or systemically. The processing sources and level of effort required for recording invoices are indicators of the usage rate and effectiveness of electronic commerce mechanisms along with the accuracy of those processes. Manual intervention needed resulting from automated processes is a quality indicator of the information being transmitted and processed.	
Billing-Aging	Measure	The percentage and number of receivables with days aged greater than 30, 60 and 90 days.	
Billing-Disputed	Measure	The dollar amount, number and percentage of billing documents disputed.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cash Reconciliations	Measure	The number of business days after the end of the month required to fully reconcile Fund Balance with Treasury (FBWT) each month.	
Collection Amounts in Suspense Accounts	Measure	The percentage of collection amounts that has resulted in Suspense account.	
Contract Award to EDA Load Date	Measure	DFARS 204.201 outlines the use of EDA as the central repository for a human readable copy of a contract. It is important that all contracts/modifications are distributed to all appropriate parties as soon as possible to ensure all information is provided and up to date.	
Contract Deficiency Reports	Measure	The number of Contract Deficiency Reports issued, including the causes, and the total number of open contracts/delivery orders.	
Cost of Interface, Operations and Maintenance	Measure	Costs of the ERP and the other DoD systems to perform the Procure-to-Pay process in regards to interfaces, operations and maintenance.	
Cycle Time to Resolve Billing Error	Measure	The average time taken to resolve the billing error.	
Delinquent Debts	Measure	Percentage of delinquent debts over 90 days that are referred to Treasury.	
E2E Invoice Processing Costs	Measure	Average cost to pay an invoice (total cost to include Component labor and DFAS labor to process an invoice) - throughput / total cost.	
Electronic Acceptance of Accountable Property	Measure	Evaluate the number of receiving reports presented for processing either manually or systemically. The processing sources and level of effort required for recording receipt and acceptance are indicators of the usage rate and effectiveness of electronic commerce mechanisms along with the accuracy of those processes. Manual intervention needed resulting from automated processes is a quality indicator of the information being transmitted and processed.	
Electronic Acceptance to Entitlement	Measure	Electronically received Acceptance information for new procurement in the Entitlement System.	
Electronic Commerce Rate	Measure	The EC Rate metric measures the extent to which the Department is moving toward hands free pay only packages from the military services various enterprise resource programs. The electronic processing streamlines workflow, ensures greater efficiency, and reduces costs.	
Electronic Invoicing	Measure	Evaluate the number of invoices presented for processing either manually or systemically. The processing sources and level of effort required for recording invoices are indicators of the usage rate and effectiveness of electronic commerce mechanisms along with the accuracy of those processes.	
Electronic Posting of Contract as Data (PDS) to EDA	Measure	The percent of contract data in EDA (PDS Schema data).	
Electronic Posting of Contract as Data (PDS) to Entitlement System	Measure	The percent of contract data in Entitlement System; evaluates the number of contracts presented for processing either manually or systemically. The tracking of purchase orders being established after contracting actions have been completed provide visibility to volume, the effectiveness of automated processes and manual intervention for workload management. The accuracy of processing from automated sources and manual intervention needed is a quality indicator of the information being transmitted.	
Electronically Accepted Purchase Requests	Measure	Electronically received PRs using the Purchase Request Data Standard (PRDS) or consistent PR structure for DoD Purchase.	
End to End Measures	Measure	Performance measures for improving and evaluating the overall efficiency and effectiveness of business operations related to end to end processes as mandated by NDAA 2009.	
FBWT Differences	Measure	Dollar amount of month end difference between the Fund Balance with Treasury as reported by the Treasury and that reported by the agency's general ledger.	
FBWT Reconciliation	Measure	Number of business days after the end of the month required to fully reconcile Fund Balance with Treasury (FBWT) each month.	
FBWT Suspense Activity	Measure	Number and dollar value of Fund Balance with Treasury transactions in suspense.	
FPDS-NG Congressional Reporting	Measure	Compliance percentage with the requirement of reporting contract actions to the Congress via FPDS-NG within three days.	
Interest Penalties	Measure	The total interest dollars paid.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Interest Penalties Paid Commercial Payments	Measure	This metric tracks payments of interest penalties to contractors and vendors as a measure of how promptly DoD pays its bills. Avoidance of interest penalties indicates effective internal controls and efficient processes, allowing funding to stay focused on intended priority requirements.	
Matching-No Delivery Reference	Measure	The percentage and number of advice of payment without a delivery / billing document referenced.	
Matching-No Sales Order Reference	Measure	The percentage and number of advice of payment transmitted without a Sales Order reference.	
Material and Service Master Requisition Utilization	Measure	This metric measures the percentage and number of purchase requisition line items processed using standard material and service masters.	
Number of FBWT Reconciling Items	Measure	The number of reconciling items to adjust monthly cash balances to agree with the United States Treasury.	
Number of Transactions that Require Reconciliation	Measure	The total value, % and number of transactions that require manual reconciliation where there is a discrepancy between Sales Order, Shipment and Billing documents.	
On-Time Billing	Measure	The number of sales orders that were billed on-time as agreed in the sales order process.	
On-Time Treasury Reporting (Future Metric)	Measure	Compliance with the Government-wide Accounting Modernization Program effort to reconcile Fund Balance with the Treasury on a daily basis.	
Payment Backlog Commercial Payments	Measure	This metric is a leading indicator for how small or large DoD's interest penalty payments will be. It measures overaged invoices as a percentage of the total number of invoices on hand at DFAS. "Overaged" is defined as those invoices backlogged in DFAS for more than the period specified by the PPA or per the contract term associated with the invoice.	
PDS Approval/Acceptance to Accrual Posting	Measure	Difference between the date that the accrual was posted in the accounting system and the date which the item/invoice was approved.	
PDS Awards and Modifications Validations	Measure	The percentage of awards and modifications that fail Procurement Data Standards (PDS) validations for incorrectly structured contracts broken out by cause.	
PDS Contract Award to Obligation Posting	Measure	Difference between the date the contract is awarded in the contract writing system and the date the obligation is posted in the accounting system.	
PDS Procurement Lead Time	Measure	The average time from initiation of the procurement action requiring a new contract to receipt of products / services purchased as a result of the procurement action.	
Procure to Pay	Measure		
Procure to Pay Frequency of Unmatched Disbursements	Measure	The number of transactions which became unmatched and the total number of disbursements made.	
Procure to Pay Interest Penalties	Measure	The total interest dollars paid.	
Procure to Pay Invoice Overage	Measure	Percentage of invoices over 30 days old.	
Procure to Pay Invoices On Hold	Measure	Number of invoices on hold that are not awaiting approval by category associated with the root cause of the on hold reason.	
Procure to Pay Payment Processing Fees	Measure	Rates charged by the Defense Finance and Accounting Service (DFAS) for payment processing and the number of invoices processed.	
Procure to Pay Pre-validation Errors	Measure	The total number of pre-validation errors, their causes and the number of pre-validation requests.	
Procure to Pay Reconciliation	Measure	Direct billable hours for accounting services and hours spent performing contract reconciliation shown as a cost.	
Procure to Pay Reconciliation Accounting Services Cost	Measure	Direct billable hours for accounting services and hours spent performing contract reconciliation shown as a cost.	
Procure to Pay Unmatched Disbursements	Measure	This metric measures our success at correcting existing unmatched disbursements (UMDs) that are 0-120 days old or older. An unmatched disbursement occurs when a recorded disbursement cannot be matched to an obligation in the accounting system.	
Procure to Pay Unsupportable Disbursements	Measure	This metric measures our success at correcting existing unmatched disbursements (UMDs) that are 0-120 days old or older. A UMD occurs when a recorded disbursement cannot be matched to an obligation in the accounting system. Accounting records cannot reflect an accurate financial position when UMDs are present and cause reported fund balances to be overstated while actual available balances are understated.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Rescission	Measure	Number of days required for an agency to remove funds from the agency general ledger as a result of receiving a rescission from OSD.	
Unmatched Collections	Measure	The number, percentage and value of transactions that has resulted in Unmatched Collections.	
Unmatched Collections Aging	Measure	The Number and age of Unmatched Collections between 0 and 120 days old, in 30 day increments.	
Unreconciled Obligations	Measure	The percentage and dollar amount variation by month, quarter, and/or year-to-date of actual obligations against the distributed budget.	
Unsupported Collections	Measure	The Month end difference between the Fund Balance with Treasury as reported by the Treasury and that reported by the agency's general ledger.	
Adaptability Measure	Measure Type	The Powertype of Adaptability Measure.	
DoDAF 2 Measure Type	Measure Type	A category of Measures. From the DoDAF 2.02 specification.	
Maintainability Measure	Measure Type	The Powertype of Maintainability Measure.	
Measure of Desire	Measure Type	The Powertype of Measure of Desire.	
Measure of Effect	Measure Type	The Powertype of Measure of Effect.	
Measureable Skill	Measure Type	The Powertype of Measureable Skill.	
Needs Satisfaction Measure	Measure Type	The Powertype of Needs Satisfaction Measure.	
Organizational Measure	Measure Type	The Powertype of Organizational Measure.	
Performance Measure	Measure Type	The Powertype of Performance Measure.	
Physical Measure	Measure Type	The Powertype of Physical Measure.	
Spatial Measure	Measure Type	The Powertype of Spatial Measure.	
Temporal Measure	Measure Type	The Powertype of Temporal Measure.	
Acceptance Evidence	Message Flow	Documentation of the act of assuming ownership of legal title and accountability of goods tendered and services rendered, excluding Real Property Placed in Service Notification. This serves as proof that the deliverables received or services rendered have been provided fulfilling specified terms and conditions against the previously agreed upon agreement, contract, and/or intragovernmental order between the supplier and the buyer. It also must include information necessary for Asset Valuation (e.g., capitalize vs. expense determinations).	
Acceptance Information	Message Flow	Documentation that ownership of legal title and accountability of goods and services has been transferred to the government buyer that allows the government supplier to record a receivable transaction.	
Accepted Intragovernmental Order	Message Flow	An intragovernmental order that has been accepted by the government supplier that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute.	
Accepted Letter of Offer and Acceptance Document	Message Flow	Accepted Letter of Offer and Acceptance is a Foreign Military Sales Trust Fund case document that has been countersigned by USG and signed by the purchaser, if required, accepting terms and conditions of the offer. The document provides information necessary to execute the case in the Foreign Military Sales Trust Fund and is the official document for recording contract (budget) authority at the case level.	
Accepted Purchase Request	Message Flow	Document which has been reviewed by the procurement organization and found to adequately describe the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
Accession Eligibility Notification	Message Flow	This includes a notification that captures the eligibility information of an applicant during accession processing. This information may include (but not be limited to) notification date and time, reasons why an applicant is not eligible, whether an applicant meets or does not meet standards, and scheduling guidance.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accession Meal Entitlement Information	Message Flow	This includes accession meal entitlement information, including (but not limited to) accession shipping information and meal check information.	
Accession Notification	Message Flow	This includes a notification that a member requires testing (e.g., medical exam, and Armed Services Vocational Aptitude Battery (ASVAB)) or needs to be processed for assignment. This information may include (but not be limited to) name, address, date of birth, social security number (SSN), and type of examinations needed.	
Accession Shipping Arrangement Notification	Message Flow	This includes information related to shipping a Member or applicant, including (but not limited to) shipper name, shipper projections, and seat blocking requests.	
Accession Shipping Final Order	Message Flow	This includes the information needed to document an approved order for a personnel action. The information may include (but not be limited to) approved order date and status, order number, order effective date, and order type. The information contained in this ICOM will be the basis for a financial obligation (a financial decommitment in the case of an order to cancel) of funds in the Financial Visibility Business Area.	
Accession Shipping Reservation Information	Message Flow	This includes reservation information related to shipping a Member or applicant, including (but not limited to) shipper name, shipping date, and travel information.	
Accounts Payable Offset	Message Flow	The amount a payment to a vendor, or other party owed by the government, should be offset to resolve any debts owed to the Government.	
Accounts Payable Offset Request	Message Flow	A request to compare the payment due to a vendor, or other party owed by the government, against any accounts receivable for the vendor or levies issued by the IRS to determine if the payment should be offset to resolve any debts owed to the government.	
Accounts Receivable Principal Balance	Message Flow	Accounts Receivable request that contains the necessary information to establish a receivable. This information will be maintained and processed throughout the life of a receivable to include verifying, reviewing and capturing vendor or customer information, performing calculations, and generating bill.	
Acknowledged Intragovernmental Order	Message Flow	An intragovernmental order that has been accepted by the government supplier and subsequently acknowledged by the government buyer that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute. The intragovernmental order may contain the original or modified order that has been mutually agreed upon between the buyer and government supplier.	
Acquisition Requirement	Message Flow	An acquisition requirement is a clearly defined requirement critical for response to immediate and long-term capability needs of the warfighter that have been reviewed, validated, funded and fielded.	
Action Plan	Message Flow	Proposed remedial action plan that requires agreement from the customer before determining whether the request can be revisited or not.	
Additional Accounts Payable Information	Message Flow	Additional information that is requested to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Accounts Payable Information Request	Message Flow	Request additional information to complete and ensure proper processing of the accounts payable or liability for payment.	
Additional Disbursement and Collection Information Request	Message Flow	This is a request to the functional area for additional disbursement and/or collections information that will help to explain and support resolving anomalies and/or discrepancies between DoD's fund balance and Treasury's records.	
Additional Medical Information Request	Message Flow	This includes requesting additional medical information based on the medical information provided during medical prescreen or as a result of the medical examination.	
Additional Medical Information Response	Message Flow	This includes receiving additional medical information based on a request sent during medical prescreen or as a result of the medical examination.	
Additional Reconciliation Information	Message Flow	Additional supporting documentation that describes the discrepancies between the Treasury and Department of Defense Fund Balance account.	
Additional Revocation Documentation Request	Message Flow	This includes information regarding a request for the appropriate party (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) to submit additional documentation justifying the revocation of an identity credential. This may include (but is not limited to) the type of documentation required (e.g., divorce papers, birth certificate).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Additional Revocation Documentation Response	Message Flow	This includes additional information related to documentation required in order to justify the revocation of an identity credential. This may include information proving ineligibility for an identity credential (e.g., divorce papers, birth certificate) or declination to respond.	
Adjustment to be Made	Message Flow	The amount to be recorded by the government supplier as an adjustment to an amount due from or paid by a government buyer.	
Advice of Payment	Message Flow	A detail explanation of a payment sent to the vendor, or other party owed by the government.	
Anticipated Adjustment	Message Flow	The amount to be recorded by the government buyer as an adjustment to an amount due or paid to a government supplier.	
Applicant Additional Information Request	Message Flow	This includes information related to a request for additional applicant information (e.g., personal information, aptitude results, medical information) in order to continue the accession process. This information may include (but not be limited to) personal information (e.g., contact information, biometric data, birth certificate, social security card and permanent resident card (i.e., green card) information), aptitude results (e.g., Armed Services Vocational Aptitude Battery (ASVAB) and special purpose testing results), medical information (e.g., parental consent, privacy act/HIPAA, release of information authorization, and personal health information), accession shipping information, and reasons for incomplete applicant information.	
Applicant Additional Information Response	Message Flow	This includes information related to a response to a request for additional applicant information (e.g., USMEPCOM Form 601-23-E). This information may include (but not be limited to) applicant name, applicant unique identifier/social security number, Recruitment Specialist (e.g., Recruiter, Service Guidance Counselor/Liaison), date of response, missing applicant information, and any response information (e.g., medical, Service) addressing a request for additional information.	
Applicant External Organizational Check Response	Message Flow	This includes information related to a response to an external organizational check of an applicant's identity, background screening, and investigation (e.g., FD-258). This may include (but not be limited to) individual personal information (e.g., social security number for Social Security Administration check, alien registration number U.S. Citizenship and Immigration check, fingerprints for Federal Bureau of Investigation and Office of Personnel Management check, and prior military service for Defense Manpower Data Center check).	
Applicant Fingerprints External Organizational Check Request	Message Flow	This includes sending a request to an external agency (e.g., Office of Personnel Management (OPM), Federal Bureau of Investigation (FBI)) to process the applicant's fingerprints (e.g., 10 prints) to obtain background screening and investigation results.	
Appropriation Act	Message Flow	A provision of legal authority by an act from Congress that allows federal agencies to incur obligations. It is the most common means of providing budget authority.	
Approved Adjustment	Message Flow	Notification from supply chain entitlement process approving adjustments to accounts payables transactions.	
Approved Apportionment	Message Flow	Approved apportionment is the notification from OMB that the DoD's apportionment request has been approved and available for distribution to the components and/or services.	
Approved Payment Request	Message Flow	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Final Cost Vouchers, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Non-Direct Cost Vouchers.	
Approved Proposal Notification	Message Flow	Notification sent to the entity that the proposal for the new requirements has been approved.	
Approved Request for Proposal	Message Flow	A request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been approved by a contracting officer for release to suppliers. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Approved Sourcing Plan Authorizing Micropurchase	Message Flow	Approved sourcing plan providing authorization to use a purchase card for requirements for purchases under \$2,500.	
Arrival Information	Message Flow	Acknowledgement of the arrival or delivery of passengers or cargo at a destination.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assessment Budget Request	Message Flow	This is a request for appropriation funding to perform ESOH aspect assessment that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Asset Recorded Cost Information	Message Flow	This message triggers an update to the asset record with Asset Recorded Cost Information.	
Asset Valuation Information	Message Flow	This is documentation which details the fiscal accountability requirements for asset values, depreciation, amortization and depletion of assets, and any adjustment to the valuation as a result of a change in the condition of the asset. This information shall include accountability information that is recorded in the records of the Department of Defense financial and property management systems.	
Audit Comments	Message Flow	Audit function reviews the draft period end or on demand financial statement to evaluate accuracy, financial risk, or cost reasonableness.	
Audit Report	Message Flow	The results of the auditor's review of the draft financial statements are documented in an audit report. The audit report should be consistent with previously recommended audit adjustments that were coordinated with Department of Defense management.	
AV_Message_Flow_13	Message Flow		
AV_Message_Flow_14	Message Flow		
Awarded Procurement Instrument or Supplemental Procurement Instrument	Message Flow	A procurement instrument that has been awarded to an external supplier and is a mutually binding legal relationship obligating the supplier to furnish the goods or services (including construction) that can be invoiced, and the buyer to provide payment for those goods and services as agreed upon by the procurement instrument. The awarded procurement instrument may contain the original or modified procurement instrument that has been mutually agreed upon between the buyer and supplier. It includes all types of actions that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, procurement instruments include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. Procurement Instruments could include Fixed-price, Cost-reimbursement, Incentive, Grants, Cooperative Agreements, Other Transactions, Indefinite-Delivery type orders, order against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules.	
Baseline Report	Message Flow	Baseline report submitted to congress for review. This baseline report will be the initiating point for reprogramming actions.	
Billing Document	Message Flow	Included in the billing document are debtor or responsible parties, amount owed, remittance terms and conditions and payment due date. This can be a statement, consolidated billing or payment coupon.	
Buyer Approved Intragovernmental Order	Message Flow		
Buyer Planning Information	Message Flow	Information provided to the supplier during the development of a sourcing strategy (i.e. demand forecast).	
Buyer Profile	Message Flow		
Cancel Payment Notification	Message Flow	Notification received by the disbursing officer from authorized official that certifies that a payment cancellation request has been received and processed.	
Cancel Payment Request	Message Flow	Request from supply chain entitlement to financial management for cancellation of a payment due to invalid amount, appropriation, or payee.	
Cancel Payment Request Returned	Message Flow	A request for cancellation of a payment due to invalid amount, appropriation, or payee that has been returned to Entitlement.	
Cancellation of Budgetary Resources	Message Flow	Cancellation is a proposal by the Executive Branch through OMB to reduce budget resources (new budget authority or unobligated balances of budget authority) that is not subject to the requirements of Title X of the Congressional Budget and the Impoundment Control Act of 1974. Resources that are proposed by the President for cancellation cannot be withheld from obligation or expenditures pending Congressional action on the proposal.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cash Receipts	Message Flow	This is any supporting documentation related to remittance for payments for goods or services (i.e., copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Casualty Assistance Delivery Request	Message Flow	This includes the request for delivery of specific casualty assistance program selections. These selections are made from a group of options made available to a casualty Member's family.	
Certified Business Partner Payment Information	Message Flow	Generated as a result of an entitlement function that identifies the amount that should be paid to a specific payee. Includes scheduled payment date, and the net amount due that has been determined in accordance with the terms and conditions of the contract and in accordance with the Prompt Payment Act. Entitlements are only approved after proper authorization, verification of fund availability, and review for duplicate payment.	
Certified Business Partner Payment Rejection	Message Flow	This is the rejection of certified business partner payment information after failing initial validation for completeness of information including payee's information, methods of payment, currency, and amount. The rejection is sent back to the supply chain entitlement process for reprocessing.	
Certified Human Resources Management Pay Information	Message Flow	This is the record, approved by a designated official, of gross pay earnings and entitlements, less deductions (statutory and elective) that results in the net disbursement. This record also reflects active employee debt balance.	
Certified Invoice	Message Flow	This is the information from a supplier that has been confirmed to comply with the terms and conditions of the contract that will allow a payment to be made.	
Certified Invoice Investment Payment Request	Message Flow	This is the record, approved by a designated official, detailing investment payment request.	
Chairman's Program Assessment	Message Flow	Provides the Chairman of the Joint Chiefs of Staff's personal appraisal on alternative program recommendations and budget proposals to the Secretary of Defense for consideration in refining the defense program and budget in accordance with 10 United States Code. The Chairman's program assessment comments on the risk associated with the programmed allocation of Defense resources and evaluates the conformance of program objective memoranda to the priorities established in strategic plans and combatant commanders' priority requirements. Also called CPA.	
Check Payment	Message Flow	Document containing the actual check and associated Check Disbursement Voucher information that is passed on to the Federal Clearinghouse for distribution to the payee.	
Chemical and Regulatory Information	Message Flow	Information on chemicals and hazardous material regulations that is received from a subscription service and maintained in the master product hazard data (MPHD) warehouse.	
Chemical and Regulatory Reference Information	Message Flow	This includes chemical and regulatory reference information such as Chemical Abstract Service (CAS) numbers.	
Clinically Indicated Testing Request	Message Flow	This includes information related to the request for consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) requestor, request date, request type, and additional comments.	
Clinically Indicated Testing Response	Message Flow	This includes the results from the consultations (e.g., specialty consults, ancillary services, medical tests and studies) regarding a specific medical condition and any additional medical information about an applicant in cases where other examinations have been inconclusive or a more specifically targeted examination is needed. This information may include (but not be limited to) response date, response type, and additional comments.	
Closure Certificate for Case Implemented in Foreign Military Sales Trust Fund	Message Flow	The Case Closure Certificate provides the information necessary for DFAS to close the case implemented in the Foreign Military Sales Trust Fund. The Certificate supports budgetary and/or proprietary impact in the general ledger to balance budget authority ceilings, cash receipts, total disbursements and the value of delivered articles and services for the case implemented in the Foreign Military Sales Trust Fund.	
Collection Activity Termination Notice	Message Flow	This is the notification from an external entity that collection action related to a debt has been terminated.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collection Confirmation	Message Flow	This is the confirmation of collections from Treasury. Deposit number, Confirmation Date, Deposit Amount, etc. In addition, detailed information on Non Sufficient Funds (NSF) checks is provided.	
Collection Receipts	Message Flow	This is information associated with collections which have been processed to include intergovernmental collections made via Intra-governmental Payment and Collection and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository. This process encompasses processing of the associated deposit ticket or debit voucher and the associated cash collection voucher, as well as the passing of collection information to the debt management and accounting general ledger activities. This also includes the resolution of administrative offsets.	
Comments to Public Draft Request for Proposal	Message Flow	Suppliers' comments on the draft request for proposal that has been publicized to potential suppliers. These comments are incorporated where appropriate prior to final release of the request for proposal for approval.	
Comments to Request for Proposal	Message Flow	Suppliers' comments on the request for proposal that has been publicized to potential suppliers.	
Commitment	Message Flow	An administrative reservation of funds based on firm procurement requests, unaccepted customer orders, Directives, and equivalent instruments.	
Commitment Modification Request	Message Flow	A request to either increase or decrease the commitment amount needed to fulfill the requirement.	
Commitment Request	Message Flow	This is a request for a commitment or decommitment that has been approved based on the existence of available funding. This commitment/decommitment is an administrative reservation/dereservation of funds for a procurement request, order, directive, payroll, retirement, retainer and annuitants pay, travel reimbursement or equivalent instrument. This also identifies commitments that have been rejected due to insufficient funding or management discretion.	
Communication from Supplier	Message Flow	Communications received from suppliers and transmitted through DoD logistics processes as part of the contract monitoring process, including requests by the supplier for a change to the terms of the contract or order.	
Communication to Supplier	Message Flow	Any official, written, addressed communication between a DoD organization, a DoD employee, or other DoD agent and an internal or external supplier regarding the execution of the supplier's contract, including requests by the internal end user, or contracting officer, for a change to the terms of the contract or order such as changes to delivery date, specifications, and cost.	
Compensation Eligibility Notification	Message Flow	This includes information used to notify an employee/Member that they are no longer eligible or are eligible for compensation.	
Conference Reports	Message Flow	Congressional committee conference reports.	
Confirmation of Physically Complete Procurement Instrument	Message Flow	Confirmation that a procurement instrument or supplemental procurement instrument is physically complete based on the terms and conditions of the procurement instrument or supplemental procurement instrument and the goods delivered or services performed.	
Confirmation of Reimbursable Bill	Message Flow	Confirmation of a reimbursable bill is provided by the U.S. Treasury. This confirmation acknowledges that a reimbursable bill has been transmitted to the intragovernmental customer.	
Confirmed Collection	Message Flow	A confirmed collection has been matched to a specific customer and debt. The confirmed collection includes all supporting documentation necessary to match to the appropriate account receivable.	
Confirmed Contract Fulfillment	Message Flow	Document received by Contracting Officer that confirms the completion or fulfillment of contractual obligations.	
Confirmed Payment	Message Flow	Confirmation received by accounts payables department that provide confirmation of payment on outstanding accounts payable.	
Congressional Action	Message Flow	The act of creating conference reports by Congress.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Congressional Enactment	Message Flow	The DoD portion of the President's Budget, is the basis for the DoD congressional enactment process. In the following nine months (February to October) the President's Budget will be closely scrutinized, serving as guidance for two major pieces of defense related legislation: the National Defense Authorization Bill and the Defense/Military Construction Appropriations Bills. Of all the legislative matters before Congress, none is more important nor more political than the review of the President's Budget. It will be examined by 535 members of Congress and hundreds of congressional staffers, each of whom possess their own agendas and priorities. The end product of the enactment process is the Authorization and Appropriations Bills.	
Congressional Feedback	Message Flow	Congressional feedback or position in the proposed baseline for reprogramming actions.	
Congressional Inquiry	Message Flow	Congressional inquiry includes request for supplemental budget documentation, testimony, appeal materials, and witnesses.	
Congressional or Federal Inquiry	Message Flow	This is a formal request for information from Congress or the Federal Government regarding the status of an acquisition effort within the Department.	
Consolidated Appeal Materials	Message Flow	The consolidated appeal materials sets forth the Department's position on the most significant programs/items impacted by congressional actions.	
Contract Closure Information	Message Flow	All information related to completion of the buyer's final procurement instrument closeout process including, but not limited to, closeout details and requesting decommitments, if necessary. This also includes any adjustments to closure information.	
Contract Holdback Account Information	Message Flow	Information necessary to create a subsidiary account for each vendor whose contract has a contract holdback clause. A predetermined amount or percentage of a contract is withheld from payment until final completion of the contract.	
Contract Modification	Message Flow	Any written change in the terms of a contract including bilateral and unilateral modifications. A bilateral modification (supplemental agreement) is a contract modification that is signed by the contractor and the contracting officer. Bilateral modifications are used to make negotiated equitable adjustments resulting from the issuance of a change order; definitize letter contracts; and reflect other agreements of the parties modifying the terms of contracts. A unilateral modification is a contract modification that is signed only by the contracting officer. Unilateral modifications are used, for example, to make administrative changes; issue change orders; make changes authorized by clauses other than a changes clause (e.g., Property clause, Options clause, or Suspension of Work clause); and issue termination notices.	
Contract or Order Information	Message Flow	A contract or order that has been awarded to a supplier and is a mutually binding legal relationship obligating the supplier to furnish the supplies or services (including construction) that can be invoiced, and the buyer to pay for them. It includes all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. The contract will contain at least the following: price, quantity, delivery date, ship-to, bill-to other terms and conditions, specification and charge code. Contracts or orders could include Fixed-price, Cost-reimbursement, Incentive, Grants, Cooperative Agreements, Other Transactions, Interagency Acquisitions Under the Economy Act, Intra-agency order, Indefinite-Delivery type orders, order against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules.	
Contractor Receipt of Government Furnished Property	Message Flow	Contractor acknowledgement that they have received government property on the performance of the contract.	
Cost Information	Message Flow	Cost Information from the internal or external customer that includes: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Cost Model Requirements Agreement	Message Flow	This object includes the terms and conditions of how the Cost Model will meet the customer's requirements. This contains the delivery schedule and specific requirements, such as the expected results, accuracy, and assumptions contained in the model.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Cost Model Template	Message Flow	A cost model template that will be used to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Cost Model Template Request	Message Flow	A request for a template that is used to accumulate the costs of performance for all orders.	
Cost Performance Information Request	Message Flow	The form used by internal or external customers to request cost/performance information. Request includes in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Credit Memo	Message Flow	Notification issued to the customer informing the customer that they have overpaid on a debt to the Department.

Current Working Estimate Report	Message Flow	This is a comprehensive cost estimating report that accounts for site procurement, design, construction, project supervision, construction security, value-added taxes, and any other project costs.	
Customer and Vendor Information	Message Flow	This is information about people and organizations to whom payments will be made. Information includes full name, mailing address, bank account information, SSN, DUNS, DUNS+4 and if an organization, an indication of whether the organization is a public or private sector entity.	
Customer Feedback	Message Flow	Receive feedback and/or agreement from the customer for the proposed remedial action plan.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Debit Voucher Information	Message Flow	The debit voucher provides information on how to recover funds from returned checks which are not paid for any reason by the bank on which they are drawn. When a check is returned unpaid, the deposit ticket cannot be recalled, corrected, or resubmitted. The receiving bank prepares a debit voucher for the difference of the deposit amount. The accounts receivable and collection accounts will be adjusted upon receipt of an unpaid check and copies of the debit voucher from the receiving bank.	
Debt Adjudication Decision	Message Flow		
Debt Close-Out or Remission Request	Message Flow		
Debt Compromise	Message Flow		
Debt Write-off Notification	Message Flow		
Debtor Response	Message Flow	This is the debtor's response to a demand letter or notice of administrative offset. This may request the debt be satisfied through installment payments or via salary offset. The request may also request an installment payment schedule, waiver, debt determination consideration or administrative hearing within the Component.	
Deduction Update Notification	Message Flow	This includes information associated with a notification that alerts an employee/Member that there has been an initiation or change to amount or terms of a deduction or reduction of pay. This includes effective date of the change, reason for the change, new deduction or reduction amount.	
Deferral Proposals	Message Flow	Proposal for deferral of appropriated budgetary resources to be temporarily withheld from obligation.	
Deferral Report	Message Flow	Report submitted to the OMB containing a detailed description of the amount, affected accounts, project, Government functions involved, reasons for deferral, effects of the deferrals, and any other relevant facts supporting the deferral decision.	
Delinquent Debt Information	Message Flow	This is an overall flow of debt information to the reporting function. Information includes account balance information, collection activity, demand letter issuance, debtor response information and results of debt adjudication proceedings. Includes both vendor and individual debt information: Vendor debt information includes regarding a dollar amount owed to the Department of Defense by a vendor. This is due to an overpayment caused by previously processed advanced or financing payments, as well as contract modification action which were processed after payment had been made. Individual debt information includes information required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non Member damages or loses Department of Defense property, or has been overpaid.	
Demand Letter	Message Flow	Demand letter provides information about eligible accounts receivable that is dunned at the first applicable and subsequent time intervals. Accounts are dunned at periodic intervals (e.g., 30-day intervals). Delinquent accounts should be dunned based on Federal statutes such as the Debt Collection Act of 1982 and the DCIA. Federal regulations on debt collection, such as the Federal Claims Collection Standards, government-wide debt collection guidance such as OMB Circular A-129, Treasury's Managing Federal Receivables, and DoD policies and procedures.	
Detailed Budget Information	Message Flow	The detailed budget information identifies types of levels for specific budgets requirements that will be used to update FYDP. The level and type of budget information required vary depending on appropriation and major programs. Some examples are as follows: <ul style="list-style-type: none"> <li>- Appropriation</li> <li>- Program Element</li> <li>- Budget Line Number</li> <li>- Project</li> <li>- Force Resource Identification</li> <li>- Manpower Resource Identification</li> </ul>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Disapproved Payment Requests	Message Flow	Payment request where payment is based on approval of a government official and the request has been disapproved. A governmental official may approve, may approve for a lesser amount or disapprove the payment request. The Approved Payment Requests will then go to the Entitlement process. Disapproved requests go back to the vendor.	
Disbursement Confirmation	Message Flow	This is the confirmation of disbursements from Treasury. Schedule number, Control totals, Confirm date, range of tracer numbers, payment medium. In addition, detailed information on cancelled checks is provided.	
Disbursing Information	Message Flow	This is information associated in processing disbursements that includes intragovernmental payments made via IPAC and commercial payments processed via electronic funds transfer and Treasury checks. This information also contains prepayments to record an expense that was paid in advance and disbursements In-Transit that have been processed by DoD but not yet confirmed by the Treasury. In addition, this information includes the payment instrument to include notification of the final invoice payment and the associated disbursement voucher, as well as disbursement information for the supply chain entitlement and accounting general ledger activities.	
Discharged Debt Tax Notification	Message Flow	This is the issuance of the IRS Form 1099-C documenting that delinquent debt has been closed out and should thus be treated as taxable income of the recipient.	
Discrepancy Report	Message Flow	Report generated upon either Receipt or Acceptance documenting any variance from the terms and conditions of the agreement, Procurement Instrument or intragovernmental order with the supplier.	
Disposition of Loss	Message Flow	Disposition of a contractor's notice of loss.	
DoD Apportionment Request	Message Flow	DoD Apportionment request contain all funding request from the services/components to be submitted to OMB for approval. This apportionment request is the department's request to make funding available for obligation as stated in the Appropriation Act and general provisions.	
DoD Technology Export Request	Message Flow	This is a U.S. industry request from the Department of Commerce or the Department of State for threat evaluation and recommendation regarding the export of DoD technology.	
DoD's Budget Submission for President's Budget	Message Flow	On-year, DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year, the DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g.. cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.	
DoD's Response to Congressional Action	Message Flow	DoD's position and response to the congressional action regarding the department's proposed reprogramming actions.	
DoD's Topline Passback Response	Message Flow	The DoD's response to OMB contains the comments and feedback from the Department on OMB's topline passback. The response reflects the results of the previous negotiations on key issues within DoD and realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs.	
Draft Contract - Request for Supplier Inventory Availability	Message Flow	Draft Contract - Request for Supplier Inventory Availability	
Draft Period End or On Demand Financial Statement	Message Flow	Draft trial balance from approved and or certified trial balance information.	
Earned Value Management Information	Message Flow	This is an output of the Earned Value Management System which measures cost overrun or cost underrun relative to the program performance measurement baseline.	
Earnings Update Notification	Message Flow	This includes information used to notify an employee/Member that they are no longer eligible or that they have become eligible.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Education Resource Requirements Information	Message Flow	This includes information associated with resource requirements for Department of Defense (DoD) and Service education programs. This information may include (but not be limited to) resources required to deliver the developed education program (e.g., funds, equipment, facilities, faculty, and other support personnel).

Electronic Fund Transfer Payment Information	Message Flow	Electronic Fund Transfer provides for electronic payments and collections. The information needed to process an Electronic Fund Transfer transaction is the payee's name, all relevant bank identifying information, amount and invoice information.	
Environmental Liability Footnote Information	Message Flow	The financial and non-financial information that is used to build the financial statement narrative and footnotes as they relate to environmental liabilities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Environmental Liability Information Rejected	Message Flow	This is the aggregated financial information for environmental liabilities that has been rejected based on various factors and not applied as applicable. It is not posted to the general ledger, and may be disclosed as a footnote on the financial statements.	
Environmental Liability Transaction Information	Message Flow	This is the financial information for environmental liabilities that will provide the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts) when posted to the general ledger.	
Evidence of Goods Tendered	Message Flow	Information from supplier that documents tendering of goods to the DoD Buyer.	
Evidence of Goods Tendered and Services Rendered	Message Flow	Information from Government suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for billing, collection and shipment planning, and product hazard or material safety information as appropriate.	
Evidence of Goods Tendered and Services Rendered from External	Message Flow	Information from commercial suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for collection and shipment planning, and product hazard or material safety information as appropriate.	
Excess Real Property Declaration	Message Flow	When a real property asset is declared as excess, the Component initiates disposal screening procedures, which includes soliciting proposals for the use of the excess space within DoD or less often with other federal entities. At this point in time, the disposal is not definitive and if the mission changes, there is no commitment to the disposal act. The occupancy and operation of the real property asset may continue during this time.	
External Carrier Data	Message Flow		
External Organization Check Request	Message Flow	This includes sending a request to an external agency identified to be an authoritative source in order to verify an applicant's self-disclosed personally identifiable information.	
External Shipping Information	Message Flow		
Federal Dollars Expended on Non Federal Asset	Message Flow	This message represents construction costs associated with a construction action conducted by the federal Government on behalf of a non federal entity.	
Final Foreign Military Sales Trust Fund Bill	Message Flow	Upon closing of the Case implemented in Foreign Military Sales Trust Fund, DoD sends the Final Case Bill to the purchaser.	
Final Government Export License Decision	Message Flow	Notification of final determination of the Federal government's position regarding export application for DoD technology.	
Financial Management Policy Request	Message Flow	Provides general guidance on the policies and procedures related to Department of Defense financial management processes which include the formulation and submission to budget requests to the Office of Secretary of Defense as well as provide guidelines and assistance accounting for assets, liabilities, revenues, and expenses.	
FMS Trust Fund Response	Message Flow	This is a response regarding a submitted request for permission to disburse payments against a line on a case implemented in the Foreign Military Sales Trust Fund. Responses include approved, denied, and in-process.	
Force List	Message Flow	A deployment equipment list or a unit deployment list or similar list; or a list of forces required by an operations plan, including assigned forces, augmentation forces, and other forces to be employed in support of the plan.	
Foreign Currency Conversion	Message Flow	Foreign Currency Conversion information received from the Treasury to process the financial events involving a monetary unit different from the currency in the primary economic environment (functional currency) of a (1) federal department or (2) component operating unit of a federal department. Gains or losses resulting from the settlement of foreign currency receivables or payables shall be included in the results of operation for the period when settlement occurs. (Source: GAO 02-248G).	
Foreign Military Sales Trust Fund Expenditure Authority Request	Message Flow	This is a request for expenditure authority associated with a payment which cites a case implemented in the Foreign Military Sales Trust Fund. No payments citing a case implemented in the Foreign Military Sales Trust Fund will be released for disbursement processing prior to receipt of expenditure authority.	
Funds Availability Request	Message Flow	This is a request for Notification of Funds Availability.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Future Years Defense Program	Message Flow	The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a 6 year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.	
FV_Message_Flow_29	Message Flow		
FV_Message_Flow_30	Message Flow		
General Ledger Account Balance Rejected	Message Flow	A discrete accumulated end of the period dollar amount associated with an individual United States Standard General Ledger account. The balance is expressed as either beginning of the period or end of the period and either debit or credit in nature.	
General Provisions	Message Flow	General Provisions spread to individual appropriations.	
Goods and Services Acknowledgement	Message Flow	The confirmation by receiver that goods were tendered or services were provided.	
Government Supplier Response	Message Flow		
Hazardous Process Description from Warfighter	Message Flow	Information that identifies potential hazardous processes in a warfighting mission activity described to the level of granularity necessary to define effective ESOH controls.	
House Appropriation Committee Report	Message Flow	JURISDICTION OF THE COMMITTEE ON APPROPRIATIONS Rule X of the Rules of the House vests in the Committee on Appropriations broad responsibility over the Federal budget. Specifically the Rule defines the Committee's jurisdiction, as follows: "Rule X clause (b). Committee on Appropriations. (1) Appropriation of the revenue for the support of the Government. (2) Rescissions of appropriations contained in appropriations Acts. (3) Transfers of unexpected balances. (4) Bills and joint resolutions reported by other committees that provide new entitlement authority as defined in section 3(9) of the Congressional Budget Act of 1974.	
Human Resources Information	Message Flow	This is an extraction of selected data related to a human resources application and human resources profile request.	
Human Resources Management Procurement Request	Message Flow	This is a bundle of all HRM procurement requests (e.g. Travel Procurement Request).	
Human Resources Profile Information	Message Flow	This includes personal, professional, and pay information related to the processes of administering manpower and staffing, human resources, personnel development, benefits, and pay. This information resource can be initially captured during a candidate's evaluation and is formally established when a candidate or other person of interest to DoD is accessed.	
Identification Budget Request	Message Flow	This is a request for appropriation funding to perform ESOH aspect identification that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Identification Documents Request	Message Flow	This includes a request for documents that can be used to establish and verify the appropriate party's (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) identity to be presented. These documents may include (but are not limited to) a passport, a driver's license, a federal identification (ID) card, a social security number card, a birth certificate, a school ID or a voter's registration card.	
Identification Documents Response	Message Flow	This includes a response to a request for identification documents. This includes the documents that can be used to establish and verify the appropriate party's (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) identity, typically (but not limited to) biometrics or I-9 forms of identification (e.g., passport, driver's license, federal ID card, social security number card, birth certificate, school ID, voter's registration card) or a declination to supply the necessary forms.	
Identity Credential Eligibility Documents	Message Flow	This includes information that can be used to establish the DoD HRM Individual Customer's (e.g., Member, contractor, civilian, dependent) eligibility for an identity credential. This includes (but is not limited to) documents that can prove that the customer is eligible to receive an identity credential (e.g., marital certificate, birth certificate, adoption decree).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Identity Credential Issuance Documents Request	Message Flow	This is a request for the appropriate parties (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) to complete all forms (e.g., national agency check, DD Form 1172) necessary to begin the identity establishment and verification process associated with identity credential issuance. This request may contain (but not be limited to) the name of the individual for whom the request was issued, information regarding the type of identity credential being requested, the necessary forms, and a deadline to complete them.	
Identity Credential Issuance Documents Response	Message Flow	This includes a response to a request for identity credential issuance documents to be submitted. This includes all information and forms necessary to begin the identity establishment and verification process associated with identity credential issuance (e.g., national agency check, DD Form 1172) or a declination to supply the necessary documents.	
Identity Credential Receipt Acknowledgement	Message Flow	This includes information relating to the acknowledgement that the appropriate parties (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) have successfully obtained the identity credential that has been assigned to them and confirmation that they will abide by the Department of Defense regulations applicable to the identity credential. This acknowledgement can be accomplished through an electronic signature using the newly issued identity credential or the signature of the appropriate documents.	
Identity Credential Service Request	Message Flow	This includes information related to a request for services to be performed regarding identity credential management (e.g., identity credential issuance, identity credential maintenance, identity credential revocation). This includes (but is not limited to) the names of the parties involved (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)), the endorsement of the requester or requesting organization, the type of service required and the reason the service is required.	
Identity Credential Service Status Notification	Message Flow	This includes information regarding the status of an identity credential service action that has been requested. This may include (but is not limited to) the name of the parties involved (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)), the type of identity credential being serviced, the status of the identity credential service (e.g., issuance approved, requested changes rejected), a justification of the status and any additional actions the parties must complete.	
IGT Order Status Information	Message Flow		
Implement Solution Budget Request	Message Flow	This is a request for appropriation funding to implement an ESOH solution that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Implementation Rejected	Message Flow	The implementation of emergency case for FMS trust fund has been rejected.	
Individual Human Resources Information	Message Flow	This information is an input into Human Resources Management activities from a person. Examples are travel voucher, family member information, and individual development information.	
Individual Training Course Resource Requirements Information	Message Flow	This includes information associated with resource requirements for Department of Defense (DoD) individual training courses. This information may include (but not be limited to) resources required to deliver the developed individual training course (e.g., funds, equipment, facilities, faculty, and other support personnel).	
Individual Travel Authorization	Message Flow	This is the authorization for physical relocation and related funds obligation of a person in support of DoD business and or operations.	
Insufficient Funds Identified	Message Flow	Insufficient Funds Identified	
Interest Rate	Message Flow	This is the interest rate established by the Department of Treasury as published in the Federal Register. This rate is equal to the current value of funds.	
Interfund Billing	Message Flow	Generated Interfund Billing transactions.	
Interfund Billing Acknowledgement	Message Flow	Automated confirmation from the interfund customer that confirms the receipt of an interfund billing.	
Intragovernmental Order Closure Information	Message Flow	All information related to completion of the government supplier's final intragovernmental order closeout process including all necessary closeout details required. This also includes any adjustments to closure information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Intragovernmental Payment and Collection	Message Flow		
Intra-Governmental Payment and Collection	Message Flow	Document containing the intragovernmental payment and payee information that is passed on to the U.S. Treasury for distribution to the payee.	
Invoice for Goods	Message Flow	A collection of data submitted by a supplier requesting payment from DoD for goods tendered. It describes an amount due for the acquisition of tangible goods as billable events, which includes the pricing including freight, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition.	
Joint Chief of Staff Feedback	Message Flow	The Joint Staff conducts requirements analyses of the POM/PCP and assess the POM/PCPs impact and recommends a response to OSD.	
Joint Chiefs of Staff Feedback Request	Message Flow	A request of the Joint Staff to conduct a requirements analysis and an impact assesment of the POM/PCP and recommends a response to OSD.	
Legal for Review Sent	Message Flow	Message to initiate the review of the not clear title.	
Logistics Order	Message Flow	A validated request for internally sourced goods or services requested by a DoD customer that contains information relative to the source, location, required delivery date, product or service description, and special handling requirements e.g. hazardous materiel, wounded and deceased casualty transport.	
Manpower Document Update Information for New Unit	Message Flow	This includes the organization structure information which is needed when establishing a new unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Reorganized Unit	Message Flow	This includes the organization structure information when there is a reorganization of a unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Updated Unit	Message Flow	This includes the updates to unit information to reflect the redesignating, inactivating, and reactivating of units. The information may include (but not be limited to) unit identifier, position occupation code, and unit position grade authorized strength level (number of positions authorized for a grade within a unit).	
Materiel and Forces Status Information	Message Flow	Information that permits the monitoring of events across a supply chain. It tracks and traces inventory, and forces globally on a line-item/individual level and provides information such as item unique identification, location, and condition.	
Max Data Structure	Message Flow	Format for submitting data into the OMB MAX system to create a new account, process an apportionment, or submit a budget.

Non DoD Threat Assessment Information	Message Flow	Federal Agency or scientific community threat assessment considerations and information.	
Non Receipt of Required Deposit	Message Flow	The required deposit to implement a case for FMS trust fund has not been received or collected.	
Notification of Billing	Message Flow		
Notification of Collection	Message Flow	This is a notification that a collection has been processed. The information could include the associated deposit ticket or debit voucher and the associated cash collection voucher, administrative offsets.	
Notification of Correcting Performance Entries	Message Flow	Notification of pro forma entries consisting of using business information pertaining to anomaly corrections captured during operations to determine the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts).	
Notification of Funds Availability	Message Flow	This is a notification that funds are available or not available for the commitment or obligation request.	
Notification of Insufficient Funds	Message Flow	This includes information associated with a notification that funds are not available for the commitment or obligation request.	
Notification of Loss from Supplier	Message Flow	Contractor notification to the government of loss of government property while in their custody.	
Obligation Request	Message Flow	This is a certified request (includes contract and or order) for funds to be obligated or deobligated.	
Official Congressional Position	Message Flow	Official Congressional decision solicited from the congress stating the position on reprogramming of appropriated funds or the response coming back from Congress as to their position on the Transfer Package.	
OMB Bulletin	Message Flow	Supplements instructions for apportionment of CRAs and applies to any extensions of the CRA.	
OMB Decision	Message Flow	A decision sent from OMB to the Comptroller responding to the request for additional continuing resolution act amount request from the Comptroller.	
OMB Feedback	Message Flow	During the budget review, OMB provides feedback to OSD on the budget estimates submitted by the components. The feedback could be related to the outyear policy and baseline estimates that must be consistent with the economic assumptions provided by OMB. OMB's feedback could also be the enforcement on the compliance of the budget estimates with OMB's policies regarding mandatory and discretionary programs.	
OMB Passback	Message Flow	These are recommended changes to DoD's proposed budget for inclusion in the Presidents Budget. Recommended changes could be based on the outyear policy and baseline estimates that must be consistent with economic assumptions (e.g. inflation).	
Operational Threat Assessment Information	Message Flow	Joint Warfighter threat assessment considerations and information.	
Order Rejected Due to Insufficient Reimbursable Authority	Message Flow		
Organization Level Manpower Document Update Information	Message Flow	Identifies the changes from the current organization level Manpower document. A Manpower document (e.g., Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization structure.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Payment Request	Message Flow	A collection of data submitted by a commercial supplier requesting payment from DoD. It describes an amount due for billable events, which includes the pricing, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition in accordance with the payment provisions of the contract.	
Payment Request Rejected	Message Flow	This information reflects a payment request that has failed one or more aspects of the matching process. The rejected payment request is sent back to the originating source for correction and resubmission.	
Performance Evidence	Message Flow	Information provided to the buyer's receipt and acceptance process that confirms the rendering of services or tendering of goods has been performed, including information for billing, collection and shipment planning. Performance evidence is also used to update the government supplier's asset record, to update goods in transit accounts, and to trigger the suppliers' receivables process for services.	
Performance Information	Message Flow	This is the flow of actual performance data back into the control system so that actual performance can be compared with planned performance.	
Personnel Accounting Information	Message Flow	Information which can be used for cost and performance management, including but not limited to pay, benefits, travel, medical and other personnel expenses.	
Personnel Action Decision Notification	Message Flow	This includes the notification information to reflect the details of a decision made by an Approval Authority on a personnel action. This may include (but not be limited to) notification recipient, notification date, personnel action identifier, and personnel action status.	
Personnel Order	Message Flow	This includes information related to a personnel order. The information may include (but not be limited to) order date, order number, award type, and order type.	
Personnel Order Requirement	Message Flow	This includes information related to an official requirement to generate an order. The information may include (but not be limited to) personnel action status, personnel action start date, and personnel action identifier.	
PHD Workunit Message Flow 4	Message Flow		
PHD Workunit Message_Flow 2	Message Flow		
PHD Workunit Message_Flow 3	Message Flow		
PHD Workunit Message_Flow 4	Message Flow		
PHD Workunit Message_Flow 5	Message Flow		
Plant Clearance Disposition	Message Flow	The disposition of a contractor's request relative to property remaining at the end of contract performance.	
Plant Clearance Schedule	Message Flow	The contractor notification to the government of property remaining at the end of performance of the contract.	
Pre Payment Information	Message Flow	The prepayment information to the seller. This is to notify the seller that a prepayment has been made before goods and/or services are received.	
Pre Solicitation Notice	Message Flow	Notification to the commercial marketplace of an existing or potential requirement.	
Prepaid Expense Adjustment	Message Flow	As resources, for which a prepayment was previously recorded, are consumed, the amount of the prepaid asset is decreased and an actual expense is recorded. The resource consumption may be supported by a periodic journal voucher or an invoice or some other documentation provided by a service provider.	
Prepared Testimony	Message Flow	Prepared testimony are materials required to support the congressional budget review. A testimony could include a witness statement. The witness statement must include the name, grade/rank, and position title of the witness; the full title of the congressional committee or subcommittee before which the witness is to appear; the date the witness is to testify; the subject of the hearing. A biographical sketch of the witness should be included in the witness statement.	
President's Management Agenda	Message Flow	The President's Management Agenda consists of the administration's strategy for improving the management of the Federal government. It focuses on five areas of management weakness across the government where improvements and the most progress can be made.	
Procurement Change Request	Message Flow	A request for modification to a sourced requirement.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Procurement Instrument Closure Information	Message Flow	All information related to completion of the buyer's final procurement instrument closeout process including, but not limited to, closeout details and requesting decummitments, if necessary. This also includes any adjustments to closure information.	
Procurement Instrument Execution Information	Message Flow	Data received from the supplier during the monitoring of contract processes based on the execution of services or providing of products stipulated in a contract, used to assess supplier performance and contract status.	
Procurement Instrument Execution Information from External	Message Flow	Information from external sources such as audits (e.g. DCAA). Used in evaluating the vendor performance on the current contract.	
Product Information Response	Message Flow	Product information sent by the identified source (eg. manufacturer, supplier or vendor) in response to a DoD request to the source for needed product hazard data (PHD).	
Program and Funding Document	Message Flow	The Program and Funding Document is the plan establishing the authorized appropriation funding for an agency during a specified period of time, specifying the program guidelines and changes in authorized funding for the agency.	
Project Approval Request	Message Flow	Design Approval Request	
Project Approval Response	Message Flow		
Project Cancellation Cost	Message Flow	This message represents costs associated with the cancellation or non approval of a design or construction project by the U. S. Congress. Design and construction costs are accumulated in the construction in progress account. At the required design or construction approval step, if the project is not or no longer approved by the U.S. Congress, all associated costs captured in the construction in progress account are relieved and expensed.	
Proposal	Message Flow	A legal offer from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided. For sole source, this includes cost or pricing data.	
Public Draft Request for Proposal	Message Flow	This is a draft request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been made public for comment. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Purchase Card Holder Information Request	Message Flow	This is a request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) request date and time, requested information, and requestor name.	
Purchase Card Holder Information Response	Message Flow	This is a response to an information request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) response date and time and member's or government civilian's information.	
Purchase Card Transactions	Message Flow		
Purchase Investment Request	Message Flow	Request sent to from the Department to the U.S. Treasury initiating the purchase of an investment in Treasury securities.	
Quadrennial Defense Review	Message Flow	The Quadrennial Defense Review (QDR) is DoD's major statement of defense strategy and business policy. The purpose of the QDR is to produce fiscally constrained programmatic guidance to accomplish the National Military Strategy and the defense goals during the Quadrennial Defense Review.	
Real Property Asset Condition Update	Message Flow	This is information concerning the current condition, physical, and/or quality, of an existing real property asset with regard to the mission it supports.	
Real Property Asset Valuation Information	Message Flow	The value of the asset, which includes original acquisition cost, depreciation/amortization expense, gain/loss on disposal, net realizable value, cost of capital improvement.	
Real Property Installed Equipment Recovered Notification	Message Flow	This is equipment that is recovered from a real property asset during a disposal event. This equipment or materiel is either returned back into logistics inventory for re-use or sold.	
Real Property Operation Ceased Notification	Message Flow	Information that a real property asset has been identified as closed with an excess declaration and disposal action to be processed.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Real Property Outgrant Evidence	Message Flow	Real property asset agreement or contract information (easement, lease, license, permit or use agreement) that documents the use of a Department of Defense managed real property asset to either a government agency or private entity for a specified consideration (rent or other remuneration).	
Real Property Outgrant Executed Notification	Message Flow	A real property asset agreement or contract information that documents the use of a Department of Defense managed real property asset to either a government agency or private entity for a specified consideration exists.	
Real Property Outgrant Payment Received	Message Flow		
Real Property Placed in Service Notification	Message Flow	Notice that an asset has been placed in service and is available for use.	
Real Property Purchases, Ingrants and Leases Evidence	Message Flow		
Rebaseline Report	Message Flow	Rebaseline report that incorporates components feedback for submission to the congress for approval. Once this rebaseline report is approved, a new baseline report will be generated.	
Receipt Account Trial Balance and Ledgers	Message Flow	Contains detailed receipt transaction and balances reported by the DoD Component during the month. Discloses information related to balance forwarded, current month receipts and month end account totals; Shows receipt balances by fund account symbol and department. Shows collections and or deposits of funds in accounts that are not immediately available for expenditure.	
Recommendation on Export Request	Message Flow	This is the recommendation to Department of Commerce or the Department of State regarding the request for the export of DoD technology.	
Recovered Property Information	Message Flow	This is information on property that has been recovered during a disposal action (e.g., demolition). This may include disposition of recovered real property installed equipment such as a Heating, Ventilation, and Air Conditioning (HVAC) system.	
Referral Debt	Message Flow	This is the referral of debts to external sources for collection action. This includes referral of uncollected debts to Department of the Treasury, Department of Justice or private collection agencies.	
Reimbursable Bill	Message Flow	Based on the billing requirement, a portion of an intra-governmental customer's outstanding receivable may be eligible for reimbursable billing. The reimbursable bill is a request for payment for specific goods or services provided.	
Reimbursable Billing	Message Flow		
Rejected Purchase Request	Message Flow	Document which has been reviewed by the procurement organization and found to not adequately describe the required supplies or services for a procurement to be initiated.	
Rejection of Goods or Services Notice	Message Flow	Notification that goods or services have not been accepted.	
Replenishment Stock Request	Message Flow	Demand that is generated at that point at which a stock replenishment requisition shall be submitted to maintain the predetermined or calculated stockage objective. For demand-based computations, the reorder point equals the sum of the safety level of supply, the level for ordering and shipping time, repair-cycle level (for reparable items), and authorized additive levels.	
Reprogramming Action	Message Flow	Realignment of budget authority from the purpose for which appropriated to finance another (usually emergent, unfunded) requirement. A necessary, desirable, and timely device during exaction of Defense programs for achieving flexibility in the use of DoD funds provided in appropriation acts.	
Reprogramming Package	Message Flow	Describes the Agency's requests and justifications to move funds among programs and may include more than one reprogramming.	
Reprogramming Request	Message Flow	Reprogramming request sent to OMB to realign funds from one program to another.	
Reprogramming Request Response	Message Flow	OMB's response on the department's reprogramming request.	
Request Cancellation	Message Flow	Notification provided to the customer that the cost performance manager is currently unable to satisfy the requirements outlined in the customer's Cost Information Request.	
Request for Additional Continuing Resolution Act Amount	Message Flow	A request for additional continuing resolution act amount sent to OMB for review and comment.	
Request for Administrative Offset	Message Flow	This is a request for administrative offset against amounts payable to indebted parties. This would be a salary offset for employees or an administrative payable offset for vendors.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Request for Disposition	Message Flow	A request for an inquiry into the terms and conditions of the contract and a request to receive weapons systems lifecycle guidance to determine if returns or disposals are warranted and to receive final settlement instructions.	
Request for Emergency Implementation of Case in the FMS Trust Fund Case	Message Flow	A request justifying the need to implement a case in the Foreign Military Sales Trust Fund when the case is in an accepted status but the amount due has not yet been received.	
Request for FYDP Information	Message Flow		
Request for Increased Reimbursable Authority	Message Flow	A request for an increase of budgetary reimbursable authority to allow the government supplier to enter an intragovernmental transaction.	
Request for Non DoD Threat Assessment Information	Message Flow	This is a request for threat assessment considerations and information from Federal Agency or scientific community.	
Request for Operational Threat Assessment Information	Message Flow	This is a request for threat assessment considerations and information from Joint Warfighter.	
Request for Proposal	Message Flow	A request for a legal offer from the supplier to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided.	
Request for Refund	Message Flow	Request for a refund payment to DoD due to overpayment or erroneous payment.	
Request for Supplemental Industry Information	Message Flow	This is a request for additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Request to Sell Investment	Message Flow	Request sent from the Department to the U.S. Treasury initiating the sale of a Department owned Treasury security.	
Rescission Language	Message Flow	The language used to complete the rescission report such as OMB identification code, agency and rescission proposal number.	
Rescission Proposals	Message Flow	Proposal for rescission of appropriated budgetary resources to be withheld from availability.	
Rescission Report	Message Flow	A rescission report to be submitted to OMB for inclusion on the President's special message to Congress regarding proposed rescission.	
Research Information	Message Flow	This is information resulting from internal DoD research for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services or identified as a result of an internal study. Examples of research include medical or human resources studies. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Research Information External	Message Flow	This is information from external sources for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Response from Legal	Message Flow	Message received resulting from the outcome of the Legal reviews of the not clear title.	
Response to Congressional and Federal Inquiry	Message Flow	This is the response to a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Responsive Proposal	Message Flow	A timely, responsive proposal from an offeror as defined in Federal Acquisition Regulation (FAR).	
Return or Disposal Request	Message Flow		
Return to Contract for Liquidated Damages	Message Flow	Message was sent to Contract to process Liquidated Damages.	
Returned Payment Notice	Message Flow	This is a notification from the disbursing activity to the originating entitlement activity that a previously issued payment has been returned and the reason(s) why. This is a notification from disbursing to a functional area that a payment has been returned from a financial institution. The payment was returned for at least one of the following reasons: invalid account number, invalid routing transcript number, account closed, or rejected by payee.

RPA_Message_Flow_5	Message Flow		
RPA_Message_Flow_6	Message Flow		
RPA_Message_Flow_7	Message Flow		
RPA-MV_Message_Flow_8	Message Flow		
Sales Reimbursement Information	Message Flow	This is reimbursement information from the sale of goods or services (e.g., commissary receipts, training).	
Secretary of Defense's Joint Programming Guidance Decision	Message Flow	The SECDEF's review and approval of the Joint Programming Guidance.	
Seller Profile	Message Flow		
Senate Appropriation Committee Report	Message Flow	The U.S. Senate Committee on Appropriations is a standing committee of the United States Senate. It has jurisdiction over all discretionary spending legislation in the Senate. The Senate Appropriations Committee is the largest committee in the U.S. Senate, consisting of 28 members. Its role is defined by the U.S. Constitution, which requires appropriations made by law prior to the expenditure of any money from the Treasury, and is therefore one of the most powerful committees in the Senate.	
Separated or Terminated or Transferred Individual Debt Information	Message Flow	This is information required to support a DoD Human Resources collection action on a delinquent person whose affiliation has been separated or terminated from Department of Defense or transferred to another federal entity. This information regards a dollar amount owed to the Department of Defense (e.g., this occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid, or has any other outstanding debt).	
Service Procurement Request	Message Flow	A document which describes the required services so that a procurement or a request for quote can be initiated.	
Shared_Message_Flow_1	Message Flow		
Shared_Message_Flow_2	Message Flow		
Shared_Message_Flow_3	Message Flow		
Shipping Status	Message Flow	Advanced notification regarding shipments from a distribution location or storage activity (i.e., advance shipping notice).	
Sourcing Planning Information Request	Message Flow	A sources sought synopsis for market research purposes only containing the buyer's planning requirements and needs. This does not reflect a commitment by the buyer to issue a request for proposal, award a contract or otherwise pay for the information provided in response to the synopsis.	
Sourcing Planning Information Response	Message Flow	Information provided by suppliers in response to Sourcing Planning Information Request (RFI) made by the DoD buyer for planning requirements or needs, including pricing, quantity, schedule and performance information.	
Stakeholder Input	Message Flow	This is input from groups such as a community advisory board, external stakeholders or other public groups as mandated by regulation.	
Statement of Accountability	Message Flow	Used to determine the accountability of foreign disbursing officers (United States Disbursing Officers) for funds held outside Treasury. Statement of Accountability provides Treasury with the information related to foreign currency transactions.	
Statement of Differences	Message Flow	The Department of Treasury produces Statement of Differences to identify differences between deposit and disbursement data. Treasury identifies these differences by comparing Statement of Transaction and Statement of Accountability data reported by agencies to data reported by financial institutions, regional finance centers and through Treasury's Government Online Accounting Link System Online Payment and Collection system.	
Stop Payment Notification	Message Flow	This is a message from the US Treasury confirming that a stop payment has occurred.	
Subscription Source Message	Message Flow	Product hazard data (PHD) received from an identified non-DoD external alternate source.	
Subscription Source Request	Message Flow	The request that is sent to the identified non DoD external source (eg. manufacturer, supplier or vendor) for needed product hazard data (PHD).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Supplemental Appropriation Act	Message Flow	An emergency adjustment to the current year appropriation act; usually for national defense contingencies and natural disaster emergencies.	
Supplemental Industry Information	Message Flow	This is the submission of additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Supplemental Information Request	Message Flow	This is the request for additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplemental Information Response	Message Flow	This is the submission of additional information or clarification required for programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings.	
Supplier Information	Message Flow	The collection of supplier information required to manage the supplier relationship and determine if a supplier is authorized to do business with the DoD.	
Supplier Planning Information	Message Flow	Planning data provided by the Supplier in response to Buyer Planning Information sent to the Supplier. It is used to support the development or refinement of a sourcing plan. This includes information on requirements, performance specifications, pricing, and quantities and is more detailed than general market research and could be proprietary.	
Supply Request	Message Flow	A request for supply support from any Component distribution system and from the GSA for requisitioning, issuing, lateral redistribution, and returning of DoD materiel.	
Tabled Requirements Notification	Message Flow	Notification sent to the customer that the proposal for the new requirements has been set aside due to questions and or concerns and needs to be re-examined.	
Time and Attendance Information	Message Flow	This is a person's number of hours worked, attendance, and leave information for a specific pay cycle.	
Transaction Confirmation	Message Flow	Treasury confirmation of purchase/sale/redemption of Marketable, Non-marketable and Market Based securities held by DoD components.	
Transfer of Government Property	Message Flow	Notification that government property in the custody of a contractor has been transferred to the government, to another contractor location or to a new contract.	
Transfer Package	Message Flow	Prepared transfer Package forwarded to Congress for legislation action. Also, submit package to subsequent step awaiting Official Congressional Position.	
Transfer Request	Message Flow	Transfer request to move budget authority from one Treasury account to another.	
Transfer Request Response	Message Flow	Finalizing transfer with OMB and prior to beginning preparation of for submission to Congress.	
Transfer Requirement	Message Flow	A Transfer Request originates either outside DoD (executive branch) or within DoD. It is a request to reduce budgetary resources (budget authority and unobligated balances) in one account and increase them in another, by the same amount.	
Treasury Certificate	Message Flow	Certificate of ownership of Marketable, Non-marketable and Market Based securities held by DoD components.	
Treasury Offset Request	Message Flow	This process aids the Treasury Offset Program (TOP) in matching delinquent debtor files against payment files. When a match occurs, the payment is intercepted and the debt is offset up to the amount of the debt plus assessed administrative fees. Under the Treasury Offset Program, delinquent accounts are subject to administrative offset of United States Government funds due individuals from various sources such as Federal Income Tax refunds, federal salary offset, and payments from other Government agencies.	
Treasury Warrant	Message Flow	The Treasury warrant is a financial control document, issued after enactment of the Appropriation Act by the Treasury Department. This document is the basis for reporting cash on the books authorized to be withdrawn from the central account maintained by the Treasury, essentially maintaining the bottom line for all appropriations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Trial Balance Data and Statement of Transactions	Message Flow	The Trial Balance is the accumulation of all financial and accounting transactions captured in General Ledger Accounts that represent the financial position of the organization at any point in time, to include aging reports. This is the logical representation of the Trial Balance that is reviewed, certified and published. The US General Ledger is the structure used in posting the Trial Balance and also includes subsidiary ledgers. In the context of Managing Execution with Treasury, the trial balance and its supporting subsidiary records is intended to represent the single source of collections and disbursements recorded by DoD.	
Unapproved Proposal Notification Sent	Message Flow	Notification sent to internal customer when proposal has been not been approved.	
Undisbursed Appropriation Account Ledger	Message Flow	Financial Management Service (FMS) provides this document for expenditure accounts that have monthly activity. FMS provides information about the appropriation warrants issued, non-expenditure transfers, and transactions reported by agencies on the Statement of Transactions.	
Unique Item Information	Message Flow	Information provided by the vendor, program manager, or item manager about an item which includes item description, Unique Item Identifier (UII), original acquisition cost, and embedded item information. It is used to enable asset management, accountability, and valuation either as an update to the asset record or the creation of the initial asset record, based on receipt or a conditional update of the item.	
Unsolicited Product Information	Message Flow	Product information received from an external non-DoD source (eg. manufacturer, supplier, vendor) pertaining to a product that contains hazardous material. The product information has not been requested by the DoD.	
Updated Detail Justification Material	Message Flow	Updated President's budget numbers in line item detail, both at direct and reimbursable level. These materials also include the update or adjustments or new justification materials to support DoD's budget submissions. It should include program performance indicators and goals, any proposed policies and strategies along with the amount of mandatory and discretionary spending. The justification should include personnel requirements, its relationship to the President Management Agenda, and additional funding needs in excess of the budget.	
Wage Determination Information Received	Message Flow	This is the salary information for an official contract, based on the Service Contract Act (SCA) and the Davis-Bacon Act (DBA).	
WIP Account Relieved	Message Flow	This message is the result of the recording of the WIP financial transaction.	
Wire Transfer File	Message Flow	File contains information that is provided to the U.S. Treasury for the wire transfer transaction. Information could include payee's name, bank account and routing number, amount of transfer, and transaction date.	
Withdraw Funds Information	Message Flow	Information sent to the Treasury regarding the line item amount to be withdrawn from the agency's appropriation.	
Work Request	Message Flow	This is a request for a contract or order that will be awarded to a supplier/contractor and will be a mutually binding legal relationship obligating the supplier to furnish the supplies or services (including construction) that can be invoiced, and the buyer to pay for them. It will include all types of commitments that obligate the DoD to an expenditure of appropriated funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, contracts include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. The contract will contain at least the following: price, quantity, delivery date, ship to, bill to other terms and conditions, specification and charge code. Contracts or orders could include Fixed-price, Cost-reimbursement, Incentive, Grants, Cooperative Agreements, Other Transactions, Interagency Procurements Under the Economy Act, Intraagency order, Indefinite-Delivery type orders, orders against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules.	
Workforce Occupational Safety Issue Communication	Message Flow	A communication to responsible authorities that an issue of actual or potential Occupational Safety concern exists. The communication may refer to a set of circumstances of interest to the ESOH community or may be a request for a process authorization. The communication will generally be identified as a result of an internal study or inspection. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Workforce Occupational Safety Issue Information	Message Flow	Information about an issue of actual or potential Occupational Safety concern. This information provides interim guidance for human resource planning while the identification and assessment of an ESOH aspect is underway. This information will be replaced with the ESOH Control Requirement once the ESOH Control Agreement is reached.

WSLM - MSSM	Need Line	This Need line represents the requirement to exchange information between the WSLM and MSSM Operational Nodes.	
WSLM - WSLM	Need Line	This Need line represents the requirement to exchange information between the WSLM and WSLM Operational Nodes.	
Accept Goods and Services	Operational Activity	This activity includes an acknowledgement by an authorized official that goods tendered and services rendered conform with contract requirements, at which time government takes ownership and triggers asset valuation and accountability.	
Accept Other Property and Services	Operational Activity	This activity includes an acknowledgement by an authorized official that goods tendered and services rendered, not including real property, conform with contract requirements, at which time government takes ownership and triggers asset valuation and accountability.	
Accept Real Property	Operational Activity	This activity accepts real property and the associated capital costs into the DoD real property inventory. It ensures compliance with all real property acceptance criteria. Steps in this activity include: inspect and verify the property; identify deficiencies, make determination of acceptability, collect and validate real property documentation such as as-build drawings and warranty information; sign and certify evidence of acceptance.	
Account for Full Time Support	Operational Activity	This activity is associated with ensuring that reserve positions are in the proper program elements based on funding allocation. Full-Time Support (FTS) Personnel: Active Guard/Reserve (AGR) includes training and administration of Reserves, Marine Corps Active Reserve (AR), Coast Guards (Reserve Program Administrator (RPA) and/or AGR) and all other Reserve or National Guard personnel serving on Active Duty (AD), other than Active Duty for Training (ADT), including statutory tours and full-time National Guard duty, in Active Component (AC) and Reserve Component (RC) organizations.	
Account for Personnel	Operational Activity	This activity is associated with accounting for time, absence, and labor, performing leave and absence administration, and managing personnel casualty and Line of Duty (LoD) determination process.	
Account for Programmed Manpower	Operational Activity	This activity is associated with ensuring that authorized military and civilian positions are in the proper program elements based on funding allocation. This activity also includes accounting for special manpower categories (e.g., controlled grades, major headquarters, Defense Health Program (DHP), programmed manager Manpower (special Ops), healthcare, transportation working capital fund, and intelligence).	
Account for Time, Absence, and Labor	Operational Activity	This activity is associated with recording, adjusting and certifying time worked, and absence information. Time, absence, and labor is used for exception reporting of Military personnel on active duty (i.e., time worked and labor are not recorded and absences (as appropriate) are recorded) and is used for positive reporting and certifying time of reserve personnel serving on inactive duty. Note: For Military personnel, labor hours are used to account for hours worked against a job code, not to determine wages. This activity is also associated with scheduling employees, attesting attendance data, managing usage of leave and paid time off, and certifying employee attendance data.	
Account for Workforce	Operational Activity	This activity is associated with assessing and maintaining the current force structure against the projected needs for that same year and ensuring that the current force structure is within a certain percent of the projected target. Activities include recording and maintaining the current and historical actual strength of a Department of Defense (DoD) Component to include all status information essential for personnel management and force readiness determination.	
Activate Unit	Operational Activity	This activity is associated with mobilizing or activating a unit.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Adjust Manpower Requirements Based on Priority List	Operational Activity	This activity is associated with reprogramming requirements based on the budget decision.	
Adjust Time, Absence, and Labor Information	Operational Activity	This activity is associated with adjusting time, absence, and labor information based on errors or modifications of proposed events (e.g., canceling leave that has yet to be executed). These adjustments can be for future leave periods already documented and current or past periods of time.	
Administer Assignment Action	Operational Activity	This activity is associated with administering an assignment action. This activity also includes determining an assignment action, submitting an assignment action request, performing assignment screening, and providing assignment action decision activities.	
Administer ASVAB Testing	Operational Activity	This activity is associated with verifying positive identification of the applicant, determining if applicant information is complete, requesting additional information if necessary, administering the Armed Services Vocational Aptitude Battery (ASVAB) test, and updating the applicant profile with the ASVAB test results.	
Administer Correction of Military Human Resources Record	Operational Activity	This activity is associated with managing all aspects of requests to the Secretary of a Military Department to correct an error within, or remove an injustice from, a military record. Corrections will be made under the procedures established by the Secretary concerned and includes information associated with notifying the person who submitted a military record correction request of the decision by the Military Department's Secretary.	
Administer Enlistment Process	Operational Activity	This activity is associated with counseling applicants on the opportunities and incentives to enlist, reviewing enlistment agreement, making a decision on enlistment agreement, and documenting the counseling session and accession agreements (e.g., pay, benefits, and length of enlistment).	
Administer Financial Assets and Liabilities	Operational Activity	The activity to identify, classify, value and manage financial (fiscal) assets to include accounts receivable and liabilities to include accounts payable from acquisition or inception to disposal or liquidation.	
Administer Grievance Process	Operational Activity	This activity is associated with initiating, processing, resolving and documenting a formal complaint related to co-worker/peer or management actions in regard to an Employee or Member (e.g., administrative grievances, sexual harassment complaints and Labor / Union grievances). This activity may include (but not be limited to) determining the type of grievance, and providing a resolution on the grievance. This activity is also associated with requesting accommodation, determining accommodation needs, and putting reasonable accommodations into place.	
Administer Human Resources Recovery Care Plan	Operational Activity	This activity is associated with collecting information (e.g., needs assessment, enrollment information, and services) and identification of the recovery team members who will provide the services to develop a Human Resources (HR) recovery plan for Recovering Service Members (RSM) enrolled in the Recovery Coordination Program (RCP). This activity also includes coordinating with service providers (e.g., family support, Veterans Affairs (VA), and transition programs) to provide assistance to a RSM, authorizing Recovery Plans prior to dissemination, and updating an existing Recovery Plan to reflect changes to a Needs Assessment.	
Administer Inter-Service Transfer	Operational Activity	This activity is associated with the administration of an Inter-Service transfer (e.g., a transfer from Army to Marine Corps). This activity may also include (but not be limited to) reviewing an Inter-Service transfer request, making a decision on the transfer, and executing the transfer.	
Administer Intra-Service Transfer	Operational Activity	This activity is associated with the administration of an Intra-Service transfer (e.g., a transfer from a Regular component to the Reserves, transfer between Reserve Categories (e.g., Ready Reserve, Standby Reserve, Retired reserve), or transfer from a Regular component to the National Guard). This activity may also include (but not be limited to) reviewing an Intra-Service transfer request, making a decision on the transfer, and executing the transfer.	
Administer Involuntary Enlistment Extension	Operational Activity	This activity is associated with determining the Members for involuntary enlistment extensions, counseling involuntary enlistment extension Members, and processing any involuntary enlistment extension waiver requests.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Administer Labor Agreements	Operational Activity	This activity is associated with implementing agreement provisions within the organization, providing training on contract details, attempting to resolve implementation issues, and collecting input on administration of agreement issues to ensure management compliance with terms of the contract. This activity is also associated with filing with a third party, engaging in discovery, preparing a response to third party filing, participating in alternative dispute resolution, participating in hearing or meeting or trial, appealing third party decision, and implementing third party decision or settlement.	
Administer Legal Personnel Programs	Operational Activity	This activity is associated with managing resolution facilitation and the administration of adverse action (judicial and non-judicial) for persons within Department of Defense's (DoD) legal oversight. Resolution facilitation refers to those person-related activities outside of a court of law such as mediation and arbitration that may be used in an attempt to settle a dispute between two or more parties (government agency, citizen, corporation). Adverse actions can be based upon misconduct, unacceptable performance or both that can lead to legal actions and non-disciplinary actions such as medical inability to report for duty, separation, or furlough that can lead to administrative actions.	
Administer Organization Unique Identifier	Operational Activity	This activity is associated with reviewing a request for an Organization Unique Identifier (OUID) for authorized/funded organization, determining the organization type (e.g., identification of organization category, organization information and data and relationships), determining if a seed is needed, and assigning and publishing an OUID. This activity also includes providing a notification if there is an existing OUID. Organization Unique Identifiers (OUIDs) are used to uniquely identify all Department of Defense organization categories (i.e., doctrinal, billets, crews, garrison, and augmentation) defined by Global Force Management Data Initiative.	
Administer Performance Evaluation	Operational Activity	This activity is associated with managing the evaluation process to include the identifying of personnel due for performance evaluation and raters that will provide their input to the individual's performance evaluation, tracking and submission of evaluation rendered on personnel to reflect performance, training progress and potential for promotion, explaining performance standards, providing written and verbal performance feedback, and closing out the process by maintaining performance files and updating performance evaluation information.	
Administer Performance Program	Operational Activity	This activity is associated with establishing the policies, procedures, and guidance for performance management programs.	
Administer Personnel Grade Change	Operational Activity	This activity is associated with managing the eligibility, validating, authorizing, generating the personnel grade change order, executing, and documenting the promotion or demotion processes.	
Administer Physical Fitness Program	Operational Activity	This activity is associated with aiding commanders in the development, implementation, evaluation, and maintenance of physical fitness programs. Included within the program is ensuring that adequate resources (e.g., personnel, equipment, and facilities) are provided, assessing the Member's physical condition and readiness (APFT, etc.), and placing the Member in an alternate fitness program if necessary, documenting the performance of the Member, coordinating medical programs (e.g., physical therapy, rehabilitation, and determination of limitations), providing written and verbal feedback on Member performance and methods for improvement, and updating of a Member's physical aptitude profile.	
Administer Position Management	Operational Activity	This activity is associated with the formulation of specifications for peacetime authorizations and wartime requirements needed to accomplish tasked Department of Defense (DoD) missions. This includes the occupation, skill, position requirements, education, and training specifications that the position requires to perform the specified mission.	
Administer Procurement Instrument or IGT Order	Operational Activity	Administer Procurement Instrument or IGT Order is composed of monitoring the contract, Intragovernmental (IGT) Order, agreement or order to ensure that a supplier is meeting requirements in accordance with the terms and conditions of the procurement instrument for providing goods/services and performing the administration activities from award to physical completion including change request management and vendor performance evaluation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Administer Promotion Appeal	Operational Activity	This activity is associated with appealing a promotion decision to include a Member's appeal package (package includes the appeal document and any other supporting documentation), approving or disapproving the appeal, and recommending a special selection board if necessary. This activity also includes notifying the appropriate parties of the appeal decision.	
Administer Recognition Program	Operational Activity	This activity is associated with administering awards, decorations, and special recognition programs to include individual, unit/organizational, and special recognition awards.	
Administer Reenlistment Process	Operational Activity	This activity is associated with determining reenlistment Candidates, processing reenlistment requests, and executing reenlistment agreements.	
Administer Special Purpose Testing	Operational Activity	This activity is associated with administering a special purpose test, updating the applicant profile with the special purpose test results, and notifying the Service of the special purpose test results.	
Administer Transfer between Military Personnel Classes	Operational Activity	This activity is associated with changing a Member's class from Enlisted to Commissioned/Warrant Officer class, or a Commissioned/Warrant Officer to an enlisted class. This activity also includes managing the initial request to become a Commissioned/Warrant Officer, the concurrence or nonconcurrence of the request, and the updating of personnel records once the personnel status has changed.	
Administer Transfer To and From Active Duty	Operational Activity	This activity is associated with transferring the Members of a Reserve Component unit to or from active duty (e.g., court martial proceedings, training, Commander directed drug testing, deployment). This includes bring a Member to a state of readiness for war or other national emergency. This activity may also include (but not be limited to) validating active duty tour information, conducting active duty tour processing, completing active duty tour processing checklist, and updating Member profile with active duty tour information.	
Administer Voluntary Enlistment Extension	Operational Activity	This activity is associated with submitting voluntary enlistment extension requests, processing voluntary enlistment extension requests, and processing any voluntary enlistment extension appeals.	
Align Supply Chain Unit Plan with Financial Plan	Operational Activity	The process of revising the long-term supply chain capacity and resource plans, given the inputs from the strategic and business plans. This includes revision of not only aggregate forecast and projections related to supply chain, source, make, and delivery plans, but also business assumptions.	
Allocate Funds	Operational Activity	This activity distributes funding and authority to the appropriate Services and Agencies.	
Allocate Manpower	Operational Activity	This activity is associated with allocating/reallocating approved manpower requirements based on category, program, and quantity.	
Analyze Education Course Evaluation	Operational Activity	This activity is associated with gathering and analyzing instructor and student evaluations of education courses after completion of each course for perceived short falls/requirements adjustments and proposed modifications.	
Analyze Grievance	Operational Activity	This activity is associated with reviewing a grievance, along with any supporting documentation, determining if the grievance contains adequate information, conducting an inquiry if necessary, determining the type of grievance (e.g., request for assistance, issue, complaint, or allegation) and who has the appropriate jurisdiction to resolve the grievance, determining if the grievance should be dismissed, and documenting the information captured.	
Analyze Technical Requirements	Operational Activity	This activity analyzes operational requirements to determine functional requirements for a system, the environment in which it must operate, and the interface and interchangeability requirements.	
Apply the Defense Acquisition Management Framework	Operational Activity	This activity manages the simplified and flexible management framework for translating mission needs and technology opportunities, based on approved mission needs and requirements, into stable, affordable, and well-managed acquisition programs that include weapon systems and automated information systems (AISs). (DODI 5000.2)	
Approve Travel Funds Availability	Operational Activity	This activity is associated with approving the obligation of funds to authorize a travel request for temporary or Permanent Change of Station (PCS) travel. The approved obligation will be sent to Financial Management.	
Approve Travel Voucher	Operational Activity	This activity is associated with approving and certifying travel expenses and receipts on a travel voucher by an authority/certifying official.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assemble and Marshal Forces	Operational Activity	This activity brings together people, supplies, and equipment in preparation for final movement, and establishes and positions support functions to expedite and control the movement and throughput of the force through the deployment pipeline. (JP 3-35 Annex A to Appendix B) This activity uses information from the transportation schedule to produce shipping documentation used to execute the actual transportation of forces to the scheduled destination.	
Assess and Aggregate Return Requirements	Operational Activity	The process of identifying, evaluating, and considering, as a whole with constituent parts, all sources of demand for the return of a product.	
Assess Beneficiary Health Status	Operational Activity	This activity is associated with determining the beneficiary's health, functional, and risk status using an issues-based approach. This assessment of health status is both on going and episodic. The health risk assessment tool is a standardized health questionnaire completed by each beneficiary on entry, and risk level is determined by population health studies.	
Assess Benefit Programs	Operational Activity	This activity is associated with gathering feedback information, evaluating the benefit programs, identifying establishment or disestablishment of benefit programs, and documenting issues and reporting information to appropriate parties for resolution.	
Assess Commissioning Program Eligibility	Operational Activity	This activity is associated with determining if a Member meets minimum eligibility requirements to be considered for admission into a commissioning program. This activity is also associated with evaluating any submitted waivers.	
Assess Contractor Methodology	Operational Activity	This activity assesses demonstrated process capability and organizational maturity in a contractor's systems engineering and production processes commensurate with the needs of the program.	
Assess Delivery Performance	Operational Activity	The process of defining the requirement and monitoring the performance of the delivery of product to a customer. When physical delivery is out-sourced the performance is passed on to source for contract administration.	
Assess Effectiveness of Access to Care	Operational Activity	This activity is associated with identifying key performance measures and performance standards, measuring the current operating performance along the indicators of quality, cost, and cycle time, and improving access to care processes and practices.	
Assess Eligibility for Separation	Operational Activity	This activity is associated with validating a Voluntary or Involuntary Separation Request, along with any supporting documentation (e.g., waivers, proof of eligibility for a specific separation action), and determining eligibility for separation based on pre-established regulatory criteria and the Member's qualifying information. This activity is also associated with identifying a Member approaching the end of their service obligation for voluntary separation, identifying a Member for separation based on reduction of force criteria, and updating a separation profile with eligibility information.	
Assess ESOH Risk	Operational Activity	This activity assesses the health, safety, ecological, or cultural risk posed by the ESOH aspect under consideration. Risk is defined as the possibility of a hazard causing suffering, harm or loss. This activity takes the identified ESOH aspect or issue (e.g., ground water plume, paint shop operations, sound exposure) and determines the level of risk associated with the hazard. The risk finding is based on factors such as severity, probability, and availability of pathways, contaminants, or receptors.	
Assess Human Resources Recovery Care Program Needs	Operational Activity	This activity is associated with assessing the Recovering Service Member (RSM) information (e.g., enrollment information, identification of needs, and Family Support information) to determine the Human Resources (HR) Recovery Coordination Program (RCP) Needs Assessment.	
Assess Physical Fitness Program	Operational Activity	This activity is associated with assessing the Service physical fitness body fat and health promotion programs and providing an annual physical fitness report.	
Assess Progress Against Individual Development Plan	Operational Activity	This activity is associated with measuring skills attained (e.g., via testing, on the job performance, employee and manager feedback) and progress made against the Individual Development Plan.	
Assess Quality of Life Program	Operational Activity	This activity is associated with assessing the effectiveness of a Quality of Life (QoL) program. This includes evaluating a QoL program according to a number of factors (e.g., how well it complies to standards, achieves mission effectiveness, usage, use of funding, personnel or other assets), reviewing and providing feedback on QoL program standards, and generating QoL program information or reports.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Assess Retirement Eligibility	Operational Activity	This activity is associated with determining if a Member has satisfied retirement eligibility criteria, or has been identified to be mandatorily retired (e.g., being passed over twice for promotion, adverse actions, medical (e.g., temporary/permanent disability), years of service and/or age, and retirement points), evaluating waivers, modeling various retirement scenarios (e.g., final retirement pay or grade based on a given retirement date), and subsequently notifying the Member of their retirement eligibility.	
Assess Supplier Performance	Operational Activity	The process of measuring actual supplier performance against internal and/or external standards, providing feedback to achieve and maintain the performance required to meet the customers' business and/or competitive needs.	
Assign Individual Occupation Classification	Operational Activity	This activity is associated with reviewing sources of input, to include (but not be limited to) aptitude testing scores, medical examination results, and waivers to classify an individual with an occupation classification.	
Assign Organization Unique Identifier	Operational Activity	This activity is associated with assigning an Organization Unique Identifier (OUID) for authorized/funded organization. This is used to uniquely identify all Department of Defense organization categories (i.e., doctrinal, billets, crews, garrison, and augmentation) defined by Global Force Management Data Initiative. This activity also includes notifying a requesting organization that an OUID exists.	
Authorize Defective Product Return	Operational Activity	The process where the last known holder or designated return center receives a defective product return authorization request from a customer, determines if the item can be accepted and communicates decision to the customer. Accepting the request would include negotiating the conditions of the return with the customer, including authorizing return replacement or credit. Rejecting the request would include providing a reason for the rejection to the customer.	
Authorize Excess Product Return	Operational Activity	The process where the designated return center receives an excess product return authorization request from a customer, determines if the item can be accepted and communicates their decision to the customer. Accepting the request would include negotiating the conditions of the return with the customer, including authorizing credit or cash discount. Rejecting the request would include providing a reason for the rejection to the customer.	
Authorize Human Resources Recovery Care Plan	Operational Activity	This activity is associated with reviewing and authorizing the recovery care plans prior to dissemination of information to the service providers. This also includes identification of the Recovery Care Team Members, who will provide the services for Recovering Service Members (RSM).	
Authorize Maintenance, Repair and Overhaul Product Return	Operational Activity	The process where a service provider receives an Maintenance, Repair and Overhaul product return authorization request from a customer, determines if the item can be accepted for Maintenance, Repair and Overhaul and communicates their decision to the customer. Accepting the request would include negotiating the conditions of the return with the customer, including authorizing return replacement or credit. Rejecting the request would include providing a reason for the rejection to the customer.	
Authorize Return or Disposal	Operational Activity	This activity makes the determination if an item can be accepted for return or disposal, and communicates the decision to the customer and the scheduling activity. The last known holder or designated return center (i.e., inventory manager or repair facility) receives a defective, excess, or repairable product return or disposal authorization request from a customer, and either accepts the request by communicating the conditions of the return, including return replacement, credit, or disposal; or rejects the request providing a reason for the rejection to the customer, inventory manager, or repair facility. This activity also authorizes the disposal actions of real property to include but not limited to demolition or transfer. (SCOR DR1.1)	
Authorize Supplier Payment - Engineer-to-Order Product	Operational Activity	The process of authorizing payments and paying suppliers for product or services. This process includes invoice collection, invoice matching and the issuance of checks - Engineer-to-Order Product.	
Authorize Supplier Payment - Make-to-Order Product	Operational Activity	The process of authorizing payments and paying suppliers for product or services. This process includes invoice collection, invoice matching and the issuance of checks - Make-to-Order Product.	
Authorize Supplier Payment - Stocked Product	Operational Activity	The process of authorizing payments and paying suppliers for product or services. This process includes invoice collection, invoice matching and the issuance of checks - Stocked Product.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Award Procurement Instrument or IGT Order	Operational Activity	Award Procurement Instrument results from an execution of an approved acquisition/sourcing plan and results in the execution contractual documentation and the legal obligation of funds. This may include creation of source selection documentation, solicitations, evaluation of proposals, and award of the procurement instrument, order or modification documents. This may also include the establishment of contracts or agreements that do not obligate funds, but may be used to satisfy future requirements. In the case of a purchase card purchase, award results when the card is presented to the merchant for the purchase.	
Balance Delivery Resources and Capabilities with Delivery Requirements	Operational Activity	The process of developing a time-phased course of action that commits delivery resources to meet delivery requirements.	
Balance Product Resources with Product Requirements	Operational Activity	The process of developing a time-phased course of action that commits resources to meet requirements - Plan Source.	
Balance Production Resources with Maintenance Requirements	Operational Activity	The process of developing a time-phased course of action that commits maintenance resources to meet maintenance requirements.	
Balance Production Resources with Production Requirements	Operational Activity	The process of developing a time-phased course of action that commits creation and operation resources to meet creation and operation requirements - Plan Make.	
Balance Return Resources with Return Requirements	Operational Activity	The process of developing courses of action that make feasible the commitment the appropriate return resources and or assets to satisfy return requirements.	
Balance Supply Chain	Operational Activity	The process of identifying and measuring the gaps and imbalances between demand and resources in order to determine how to best resolve the variances through marketing, pricing, packaging, warehousing, outsource plans or some other action that will optimize service, flexibility, costs, assets, (or other supply chain inconsistencies) in an iterative and collaborative environment. The process of developing a time-phased course of action that commits supply-chain resources to meet supply-chain requirements.	
Balance Supply Chain Resources with Demand	Operational Activity	Identifying, measuring, and resolving the gaps and imbalances between demand and capacity to develop a time-phased course of action that commits supply-chain resources to meet supply-chain requirements.	
Build Loads - Stocked Product	Operational Activity	Transportation modes are selected and efficient loads are built - Stocked Product.	
Build Loads - Engineer-to-Order Product	Operational Activity	Transportation modes are selected and efficient loads are built - Engineer-to-Order Product.	
Build Loads - Make-to-Stock Product	Operational Activity	Transportation modes are selected and efficient loads are built - Make-to-Stock Product.	
Calculate Supply Chain Entitlement	Operational Activity	This activity involves determining the entitlement and calculating the adjusted payment amount for a vendor, or other party owed by the government, as a result of having provided material or services to the DoD. The activity includes conducting a two-way or three-way match to validate the payment request, and calculating the adjustment to an account payable for vendor, or other party owed by the government. For FAR-based payments, the payment instructions found in the contract are applied to the payment request. The calculation takes into account any adjustments based on contract clauses (i.e., contract holdbacks), discounts from either the payment request or contract, and any interest due to the vendor. A payment date is scheduled within the constraints of the Prompt Payment Act, if applicable.	
Capture Award Specification	Operational Activity	This activity is associated with reviewing an award recommendation decision and capturing the award specifications in order to execute the award authorization.	
Capture Competency Credentials	Operational Activity	This activity is associated with initially capturing a person's certificates of qualification, licensing, and civilian-sector competencies of interest to the Department of Defense (DoD). Information captured also includes related information on active and reserve members (e.g., issuing agency, date of issuance, date of expiration) on DoD Members (active duty and reserve) and civilian employees with specific civilian-sector designated skills (e.g., emergency medical technician, police detective, and commercial airline 747 pilot).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Capture Operational Duty Experience Competency	Operational Activity	This activity is associated with capturing operational duty (e.g., operational flying duty, operational submarine duty) experience in the increment of time specified in standards for operational experience competencies. Experience competencies are based on specified periods of time performing specific operational duties and are used in determining an occupation's qualification levels (e.g., intermediate vs. qualified air force pilot). This information is used to compute pay entitlements (e.g., eligibility gates for minimum periods of operational aviation or submarine duty compared against years of specified service) authorized by law.	
Categorize Unauthorized Absence	Operational Activity	This activity is associated with making a decision categorizing a Member into one or more categories of unauthorized absence and disseminating unauthorized absence information to all appropriate parties (e.g., adverse actions, police assistance). Categories of unauthorized absence may include (but not be limited to) Unauthorized Absence (UA) and Deserter. This also includes coordinating the necessary categorization follow up actions with the appropriate parties that need to be taken regarding a Member who has been categorized as an unauthorized absence or desertion offender.	
Certify Time, Absence, and Labor Information	Operational Activity	This activity is associated with certifying and/or re-certifying (for adjustments) of time, absence, and labor information by the certifying authority, enabling payroll labor costs to be distributed and charged to appropriate cost centers, and ensuring that leave and retirement point information are updated.	
Checkout	Operational Activity	The processes and tasks associated with product checkout including scanning, method of payment, credit application and approval, service agreement, order confirmation, and/or invoice or receipt.	
Clarify Labor Bargaining Unit and Representation	Operational Activity	This activity is associated with clarifying organization and employees that should be included in the appropriate defined bargaining unit. This activity also includes resolving recognition issues.	
Closeout Noncombatant Evacuation Operations	Operational Activity	This activity is associated with confirming the Noncombatant Evacuation Operations (NEO) Evacuee's actual departure information, confirming the NEO evacuee's actual arrival information, managing personnel visibility for evacuation centers, and sending notification of the confirmed NEO evacuees that arrived at their destination to the appropriate parties.	
Closeout Performance Evaluation Process	Operational Activity	This activity is associated with submitting the final performance evaluation, distributing the final performance evaluation, and adding the new evaluation to the individual's personnel/pay record. This activity may also include updating the senior rater's profile with the evaluation score given to the individual and the completion date of the performance evaluation process.	
Collect Program and Budget Information	Operational Activity	This activity collects the POMs and BES from the military services and defense agencies for review. On the even-numbered On-Budget years, the services submit their Program Objective Memorandum and Budget Estimate Submissions. Each program and budget information is based on the programs and fiscal guidance contained in the JPG; and includes the prior, current, and two budget fiscal years. On the odd-numbered Off-Budget years, the services submit their Program Change Proposals and Budget Change Proposals.	
Compare Current Organization Structure Against Required Organization Structure	Operational Activity	This activity includes analyzing both the current unit structure along with the required unit structure and determining what changes have been made to obtain the required unit structure for the mission type change.	
Compile Acquisition Strategy	Operational Activity	This activity collects and assembles the business and technical management information required to develop an approach to achieve program objectives within the resource constraints imposed. It is the framework for planning, directing, contracting for, and managing a program. It provides a master schedule for research, development, test, production, fielding, modification, postproduction management, and other activities essential for program success. The acquisition strategy is the basis for formulating functional plans and strategies (e.g., Test and Evaluation Master Plan (TEMP), Acquisition Plan (AP), competition, systems engineering).	
Compile Analysis of Alternatives Results	Operational Activity	This activity collects information and recommendations resulting from the analysis of performance, operational effectiveness, operational suitability, and estimated costs of alternative systems to meet a mission capability.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Compile Capability Development Document	Operational Activity	This activity collects and assembles the information necessary to develop the document, which captures the information necessary to develop a proposed program(s). The Capability Development Document (CDD) outlines an affordable increment of militarily useful, logistically supportable, and technically mature capability. The CDD supports a Milestone B decision review.	
Compile Capability Production Document	Operational Activity	This activity collects and assembles the information necessary to develop the document that addresses the production elements specific to a single increment of an acquisition program. The Capability Production Document (CPD) must be validated and approved before a Milestone C decision review. The refinement of performance attributes and Key Performance Parameters (KPPs) is the most significant difference between the Capability Development Document (CDD) and CPD.	
Compile Draft Analysis of Alternatives Plan	Operational Activity	This activity collects and assembles the information required to develop a draft plan, which details the approach to be followed in conducting the Analysis of Alternatives (AoA) during the Concept Refinement phase.	
Compile Economic Analysis	Operational Activity	This activity collects and assembles Major Automated Information System (MAIS) information required to evaluate the relative worth of different technical alternatives, design solutions, and/or acquisition strategies, and provide the means for identifying and documenting the costs and associated benefits of each alternative to determine the most cost effective solution.	
Compile Full Rate Production RFP	Operational Activity	This activity collects and assembles the technical, management, performance, cost and contractual information required to initiate a solicitation to procure economic production quantities following stabilization of the system design and validation of the production process.	
Compile Initial Budget Estimates	Operational Activity	This activity collects and assembles initial budget information for the principal programming document that details how the Department proposes to respond to capability needs.	
Compile Initial Capabilities Document	Operational Activity	This activity collects and assembles the information required to document the need for a materiel approach, or an approach that is a combination of materiel and non-materiel, to satisfy specific capability gap(s). The Initial Capabilities Document (ICD) defines the gap in terms of the functional area; the relevant range of military operations; desired effects; time and DOTMLPF (Doctrine, Organization, Training, Material, Leadership, Personnel, and Facilities); and policy implications and constraints. The outcome of an ICD could be one or more DOTMLPF Change Recommendations (DCRs) or Capability Development Documents.	
Compile Low Rate Initial Production RFP	Operational Activity	This activity collects and assembles the technical, management, performance, cost and contractual information required to initiate a solicitation to procure the minimum number of systems (other than ships and satellites) to provide production representative articles for Operational Test and Evaluation (OT&E), establish an initial production base, and permit an orderly increase in the production rate sufficient to lead to Full Rate Production (FRP) upon successful completion of Operational Testing (OT).	
Compile Preliminary Integrated Architecture	Operational Activity	This activity collects and assembles preliminary architecture, based on Joint Capabilities Integration and Development System (JCIDS) input, consisting of multiple views or perspectives that facilitates integration and promotes interoperability across capabilities and among related integrated architectures.	
Compile Product Support Package	Operational Activity	This activity collects and assembles the information that establishes the personnel, training, logistics, and other support required to maintain and prolong operations of a product throughout its life-cycle.	
Compile Product Support Plan	Operational Activity	This activity collects and assembles the information required to develop a plan to provide the package of support functions necessary to maintain the readiness and operational capability of the systems, subsystems, and support systems. It encompasses all critical functions related to system readiness, including materiel management, distribution, technical data management, maintenance, training, cataloging, configuration management, engineering support, repair parts management, failure reporting and analyses, and reliability growth.	
Compile System Development and Demonstration RFP	Operational Activity	This activity collects and assembles the technical, management, performance, cost and contractual information required to initiate system development and demonstration solicitation as part of the development of an affordable, supportable, interoperable and producible system solution.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Compile System Performance Specification	Operational Activity	This activity collects and assembles the information required to develop a system performance specification, which identifies performance requirements in terms of required results with criteria for verifying compliance. It defines the functional requirements for the system, the environment in which it must operate, and the interface and interchangeability requirements.	
Compile Technology Demonstration Results	Operational Activity	This activity compiles the results of previous demonstrations from an original or model to correct or improve performance of a later system/item to meet the stated thresholds in the Key Performance Parameters. Early prototypes may be built during System Development and Demonstration (SDD) phase, or be the result of an Advanced Concept Technology Demonstration (ACTD) or Advanced Technology Demonstration (ATD), and tested prior to Milestone C decision.	
Compile Technology Development RFP	Operational Activity	This activity collects and assembles the technical, management, performance, cost and contractual information required to initiate a technology development oriented solicitation as part of the demonstration of readiness to proceed with program initiation.	
Complete Active Duty Tour Processing Checklist	Operational Activity	This activity may include (but not be limited to) counseling and processing related to training (e.g., certifications, theater specific requirements) legal, HRM information (e.g., record of emergency data), medical, dental, or chaplain services.	
Complete Benefit Selection	Operational Activity	This activity is associated with enrolling (i.e., start, stop, or changes) a Member/Employee for a specific benefit upon selection and open enrollment periods, documenting the initial request or changes to their elections, contributions, coverage and beneficiaries, and obtaining appropriate parties signatures for changes to benefit coverage and/or beneficiaries where necessary. This activity is also associated with submitting and managing claims for workers compensation and injury benefits for employees.	
Complete In-Processing Checklist	Operational Activity	This activity is associated with a Member completing the items on the in-processing checklist.	
Complete Out-Processing Checklist	Operational Activity	This activity is associated with completing the activities listed on the out-processing checklist.	
Complete Retirement Checklist	Operational Activity	This activity is associated with conducting preseparation counseling, signing the preseparation counseling form, and completing the retirement checklist.	
Conduct Acquisition Assessment	Operational Activity	This activity provides programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios.	
Conduct Acquisition Decision Review	Operational Activity	This activity reviews and evaluates information in support of the acquisition decision process.	
Conduct Acquisition Logistics	Operational Activity	This activity develops technical and management requirements which ensure supportability implications are considered throughout the acquisition life-cycle. The intent is to minimize support costs and to ensure end user resources to sustain the system in the field will be available.	
Conduct Acquisition Program Baseline Review	Operational Activity	This activity reviews the key cost, schedule, and performance constraints in the phase succeeding the milestone for which they were developed.	
Conduct Acquisition Resource Analysis	Operational Activity	This activity provides an overall acquisition life-cycle direction and serves as a central focal point for DoD long range programmatic projections to include investment area assessment, affordability analysis, acquisition alternatives, and funding controls.	
Conduct Active Duty Tour Processing	Operational Activity	This activity is associated with validating active duty tour information (e.g., Member name, rank, activation start date, reason for activation). This activity may include (but not be limited to) determining if Member meets active duty tour requirements and notifying the appropriate parties of any invalid or incomplete information.	
Conduct Ad hoc Review	Operational Activity	This activity reviews additional information in support of the acquisition decision process. It may include other independent cost estimates, and ad-hoc cost assessments, for programs subject to review or oversight.	
Conduct Adjudication of Personnel Security Clearances	Operational Activity	This activity is associated with conducting the adjudication needed to review, issue, deny, recertify, revoke, or reinstate a personnel security clearance (e.g., National Agency Check (NAC), National Agency Check with Inquiries (NACI), Top Secret (TS)).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Affordability Assessment Review	Operational Activity	This activity collects, reviews and analyzes information to conduct an independent analysis to determine if the Life Cycle Cost (LCC) of an acquisition program is in consonance with the long-range investment and force structure plans of the DoD or individual DoD Components.	
Conduct Alternative Systems Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that the resulting set of requirements agree with the warfighters' needs and expectations, and provide the recommendation for the preferred system concept.	
Conduct Assessment for Transition Assistance	Operational Activity	This activity is associated with assessing the transition assistance needs of Members, their families, newly separated members and civilian personnel. This includes (but is not limited to) reviewing the transition assistance request, identifying needs of the requester, determining the transition assistance services that are available (e.g., Employment Assistance, Relocation Assistance, Education and Training Programs) and providing transition assistance service options to the requester.	
Conduct Benefit Counseling	Operational Activity	This activity is associated with reviewing the Member's/Employee's information, identifying the benefits available, and providing information on the different benefit options, eligibility criteria, requirements (e.g., service obligation and grade point average), application process, restrictions, and consequences.	
Conduct Board for Correction of Military Record	Operational Activity	This activity is associated with reviewing a correction of military record request, returning a request without action, notifying a Member/Requester of the time and place of a hearing, conducting a hearing, requesting additional information, making a recommendation on a request, and forwarding a recommendation for approval or disapproval.	
Conduct Budget Review	Operational Activity	This activity supports the budget hearing review with OSD and OMB. The review is coordinated with all of the stakeholders on a particular issue. Through this review process, all perspectives including those of the Chairman of the Joint Staff, Under Secretaries of Defense, Service Secretaries, and OMB are considered as an integral part of the decision-making process.	
Conduct Casualty Assistance Needs Assessment	Operational Activity	This activity is associated with counseling and assessing the casualty assistance needs of Department of Defense (DoD) personnel and their families. These counseling actions may, in some cases, occur over an extended period of time depending on the type of casualty (i.e., casualty cases categorized as ill/injured or missing may require longer and more frequent periods of counseling compared to those of death casualty cases).	
Conduct Competency Testing	Operational Activity	This activity is associated with administering entry level (e.g., Armed Services Vocational Aptitude Battery, Armed Forces Officer Qualifying Test) and in-service testing (e.g., promotion testing, Defense Language Aptitude Battery).	
Conduct Concept Decision Review	Operational Activity	This activity is the review for the first decision point of the Defense Acquisition Management Framework. It authorizes entry into the Concept Refinement (CR) phase. The principal document at this decision point is the Initial Capabilities Document (ICD) which also contains an approved plan for conducting an Analysis of Alternatives (AoA).	
Conduct Critical Design Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that a system can proceed into fabrication, demonstration, and test and can meet stated performance requirements within cost, schedule, risk, and other system constraints. Generally this review assesses the system final design as captured in product specifications for each configuration item in the system's product baseline, and ensures that each configuration item in the product baseline has been captured in the detailed design documentation. Normally conducted during the System Development and Demonstration (SDD) phase.	
Conduct Defense Acquisition Executive Summary Review	Operational Activity	This activity is the principal mechanism for tracking programs between milestone reviews. A Defense Acquisition Executive Summary (DAES) report is provided by the Program Manager (PM) of a Major Defense Acquisition Program (MDAP) to the Under Secretary of Defense (Acquisition, Technology, and Logistics).	
Conduct Design Readiness Review	Operational Activity	This activity provides for an in-phase assessment of design maturity during the System Development and Demonstration (SDD) phase, typically at the end of the System Integration effort. Completion of a Design Readiness Review (DRR) ends the System Integration effort and begins the System Demonstration effort of the System Development and Demonstration phase.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct DOTMLPF Analysis	Operational Activity	This activity conducts an analysis to determine whether an integrated Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, and Facilities (DOTMLPF) approach (that is, a nonmaterial approach and/or a materiel approach) is required to fill the capability gaps identified in the Functional Need Analysis (FNA).	
Conduct Education Course	Operational Activity	This activity is associated with conducting education courses (e.g., resident and distributed learning) such as higher education opportunities. This activity may include (but not be limited to) teaching students course material, creating student performance information for the course and the student's evaluation of the course and instructors. When a person completes all requirements of scheduled courses, the related development information (e.g., course identification, date of completion, and scores or ranking) and any retention actions resulting from enrolling into an education course will be recorded.	
Conduct Executive Assessment Review	Operational Activity	This activity is conducted at the executive level where information is gathered and evaluated to make a decision or assessment about a program.	
Conduct Executive Level Contract Audits	Operational Activity	This activity performs contract audits for the Department, and provides accounting and financial advisory services regarding contracts and subcontracts to all DoD Components responsible for procurement and contract administration.	
Conduct Executive Level Contract Management Oversight and Reporting	Operational Activity	This activity consists of executive oversight and reporting required to perform worldwide acquisition life cycle contract management for Department of Defense weapon system and automated information systems, spares, supplies and services are delivered on time, at projected cost, and meet all performance requirements.	
Conduct Family Support Needs Assessment	Operational Activity	This activity is associated with assessing the needs of Department of Defense (DoD) personnel and their families. This includes processing requests for service and collecting information to create a family support needs assessment, requesting coordination assistance with DoD and non-DoD agencies which will provide recommended family support services and updating the personnel/pay record to document counseling sessions.	
Conduct Follow On Operational Test and Evaluation	Operational Activity	This activity conducts test and evaluation after the Full Rate Production Decision Review (FRPDR) to refine the estimates made during Operational Test and Evaluation (OT&E), to evaluate changes, and to reevaluate the system to ensure that it continues to meet operational needs and retains its effectiveness in a new environment or against a new threat.	
Conduct Full Rate Production Decision Review	Operational Activity	This activity is a review normally conducted at the conclusion of Low Rate Initial Production (LRIP) effort that authorizes entry into the Full Rate Production (FRP) and Deployment effort of the Production and Deployment phase of the Defense Acquisition Management Framework.	
Conduct Functional Analysis and Allocation	Operational Activity	This activity conducts logical analyses to define successively lower functional and performance requirements, to identify functional interfaces, and to allocate functions to components of the system (e.g., hardware, software, and human).	
Conduct Functional Capabilities Board Review	Operational Activity	This activity supports the review and assessment of JCIDS (Joint Capabilities Integration and Development System) documents to include organization, analysis, and prioritization of joint warfighting capabilities within an assigned functional area.	
Conduct Functional Configuration Audit	Operational Activity	This activity conducts an audit to ensure that the product design is accurately documented and to verify that the actual performance of the configuration item meets specification requirements.	
Conduct Functional Solution Analysis	Operational Activity	This activity is conducts an operationally based assessment of all potential Doctrine, Organization, Training, Materiel, Leadership, Personnel, and Facilities (DOTMLPF) approaches to solving (or mitigating) one or more of the capability gaps (needs) previously identified. The completed Functional Solutions Analysis (FSA) shall document the capability gaps and alternative approaches and include integrated architectures linking the approaches to existing systems.	
Conduct Independent Initial Operational Test and Evaluation	Operational Activity	This activity conducts an independent Initial Operational Test and Evaluation (IOT&E) on production, or production representative articles, to determine whether systems are operationally effective and suitable, and which supports the decision to proceed Beyond Low Rate Initial Production (BLRIP).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Individual Training Course	Operational Activity	This activity is associated with conducting the training course (e.g., resident and distributed). This activity also includes teaching students training course material, recording all students course attendance to determine if they receive credit or not for the individual training course and issuing certificates and/or awarding competencies for successful completion of the individual training course. When a person completes all requirements of scheduled courses, the related development information (e.g., course identification, date of completion, and scores or ranking) will be recorded.	
Conduct Initial Technical Review	Operational Activity	This activity conducts a multi-disciplined technical review held early during the Concept Refinement phase to support a program's initial Program Objectives Memorandum (POM) submission. The review ensures that a program's technical baseline is sufficiently rigorous to support a valid cost estimate (with acceptable cost risk), and enable an independent assessment of that estimate by cost, technical, and program management subject matter experts.	
Conduct Integrated Baseline Review	Operational Activity	This activity is conducted by the government program manager with the contractor to document the scope associated with cost, schedules, and resources, resulting in the development of a Performance Measurement Baseline (PMB) for the contractor.	
Conduct Joint Interoperability and Supportability Certification	Operational Activity	Joint Staff/J-6 will perform IT and National Security Systems (NSS) interoperability and supportability certifications on all Capability Development Documents (CDDs) and Capability Production Documents (CPDs) designated as JROC (Joint Requirements Oversight Council) Interest or Joint Integration. This certification will include evaluation of compliance with the DoD Net-Centric Data Strategy through collaboration with the communities of interest that apply to these capabilities. Additionally, Joint Staff/J-6 will lead the validation of Net Ready (NR)-KPP (Key Performance Parameters) and will resolve all issues associated with the NR-KPP.	
Conduct Joint Potential Designator Review	Operational Activity	This activity reviews initial joint potential designation of JCIDS (Joint Capabilities Integration and Development System) proposals and provides recommendations regarding validation, approval and interoperability expectations to the Joint Staff.	
Conduct Joint Requirements Oversight Council Review	Operational Activity	This activity reviews designated programs and supports the Defense Acquisition System review process. Activities include Joint Staff reviews of JCIDS (Joint Capabilities Integration and Development System) documents and assignments of Joint Potential Designator; review of any JCIDS issues which may have joint interest or impact; validation of key performance parameters; and make recommendations as appropriate to, the Secretary of Defense, Deputy Secretary of Defense, Under Secretary of Defense (Acquisition, Technology, and Logistics), Assistant Secretary of Defense (Networks and Information Integration), and the Under Secretary of the Air Force (as DoD Space Milestone Decision Authority).	
Conduct Joint Staff Validation and Approval	Operational Activity	This activity assists the executive military leadership in identifying and assessing the priority of joint military requirements (including existing systems and equipment) to meet the National Military Strategy (NMS). Executive military leadership directly supports the Defense Acquisition Board (DAB) through the review, validation, and approval of key cost, schedule, and performance parameters at the start of the acquisition process, prior to each milestone review, or as requested by the Under Secretary of Defense (Acquisition, Technology, and Logistics) (USD(AT&L)).	
Conduct Labor Negotiation	Operational Activity	This activity is associated with meeting to bargain in good faith to reach an agreement.	
Conduct Live Fire Test and Evaluation	Operational Activity	This activity conducts a test to evaluate the vulnerability and/or lethality aspects of a conventional weapon or conventional weapon system. Live Fire Test & Evaluation (LFT&E) is a statutory requirement (Title 10 U.S.C. § 2366) for covered systems, major munitions programs, missile programs, or product improvements to a covered systems, major munitions programs, or missile programs before they can proceed Beyond Low Rate Initial Production (BLRIP).	
Conduct Logistics Business Planning	Operational Activity	The development and issuing of courses of action over specified time periods that represent a projected appropriation and allocation of logistics resources and capacity to meet projected requirements in carrying out the movement and maintenance of forces. This activity balances strategic objectives and available resources against anticipated demand and historical performance. The output is functional logistics business plans that guide execution of supply chain activities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Milestone Decision Review	Operational Activity	This activity provides authority to approve entry of an acquisition program into each of the next phases of the acquisition process and shall be accountable for cost, schedule, and performance reporting to higher authority, including congressional reporting. The Milestone Decision Review is conducted by the Defense Acquisition Board and results in an Acquisition Decision Memorandum.	
Conduct Operational Test Readiness Review	Operational Activity	This activity conducts a multi-disciplined product and process assessment to ensure that the production configuration system can proceed into Initial Operational Test and Evaluation (IOT&E) with a high probability of success.	
Conduct Periodic and Ad-hoc Reporting	Operational Activity	This activity provides for DoD acquisition reporting submissions regarding statutory, regulatory and policy requirements. This includes cost, schedule and technical reporting.	
Conduct Personnel Security Clearance Determination Counseling	Operational Activity	This activity is associated with counseling a person on the determination that was reached regarding a personnel security clearance. If the outcome was favorable, this includes (but is not limited to) informing the person of the determination and collecting the necessary signatures to finalize the clearance. If the outcome was unfavorable, this includes (but is not limited to) counseling the person about the reasons for the determination, the effects of the determination (e.g., reassignment, termination, clearance revocation), and the unfavorable personnel security clearance determination appeals process.	
Conduct Personnel Security Investigation	Operational Activity	This activity is associated with conducting pre-investigations and Personnel Security Investigations (PSI) as needed in order to determine an applicant's qualifications for the requested personnel security clearance. This may also include sustaining a clearance holder's clearance if there is no cause for further adjudication.	
Conduct Physical Configuration Audit	Operational Activity	This activity conducts a physical examination of the actual configuration of the item being produced. It verifies that the related design documentation matches the item as specified in the contract.	
Conduct Physical Evaluation Board (PEB)	Operational Activity	This activity is associated with reviewing and consolidating any physical evaluation information received, as well as determining whether a Member is reasonably able to perform the duties of his or her office, grade, rank, or rating. This activity includes reviewing the Member's medical evaluation records from the Medical Evaluation Board (MEB).	
Conduct Physical Inventory	Operational Activity	The Conduct Physical Inventory activity verifies the existence, location, and quantity of real property to ensure accountability and enable accurate valuation of real property. It also includes physically counting/verifying of capital assets to ensure accountability (existence, quantity and condition) to enable accurate valuation of existing capital assets, it accumulates the results of the physical inventory for analysis of variance (ANOVA) which is verified and approved by an authorized official, it determines the source and reason for inventory variances resulting from the execution of a physical inventory, and modifies the inventory control procedures as required. Information produced by this activity is either used to create or update an initial capital asset or real property record.	
Conduct Portfolio Decision Review	Operational Activity	This activity reviews defense systems as an integrated framework for evolving or maintaining existing systems and acquiring new systems to achieve strategic goals.	
Conduct Post Deployment Performance Review	Operational Activity	This activity verifies whether the fielded system continues to meet or exceed thresholds and objectives for cost, performance, and support parameters approved at full-rate production. This review includes an assessment of Product Support Integrator or Provider performance, product improvements incorporated, configuration control and modification of performance based logistics agreements as needed based on changing warfighter requirements or system design changes.	
Conduct Post Independent Analysis	Operational Activity	This activity performs an independent review of the Functional Solution Analysis (FSA) to ensure it was thorough and that the recommended non-materiel and materiel approaches are reasonable possibilities to deliver the capability identified in the Functional Area Analysis (FAA) and/or Functional Needs Analysis (FNA). The analysis will be conducted by a sponsor group separate from those who performed the FSA.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Preliminary Design Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that a system is ready to proceed into detailed design and can meet stated performance requirements within cost (program budget), schedule (program schedule), risk, and other system constraints. Generally, this review assesses the system preliminary design as captured in performance specifications for each configuration item in the system (allocated baseline), and ensures that each function in the functional baseline has been allocated to one or more system configuration items. Normally conducted during the System Development and Demonstration (SDD) phase.	
Conduct Production Readiness Review	Operational Activity	This activity is a formal examination of a program to determine if the design is ready for production and if the producer has accomplished adequate production planning. Production Readiness Reviews (PRRs) are normally performed as a series of reviews toward the end of System Development and Demonstration (SDD) phase. Under some circumstances a PRR may also be appropriate in the Production and Deployment (P&D) phase.	
Conduct Program Management	Operational Activity	This activity exercises designated authority and responsibility for planning, organizing, staffing, controlling and leading the combined efforts of participating/assigned civilian and military personnel organizations for the management of programs or specific defense acquisition throughout the lifecycle.	
Conduct Promotion Selection	Operational Activity	This activity is associated with processing a recommendation for a person's promotion. This activity includes completing promotion requirements, which may include a promotion board or special selection board, producing a promotion list, counseling Member on promotion decisions, and determining if Officer meets the criteria for appeal.	
Conduct Readiness Assessments	Operational Activity	This activity is associated with conducting scenario-based readiness assessments on a quarterly basis. This activity also includes using analytical tools and models, as appropriate, to aid in scenario assessment.	
Conduct Research to Identify Prospects	Operational Activity	This activity is associated with conducting the research to identify prospects for recruitment through advertising, telemarketing (e.g., phone calls, postal mailings, and email), site visits (e.g., high schools, colleges, shopping centers, areas of entertainment, and job fairs), reviewing high school Armed Services Vocational Aptitude Battery (ASVAB) scores, and screening prospects that walk-in to the recruitment office.	
Conduct Science and Technology	Operational Activity	Conduct Science and Technology delineates the basic research, applied research and advanced technology development activities conducted in support of acquisition, statutory, and regulatory requirements performed by a specific skill set, discipline, or broad business area. It includes activities conducted in support of DoD technology export.	
Conduct Sourcing	Operational Activity	This activity includes managing sourcing requirements, developing a sourcing strategy to best satisfy the requirement, executing the sourcing strategy through solicitation and development of sourcing vehicles, and the management of the contract or intragovernmental order for goods and services. This includes management of the sourcing process for goods and services, including awarding the contract or the acknowledging the intragovernmental order, receipt and acceptance of contract or order deliverables, monitoring the contract or order, contract or order close-out, and other agreements.	
Conduct Sponsor Validation and Approval	Operational Activity	This activity reviews capability development documentation, reporting, and funding actions required to support the capabilities development process.	
Conduct Succession Planning	Operational Activity	This activity is associated with identifying key positions and occupations, determining future competency requirements, building target competency profiles, matching employees to target competency profiles, and creating agency succession development strategy.	
Conduct Support Analysis	Operational Activity	This activity conducts an analysis to determine the needed logistics support functions to maintain the readiness, sustainment and operational capability of a system. This analysis will encompass all of the critical functions related to weapon system readiness including: materiel management, distribution, technical data management, maintenance, training, cataloging, configuration management, engineering support, repair parts management, failure reporting and analyses, and reliability growth.	
Conduct Supportability Assessment	Operational Activity	This activity conducts an assessment to verify the degree to which the proper levels of personnel, training, logistics, and other support required to maintain and prolong operations of a product throughout its life-cycle exist.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct System Engineering	Operational Activity	This activity provides planning, organizing and executing the design, development, fabrication, installation, modification or analysis of systems or system components.	
Conduct System Functional Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that a system can proceed into preliminary design, and that all system requirements and functional performance requirements derived from the Capability Development Document are defined and are consistent with program budget, schedule, risk, and other system constraints. The system functional baseline is established at the conclusion of this review. Typically accomplished during the System Development and Demonstration (SDD) phase.	
Conduct System Requirements Review	Operational Activity	This activity follows the Initial Technical Review and conducts a multi-disciplinary review to assess system requirements as captured in the system specification, and ensures that the system requirements are consistent with the preferred system solution.	
Conduct System Threat Assessment	Operational Activity	This activity describes the threat to be countered and the projected threat environment that includes significant changes in the threat environment relative to operational threat environment, adversary capability(s) that may effect operation of the system, system specific threat, reactive threat, and technologically feasible threats.	
Conduct System Verification Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that the system is ready to proceed into Low-Rate Initial Production and Full-Rate Production within cost (program budget), schedule (program schedule), risk, and other system constraints. Generally this review provides an audit trail from the Critical Design Review.	
Conduct System-Level Testing	Operational Activity	This activity conducts developmental testing on systems to verify the status of technical progress, verify that design risks are minimized, substantiate that contractually required technical performance has been achieved, and certify readiness for initial operational testing. This activity also conducts operational or field testing of systems, under realistic conditions, to determine the effectiveness and suitability of the weapons, equipment, or munitions for use in military operations by typical military users.	
Conduct Systems Analysis and Control	Operational Activity	This activity evaluates, manages and controls requirements analysis, functional analysis and allocation, plus design synthesis that transforms requirements into designs and products.	
Conduct Technical Reviews	Operational Activity	This activity conducts multi-disciplinary reviews of an acquisition pre-concept, concept, solution, or acquisition systems at given points along the acquisition development continuum to gauge performance and progress toward meeting the requirements of a stated capability requirement, and to assess the cost, schedule and technical risk of continuing down the critical path. These reviews are conducted by Overarching Integrated Product Teams (OIPTs) consisting of functional experts in the system engineering, test and evaluation, acquisition logistics, program management, and science and technology disciplines.	
Conduct Technology Demonstration	Operational Activity	This activity demonstrates the technology and refines the solution to fully exploit and assess the military utility of the proposed capability and determine the appropriate set of technologies to be integrated into the full system.	
Conduct Technology Development System Requirements Review	Operational Activity	This activity occurs during the Technology Development phase and conducts a detailed multi-disciplinary review to ensure that the system requirements remain consistent with the preferred system solution as well as available technologies identified during the Technology Development phase.	
Conduct Test and Evaluation	Operational Activity	This activity provides planning, executing and assessing developmental and operational system-level test.	
Conduct Test Readiness Review	Operational Activity	This activity conducts a multi-disciplined technical review to ensure that a subsystem or system is ready to proceed into formal test. The Test Readiness Review (TRR) assesses test objectives, test methods and procedures, scope of tests, and safety, and confirms that required test resources have been properly identified and coordinated to support planned tests.	
Conduct Threshold and Objective Tradeoffs Analysis	Operational Activity	This activity conducts an analysis to determine the acceptable range of operational performance at which the desired capability objective is still achievable.	
Conduct Unfavorable Personnel Security Clearance Determination Appeals Process	Operational Activity	This activity is associated with processing an appeal to an unfavorable personnel security clearance determination. This may include (but is not limited to) reviewing the circumstances of the determination, considering the reasons for the unfavorable determination and reissuing a determination on the personnel security clearance.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Conduct Unit Cost Review	Operational Activity	This activity reviews system cost analysis, review, estimation and presentation of cost analysis.	
Conduct Workforce Analysis	Operational Activity	This activity is associated with reviewing and validating the request for analysis of specified information (e.g., strength, authorization, strength planning and grade distribution), gathering the information needed to conduct the analysis, and analyzing the information gathered to produce the required information.	
Consolidate Best Materiel Approaches	Operational Activity	This activity collects and assembles potential approaches in an integrated fashion that reflect the future requirements of joint force commanders. Approaches may include Family of Systems (FoS) or System of Systems (SoS) that take different approaches to filling the capability gap, each addressing operational considerations and compromises in a different way. These activities include leveraging the expertise of all government agencies, as well as industry, in identifying possible materiel approaches.	
Consolidate Final Production Baseline	Operational Activity	This activity consolidates all approved documentation describing necessary functional and physical characteristics of the Configuration Item (CI). This baseline normally includes product, process, and material specifications, engineering drawings, and other related data, is usually based on the initial production baseline and is finalized at the Physical Configuration Audit (PCA).	
Consolidate Human Resources Profiles	Operational Activity	This activity is associated with consolidating Human Resources Profiles from all Human Resources Management business areas to capture all instances where Human Resources Profiles need to be brought up to date to reflect the current state of the profile. This activity also includes determining which business processes and workflows are affected by the update of Human Resources Profiles.	
Consolidate Initial Product Support Strategy	Operational Activity	This activity collects and assembles planning, analysis, and trade-off information to determine the optimum support concept for a materiel system and identify the strategies for continuous affordability improvements throughout the product life-cycle.	
Consolidate Initial Production Baseline	Operational Activity	This activity combines information describing all of the necessary functional and physical characteristics of the Configuration Item (CI). This baseline normally includes product, process, and material specifications, engineering drawings, and other related data and is usually initiated at the Critical Design Review (CDR).	
Consolidate Orders - Stocked Product	Operational Activity	The process of analyzing orders to determine the groupings that result in least cost/best service fulfillment and transportation - Stocked Product.	
Consolidate Orders - Make-to-Stock Product	Operational Activity	The process of analyzing orders to determine the groupings that result in least cost/best service fulfillment and transportation - Make-to-Stock Product.	
Consolidate Orders into Conveyance-Based Loads	Operational Activity	This activity analyzes orders to determine the groupings that result in least cost/best service fulfillment and transportation. Transportation modes are also selected and loads are optimized for planned movement. By processing the release order information, this activity produces information about the load used to match resources to execute the planned movement of materiel and/or personnel. (SCOR D1.4, D1.5).	
Consolidate Performance Based Logistics Strategy	Operational Activity	This activity combines the preferred sustainment strategy for system product support that employs the purchase of support as an integrated, affordable performance package designed to optimize system readiness. Performance Based Logistics (PBL) meets performance goals for a system through a support structure based on long-term performance agreements with clear lines of authority and responsibility.	
Consolidate Supportability Objectives	Operational Activity	This activity combines design, technical support data, and maintenance procedures to facilitate detection, isolation, and timely repair and/or replacement of system anomalies. This includes factors such as diagnostics, prognostics, real time maintenance data collection, and human system integration considerations.	
Consolidate Technology Development Strategy	Operational Activity	This activity collects and assembles the information required to develop an approach for achieving recommended Technology Readiness Levels and demonstrating readiness to proceed with program initiation. This reduces technology risk, determines the appropriate set of technologies to be integrated into the full system, and supports justification of funding for advanced development work.	
Control Program Execution	Operational Activity	Activities to initiate, control and adjust execution of the program. This activity includes program and acquisition program documentation, pre-deployment and fielding of the system, required support, test and evaluation, and final production baseline revisions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Coordinate and Integrate Health Services	Operational Activity	This activity is associated with optimizing utilization of services to achieve the desired beneficiary outcomes and promote maximum force readiness. This activity also utilizes evidence-based decision tools and management systems.	
Coordinate Applicant Package	Operational Activity	This activity is associated with coordinating the applicant package. This includes (but is not limited to) determining processing date, sending the accession notification to appropriate parties (e.g., MEPS Personnel, Recruiting Service Liaison/Guidance Counselor, Test Administrator, MEPS Medical Staff), and arranging transportation to send the applicant to a Military Entrance Processing Station (MEPS) for evaluation (e.g., Armed Services Vocational Aptitude Battery (ASVAB), Medical).	
Coordinate Casualty Action	Operational Activity	This activity is associated with determining if casualty remains have been recovered, coordinating efforts for search and recovery teams, providing disposition of remains and shipping of personal effects, coordinating personnel travel for wounded, ill, or injured Members out of a combat zone, and identifying casualty information which may be released to the media and next of kin (NOK).	
Coordinate Family Support Services	Operational Activity	This activity is associated with coordinating Family Support services and/or programs for Department of Defense (DoD) personnel and their families. This activity also includes reviewing the coordination assistance response to finalize service coordination and enrolling or disenrolling members/families from Family Support programs.	
Coordinate Human Resources Management Policy and Guidance	Operational Activity	This activity is associated with reviewing the draft Human Resources Management (HRM) policy and guidance and other information received (e.g., workforce analysis information) and developing a proposed HRM policy and guidance, which is coordinated with the appropriate parties (e.g., Interagency, Department of Defense (DoD) components) for review and verified by signature. The final review and signature is coordinated with workforce communications (e.g., publishers of the policy and guidance).	
Coordinate Human Resources Recovery Care Plan	Operational Activity	This activity is associated with coordinating the service providers (e.g., family support, Veterans Affairs (VA), and Transition Programs) to provide assistance to a Recovering Service Member (RSM) and to ensure the implementation, and oversight of the recovery care plans including updating an existing recovery care plan to reflect changes to a Needs Assessment.	
Coordinate Manpower Change	Operational Activity	This activity is associated with coordinating adjustments needed with other Service Components and working with organizations to carry out the change request.	
Coordinate Noncombatant Evacuee for Transportation	Operational Activity	This activity is associated with coordinating the assignment of the Noncombatant Evacuation Operations (NEO) Evacuee to available transportation seating. The NEO evacuee is listed on a manifest, along with the scheduled transportation information. The NEO evacuee is then notified of their assigned scheduled transportation information. The deployment information provides the final passenger list.	
Coordinate Personnel Distribution Plan Implementation	Operational Activity	This activity is associated with evaluating the proposed personnel requirement requests against the personnel distribution plan for implementation of Department of Defense (DoD) service mission priorities and coordinating personnel requirements with the appropriate parties. This also includes production of personnel requirement requests.	
Coordinate Risk Management Plan	Operational Activity	This activity is associated with ensuring the risks and strategies are addressed in the program/budget plans, and reporting risks and findings to the appropriate parties (e.g., Senior Readiness Oversight Council (SROC)). This activity is also associated with providing reports on current and projected readiness issues and providing recommendations on readiness policy matters.	
Coordinate Transition Assistance	Operational Activity	This activity is associated with conducting DoD Preseparation Counseling, Department of Labor Employment Workshops, VA Benefits Briefing, and Disabled Transition Assistance Program Briefings.	
Counsel Member on Retirement	Operational Activity	This activity is associated with receiving counseling on the Member's retirement process, impact on his or her ability to return to their previous status, and personnel elections options available. This type of official counseling is required and will be documented in the Member's retirement profile information.	
Counsel Member on Separation	Operational Activity	This activity is associated with reviewing a separation decision, determining if a Member requires counseling, and explaining to the Member a separation decision if the Member was involuntarily separated.	
Counsel Personnel on Performance Evaluation Report	Operational Activity	This activity is associated with providing performance evaluation information to personnel as well as providing guidance for refuting adverse performance evaluations and appeal options.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Counsel Personnel on Performance Plan	Operational Activity	This activity is associated with counseling a Member on their performance evaluation plan against which they will be evaluated. This may include (but may not limited to) duty descriptions, expectations, rater and Member input, and what the Member needs to do to achieve stated goals.	
Create Geospatial Information	Operational Activity	This activity creates Geospatial Information, which is the information required for the spatial representation of real world phenomena (e.g. real property asset, interest area, geopolitical area). The information is created using specialized tradecraft and techniques that implement I&E geospatial standards and guidance. This activity also includes documenting the geospatial metadata associated with the Geospatial Information. For example, this activity enables the creation of a geospatial representation of the location of a real property asset or an ESOH interest area.	
Create Human Resources Profiles	Operational Activity	This activity is associated with creating Human Resources Profiles (e.g., recruiting, assignment, personnel/pay, benefit and medical) once all information has been collected and certified. A Human Resources Profile is a working file that contains temporary and permanent information. This activity also includes documenting the disposition of Human Resources Profiles.	
Create Human Resources Record	Operational Activity	This activity is associated with creating the Human Resources Record, which is the information from the Human Resources Profile that has been determined to become part of a permanent record (e.g., recruiting, assignment, personnel/pay, benefit and medical). This activity also includes documenting the disposition of the Human Resources Record.	
Create Individual Training Course Curriculum	Operational Activity	This activity is associated with creating an individual training course curriculum and related materials to meet mission goals or new job skills by setting individual training course objectives and any required prerequisites. This activity includes outlining course objectives and creating course content to align to the objectives of the course.	
Create Occupation Classification	Operational Activity	This activity is associated with establishing a new occupation classification in response to the development of new career field(s).	
Create Separation Checklist	Operational Activity	This activity is associated with creating the required out-processing checklist and necessary forms (e.g., medical and dental records, travel voucher) and issuing it to the Member for completion.	
Create Travel Voucher	Operational Activity	This activity is associated with creating a voucher from the travel authorization by a traveler and making changes to reflect actual expenses. The voucher identifies the trip itinerary and all expenses to be reimbursed for that trip.	
Create Unit Structure	Operational Activity	This activity is associated with creating the structure for a new unit based on the information contained in the organization change request.	
Define and Assess Beneficiary Population	Operational Activity	This activity is associated with defining and assessing a given population requires that the population is identified through some means. Health/risk screening is designed to elicit information from and about the identified population regarding environmental threats, certain disease states, conditions, activities, and behaviors/patterns that can influence health status. A health risk profile and/or cost risk analysis is completed to target a given population.	
Define Cost Performance Model	Operational Activity	The Define Cost Performance Model activity obtains the laws, regulations, standards, etc. from External Oversight, Internal Oversight and Other Core Business Mission Areas, as well as the high-level framework established in the strategic plan and budget from Other Domains. In addition, this activity acquires acceptable standards and methods from Industry Partners and External Oversight. Using these inputs, this activity defines model structure and data requirements, relationships of responsibility segments and cost objects, the criteria for detecting business anomalies, and the methodology by which inputs will be traced to the model elements. Ultimately, it will produce an unpopulated model.	
Define Program	Operational Activity	This activity examines concepts, technology, risk and cost in order to refine requirements and defines the program in concert with the warfighter.	
Deliver	Operational Activity	The deliver activities associated with operating a supply chain and creating maintaining and fulfilling customer orders. This includes receipting, validating, and creating customer orders; scheduling order delivery; and picking, packing and shipping.	
Deliver and/or Install	Operational Activity	The process of preparing and installing the product at the customer site. The product is fully functional upon completion.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Deliver Casualty Assistance Services	Operational Activity	This activity is associated with coordinating the delivery of casualty assistance services (e.g., invitational travel orders, items pertaining to interment, medical counseling and treatment) and evaluating whether the goals of the casualty assistance program are being achieved.	
Deliver Education Programs	Operational Activity	This activity is associated with identifying available education resources, managing education enrollment, conducting education courses, and evaluating education courses and instructors.	
Deliver Engineer-to-Order Product	Operational Activity	The process of obtaining, responding to, and allocating resources for a customer order that has unique requirements or specifications and delivering a product that is partially or fully designed, redesigned, manufactured, and/or assembled from a bill of materials or recipe that includes one or more custom parts or ingredients. Design will begin only after the receipt and validation of a firm customer order.	
Deliver from Maintenance	Operational Activity	The process of preparing the product from maintenance for delivery to customer or customer pickup. The product is fully functional upon completion.	
Deliver Health Services	Operational Activity	This activity is associated with providing the beneficiary and family with information and health services in a timely, productive, and effective manner that achieves desired outcomes and maximizes force readiness.	
Deliver Individual Training Course	Operational Activity	This activity is associated with administering the training course which includes identifying available individual training course resources, managing individual training course enrollment, conducting and analyzing individual training course.	
Deliver Make-to-Stock Product	Operational Activity	The processes of delivering product that is sourced, configured, manufactured, and/or assembled from standard raw materials, parts, ingredients or sub-assemblies, in response to a specific firm customer order. A reference to the customer order is exchanged with the sourcing or make process and attached to or marked on the product. Products in stock are identifiable by customer order through labeling and inventory data management. Examples include assigning a serial number, lot number or batch number to a customer order prior to Make or Source, processes that generate a bill-of-materials for the associated Make process (e.g. configure-to-order and assemble-to-order) and the 'special order' process in retail.	
Deliver Morale, Welfare and Recreation Program	Operational Activity	This activity is associated with delivering Morale, Welfare and Recreation (MWR) programs. This includes administering personnel accounts for MWR managing program enrollment, verifying that individuals are eligible for a program and making decisions about special enrollment circumstances, managing disenrollment and closeout of program accounts, and consolidating and reporting information about MWR program enrollment.	
Deliver Property and Forces	Operational Activity	This activity satisfies the needs of internal and external customers, as evidenced by orders (i.e. requisitions, purchase orders or contracts), by issuing or transporting forces, inventory and related materials or capital equipment. Property and forces come under control of the Deliver activity when they are received at staging. The Deliver activity is triggered when an inquiry, order or orders are received from a customer. It includes the care and custody of the forces, goods, picking orders, arranging transportation and issuing, transporting or shipping the forces or goods. The Deliver activity is complete when the goods or forces have been received by the consignee, acknowledged and invoiced, and the in transit record has been cleared. As referenced by the SCOR model for DELIVER.	
Deliver Quality of Life Programs	Operational Activity	This activity is associated with administering a Quality of Life (QoL) program(s) (e.g., Morale, Welfare and Recreation (MWR), Family Support Services, Human Resources Recovery Coordination Program (RCP), Social Action Programs, and Employee Assistance programs). This includes program execution (e.g., enrollment, counseling, providing on-going support, performance and financial reporting). This activity is also associated with providing Employee Assistance Program (EAP) services, and making referrals to EAP services.	
Deliver Retail Product	Operational Activity	Deliver Retail Products are the processes used to acquire, merchandise, and sell finished goods at a retail store. A retail store is a physical location that sells products (and services) direct to the consumer using a point of sale process (manual or automated) to collect payment. Merchandising at a store level is the stocking and restocking of products in designated storage locations to generate sales in a retail store.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Deliver Return Defective Product	Operational Activity	The receipt and disposition determination of defective products as defined by the warranty claims, product recall, non-conforming product and/or other similar policies including appropriate replacement. The Return Defective Product supports any type of product not conforming to specifications (including order non-conformance such as late or otherwise improper delivery); company business rules determine the definition of 'defective'. The physical disposition of the product may not be part of the return process.	
Deliver Return Excess Product	Operational Activity	The receipt of excess or aging inventory or obsolete products as defined by the terms and conditions of a customer/supplier contract. The intention of excess product returns is to reallocate inventory to a location or organization that can sell the product that is considered in excess in the current location. The physical disposition of the product may not be part of the return process.	
Deliver Return Maintenance, Repair and Overhaul Product	Operational Activity	The receipt of Maintenance, Repair and Overhaul (MRO) products or company assets for the purpose of servicing, repairing or upgrading it, as defined by Maintenance Plans or the occurrence or anticipation of risk of failure. Generally company assets managed through a MRO process are expected to be refurbished to a useable condition and returned to service. The Return process does not represent the actual maintenance, repair or overhaul activities; these are generally represented by Make processes. The physical disposition of the product may not be part of the return process.	
Deliver Social Action Programs	Operational Activity	This activity is associated with supporting social action programs to include sexual harassment counseling and drug/alcohol education/treatment, planning and monitoring equal opportunity programs, conducting research on social programs, problems, solutions, and preventions, providing non-partisan information and assistance to facilitate voting participation and organizing community activities for social action program awareness. This activity is also associated with coordinating with the appropriate parties to develop mandatory education and training courses and provide cultural awareness events, and removing barriers and practices that negatively impact DoD members and employees.	
Deliver Stocked Product	Operational Activity	The process of delivering product that is sourced or made based on aggregated customer orders, projected orders/demand and inventory re-ordering parameters. The intention of Deliver Stocked Product is to have the product available when a customer order arrives (to prevent the customer from looking elsewhere). For services industries, these are services that are pre-defined and off-the-shelf (e.g. standard training). Products or services that are 'configurable' cannot be delivered through the Deliver Stocked Product process, as configurable products require customer reference or customer order details.	
Demonstrate Product Support Capability	Operational Activity	This activity demonstrates the capability to provide the required package of support functions necessary to maintain the readiness and operational capability of the systems, subsystems, and support systems exists. This encompasses all critical functions related to system readiness, including materiel management, distribution, technical data management, maintenance, training, cataloging, configuration management, engineering support, repair parts management, failure reporting and analyses, and reliability growth.	
Designate Unit	Operational Activity	This activity is associated with designating the unit's structure or attributes based on the requirements contained in the organization change request.	
Determine Accession Screening Eligibility	Operational Activity	This activity is associated with requesting additional applicant information; determining if the applicant is eligible to continue accession processing based on information provided; updating the applicant profile with eligibility or ineligibility to continue accession processing information; and forwarding or notifying the appropriate parties (e.g., Services, applicant) of the results from the preliminary screening process.	
Determine Aptitude Eligibility	Operational Activity	This activity is associated with reviewing ASVAB test results, determining if the applicant meets DoD aptitude standards, updating the applicant profile with the aptitude testing results, and notifying appropriate parties (e.g., Service, applicant) of the aptitude test results.	
Determine Assignment Action	Operational Activity	This activity is associated with selecting a Member for a valid open personnel requisition or selecting a valid open personnel requisition for a Member who has been identified as requiring a new assignment.	
Determine Available Supply Chain Resources	Operational Activity	Identifying, prioritizing, and aggregating the required capacity to provide a product or service at the appropriate level, horizon and interval.	
Determine Award Type Request	Operational Activity	This activity is associated with determining the award type being requested.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Determine Compensation Eligibility	Operational Activity	This activity is associated with using an established set of pay criteria and business rules for determining whether an employee/Member is eligible and authorized for a particular pay type (e.g., allowances, allotments, special pays, and incentive pays). The criteria may include (but not be limited to) benefit information (e.g., health, retirement, and survivor), duty status, personnel agreement information, verification that personnel have performed a certain duty (e.g., submarine, flying, and diving), and assignment information.	
Determine Deductions	Operational Activity	This activity is associated with determining deductions from an employee/Member's pay. It includes determining statutory deductions (e.g., Federal Insurance Contributions Act (FICA) Tax, Deductions for Armed Forces Retirement Homes, Federal Income Tax Withholding (FITW), garnishments, withholding for state income taxes, social security, collections, and reductions), processing allotments, determining tax levies, determining overpayment of pay and allowances, repayment of advance or casual pay, sending notifications to inform an employee/Member of changes to deduction or indebtedness information, and capturing the decision/authorization by an Approval Authority to award, change, terminate or reinstate an employee/Member's compensation.	
Determine Demand Forecast	Operational Activity	Identifying, aggregating, and prioritizing, all sources of requirements for the integrated supply-chain of a product or service at the appropriate level, horizon and interval.	
Determine Disciplinary Action	Operational Activity	This activity is associated with determining and performing non-punitive or non-judicial actions or referring the case to court-martial, involuntary discharge, creating authoritative source document, and documenting both court-martial and non-judicial punishment proceedings.	
Determine Earnings	Operational Activity	This activity is associated with determining the earnings an employee/Member should receive based on the eligibility determination for particular pay types (e.g., allotments, special pay, bonuses, and incentive pay). Determination of earnings may include pay and allowances for basic pay, duty pay, Basic Allowance for Housing (BAH), Cost of Living Allowance (COLA), accession bonus, and reenlistment bonus.	
Determine Education Resource Requirements	Operational Activity	This activity is associated with determining the type and amount of resources required to deliver a developed education curriculum. Such resources may include (but not be limited to) equipment, facilities, faculty, and other support personnel.	
Determine Eligibility for Applied Benefit	Operational Activity	This activity is associated with reviewing the eligibility criteria against the Member's/Employee's profile information and assessing eligibility for benefit.	
Determine Eligibility for Award	Operational Activity	This activity is associated with reviewing the award qualification and the Member's profile to determine eligibility for the recommended award.	
Determine Eligibility for Education Enrollment	Operational Activity	This activity is associated with reviewing an enrollment request and determining the eligibility to enroll into an education course or program based on pre-established regulatory criteria and the student's profile information. This activity may include (but not be limited to) reviewing prerequisites for an education course or program, updating the student's profile with eligibility information, and counseling the student on any retention actions resulting from enrolling into an education course.	
Determine Eligibility for Enrollment in HR Recovery Coordination Program	Operational Activity	This activity is associated with determining the eligibility of enrollment for a Recovering Service Member (RSM) into the Human Resources (HR) Recovery Coordination Program (RCP). This activity also includes assigning the RSM care category (e.g., return to duty in less than 180 days, unlikely to return to duty in less than 180 days, and highly unlikely to return to duty), collecting information (e.g., identification of preliminary needs and identification of Recovery Team) to complete RCP enrollment, assignment of a care coordinator, and periodic review of the recovery care plan assessment report to determine if the RSM needs to remain in the RCP.	
Determine Eligibility for Individual Training Course Enrollment	Operational Activity	This activity is associated with reviewing an enrollment request and determining the eligibility to enroll into a training course based on pre-established regulatory criteria and the Member's profile information. This activity may include (but not be limited to) reviewing prerequisites for a training course, updating the Member's profile with eligibility information, and counseling the Member on any retention actions resulting from enrolling into a training course.	
Determine Eligibility for Selected Benefit	Operational Activity	This activity is associated with reviewing the eligibility criteria against the Member's/Employee's profile information and assessing eligibility for selected benefit.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Determine Entrance Eligibility	Operational Activity	This activity is associated with verifying positive identification of the applicant, determining if the applicant information is complete, conducting the accession interview (i.e., pre-enlistment interview, pre-accession interview), conducting additional disclosure resolution, determining if the applicant is eligible to continue the accession process, and updating the applicant profile with information from the accession interview and eligibility or ineligibility to continue accession process information.	
Determine Entrance Qualifications	Operational Activity	This activity is associated with performing preliminary screening, performing aptitude qualification, and performing medical qualification.	
Determine if Leave Sell Back is Permissible	Operational Activity	This activity is associated with determining if the sell back of leave is permissible by determining if the Member meets the qualifications to sell military accrued leave.	
Determine Individual Training Course Resource Requirements	Operational Activity	This activity is associated with establishing what resource requirements (e.g., type of instructor, class size, and supplies) are needed to effectively conduct the training course. This activity is also associated with determining if a training course will be resident or distributed (e.g., distance learning, correspondence courses, and online courses) learning.	
Determine Leave Balance	Operational Activity	This activity is associated with reviewing and validating the accounting period leave information, notifying the appropriate parties of any invalid leave information, and determining all leave deductions and leave accrual for a Member in a given leave accounting period.	
Determine Manpower Requirements to be Funded	Operational Activity	This activity is associated with determining mission requirements that are funded and unfunded based on the priority list and projected funding allocation.	
Determine Materiel and Resource Availability	Operational Activity	This activity conducts market research to determine if materials are available to meet the Government's needs or could be developed to meet the Government's needs. The extent of market research will vary, depending on such factors as urgency, estimated dollar value, complexity, and past experience.	
Determine Medical Qualification	Operational Activity	This activity is associated with determining if the applicant meets medical standards based on the results from the medical examination, determining if a disqualifying medical condition is permanent or temporary, providing the medical examination results to the Service, reviewing the Service medical decision, determining if the Service is accepting the applicant's disqualifying medical condition(s) if any, and updating the applicant profile with the medical examination results and Service medical decision information.	
Determine Member for Reenlistment	Operational Activity	This activity is associated with reviewing, identifying, and determining Members eligible for reenlistment who have met the prerequisites for reenlistment or who have requested to reenlist. This activity may also include reviewing the target enlistment career progression pattern (e.g. timing for promotion, reenlistment, and service limits), as well as counseling a Member on the opportunities and incentives to reenlist, reviewing the length of reenlistment agreement, reviewing the Member's eligibility, and documenting the counseling session.	
Determine Mission Requirements for Manpower	Operational Activity	This activity is associated with determining the manpower required to support the missions, functions, and tasks of an Organization/Component based upon the strategic objectives, policy, roles and missions, and warfighting strategies identified by a higher authority. It also includes the determination of Force Structure and non-Force Structure requirements (to include the proper mix of military, civilian and contractor positions). Planning must take into consideration peacetime and wartime missions and requirements.	
Determine Occupational Competencies	Operational Activity	This activity is associated with determining the Department of Defense (DoD)-recognized competencies related to occupations or occupation families. Warfighter-identified deficiencies, and proposals from multiple sources, are also assessed with the generation of feedback and proposed actions. This activity also includes evaluating appropriateness and applicability of competency model components per occupation, and proposing changes for validation and acceptance.	
Determine Officer Involuntary Retention Waiver Request Outcome	Operational Activity	This activity is associated with reviewing involuntary retention waiver supporting documentation, documenting, and acting upon an Officer's request to have their involuntary retention action waived. This activity also includes notifying the Officer of waiver request outcome.	
Determine Organization Structure to Support Mission Change	Operational Activity	This activity is associated with deciding the organizational structure needed to support the change in mission.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Determine Performance Evaluation Rating Chain	Operational Activity	This activity is associated with identifying, publishing, and disseminating the performance evaluation rating chain for a given individual. The performance evaluation rating chain information may include (but not be limited to) name of rater, rank of rater, and grade of rater.	
Determine Personnel Requiring Performance Evaluation	Operational Activity	This activity is associated with identifying and notifying personnel that they are due or overdue for performance evaluation.	
Determine Reimbursement Amount Due	Operational Activity	This activity is associated with determining the reimbursement amount due, based upon reimbursement type (e.g., medical education program expense reimbursement, Cost of Living Allowance Unique reimbursement) and established reimbursement criteria.	
Determine Reimbursement Eligibility	Operational Activity	This activity is associated with receiving and reviewing reimbursement information, and using an established set of reimbursement criteria and business rules for determining whether an employee/Member is eligible and authorized for a particular reimbursement type (e.g., medical education program expense reimbursement, Cost of Living Allowance Unique reimbursement).	
Determine Route and Carriers	Operational Activity	This activity consolidates and routes loads by mode, lane and location; selects specific carriers by best value; and rates and tenders shipments using load, asset, and carrier information to produce a transportation schedule required to perform movement execution. (SCOR D1.6, D1.7)	
Determine Type of Request	Operational Activity	This activity is associated with reviewing a request for an Organization Unique Identifier (OUID) for authorized/funded organization, determining the organization type (e.g., identification of organization category, organization information and data and parent/child relationships), determining if an OUID already exists.	
Develop and Implement Acquisition Policy	Operational Activity	This activity develops and implements new policy and associated procedures and enablers.	
Develop and Resolve Programmatic Issues	Operational Activity	This activity develops and resolves programmatic issues. The issues are discussed, alternatives identified and approaches negotiated and resolved among the services and programs. OSD, in conjunction with other executive-level leaders described, review specific major issue documents prepared as part of this activity and forwarded to the SECDEF for resolution. Decisions reached are issued to the components for finalization of the POMs/PCPs. Minor Issues are managed by a smaller group with recommendations forwarded to the DEPSECDEF for approval. Following the staff review of the POMs SLRG members, Function Capabilities Boards, and the COCOMs submit issues for consideration to OSD. Additionally, the Joint Staff participates in the development of the issues by providing members to an issue team lead by an OSD PA&E issues analyst. After the issues are considered by the SLRG, the Deputy SECDEF makes a preliminary decision on each one they are incorporated into the Issue Book for review by the Secretary of Defense.	
Develop Benefit Programs	Operational Activity	This activity is associated with determining the need for benefit program by reviewing benefit program needs, identifying and coordinating benefit programs, establishing eligibility criteria and available options, defining benefit enrollment/application process, making decisions on benefit programs, and distributing benefit program information. This activity is also associated with delivering benefits communication, managing provider contracts, electing benefits, activating enrollments, and maintaining appropriate records.	
Develop Budget Guidance	Operational Activity	The budget plan is a blueprint for using financial resources during any given fiscal period or series of periods. The budget planning guidance includes updates to the budget plan as necessary and reporting on the use of resources against these plans throughout the year. This guidance will be the authoritative source for the military services and defense agencies in developing their Budget Estimates Submissions and Budget Change Proposals.	
Develop Capability Documents	Operational Activity	This activity manages the overall development of initial documentation and subsequent refinements in detail and scope of a warfighter capability.	
Develop Career Path Plan	Operational Activity	This activity is associated with developing career path plans that support a specific occupational career path. This activity may include (but not be limited to) developing and identifying the specific requirements needed to progress in a particular career path and any associated training and educational courses need to progress within a particular career path.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Develop Concept of Operations	Operational Activity	This activity develops a verbal or graphic statement, in broad outline, of a commander's assumptions or intent in regard to an operation or series of operations. It is designed to give an overall picture of the operation.	
Develop Education Course Curriculum	Operational Activity	This activity is associated with developing instructional curriculum and educational goals. This activity also includes designing educational objectives, plans, materials, tests, and development of any associated courseware.	
Develop Education Programs	Operational Activity	This activity is associated with identifying education requirements, developing and maintaining education course curriculums, and determining education resource requirements.	
Develop ESOH Control Agreement	Operational Activity	This activity develops the required set of operational controls implemented by a mission process to comply with environment, safety, and occupational health legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by agreement between stakeholders such as the owner or operator of the mission process; supporting environment, safety, and occupational health organizations; permitting agencies; the public; and other appropriate DoD organizations such as human resources and acquisition. Environment, safety, and occupational health controls govern operation, use, maintenance, design, technology, materiel, hazardous materiel usage, work process, mission process, or facility use. The activity also includes efforts to amend the ESOH control agreement when the mission process identifies the need to modify parameters defined in the original agreement. The output of this activity is an ESOH Control Agreement that documents the agreement among key stakeholders that an ESOH solution is needed to address an ESOH aspect, as well as details about the ESOH solution and how it will be implemented. It may also specify parameters that indicate when the ESOH aspect has been fully resolved. Examples include a CERCLA Record of Decision, a Hazardous Process Authorization, an Integrated Natural Resource Management Plan, and operating permits issued under the Resource Conservation and Recovery Act, the Safe Drinking Water Act, etc. They may also define standard operating procedures, specify safety requirements, detail experience levels and training requirements, prescribe monitoring and reporting requirements, or specify other required activities.	
Develop ESOH Solution	Operational Activity	This activity involves the development of alternative ESOH solutions that address the findings of ESOH aspect and risk assessments. The alternative solutions are developed in compliance with ESOH laws and regulations for protecting human health, safety, and the environment, and are evaluated against factors such as effectiveness, technical feasibility, cost, and socio-economic impact. The outcome of this activity is the identification and documentation of a preferred ESOH solution.	
Develop Functional Concept	Operational Activity	This activity develops the "how" a future joint force commander will integrate a set of related military tasks to attain capabilities required across the range of military operations. It derives specific context from joint operating concepts and promotes common attributes in sufficient detail to conduct experimentation and measure effectiveness.	
Develop Human Resources Management Policy and Guidance	Operational Activity	This activity is associated with reviewing information received (e.g. Strategic Planning Guidance, National Military Strategy, Program and Budget Output Information, Human Resources Management (HRM) policy and guidance request), developing a draft HRM policy and guidance (e.g., accession policy, compensation policy, enlisted and officer personnel management policy), and collaborating with the appropriate parties for input to the draft policy and guidance.	
Develop Human Resources Management Strategy	Operational Activity	This activity is associated with formulating and updating Human Capital mission and vision, formulating and updating Human Resources mission and vision, developing multi-year Human Capital objectives and strategies, developing multi-year Human Resources objectives and strategies, establishing Human Capital goals, milestones and evaluation criteria, establishing Human Relations goals, milestones and evaluation criteria, and reporting on progress against Human Capital and Human Relations objectives and strategies.	
Develop Human Resources Recovery Care Plan	Operational Activity	This activity is associated with reviewing the assessment information in order to develop a Human Resources (HR) recovery care plan (e.g., services, and identification of the recovery team members who will provide services) for the Recovering Service Members (RSM).	
Develop Individual Training Course	Operational Activity	This activity is associated with identifying, creating, maintaining individual training courses and determining individual training course resource requirements.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Develop Information Support Plan	Operational Activity	This activity develops the required attributes (to include interface descriptions, infrastructure and support requirements, standards profiles, measures of performance, and interoperability shortfalls) for an Acquisition Category (ACAT) program that connects, in any way, to the communications and information infrastructure including both Information Technology (IT) and National Security System (NSS) programs.	
Develop Integrated Architecture	Operational Activity	This activity manages the architecture consisting of multiple views (operational view, systems view and technical view) that facilitates integration and promotes interoperability across capabilities and among related architectures.	
Develop Integrated Logistics Support Plan	Operational Activity	This activity develops a plan to address the management of logistics support and sustainment of a weapon system over its life-cycle.	
Develop Integrating Concept	Operational Activity	This activity develops an approach to integrate functional means to achieve operational ends. This approach includes a list of essential battlespace effects (including essential supporting tasks, measures of effectiveness, and measures of performance) and a CONOPS for integrating these effects together to achieve the desired end state.	
Develop Joint Capability Document	Operational Activity	This document develops a document that identifies a set of capabilities that support a defined mission area utilizing associated Family of Joint Future Concepts, CONOPS or Unified Command Plan-assigned mission.	
Develop Joint Future Concepts	Operational Activity	This activity develops the overarching concept that guides the development of future joint force capabilities. It broadly describes how the joint force is expected to operate 10-20 years in the future in all domains across the range of military operations within a multilateral environment in collaboration with interagency and multinational partners.	
Develop Joint Operations Concepts	Operational Activity	This activity develops the overarching concept that guides the development of joint force capabilities. It describes how a Joint Force Commander will plan, prepare, deploy, employ, and sustain a joint force against potential adversaries' capabilities or crisis situations specified within the range of military operations. It also describes the measurable detail needed to conduct experimentation, permit the development of measures of effectiveness, and allow decision makers to compare alternatives and make programmatic decisions.	
Develop Key Performance Parameters	Operational Activity	This activity compiles attributes or characteristics of a system that are considered critical or essential to the development of an effective military capability and those attributes that make a significant contribution to the key characteristics as defined in the Joint Operations Concept.	
Develop Materiel Solution Approaches	Operational Activity	This activity develops approaches for correction of a deficiency, satisfaction of a capability gap, or incorporation of new technology that result in the development, acquisition, procurement, or fielding of a new item (including ships, tanks, self-propelled weapons, aircraft, etc. and related software, spares repair parts, and support equipment, but excluding real property, installations, and utilities) necessary to equip, operate, maintain, and support military activities without disruption as to their application for administrative or combat purposes. In the case of family of systems and system of systems approaches, an individual materiel solution may not fully satisfy a necessary capability gap on its own.	
Develop Performance Based Logistics Strategy	Operational Activity	This activity develops a sustainment strategy for weapon system product support that employs the purchase of support as an integrated, affordable performance package designed to optimize system readiness.	
Develop Personnel Distribution Plan	Operational Activity	This activity is associated with developing and approving a personnel distribution plan based on the personnel guidance information, manpower documents and workforce analysis information and distributing the plan to the appropriate parties.	
Develop Physical Fitness Program	Operational Activity	This activity is associated with developing a physical fitness program and related physical activities consistent with established principles of physical conditioning that enhance fitness and general health essential to combat readiness. This activity may include (but not be limited to) reviewing mission requirements, physical fitness program assessment information, and health care beneficiary care profile information to determine fitness objectives and identify physical fitness program requirements; creating or modifying physical fitness training tasks; and determining physical fitness program resources (e.g., personnel, equipment, facilities, and training aids) necessary to conduct a physical fitness program.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Develop Policy and Procedure Guidance	Operational Activity	This activity is associated with reviewing the Strategic Planning Guidance document to create the Department of Defense (DoD) Component-specific planning guidance.	
Develop Population Health Management Practices	Operational Activity	This activity is associated with developing a continuous process of tools, models, programs, and processes to support population health management, based on analysis of population health data, and research. This activity also includes developing new evidenced based care models that are supported by research.	
Develop Procurement Strategy	Operational Activity	Develop Procurement Strategy is initiated as a review of sourcing alternatives for the goods and/or services requested to determine the products and services from vendor sources that will best meet the requirement. Activities include determining: appropriate contractual vehicles, terms and conditions, opportunities for strategic sourcing, and the independent government estimate for performance. This activity determines the strategy to acquire supplier provided goods and services that satisfy the approved requirement.	
Develop Program	Operational Activity	This activity defines the strategy, action, schedule, resources and facilities necessary to accomplish and manage the program.	
Develop Program Guidance	Operational Activity	This activity describes the issuance of top-line fiscal control provided to each of the services and components for use in preparing their POMs. This guidance provides fiscal constraints that must be observed by DoD Components in the formulation of force structures and by the Office of the Secretary of Defense (OSD) and joint staff in reviewing proposed programs.	
Develop Risk Management Plan	Operational Activity	This activity is associated with identifying critical readiness deficiencies or capability shortfalls and risks in executing missions. This activity is also associated with identifying deficiencies in the areas of training and personnel, to include issues such as medical, equipment, ordnance, and sustainment. This activity is also associated with developing and coordinating strategies to rectify deficiencies and identifying appropriate measures to reduce risks.	
Develop Science and Technology Strategy	Operational Activity	This activity develops the strategies and supporting plans to exploit technologies and prototypes to respond to the needs of the DoD and ensure U.S. technological superiority.	
Develop Solution Alternatives	Operational Activity	This activity develops potential materiel solution alternatives. Alternatives may include a Family of Systems (FoS) that take different approaches to filling the capability gap, each addressing operational considerations in a different way.	
Develop Staff Acquisition Plan	Operational Activity	This activity is associated with matching hiring requests to position descriptions, identifying hiring sources, creating a hiring plan, and providing a management advisory service.	
Develop Staff Acquisition Strategy	Operational Activity	This activity is associated with analyzing staffing needs, identifying hiring flexibilities, identifying sourcing strategies, creating a staff acquisition strategy, and communicating the staff acquisition strategy.	
Develop Technology	Operational Activity	This activity explores technological opportunities and develops potential technologies to a maturity level sufficient for implementation in DoD systems in order to strengthen the technology base. This activity could also include the exploitation of developed technologies.	
Develop Test Plans	Operational Activity	This activity conducts test and evaluation planning starting with Technology Development and continuing through System Development and Demonstration into Production and Deployment. The test plans will describe how component technologies are developed and demonstrated in a relevant environment to support a program's transition into the System Development and Demonstration Phase.	
Dispose or Return Property and Materiel	Operational Activity	This activity sends goods and equipment back into the supply chain when they are received in error, in excess of required quantities, or defective, obsolete, damaged, or worn until rendered no longer useful in their current condition. This activity also includes the disposal actions of real property to include but not limited to demolition or transfer. As referenced by the SCOR model for RETURN.	
Dispose Property or Materiel	Operational Activity	This activity addresses the actions required to properly dispose property or materiel that has been authorized for disposal as it is beyond economical repair, not covered by a valid warranty, and is not required for use by any other government organization, per the disposal authorization instruction. This activity also addresses the actions to dispose of real property to include but not limited to demolition or transfer.	
Disposition Defective Product	Operational Activity	The process of the customer determining whether to return the defective item and the appropriate source contact for a return authorization.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Disposition Excess Product	Operational Activity	The process of the customer determining whether to return the excess material and identification of a designated return center a return authorization.	
Disposition Maintenance, Repair and Overhaul Product	Operational Activity	The process of the customer determining whether to service the item, what service is required, and who the appropriate service provider would be to service the item. Outputs include a decision to: (1) send a return authorization request to a service provider, (2) send the product back into service without requiring a return authorization request, or (3) discard the item.	
Distribute Assignment Order	Operational Activity	This activity is associated with distributing assignment orders to the appropriate parties for action or information. This assignment order information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	
Distribute Award Order	Operational Activity	This activity is associated with distributing award orders to the appropriate parties for action or information. This award order information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	
Distribute Human Resources Information	Operational Activity	This activity is associated with providing Human Resources Information in response to a personnel record request, mission requirement need, and reporting purposes.	
Distribute Manpower Document	Operational Activity	This activity is associated with sending the Manpower documents to the different organization levels for review and necessary updates.	
Distribute Personnel Grade Change Order	Operational Activity	This activity is associated with distributing personnel grade change orders to the appropriate parties (e.g., Member, Commander) for action or information. This personnel grade change order information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	
Distribute Retirement Order	Operational Activity	This activity is associated with distributing retirement orders to the appropriate parties for action or information. This activity also includes determining the following retirement order information: approved order date and status, order number, order effective date, and order type.	
Distribute Separation Order	Operational Activity	This activity is associated with distributing separation orders to the appropriate parties for action or information. This activity also includes determining the following separation order information: approved order date and status, order number, order effective date, and order type.	
Distribute Transfer Order	Operational Activity	This activity is associated with distributing transfer orders to the appropriate parties for action or information. This transfer order information may include (but not be limited to) approved order date and status, order number, order effective date, and order type.	
Document Adverse Action Results	Operational Activity	This activity is associated with documenting all adverse action results by producing adverse action reports, updating the Member's profile with adverse action results and removing administrative holds as necessary. This activity also includes either documenting the offense and punishment or removing/expunging the charges based on the decision/findings.	
Document Casualty Assistance Program Selections	Operational Activity	This activity is associated with advising the Member or next of kin on available programs and benefits related to casualty assistance, documenting their selections from available programs and services, and directing them to the appropriate parties for further assistance. These programs and benefits may be sponsored by sources both internal and external to DoD (e.g., Service-sponsored programs through Family Support, Department of Veterans Affairs (VA)-sponsored programs and benefits, and, in the event of death casualty, family-selected funeral products/service providers).	
Document Preferred System Concept	Operational Activity	This activity documents the organization of hardware, software, material, facilities, personnel, data, and services needed to perform a designated function with specified results, such as the gathering of specified data, its processing, and delivery to users.	
Document Time, Absence, and Labor Information	Operational Activity	This activity is associated with documenting electronically or manually time worked and the associated characteristics of the time (e.g., regular, overtime, night differential, time periods associated with Unit Training Assemblies), as well as documenting labor allotted to specific tasks, duty participation, projects, and/or programs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Document Transition Assistance Selections	Operational Activity	This activity is associated with documenting Members, their families and civilian personnel's transition assistance service (e.g., Employment Assistance, Relocation Assistance, Education and Training Programs) options. This includes (but is not limited to) counseling Members, their families, newly separated members and civilian personnel on transition assistance service selections and providing information on transition assistance service providers.	
Enable Deliver	Operational Activity	Enable Processes prepare, maintain, or manage information or relationships on which planning and execution processes rely - Enable Deliver.	
Enable Make	Operational Activity	Enable Processes prepare, maintain, or manage information or relationships on which planning and execution processes rely - Enable Make.	
Enable Plan	Operational Activity	A plan for the development and establishment of courses of action over specified time periods to appropriate delivery resources to meet projected delivery requirements. The plan contains necessary business requirements for information and relationships to effectively and efficiently plan the Supply Chain.	
Enable Return	Operational Activity	Enable Processes prepare, maintain, or manage information or relationships on which planning and execution processes rely - Enable Return.	
Enable Source	Operational Activity	Enable Processes prepare, maintain, or manage information or relationships on which planning and execution processes rely - Enable Source.	
Enforce Unfavorable Personnel Security Clearance Determinations	Operational Activity	This activity is associated with enforcing the outcomes resulting from an unfavorable personnel security clearance determination. This may include (but is not limited to), coordinating a person's reassignment or termination, revoking a clearance or downgrading a clearance.	
Engineer-to-Order	Operational Activity	The process of developing, designing, validating, and ultimately using a manufacturing process to produce products or services based on the requirements of a specific customer. In general Engineer-to-Order requires that work instructions may need to be defined or refined and material routing instructions may need to be added or modified. An example of an alternative or related name for Make Engineer-to-Order is: Design-to-Order (DTO).	
Ensure Quality of Health Services	Operational Activity	This activity is associated with determining metrics, analyzing data, and providing feedback to individual providers in a manner that supports improvement of the quality of services provided to beneficiaries. Information and data collected facilitates meeting regulatory requirements for credentialing and accreditation.	
Enter Order, Commit Resources and Launch Program	Operational Activity	The process of entering/finalizing the customers order, approving the planned resources (e.g., engineering, manufacturing, etc.) and officially launching the program.	
Establish Accounts Receivable	Operational Activity	The activity to establish receivables involves the administration of monies owed to the Department of Defense. This includes the recording of the receivable and recognizing revenue earned.	
Establish and Communicate Return Plans	Operational Activity	The establishment and communication of courses of action over specified time periods that represent a projected appropriation of required return resources and or assets to meet return process requirements.	
Establish And Communicate Supply Chain Plans	Operational Activity	The establishment and communication of courses of action over the appropriate time-defined (long-term, annual, monthly, weekly) planning horizon and interval, representing a projected appropriation of supply-chain resources to meet supply-chain requirements.	
Establish Delivery Plans	Operational Activity	The establishment of courses of action over specified time periods that represent a projected appropriation of delivery resources to meet delivery requirements.	
Establish Evaluation Approach	Operational Activity	This activity is associated with conducting job analyses (e.g., analyzing Federal and agency-specific qualification standards, classified descriptions of duties and/or job requirements), developing applicant assessment criteria, and developing an assessment approach based on job analysis results and existing best practices.	
Establish Executive Level Contract Performance Criteria	Operational Activity	This activity drives a systematic approach to contract performance improvement through an ongoing process of establishing strategic performance objectives.	
Establish Individual Development Plan	Operational Activity	This activity is associated with the manager and employee, in a collaborative effort, identifying developmental opportunities to address competency goals and/or deficiencies and setting up an action plan for development going forward.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Establish Labor Communication Protocol	Operational Activity	This activity is associated with establishing the relationship for ongoing communication between union and management.	
Establish List of Potential Prospects	Operational Activity	This activity is associated with establishing a list of potential prospects for recruitment and making contact to collect initial personal information (e.g., name, phone number, and email address).	
Establish Maintenance Plans	Operational Activity	The establishment of courses of action over specified time periods that represent a projected appropriation of supply resources to meet maintenance requirements.	
Establish Performance Evaluation Rating Chain	Operational Activity	This activity is associated with establishing a Member's performance evaluation rating chain by identifying the raters that will provide input to a Member's performance evaluation.	
Establish Performance Management Programs	Operational Activity	This activity is associated with developing a results-focused performance management procedures and requirements for planning, monitoring, assessing and rating employee performance and correcting or rewarding such performance as appropriate (e.g., work with employees and unions). This activity also includes specifying the employees covered by the performance management program, addressing the application and operation of written and verbal performance feedback (e.g., other intermittent performance assessments, employee individual development plans, measures against competencies and performance elements and standards), and obtaining required management approval. This activity also includes identifying bonus and award (e.g., monetary, non-monetary) strategies for any given year.	
Establish Performance Plan	Operational Activity	This activity is associated with initiating a discussion with an employee to establish a performance plan for the given rating period, finalizing and communicating the performance requirements and proficiency levels where the employee understands the measures against which he or she will be rated, This may include (but not be limited to) specific results expected, agency-wide core competencies, and position specific competencies which Human Resources (HR) will provide consultative support as requested.	
Establish Production Plans	Operational Activity	The establishment of courses of action over specified time periods that represent a projected appropriation of supply resources to meet production and operating plan requirements.	
Establish Quality of Life Program	Operational Activity	This activity is associated with establishing a Quality of Life (QoL) program. This includes receiving QoL program proposals, making decisions concerning QoL program development, reviewing a QoL program requirement and pertinent information (e.g., current benefits programs, financial, asset, personnel and market information, strategic plans), coordinating analysis to assist in requesting funding, facilities, and personnel for a QoL program, developing goals, short and long-term plans and standards for a QoL program, and issuing initial QoL program information.	
Establish Sourcing Plans	Operational Activity	The establishment of courses of action over specified time periods that represent a projected appropriation of supply resources to meet sourcing plan requirements.	
Establish Unit	Operational Activity	This activity is associated with creating, designating, and organizing a new unit.	
Evaluate and Synthesize Test Results	Operational Activity	This activity supports the process of evaluating and analyzing performance related information and using the results to make or accept recommendations for system changes. The information has many uses including risk identification, risk mitigation and empirical data to validate models and simulations.	
Evaluate Budget Submission	Operational Activity	This activity is where the budget estimates are reviewed by the OSD and OMB to ensure proper pricing, reasonableness, and executability. The OSD and OMB conducts budget hearings with components to ensure that the budget estimates are in alignment with the areas of interest of the Administration. Major Budget Issues are identified for resolution. Based on the results of the evaluation, draft Program Budget Decisions (PDBs) are written for review and coordination.	
Evaluate Candidate	Operational Activity	This activity is associated with determining qualified and eligible candidates, assessing candidates to be referred, applying Federal rules on preferences (priorities), referring candidates for consideration, assessing candidates for selection, making tentative selections, and validating selections.	
Evaluate Family Support Services	Operational Activity	This activity is associated with gathering feedback information and evaluating whether the goals of the Family Support needs assessment are being achieved. This includes producing a Family Support service evaluation report to evaluate the services being provided, whether goals are being met, identification of additional services, documenting issues, and the identification of Members or family members who no longer require Family Support services.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Evaluate Human Resources Recovery Care Plan	Operational Activity	This activity is associated with evaluating whether the goals of a Human Resources (HR) Recovery Care Plan are being achieved and preparing Recovering Service Member (RSM) to return to duty, separate, or retire. This activity also includes producing a periodic recovery plan assessment report to evaluate the services being provided to the RSM, determine if goals are being met, and the identification of RSMs who no longer require services from the Human Resources Recovery Coordination Program (RCP).	
Evaluate Manpower Change Request	Operational Activity	This activity is associated with analyzing and validating the Manpower Change Request received. This activity may also be associated with notifying the organization that the change request has been determined to be an invalid request.	
Evaluate Organization Change Request	Operational Activity	This activity is associated with analyzing the Change Request or Mission/Force structure change. Force Structure refers to the organizations, units, personnel and equipment that comprise the Department of Defense.	
Evaluate Performance Management Programs	Operational Activity	This activity is associated with determining the effectiveness of the program in terms of individual employee performance plan alignment to agency mission and goals, determining the relationship of employee ratings distribution to organizational achievements, determining the use of validated competencies, employee understanding of relationship between expected results and agency goals, and determining the use of balanced and credible measures and ability of supervisors to make meaningful distinctions in performance. This activity may also include This review may be conducted using appropriate evaluation tools such as 360 ratings, supervisor feedback, self-assessment and employee surveys. This review should be conducted periodically, as scheduled by the agency, but not less than every two to three years for established programs and annually for new programs.	
Evaluate Personnel Performance	Operational Activity	This activity is associated with reviewing the individual's personnel/pay record by the rating chain, assessing the individual's performance, documenting their assessment, and submitting the performance evaluation to the next rater in the individual's rating chain as necessary. This activity may also include reviewing the initial assessment by the next level of rater and documenting their concurrence or non-concurrence to the assessment, plus providing any comments.	
Evaluate Population Health Management	Operational Activity	This activity is associated with forming and comparing an evaluation process for the development and implementation of an evidence-based population health management system. Evaluations are based on the accurate collection, analysis and dissemination of population information.	
Evaluate Product Support Capabilities	Operational Activity	This activity collects and assembles the information necessary to define the technical and management activities conducted to ensure supportability implications are considered early and throughout the acquisition process to minimize support costs and to provide the user with the resources to sustain the system in the field.	
Evaluate Production Capability	Operational Activity	This activity evaluates manufacturing processes, and available or programmed production facilities and equipment to determine the degree to which a technology is producible, reliable, and affordable.	
Evaluate Program Information	Operational Activity	This activity reviews the consolidated POMs or PCPs in accordance with program views of overarching enterprise and services contributions to defense capabilities and program resource (and to-be performance-cost) requirements. Conflicting or outstanding POM/PCP program fulfillment issues are noted for subsequent program management and executive review and evaluation. The review and evaluation of the compiled POMs/PCPs is performed by the OSD, Joint Chief of Staff, Senior Leader Review Group members and COCOMS. This activity involves an iterative review and update activity aimed at finalizing and approving the individual POMs/PCPs submitted by the services/agencies. The POMs or PCPs are reviewed in terms of the specific needs of these areas of defense using the published Major Issues List.	
Evaluate Strategic Goals	Operational Activity	This activity ensures that the planning goals and programming objectives are consistent with the National Military and National Security strategies. This activity also identifies focus areas to identify priorities that will be used to develop fiscal and program guidance.	
Evaluate Technology	Operational Activity	This activity evaluates the readiness, risk and cost of technologies for potential to support required capabilities.	
Execute Acquisition Management Integration	Operational Activity	Execute Acquisition Management Integration encompasses the acquisition oversight, transformation, policy, and resource analysis performed by a specific skill set, discipline, or broad business area.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Execute Apportionment	Operational Activity	This activity establishes the budget authority as the beginning of the execution process. This activity records an agency's budgetary resources and supports the establishment of legal budgetary limitations within the agency, including appropriation warrants, apportionments, reappropriations, transfer allocations, and continuing resolutions. It also supports the establishment of funding to agencies that are not subject to apportionment.	
Execute Award Order	Operational Activity	This activity is associated with reviewing and documenting the final decision, preparing official award order, issuing an award certificate, and updating the individual's award information. An official award order may also be for revoking an award.	
Execute Continuing Resolution	Operational Activity	This activity focuses on identifying amounts available and additional authority request for distribution under the Continuing Resolution Act.	
Execute Demotion	Operational Activity	This activity is associated with executing the demotion decision, updating the Member's personnel/pay record, and notifying the appropriate parties (e.g., Commander, housing authorities, Civilian Personnel Office) of the demotion.	
Execute Disposal Plan	Operational Activity	This activity includes execution or management oversight of the removal of weapons and legacy systems.	
Execute Disposition of Human Resources Information	Operational Activity	This activity is associated with executing disposition actions for Human Resources Information (i.e., Human Resources Profile and Human Resources Record). The disposition of the Human Resources Information will be determined after the record or profile has been created. Disposition actions may include but not be limited to transfer from one Federal agency to another, transfer of permanent records to the National Archives, and disposal of temporary records.	
Execute DoD Acquisition	Operational Activity	Execute DoD Acquisition encompasses the activities related to the conceptualization, initiation, design, development, testing, contracting, production, deployment, Logistics Support (LS), modification, and disposal of weapons and other systems, supplies, real property, or services (including construction) to satisfy DoD needs, intended for use in, or in support of, military missions.	
Execute Enlistment Extension Agreement	Operational Activity	This activity is associated with preparing enlistment extension Service agreements, facilitating the signing of the service enlistment agreements, updating Members' information, and counseling members on pending extensions.	
Execute Individual Assignment	Operational Activity	This activity is associated with processing an individual assignment. This activity may include (but not be limited to) generating orders, performing in and out-processing, managing assignment elections.	
Execute Inter-Service Transfer	Operational Activity	This activity is associated with executing the Inter-Service transfer while ensuring that the Member's continuation of service is preserved. This activity may include (but not be limited to) updating transfer profile information and generating transfer orders, (e.g., transfer package, personnel/pay record, separation orders).	
Execute Intra-Service Transfer	Operational Activity	This activity is associated with executing the Intra-Service transfer while ensuring that the Member's continuation of service is preserved. The appropriate records are updated and submitted to Human Resources (e.g., health records, Personnel/Pay record, separation orders).	
Execute Joint Capabilities Integration and Development System	Operational Activity	This activity supports the Chairman of the Joint Chiefs of Staff (CJCS) and the Joint Requirements Oversight Council (JROC) in identifying, assessing, and prioritizing joint military capability needs as required by law. The capabilities are identified by analyzing what is required across all functional areas to accomplish the mission.	
Execute Manpower	Operational Activity	This activity is associated with reviewing Manpower Allocation, reconciling discrepancies, updating position data and Manpower documents, and distributing Manpower documents.	
Execute Other Acquisition Statutory Responsibility	Operational Activity	This activity executes the remaining statutory activities not addressed in the Defense Acquisition Management Framework, DoD Decision System, or Acquisition Business Functional Areas.	
Execute Payroll	Operational Activity	This activity is associated with scheduling pay processing by pay population, calculating earnings and gross pay, certifying net pay, maintaining payroll history, producing pay statements (e.g., leave and earnings statement (LES) and payroll disbursement history), establishing employer contributions for personnel in an effective pay period, applying allotment elections during distribution of pay, and updating pay information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Execute Performance Based Logistics	Operational Activity	This activity initiates the preferred sustainment strategy for system product support that employs the purchase of support as an integrated, affordable performance package designed to optimize system readiness.	
Execute Performance Evaluation	Operational Activity	This activity is associated with informing the performance evaluation raters, evaluating the individual's performance, counseling the individual on their performance evaluation, and tracking the performance evaluation progress.	
Execute Planning Programming and Budgeting	Operational Activity	This is the primary resource allocation process for all DoD. It is one of three major support systems for defense acquisition along with JCIDS and the Defense Acquisition System. The SECDEF establishes policies and strategies for the Department and uses this information as a guide for resource allocations decisions.	
Execute Program	Operational Activity	This activity provides the leadership and resources required for the program lifecycle execution as approved. This includes standing up all aspects of the program organization, management of the lifecycle, and program controls.	
Execute Promotion	Operational Activity	This activity is associated with executing a Member's promotion. This activity also includes receiving an approved promotion list, verifying the Member's continued promotion eligibility, preparing and distribution of a promotion order, and removing a promotion order for a Member's promotion declination.	
Execute Reenlistment Agreement	Operational Activity	This activity is associated with preparing reenlistment agreements, executing the Oath of Enlistment, obtaining the appropriate signatures for the reenlistment agreements (e.g., Reenlistment/Career Counselor, Commissioned Officer, Member), and updating the Members' profile.	
Execute Reimbursements	Operational Activity	This activity is associated with certifying reimbursement expense information, scheduling reimbursement processing, and updating the pay profile with reimbursement information (e.g., reimbursement type, reimbursement amount, and reimbursement date).	
Execute Requisition	Operational Activity	Execute Requisition consists of requesting goods and/or services, which includes, but is not limited to the following activities: generating the request; receiving the appropriate approvals from management indicating the validity of the request; validating that funds are available; reserving the funds necessary for the request via a financial commitment transaction; and routing the request to the buyer with the information necessary for final approval and sourcing.	
Execute Rescission Deferrals and Cancellations	Operational Activity	This activity describes the rescission, deferral, and cancellation of budgetary resources with the Department of Defense. Rescission means a proposal by the President to reduce budgetary resources (new budget authority or un-obligated balances of budget authority) pursuant to the requirements of Title X of the Congressional Budget and Impoundment Control Act of 1974. Resources that are proposed by the President for rescission may be withheld from obligation for 45 calendar days of continuous session of the Congress (excluding an adjournment of more than three days on which either House is not in session) pending congressional action on the proposal. Deferral means any executive branch action or inaction that temporarily withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources through a special message from the President to Congress. Cancellation means a proposal by the President to reduce budget resources (new budget authority or un-obligated balances of budget authority) that is not subject to the requirements of Title X of the Congressional Budget and Impoundment Control Act of 1974.	
Execute Retirement	Operational Activity	This activity is associated with executing the retirement decision. This activity also includes verifying that no special conditions may hinder the Member's final clearance, issuing and distributing the retirement order (e.g., the DD Form 214) and other retirement-related documents, and updating the Member's information to reflect a retirement.	
Execute Separation	Operational Activity	This activity is associated with executing a separation decision. This activity may include (but not be limited to) issuing and distributing the Certificate of Release or Discharge from Active Duty (DD Form 214) and other separation-related documents and updating the Member's record to reflect separation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Execute the DoD Decision Support System	Operational Activity	This activity encompasses the collection and integration of the three principal decision-making processes DoD employs to identify military capability needs, conduct strategic planning, develop materiel and non-materiel solutions, allocate resources, and acquire weapon systems and automated information systems. These decision processes include: the Joint Capabilities Integration and Development System (JCIDS); the Planning, Programming and Budgeting System (PPB); and the Defense Acquisition System.	
Fill Shopping Cart	Operational Activity	Typical set of tasks associated with product selection, storage and movement through to checkout.	
Finalize Acquisition Strategy	Operational Activity	This activity finalizes (for Increment I) the approved business and technical management approach designed to achieve program objectives. Refinements include specific considerations resulting from the low-rate initial production phase.	
Finalize Production Engineering	Operational Activity	Engineering activities required after acceptance of order, but before product can be produced. May include generation and delivery of final drawings, specifications, formulas, part programs, etc. In general, the last step in the completion of any preliminary engineering work done as part of the quotation process.	
Forecast Technology	Operational Activity	This activity discovers and identifies emerging technologies and exploits their implications for possible future threats and warfighting capabilities.	
Formulate Applicant Mitigation Plan	Operational Activity	This activity is associated with formulating a mitigation plan for an applicant that failed any part of the recruiting or accession process. This information may include (but not be limited to) name, goals to be completed, and dates of goal completion.	
Generate Assignment Order	Operational Activity	This activity is associated with executing an assignment order. This activity may include (but not be limited to) preparing an assignment order (e.g., military assignment order, military deployment order, civilian detail order, and contractor Letter of Authorization), providing an assignment order decision, distributing an assignment order, and verifying assignment eligibility to ensure Members are not disqualified from the orders generation process.	
Generate Award Order	Operational Activity	This activity is associated with executing an award order. This activity may also include (but not be limited to) preparing an award order, providing an award order decision, distributing an award order, and verifying award eligibility to ensure Members are not disqualified from the orders generation process.	
Generate Personnel Grade Change Order	Operational Activity	This activity is associated with executing a personnel grade change order. This activity may also include (but not be limited to) preparing a personnel grade change order, providing a personnel grade change order decision, distributing a personnel grade change order, verifying personnel grade change eligibility to ensure that Members are not disqualified from the orders generation process. Personnel grade change orders are authorizing documents (e.g., Army, AF - Orders, Navy - NAVAdmin, and MC - MARAdmin) pertaining to the decision to promote or demote a Member.	
Generate Retirement Order	Operational Activity	This activity is associated with executing a retirement order. This activity also includes preparing the retirement order, populating the retirement order, providing the retirement type decision, generating the retirement order, and distributing the retirement order.	
Generate Separation Order	Operational Activity	This activity is associated with generating a separation order. This activity may include (but not be limited to) preparing a separation order, populating a separation order, providing and documenting a separation order decision, distributing a separation order, and verifying separation eligibility to ensure Members are not disqualified from the orders generation process.	
Generate Stocking Schedule	Operational Activity	The process of scheduling resources to support item-stocking requirements.	
Generate Transfer Order	Operational Activity	This activity is associated with executing a transfer order by the proper authority. This activity may also include (but not be limited to) preparing a transfer order, populating a transfer order, providing a transfer order decision, distributing a transfer order, and transferring eligibility verification to ensure Members are not disqualified from the orders generation process.	
Hire Employee	Operational Activity	This activity is associated with extending job offers, determining terms of offers, responding to job offers, initiating pre-employment processes, certifying compliance with pre-employment requirements, bringing selectees on board (Entrance on Duty), and closing out case files.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Identify and Reserve Supply Chain Resources	Operational Activity	This activity locates, identifies, reserves, and synchronizes materiel, support personnel, and/or services for specific orders, and commits and schedules a delivery date to initiate the transport of property and forces to a requested destination within identified resource constraints and budgetary guidelines. (SCOR D1.3, DR1.4)	
Identify Available Education Resources	Operational Activity	This activity is associated with reviewing requirements and determining the availability of resources necessary to conduct an educational program. This activity may include (but not be limited to) identifying available instructors, facilities, supplies, and other resources and managing the scheduling of those resources to enable the delivery of an education course or programs.	
Identify Available Individual Training Course Resources	Operational Activity	This activity is associated with reviewing requirements and determining the availability of resources necessary to conduct an individual training course. This activity may include (but not be limited to) identifying available instructors, facilities, supplies, and other resources and managing the scheduling of those resources to enable the delivery of an individual training course.	
Identify Candidates to Fill Requisition	Operational Activity	This activity is associated with identifying potential candidates for a personnel requisition. The evaluation will result in the identification of Members whose qualifications match the personnel requisition criteria and are eligible for an assignment, Members who are in the assignment window, Members with career preferences, and Members who have volunteered for the advertised personnel requisition.	
Identify Career Path Requirements	Operational Activity	This activity is associated with identifying career path requirements based on new requirements to meet Department of Defense (DoD) occupational needs. This activity may include (but not be limited to) establishing a position and grade structure for a career path and identifying any physical and competency requirements necessary to perform the occupation.	
Identify Defective Product Condition	Operational Activity	The process where the customer utilizes planned policies, business rules and product operating conditions inspection as criteria to identify and confirm that material is excess to requirements defective.	
Identify Education Requirements	Operational Activity	This activity is associated with identifying education requirements based on new education proposals and deficiencies to meet Department of Defense (DoD) education needs. This activity is also associated with identifying current courses for updating based off of course evaluations and other factors.	
Identify Excess Product Condition	Operational Activity	The process where the customer utilizes planned policies, business rules and product inspection as criteria to identify and confirm that material is in excess of the current requirements.	
Identify Individual Training Course Requirements	Operational Activity	This activity is associated with reviewing the personnel development plan to identify what training courses need to be developed or updated. This activity is also associated with identifying current courses for updating based off of course evaluations and other inputs.	
Identify Member for Involuntary Enlistment Extension	Operational Activity	This activity is associated with receiving notification to involuntarily extend Member(s) due to a declaration of war, stop loss, or administrative reasons (e.g., medical, UCMJ), and identifying Member(s) for involuntary extension because war has been declared, stop loss has been imposed, or as a result of an administrative action. This activity may also be associated with counseling and notifying a Member whose enlistment is involuntarily extended, which may include counseling on the type of extension, the anticipated duration, and actions/activities that must occur prior to the extension being lifted.	
Identify Member for Reenlistment	Operational Activity	This activity is associated with determining members for reenlistment, counseling members on reenlistment, submitting reenlistment waivers, and submitting reenlistment requests.	
Identify Mission List	Operational Activity	This activity is associated with identifying missions that need to be accomplished based on the Organization/Component-specific planning guidance. Missions are the official tasking by a higher authority that accomplish warfighting and support requirements for specific Department of Defense (DoD) Components. Missions can include modifications to current Organization/Component missions based on the DoD's strategic goals, policy, directives, force structure, and warfighting strategies of higher authority.	
Identify Noncombatant for Evacuation	Operational Activity	This activity is associated with identifying the Noncombatant Evacuation Operations (NEO) Evacuee that meets the criteria of the NEO incident. All identified NEO evacuees are listed on the final NEO Evacuee List, which is included in a manifest to the appropriate parties for evacuation of the NEO evacuees to an area of safety.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Identify Promotion Candidates	Operational Activity	This activity is associated with supporting the determination of eligibility for promotion, reviewing promotion eligibility requirements including promotion criteria, and identifying promotion candidates, which may include soliciting recommendations from an Approval Authority for promotion candidates.	
Identify Property and Materiel for Return or Disposal	Operational Activity	This activity addresses actions to utilize planned policies, business rules and product operating conditions inspection as criteria to identify and confirm that material is excess to requirements, defective, or requires repairs outside organic capability to include requesting disposition instructions and authorization to return or dispose. This activity also addresses actions to identify and confirm the disposal actions of real property to include but not limited to demolition or transfer. (SCOR SR1.1, SR1.2, SR1.3)	
Identify Sources of Supply - Engineer-to-Order Product	Operational Activity	The identification and qualification of potential suppliers capable of designing and delivering product that will meet all of the required product specifications - Engineer-to-Order Product.	
Identify, Assess and Aggregate Delivery Resources	Operational Activity	The process of identifying, evaluating, and considering, as a whole with constituent parts, all things that add value in the delivery of a product or service.	
Identify, Assess and Aggregate Maintenance Resources	Operational Activity	The process of identifying, evaluating, and considering, as a whole with constituent parts, all things that add value in the maintenance of a product.	
Identify, Assess and Aggregate Production Resources	Operational Activity	The process of identifying, evaluating, and considering, as a whole with constituent parts, all things that add value in the creation of a product or performance of a service - Plan Make.	
Identify, Assess, and Aggregate Return Resources	Operational Activity	The process of identifying, evaluating, and consideration for all resources that add value to, execute, or constrain the processes for the return of a product.	
Identify, Prioritize and Aggregate Delivery Requirements	Operational Activity	The process of identifying, prioritizing, and considering, as a whole with constituent parts, all sources of demand in the delivery of a product or service.	
Identify, Prioritize and Aggregate Maintenance Requirements	Operational Activity	The process of identifying, prioritizing, and considering as a whole with constituent parts, all sources of demand in the maintenance of a product or service.	
Identify, Prioritize and Aggregate Production Requirements	Operational Activity	The process of identifying, prioritizing, and considering as a whole with constituent parts, all sources of demand in the creation of a product or service - Plan Make.	
Identify, Prioritize and Aggregate Supply Chain Requirements	Operational Activity	The process of identifying, aggregating, and prioritizing, all sources of demand for the integrated supply chain of a product or service at the appropriate level, horizon and interval. The sales forecast is comprised of the following concepts: sales forecasting level, time horizon, and time interval. The sales forecasting level is the focal point in the corporate hierarchy where the forecast is needed at the most generic level. i.e. Corporate forecast, Divisional forecast, Product Line forecast, SKU, SKU by Location. The sales forecasting time horizon generally coincides with the time frame of the plan for which it was developed i.e. Annual, 1-5 years, 1- 6 months, Daily, Weekly, Monthly. The sales forecasting time interval generally coincides with how often the plan is updated, i.e. Daily, Weekly, Monthly, and Quarterly.	
Identify, Prioritize and Aggregate Supply Chain Resources	Operational Activity	The process of identifying, prioritizing, and aggregating, as a whole with constituent parts, all sources of supply that are required and add value in the supply chain of a product or service at the appropriate level, horizon and interval.	
Identify, Prioritize, and Aggregate Product Requirements	Operational Activity	The process of identifying, prioritizing, and considering, as a whole with constituent parts, all sources of demand for a product or service in the supply chain - Plan Source.	
Identify, Prioritize, and Aggregate Product Resources	Operational Activity	The process of identifying, evaluating, and considering, as a whole with constituent parts, all material and other resources used to add value in the supply chain for a product or services - Plan Source.	
Implement Case in Foreign Military Sales Trust Fund	Operational Activity	<p>This activity implements a specific Letter of Offer and Acceptance document in the Foreign Military Sales Trust Fund. Letters of Offer and Acceptance documents (Basic, Amendment, Modification and Lease) are implemented upon acceptance and receipt of a deposit, if required.</p> <p>On an exception basis, DSCA may authorize emergency implementation when the document is in accepted status and prior to receipt of the required deposit.</p> <p>This activity establishes the contract authority for the implemented case and records budgetary resources at the case level.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Implement ESOH Solution	Operational Activity	This activity encompasses the design, implementation and monitoring for successful implementation of the selected ESOH solution. It includes all actions taken to achieve the operational controls and outcomes specified in the ESOH Control Agreement. The outcome of this activity is the elimination of the ESOH aspect of concern.	
Implement Logistics Support Strategy	Operational Activity	This activity implements the life-cycle support strategy to sustain and continually improve product affordability for programs.	
Implement Manpower Change Request	Operational Activity	This activity includes the applying the approved manpower changes, modifying policy so the force manager can implement the given policies, and updating the Manpower document to reflect changes.	
Implement Population Health Management Practices	Operational Activity	This activity is associated with taking a proactive action or engaging in proactive activities, methods, or practices that maximize health status and/or minimize health risk for selected populations and/or population health programs. This activity also includes surveillance of troop readiness (e.g., immunizations) and environment conditions which will enable rapid deployment and support of troops in the theatre.	
Implement Unit Structure	Operational Activity	This activity is associated with executing the unit structure that meets the mission requirements.	
Inactivate Unit	Operational Activity	This activity is associated with designating a unit or group as not in use or non-operational. An inactive unit is available for activation when needed. This activity also includes the disestablishing, decommissioning and deactivating of a unit, both active duty and reserves that were activated.	
Incorporate Program Decisions	Operational Activity	This activity incorporates the Program Decision Memorandum to the budgeting system.	
Inform Appropriate Parties of Performance Evaluation	Operational Activity	This activity is associated with notifying the appropriate parties including (but not limited to) the Member being evaluated and the Member's rating chain of the upcoming evaluation.	
Initiate Asset Valuation	Operational Activity	This activity initiates the account that will be used in accumulating full cost of an asset to include all costs incurred to bring the real and personal property to form and location suitable for its intended use. APUID and/or RPUID will be assigned to this activity.	
Initiate Casualty Process	Operational Activity	This activity is associated with the initial review and categorization (e.g., deceased, missing, and injured) of a casualty incident, creating a casualty report (initial and supplemental) to capture findings (e.g., casualty status, casualty type, and casualty classification), notifying the next-of-kin (NOK), requesting casualty assistance, and identification of casualty information which may be released to the media and NOK.	
Initiate Labor Bargaining Process	Operational Activity	This activity is associated with providing notifications and requests to bargain. Requests to bargain could be triggered by changes to conditions of employment, statutory requirements, and Government-wide Laws, Policies, and Regulations.	
Initiate Obligation Adjustment Travel Voucher Invoice	Operational Activity	This activity is associated with capturing obligation adjustments during the travel voucher process. Obligation adjustments are made when a voucher invoice is not identical to the total obligation amounts on the authorization and its amendment(s). An adjusting obligation must be submitted to Financial Management to account for the difference.	
Install Product - Stocked Product	Operational Activity	When necessary, the process of preparing, testing and installing the product at the customer site. The product is fully functional upon completion - Stocked Product.	
Install Product - Engineer-to-Order Product	Operational Activity	The process of preparing, testing and installing the product at the customer site. The product is fully functional upon completion - Engineer-to-Order Product.	
Install Product - Make-to-Stock Product	Operational Activity	When necessary, the process of preparing, testing and installing the product at the customer site. The product is fully functional upon completion - Make-to-Stock Product.	
Investigate Casualty Incident	Operational Activity	This activity is associated with reviewing the casualty report for personnel categorized as deceased, missing (e.g., missing in action (MIA), captured, beleaguered, and besieged), wounded, ill or injured (i.e., seriously wounded, ill/injured, very seriously wounded, ill/injured), and investigating facts related to the casualty incident to rule out an unauthorized absence. This activity also includes creating a report which outlines findings of the investigation, duty status, circumstances surrounding the casualty, and casualty tracking information, and creating a report which outlines findings of the investigation and duty status.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Investigate Line of Duty Incident	Operational Activity	This activity is associated with gathering and investigating facts related to the Line of Duty (LoD) incident. This may include (but not be limited to) validating the incident, reviewing LoD documentation (e.g., LoD incident information, LoD legal information, casualty information, and adverse action information) for completeness, verifying information (e.g., initial notifications, reports, forms), documenting LoD investigation findings, and providing LoD investigation findings to support in making a LoD decision.	
Invoice - Stocked Product	Operational Activity	A signal is sent to the financial organization that the order has been shipped and that the billing process should begin and payment be received or be closed out if payment has already been received. Payment is received from the customer within the payment terms of the invoice - Stocked Product.	
Invoice - Engineer-to-Order Product	Operational Activity	A signal is sent to the financial organization that the order has been shipped and that the billing process should begin and payment be received or be closed out if payment has already been received. Payment is received from the customer within the payment terms of the invoice - Engineer-to-Order Product.	
Invoice - Make-to-Stock Product	Operational Activity	A signal is sent to the financial organization that the order has been shipped and that the billing process should begin and payment be received or be closed out if payment has already been received. Payment is received from the customer within the payment terms of the invoice - Make-to-Stock Product.	
Issue Award Certificate	Operational Activity	This activity is associated with issuing the award certificate for the award.	
Issue Budget Decision	Operational Activity	This activity describes the issuance of Program Budget Decision and other decisions to reflect the SECDEF's final decision on the submitted budget from the components. This decision could include final outcome and budget issues identified during the OSD/OMB budget review process.	
Issue Fiscal Guidance	Operational Activity	The issuance of the annual guidance consistent with Strategic Planning Guidance (SPG). Provides fiscal constraints that must be observed by DoD Components in the formulation of force structures and by the Office of the Secretary of Defense (OSD) and joint staff in reviewing proposed programs.	
Issue Identity Credential	Operational Activity	This activity is associated with issuing an identity credential (Identity Cards (e.g., Common Access Card (CAC), Personal Identity Verification (PIV) Card, identification tags, unit controlled cards) and the information associated with them (e.g., Personal Identification Number (PIN) numbers, applets, identity information)) so that a party may be accurately identified and be able to gain access to Human Resources privileges and information. This includes (but is not limited to) gathering relevant identity information, verifying the appropriate party's identity, ensuring the appropriate party's identity credential eligibility, producing requests for additional identity credential service as necessary, producing and distributing the appropriate identity credential for appropriate party.	
Issue In-Processing Checklist	Operational Activity	This activity is associated with creating and issuing the in-processing checklist. The checklist includes all activities the person must complete before being cleared for new assignment or duty station.	
Issue Material - Make-to-Stock	Operational Activity	The selection and physical movement of sourced/in-process product (e.g., raw materials, fabricated components, subassemblies, required ingredients or intermediate formulations) from a stocking location (e.g., stockroom, a location on the production floor, a supplier) to a specific point of use location. Issuing product includes the corresponding system transaction. The Bill of Materials/routing information or recipe/production instructions will determine the products to be issued to support the production operation(s) - Make-to-Stock.	
Issue Out-Processing Checklist	Operational Activity	This activity is associated with creating and issuing the out-processing checklist. The checklist includes all activities the person must complete before departing to a new assignment or duty station.	
Issue Policy and Guidance	Operational Activity	This activity includes identifying the impact of internal or external accounting and budgetary requirements on DoD accounting and budget policy. External requirements may come from various sources, including Federal authoritative sources such as FASAB, Treasury, and OMB. Internal requirements may come from DoD business mission partners. The activity includes drafting, coordinating, and updating accounting policy to reflect agreed to changes.	
Issue Program Decision Memorandum	Operational Activity	This activity generates the Program Decision Memorandum (PDM) after the POMs/PCPs have been finalized and accepted. The PDM incorporates the major program decisions reached that have been or are to be incorporated into the individual POMs/PCPs of the services and programs.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Issue Sourced/In-Process Product - Engineer-to-Order	Operational Activity	The selection and physical movement of sourced/in-process products (e.g., raw materials, fabricated components, subassemblies, required ingredients or intermediate formulations) from a stocking location (e.g., stockroom, a location on the production floor, a supplier) to a specific point of use location. Issuing material includes the corresponding system transaction. The Bill of Materials/routing information or recipe/production instructions will determine the materials to be issued to support the production operation(s) - Engineer-to-Order.	
Issue Sourced/In-Process Product - Make-to-Order	Operational Activity	The selection and physical movement of sourced/in-process products (e.g., raw materials, fabricated components, subassemblies, required ingredients or intermediate formulations) from a stocking location (e.g., stockroom, a location on the production floor, a supplier) to a specific point of use location. Issuing product includes the corresponding system transaction. The Bill of Materials/routing information or recipe/production instructions will determine the products to be issued to support the production operation(s) - Make-to-Order.	
Load Product and Generate Shipping Docs - Engineer-to-Order Product	Operational Activity	The series of tasks including placing/loading product onto modes of transportation, and generating the documentation necessary to meet internal, customer, carrier and government needs. Shipping documentation includes the invoice. Optionally verify customer credit - Engineer-to-Order Product.	
Load Product and Generate Shipping Docs - Make-to-Stock Product	Operational Activity	The series of tasks including placing/loading product onto modes of transportation, and generating the documentation necessary to meet internal, customer, carrier and government needs. Shipping documentation includes the invoice. Optionally verify customer credit - Make-to-Stock Product.	
Load Vehicle and Generate Shipping Docs - Stocked Product	Operational Activity	The series of tasks including placing/loading product onto modes of transportation, and generating the documentation necessary to meet internal, customer, carrier and government needs. Shipping documentation includes the invoice. Optionally verify customer credit - Stocked Product.	
Maintain Asset Information	Operational Activity	This activity ensures that individual asset records are fully consistent with the actual status of assets, including the physical, legal and financial status. This activity ensures that any state or condition change to assets throughout the lifecycle is maintained. This activity enables the creation of a record and updates the property record with information based on a change to the quantity, condition or interest of ownership of real property. It also stores or flags property records that are no longer in active status. This activity enables the maintenance of the fiscal accountability requirements for asset values, depreciation, amortization, depletion of assets, and any adjustment to the valuation as a result of a change in the condition of the asset. It also includes but not limited to determining replacement value and net inventory value for Operating Materials and Supplies (OM&S) assets.	
Maintain Benefit Profile Information	Operational Activity	This activity is associated with documenting the Member's/ Employee's initial benefit selections or changes to existing benefit information (e.g., contributions, coverage and beneficiaries), ensuring all appropriate signatures were obtained and supporting documents were submitted, and notifying appropriate parties on changes to a Member's/Employee's benefit information.	
Maintain Benefit Programs	Operational Activity	This activity is associated with identifying changes to existing benefit programs, and coordinating changes or disestablishment of benefit programs with appropriate parties, such as various third-party health insurance program under contract to the Federal government.	
Maintain Career Path Requirements	Operational Activity	This activity is associated with maintaining, updating or discontinuing an existing career path to meet mission goals or new career path requirements.	
Maintain Competency Credentials	Operational Activity	This activity is associated with maintaining credentials (e.g., adding certificates of qualification, licensing, and civilian-sector competencies of interest to the Department of Defense (DoD)) so that a person's credentials may be accurately identified. This may include (but is not limited to) reviewing credential request documents, issuing a request for additional credential service as needed, verifying the necessary information to make the changes, and updating the credentials to reflect the changes made.	
Maintain Education Course Curriculum	Operational Activity	This activity is associated with maintaining instructional curriculum and educational goals. This activity also includes maintaining educational objectives, plans, materials, tests, and development of any associated courseware.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Maintain Geospatial Information	Operational Activity	This activity receives the request to update, and updates individual geospatial features using geospatial tradecraft and techniques to meet specified requirements: e.g. data currency, data accuracy and precision, data quality.	
Maintain Human Resources Record	Operational Activity	This activity is associated with maintaining (e.g., updating and modifying) the Human Resources Record, which is the information from the Human Resources Profile that has been determined to become part of a permanent record (e.g., recruiting, assignment, personnel/pay, benefit and medical).	
Maintain Human Resources Recovery Care Plan	Operational Activity	This activity is associated with maintaining the recovery care plan based on the evaluation results. Maintenance will reflect that a Needs Assessment was conducted, and goals were identified to address the Recovering Service Member (RSM) needs.	
Maintain Identity Credential	Operational Activity	This activity is associated maintaining (e.g., adding applets to the identity credential, unlocking the identity credential, changing the associated Personal Identification Number (PIN)) an identity credential (Identity Cards (e.g., Common Access Card (CAC), Personal Identity Verification (PIV) Card, ID tags, unit controlled cards) and the information associated with them (e.g., PIN numbers, applets, identity information)) so that a party may be accurately identified and be able to gain access to Human Resources privileges and information. This includes (but is not limited to) reviewing credential service request documents, issuing a request for additional identity credential service as needed, verifying the necessary information to make the changes (e.g., verifying identity, verifying authorization) and making the requested changes if applicable.	
Maintain Individual Training Course Curriculum	Operational Activity	This activity is associated with maintaining, updating or discontinuing existing individual training courses and related materials.	
Maintain Occupation Classification	Operational Activity	This activity is associated with amending the existing index of occupation classifications. These classifications may be either changed or archived due to the merging or elimination of career fields.	
Maintain Operational Duty Experience Competency	Operational Activity	This activity is associated with maintaining operational duty (e.g., operational flying duty, operational submarine duty) experience in the increment of time specified in standards for operational experience competencies, so that a person's operational duty experience may be accurately identified. This may include (but is not limited to) reviewing operational experience competencies request documents, issuing a request for additional operational experience competencies service as needed, verifying the necessary information to make the changes, and updating the operational experience competencies to reflect the changes made.	
Maintain Physical Fitness Program	Operational Activity	This activity is associated with maintaining a physical fitness program in accordance with established fitness objectives. This activity may include (but not be limited to) educating Members on physical fitness (e.g., exercise, diet and nutrition, tobacco cessation, safety, and stress management), formally evaluating the physical fitness and body fat of Members against the prescribed standards of the respective Service during scheduled physical fitness training, and placing Members who exceed the body fat standards in a Service-directed weight control program.	
Maintain Position Data	Operational Activity	This activity is associated with creating, updating, and deleting positions and position details, as well as identifying positions needed based on grade, skills, and quantity to fulfill mission requirements. Position details may include (but not be limited to), position identification number, name, description, requirements (e.g., skills, grades, education and training), and responsibilities. NOTE: The Navy keeps the billet identification number for any deleted position. This activity is also associated with identifying positions needed based on grade, skills and quantity to fulfill mission requirement.	
Maintain Quality of Life Program	Operational Activity	This activity is associated with maintaining existing and newly developed Quality of Life (QoL) programs. This includes coordinating with Department of Defense (DoD) and non-DoD entities on appropriate matters related to QoL (e.g., foreign government interactions, financial, real property and personnel matters, supplier communications), overseeing QoL program operation (e.g., providing administrative and technical guidance, ensuring safety for QoL participants and staff, gathering performance information), and taking appropriate actions to handle QoL program disestablishment (e.g., collecting debts owed to a QoL program that is being disestablished, coordinating decisions concerning program assets).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Maintain Source Data	Operational Activity	The process of collecting, sorting, defining hierarchy and managing configuration control of supplier information and source data that are required to make sourcing and related planning and manufacturing decisions. Source data to be maintained includes supplier profile data, financials, quality and delivery performance, spend analysis at various levels of the enterprise, from major business units to material part number.	
Make - Includes Maintenance	Operational Activity	The converting activities associated with operating a supply chain. This focuses on conversion of materials rather than production or manufacturing because Make represents all types of material conversions: assembly, chemical processing, maintenance, repair, overhaul, recycling, refurbishment, remanufacturing, and other material conversion activities to include maintenance.	
Make Decision on Award	Operational Activity	This activity is associated with reviewing the award recommendation request and the Member's award information and eligibility for the recommended Unit Award or Individual Achievement Award. This activity also includes approving or disapproving an award request, documenting the final decision, and notifying the appropriate parties. The award request decisions can be any of the following: Approved for higher award; Approved for recommended award; Approved for lower award; and Disapproved for recommended award.	
Make Decision on Benefit Application	Operational Activity	This activity is associated with approving or disapproving a benefit application, documenting the final decision, and notifying the appropriate parties.	
Make Decision on Candidate	Operational Activity	This activity is associated with making a decision on a position candidate. This may include (but not be limited to) reviewing any referral comments, reviewing a candidate's resume and references, and interviewing a candidate.	
Make Decision on Commissioning Program Request	Operational Activity	This activity is associated with evaluating eligible Members on a competitive basis for admittance to any of the commissioning programs based on individual established criteria, conducting an entrance review board, and providing a decision on the commissioning program.	
Make Decision on Education Enrollment	Operational Activity	This activity is associated with reviewing enrollment information, making a decision on the enrollment request, and providing a documented decision on enrollment into an education course or program to include enrollment into an external education course or program. This activity may include (but not be limited to) reviewing the student's profile to determine whether the student meets course or program prerequisites and reviewing course and/or program availability.	
Make Decision on Individual Training Course Enrollment	Operational Activity	This activity is associated with reviewing enrollment information and providing a documented decision on enrollment into a training course. This activity may include (but not be limited to) reviewing the Member's profile, course availability, and competency level.	
Make Decision on Inter-Service Transfer	Operational Activity	This activity is associated with reviewing an Inter-Service transfer request, along with a recommendation to concur or nonconcur with the transfer, and providing a documented decision on the transfer.	
Make Decision on Intra-Service Transfer	Operational Activity	This activity is associated with reviewing an Intra-Service transfer request, along with a recommendation to concur or nonconcur with the transfer, and providing a documented decision on the transfer.	
Make Decision on Occupation Classification Action	Operational Activity	This activity is associated with reviewing a request to create or maintain an occupation classification, and approving or disapproving the request. The list of approved occupation classifications are used to identify individuals who have been assessed to meet prescribed classification specifications, which are the basis for the determination of the Department of Defense (DoD) recognized competencies required for a civilian employee or Member.	
Make Decision on Reimbursement Payment	Operational Activity	This activity is associated with making a decision on a reimbursement (e.g., medical education program expense reimbursement, Cost of Living Allowance Unique reimbursement) based on an established set of reimbursement criteria.	
Make Decision on Risk Management Plan	Operational Activity	This activity is associated with making a decision on a risk management plan in accordance with established Laws, Policies, and Regulations.	
Make Decision on Special Category Retention Bonus	Operational Activity	This activity is associated with making and documenting a decision on a special category retention incentive or bonus for a Member. This activity includes reviewing eligibility for and approving incentive/bonus associated with the retention.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Make Decision on Voluntary Resignation Request	Operational Activity	This activity is associated with making a decision on an Officer's request to voluntarily resign his/her military officer appointment and continue serving in an enlisted or warrant officer pay grade (i.e., reversion). Officers may be permitted to continue their military service in a pay grade other than commissioned officer according to limitations contained within 10 USC.	
Make Line of Duty Decision	Operational Activity	This activity is associated with making a Line of Duty (LoD) decision (e.g., interim and final) to determine whether an incident occurred in the LoD or not in the LoD. This activity also includes reviewing LoD documentation (e.g. LoD incident information, LoD recommendations, casualty information, and adverse action information) for completeness, determining whether a LoD incident requires further legal review and/or requires an investigation, and documenting the LoD decision.	
Make Reenlistment Decision	Operational Activity	This activity is associated with reviewing reenlistment request and any waivers included to determine if a Member is qualified to reenlist and making reenlistment approval or disapproval decision. This activity also includes reviewing of any reenlistment appeal to the Member's reenlistment request, previously disapproved by his/her Commander, to the Senior Official on the Commander's chain of command and recording the reenlistment appeal approval or disapproval decision.	
Make-to-Order	Operational Activity	The process of manufacturing in a make-to-order environment adds value to products through mixing, separating, forming, machining, and chemical processes for a specific customer order. Products are completed, built or configured only in response to a customer order, the customer order reference is attached to the production order, attached to or marked on the product upon completion of the make process and referenced when transferring the product to Deliver. The product is identifiable throughout the Make process, as made for a specific customer order. Examples of alternative or related names for Make-to-Order are: Build-to-Order (BTO), Assemble-to-Order (ATO), Configure-to-Order (CTO), and postponement.	
Make-to-Stock	Operational Activity	The process of adding value to products through mixing, separating, forming, machining, and chemical processes.	
Manage Access To Healthcare	Operational Activity	This activity is associated with streamlining a beneficiary's efforts to receive care and ensuring the care received is appropriate in terms of type of care, intensity of care, and location of care, regardless of where the care is provided (e.g., sustaining base, deployed location, or a training exercise location). All requisite information to make these assessments will be available to access personnel for them to make appropriate decisions at the point of a service request. A successful implementation of these processes will result in beneficiaries receiving the right care, at the right time and at the right location for the most appropriate cost.	
Manage Accession	Operational Activity	This activity is associated with determining applicant qualification, managing applicant processing scheduling, performing external organization check, performing Service accession, and performing accession shipping.	
Manage Accounts Receivable Balance	Operational Activity	Manage Accounts Receivable Balance activity manages the outstanding receivables throughout its accounting lifecycle. This activity includes maintaining and managing the changes to the balances due to receivable aging, collection of receipts or outstanding debt, and any debt write-offs or offsets against the receivables.	
Manage Acquisition Business Functional Areas	Operational Activity	Manage Acquisition Business Functional Areas encompasses the acquisition or acquisition-related operations and/or activities performed by a specific skill set, discipline, or broad business area.	
Manage Acquisition Oversight Integration	Operational Activity	This activity manages and integrates acquisition oversight performed by DoD, DoD components and Congressional committees of DoD programs to determine current status, ascertain if the requirements are achievable and/or require modification. These activities include capabilities based acquisition, periodic and ad-hoc reporting, and acquisition assessments.	
Manage Acquisition Policy	Operational Activity	This activity manages the compliance to the Department's acquisition policy to include policy, guidelines and procedures. This includes the development and implementation of new policy and associated procedures and enablers.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Acquisition Workforce	Operational Activity	This activity provides the management of policies and procedures, with the coordination of the Under Secretary of Defense for Personnel and Readiness, for the effective management of the acquisition workforce within the Department of Defense.	
Manage Adverse Actions	Operational Activity	This activity is associated with validating the alleged offense, determining disciplinary actions, and administering adverse actions results. Adverse Actions can be based upon misconduct and/or substandard performance that result in legal or administrative actions against a Member by an appropriate military authority. Adverse legal actions may include non-punitive, non-judicial, and court-martial proceedings. Penalties may include (but not be limited to) reduction in rank, involuntary discharge, documentation of substandard performance, promotion list removal, or a sentence for confinement.	
Manage and Monitor Disposal	Operational Activity	This activity manages and monitors the planning and execution regarding the removal of weapons and legacy systems that require an acquisition program to provide for a replacement, is required to support demilitarization, or have special reclamation requirements.	
Manage and Support Program Retirement and Closeout	Operational Activity	This activity manages and supports the planning and managing of program retirement and/or disposal of operational systems and close-out program activities. This includes physical removal from the field, asset transfer, contractor close-out, preservation of as-built drawings and the transfer, capture or redirection of usable assets.	
Manage and Sustain Personnel	Operational Activity	This activity is associated with managing the actions necessary for the daily support of a person's linkage to the Department of Defense (DoD). This activity also includes managing a person's relation to positions, tracking time and attendance within those relationships, managing daily performance/career progression, managing legal documentation associated with the transition process, managing extensions of enlistment contract, and reenlisting. Provisions for exceptional activities involving adverse actions and grievances are also addressed. This also includes oversight of military retirees and inactive reservists.	
Manage Applicant Personal Data	Operational Activity	This activity is associated with capturing applicant personal data, and determining if applicant information is complete or if additional information is needed. This activity is also associated with validating the applicant personal data, such as ensuring that the social security number (SSN) provided is within SSN range.	
Manage Applicant Processing Scheduling	Operational Activity	This activity is associated with submitting an accession processing request, validating personal information and requested accession processing schedule, providing the accession processing schedule to the Service, and maintaining the accession processing schedules.	
Manage Applicant Prospecting	Operational Activity	This activity is associated with conducting research to identify prospects through advertising, telemarketing, mailings, area canvassing and site visits (e.g., high schools, colleges, shopping centers, and job fairs), reviewing high school Armed Services Vocational Aptitude Battery (ASVAB) scores, and receiving in-office visits from potential recruitment applicants. This also includes collecting initial personal contact information (e.g., name, phone number, and email address)	
Manage Assignment	Operational Activity	This activity is associated with identifying qualified and available personnel (i.e., members, employees, and designated contractors) for temporary or permanent assignments. This activity may include (but not be limited to) gathering Human Resources Profile information for assignment, administering an assignment action, performing out-processing of personnel, performing in-processing of personnel, generating assignment orders, and processing assignment elections and personnel action request activities.	
Manage Assignment and Transfer	Operational Activity	This activity is associated with assigning or transferring Department of Defense (DoD) Members and Employees to positions. This activity includes administering assignment actions, executing individual assignment, processing inter-Service, intra-Service transfers, transferring Members between military personnel classes, to and from active duty and generating the transfer order.	
Manage Audit and Oversight of Contractor Activity	Operational Activity	This activity provides audit and management oversight of Contractor activities.	
Manage Baseline for Reprogramming	Operational Activity	This activity manages the baseline for reprogramming appropriated funds within a fiscal year. This baseline will be used as the starting point for reprogramming actions such as below threshold reprogramming (BTR), internal reprogramming, or prior approvals.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Benefit Programs	Operational Activity	This activity is associated with developing, maintaining, assessing and delivering benefit programs for Military and Civilian personnel, Veterans and family members. Benefit programs may include (but not be limited to) healthcare (e.g., insurance for medical, dental, vision and long term care), education benefits (e.g., Montgomery GI Bill [MGIB], Tuition Assistance Program, Reserve Education Assistance Program [REAP]), life insurance (e.g., Group Life Insurance, Traumatic Injury Protection), retirement planning (e.g., Thrift Savings Plan [TSP]), survivor benefits (e.g., Survivor Benefit Plan [SBP], Death Gratuity) and miscellaneous benefits (e.g., Military family housing, employment assistance, death and burial benefits, injury and Savings Deposit Plan, Flexible Spending Account Program, Home Owners Assistance Program and relocation assistance). This activity is also associated with managing the contracted relationship between the Department of Defense (DoD) eligible civilian employee beneficiaries (e.g., employees, family members, and survivors under Federal Employee Health Benefits [FEHB] or similar programs) and various third-party health insurance programs under contract to the Federal government.	
Manage Benefits	Operational Activity	This activity is associated with the managing and/or supporting Department of Defense (DoD) and Office of Personnel Management (OPM) benefits to include eligibility determination, counseling, enrollment and termination. This activity also includes providing the following: Human Resources (HR) entitlements (e.g., family group life insurance, child support, allotments); Quality of Life (QoL) resources (e.g., child care, exceptional family member program, morale, welfare and recreation programs); educational resources (e.g., Montgomery GI Bill, Veterans Educational Assistance Program, student loan program); healthcare resources (e.g., patient care, entitlement programs and insurance programs such as TRICARE for dental, medical and vision); retirement resources (e.g., retirement benefits, disability benefits); and managing the Human Resources (HR) Recovery Coordination Program (RCP).	
Manage Billing	Operational Activity	This activity monitors and manages the billing activity. An example of managing the billing activity is as follows: a bill is generated for goods shipped, or services rendered based on the terms and conditions of the purchase contract. The activity is end to end from generation through closeout. This also includes all Intergovernmental Department of Defense billings to include Actual, Suspense, Special, and Fixed Price.	
Manage Business Rules for Plan Processes	Operational Activity	The process of establishing, maintaining, and enforcing decision support criteria for Supply Chain Planning which translate to rules for conducting business, i.e. developing and maintaining customer and channel performance standards of an entire supply chain such as service levels, given service requirements by supply chain stakeholders/trading partners. Business rules align PLAN process policies with business strategy, goals, and objectives.	
Manage Business Rules for Return Processes	Operational Activity	The process of establishing, maintaining, and enforcing decision support criteria for Return Planning that are translated into rules for conducting business. These rules align Return process policies with business strategy, goals, and objectives. Examples of business rules include those that (1) Enable customers to identify when scheduled and unscheduled conditions occur that require a return authorization request, (2) Enable a service provider to confirm a part is authorized to be returned, (3) Identify the waiting period to confirm a return item has been shipped and received before following up (4) Develop and maintain customer and channel performance standards of return processes such as service levels, given service requirements by supply chain stakeholders/trading partners.(5) Communicate to customers the allowable amount of elapsed time from purchase and condition in which excess material must be received in order for it to be accepted as a return (6) Negotiate any restocking charge stipulations.	
Manage Capabilities Based Acquisition	Operational Activity	This activity manages the diverse aspects of defense acquisition to ensure that each program is capabilities based and supports the National Security Strategy to achieve efficient use of resources. The intent is to deliver capabilities to the field quickly and efficiently, leverage existing products and take advantage of evolutionary spiral and risk driven approaches.	
Manage Capability Performance Attributes	Operational Activity	This activity manages the definition of operational and support-related performance attributes of a system to provide the desired capability required by the warfighter. These performance attributes must be verified by testing and evaluation.	
Manage Capital Assets	Operational Activity	The process of acquiring, maintaining and dispositioning an organization's capital assets located at a supplier's facility and/or outside source, which are used to operate the supply chain.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Career Path	Operational Activity	This activity is associated with establishing career development path (framework of potential development and related suggested assignment actions for a specific occupation or group of occupations) for all civilian employees and Members. It also includes formulating alignment of prospective training/education, retention, and assignment requests with the appropriate established career development path. This activity may include (but not be limited to) identifying career path requirements, developing career path plans, and maintaining career path requirements.	
Manage Casualty Assistance Programs	Operational Activity	This activity is associated with providing casualty assistance and counseling to Department of Defense (DoD) personnel and their families, generating invitation travel orders, and conducting an evaluation of the casualty assistance program. This activity also includes coordinating all forms of communication (e.g., release of information associated with casualties, obtaining copies of records, reports and investigations) between Casualty Assistance Centers/Programs, and DoD personnel and their families.	
Manage Certification Validation Approval and Reviews	Operational Activity	This activity manages all aspects of the Certification, Validation, Approval and Reviews performed during the JCIDS decision process.	
Manage Civilian Personnel Separation and Retirement	Operational Activity	This activity is associated with administering civilian personnel separations and retirement. These separations may include (but not be limited to) resignations, terminations, removals, separations due to reduction in force, separations to enter the uniformed services, and deaths. These separations also include those involuntary separations under which the employee may be eligible for discontinued service retirement. Separation includes completing and sending a voluntary civilian separation request to the Office of Personnel Management (OPM) with required information, determining whether an employee is eligible to voluntarily separate, issuing and updating checklist items (e.g., tasks and appointments) required to complete the voluntary separation action, obtaining recommendations and approval from the appropriate approval authority, and updating the employee's information to reflect separation approval status. Retirement includes completing and sending a voluntary civilian retirement request to the Office of Personnel Management (OPM) with required information, determining whether an employee is eligible to voluntarily retire, issuing and updating checklist items (e.g., tasks and appointments) required to complete the voluntary retirement action, obtaining recommendations and approval from the appropriate approval authority, and updating the employee's information to reflect retirement approval status. There may be no transfer action initiated for a civilian separation or retirement.	
Manage Civilian Staff Acquisition	Operational Activity	This activity is associated with establishing procedures for recruiting and selecting high-quality, productive employees with the appropriate knowledge, skills, and abilities in accordance with merit system principles. This activity also includes sourcing and evaluating a candidate, making a decision on the candidate, and hiring a new employee.	
Manage Collections	Operational Activity	This activity includes receiving and recording cash or cash-like instruments in exchange for goods or services. This activity also includes receiving prepayments on goods or services prior to delivering. The activity also generates transactions to support posting to the general ledger.	
Manage Compensation	Operational Activity	This activity is associated with determining eligibility, authorizing pay, determining earnings and deductions, executing payroll, and managing reimbursements. It includes: special pays, allowances, Human Resources (HR) entitlements, pay adjustments, allotments, bonds, garnishments and offsets, as well as payroll and tax withholding reporting (e.g., leave and earnings statement, personal statement of military compensation, W-2 statement of wages).	
Manage Compensation and Reimbursements	Operational Activity	This activity is associated with determining eligibility for reimbursement or compensation, determining reimbursement amount, earnings and deductions, authorizing reimbursement payments, and certifying the reimbursement expense and payroll information. Compensation and reimbursements may include (but not be limited to) special pays, allowances, Human Resources (HR) entitlements, travel vouchers, pay adjustments, allotments, bonds, garnishments and offsets, as well as payroll and tax withholding reporting (e.g., leave and earnings statement, personal statement of military compensation, W-2 statement of wages).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Competencies	Operational Activity	This activity is associated with developing, validating, and documenting a person's competencies (capability to apply knowledge, skills and abilities) needed to accomplish organizational goals. This activity also includes determining occupational competencies, managing competency testing, managing competency credentials, and managing operational duty experience competencies.	
Manage Competency Credentials	Operational Activity	This activity is associated with capturing and maintaining a person's certificates of qualification, licensing, and civilian-sector competencies of interest to the Department of Defense (DoD). Information captured also includes related information on active and reserve members (e.g., issuing agency, date of issuance, date of expiration) on DoD Members (active duty and reserve) and civilian employees with specific civilian-sector designated skills (e.g., emergency medical technician, police detective, and commercial airline 747 pilot).	
Manage Competency Testing	Operational Activity	This activity is associated with administering and recording results for competency related tests used for entry level (e.g., Armed Services Vocational Aptitude Battery, Armed Forces Officer Qualifying Test) and in-service testing (e.g., promotion testing, Defense Language Aptitude Battery) utilized to determine a level of measurement related to a specific competency or grouping of competencies. This would also include any specified testing of competencies related to credentials captured from a person. Warfighter identified deficiencies, and proposals from multiple sources, are also assessed with the generation of feedback and proposed actions. This activity also includes conducting competency tests and recording competency test results.	
Manage Concept Development	Operational Activity	This activity manages the concept development process designed to refine and mature future warfighting concepts.	
Manage Concept Refinement	Operational Activity	This activity supports the first phase of the Defense Acquisition Management Framework; however, a decision to begin Concept Refinement (CR) does not constitute program initiation of a new acquisition program. The purpose of this phase is to refine the concept documented in the Initial Capabilities Document (ICD) and to prepare a Technology Development Strategy (TDS).	
Manage Congressional and Federal Inquiry	Operational Activity	This activity manages the responses to Congressional and Federal inquiries regarding Defense Acquisition.	
Manage Defense Acquisition System	Operational Activity	This activity manages the Department of Defense Acquisition System to provide effective, affordable and timely systems to the end users.	
Manage Delinquent Debt	Operational Activity	This activity includes the management and collection of commercial debts determined to be delinquent and other individual out of service debt. Individual out of service debts may be resolved through involuntary salary and/or administrative offset. The activity also captures the debt compromise procedures, suspension and termination of debts, and write-offs and discharged debts.	
Manage Deliver Business Rules	Operational Activity	The process of defining and maintaining rules which affect the acceptance of an order, based on quantity, method of delivery, credit, customer experience, etc. (Include distribution channel rules)	
Manage Deliver Capital Assets	Operational Activity	Acquisition, maintenance, and disposition of order management, warehouse and transportation capital assets. Determine material handling (inventory) pick pack & ship methods (inventory), and equipment.	
Manage Deliver Information	Operational Activity	The process of collecting, maintaining, and communicating information to support deliver planning and execution processes. The information to be managed includes: order data - (customer preference, history, status, and delivery requirements, etc.), warehouse data, transportation data, and deliver data.	
Manage Deployment	Operational Activity	This activity manages, coordinates and oversees the fielding of systems placed into operational use with units in the field/fleet.	
Manage Disbursements	Operational Activity	All activities between internal or external entities related to effecting payments via electronic funds transfer to appropriate payees of the Department of Defense. A disbursement includes advances to others, payments for products and services received, and other types of payments. Amounts due to a single payee may be consolidated into a single payment. This includes accounting transactions and adjustments required by the general ledger.	
Manage DoD Traveler Visibility	Operational Activity	This activity is associated with projecting a DoD traveler's location based on scheduled travel related resources. This also utilizes direct feedback information from transportation modes (e.g., commercial carriers such as airlines or Department of Defense's Global Transportation Network (GTN)).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Earned Value Management Performance Data	Operational Activity	This activity provides documentation and information from contractors and government activities to relate time-phased budgets to specific tasks identified in the statement of work; produce data that indicate work progress; properly relate cost, schedule, and technical accomplishment; and produce data that is valid, timely, and auditable.	
Manage Education	Operational Activity	This activity is associated with developing and delivering education programs. This activity may include (but not be limited to) providing a comprehensive prekindergarten through 12th grade curriculum to DoD dependents, managing DoD Programs with Industry and schools covered within the National Defense University, the Services' Command and Staff Colleges and War Colleges, higher education programs at DoD institutions, and higher education enrollment at civilian institutions.	
Manage Education Enrollment	Operational Activity	This activity is associated with determining the eligibility and making a decision on enrollment into an education course or program. This activity also includes enrollment procedures for personnel seeking external educational opportunities (e.g., Law School), scheduling education courses, and counseling of any retention actions resulting from enrolling in the education course.	
Manage Energy	Operational Activity	This activity is where all energy program tasks needed to manage facility energy reporting, facility energy goals, and facility energy analytics are executed.	
Manage Enlistment Extension	Operational Activity	This activity is associated with administering voluntary enlistment extensions, administering involuntary enlistment extensions, and executing enlistment extension agreements.	
Manage Environmental Liability Information	Operational Activity	This activity identifies and values environmental liabilities, and prepares environmental liability information for reporting purposes. It also encompasses documentation and validation of pertinent information pertaining to environmental liabilities. The output of this activity is a complete set of validated, properly documented environmental liability information ready for submission for financial statement reporting.	
Manage Execution Fund Account	Operational Activity	This activity includes establishing an initial fund balance for each program and decrementing the amount of available funds as spending activity occurs. This activity allows for funds control validation prior to approval of commitments/de-commitments, obligations/de-obligations, supply chain entitlements, and expenditures. This activity supports the Commitment and Obligation of the funds requested from other activities. Commitments, obligations, entitlements, and expenditures would decrease the available fund balance.  This activity also supports the funds balance and status reporting requirements to support the management and execution of budgetary resources.	
Manage Execution Risk	Operational Activity	This activity manages the synthesizing and correlation of execution risk elements in the IMS, CPR, risk mitigation plans, technical status documentation, program status reviews, and other sources of program status to ensure integrated risk management process includes all disciplines required to support the execution life cycle of their system (e.g., systems safety, logistics, in-service support, test, earned value management, finance). This activity includes reporting program risks to appropriate Program Executive Officer (PEO)/PM/Systems Commanders and user personnel prior to Milestone decisions, following significant risk changes, or as requested.	
Manage Execution with Treasury	Operational Activity	This activity includes the reconciliation of the Department of Defense fund balances with the Treasury fund balance accounts to represent the department's spending ability on future authorized transactions. The reconciliation in this activity involves comparing the disbursement and collection transactions reported through the Statement of Accountability and Statement of Transactions against the Treasury's financial statements.	
Manage Executive Level Contract Performance	Operational Activity	This activity collects and analyzes contract performance information and reports performance across the Department to assess contract effectiveness and performance trends.	
Manage Facility Energy	Operational Activity	This activity is where energy program managers take all actions needed to manage facility energy reporting, facility energy goals, and facility energy analytics.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Facility Energy Conservation	Operational Activity	This activity is where energy managers take all actions needed to manage facility energy conservation, including performance of facility energy reviews, selecting energy conservation measures to implement, determining energy conservation measure implementation schedules, and performing energy project measurement and verification.	
Manage Facility Energy Consumption	Operational Activity	This activity is where energy managers take all actions needed to manage facility energy consumption, including determination of facility energy consumption parameters, recording facility energy consumption, and analyzing facility energy consumption.	
Manage Family Support	Operational Activity	This activity is associated with managing family support and family advocacy services (e.g., orientation, deployment support, child and domestic abuse assistance, relocation assistance, information and referral, child care, youth recreation and development) for Members, authorized DoD Civilians, and their families. This includes conducting a needs assessment, managing Family Support program coordination, performing follow-up on services and conducting evaluation of family support programs. This also includes updating the personnel and pay record to document services provided.	
Manage Financial Reporting Requirement	Operational Activity	This activity encompasses closing the general ledger, generating and consolidating trial balances, preparing draft financial statements, working with management and auditors to collect comments on the draft financial statements, and preparing a certified financial statement package (including financial statements, narratives, and footnotes). This activity can be conducted at both the component and the Department of Defense Enterprise level.	
Manage Finished Goods Inventories	Operational Activity	The process of establishing and maintaining finished goods, inventory limits or levels, replenishment models, ownership, product mix, stocking locations.	
Manage Full Rate Production	Operational Activity	This activity manages production of economic quantities following stabilization of the system design and validation of the production process.	
Manage General Ledger Structure	Operational Activity	This activity includes identifying the impact of internal or external requirements on the DoD's standard chart of accounts. External requirements may come from various sources, including Federal authoritative sources such as FASAB, Treasury, and OMB. Internal requirements may come from DoD business mission partners. The activity includes drafting, coordinating, and updating the chart of accounts to reflect agreed to changes.	
Manage General Ledger Transactions	Operational Activity	This activity encompasses accounting for assets, liabilities, fund balances, revenues and expenses associated with the maintenance of federal funds and expenditure of federal appropriations (salaries and expenses, operation and maintenance, procurement, working capital, trust funds, etc.). In accordance with applicable federal standards (FASAB, Treasury, OMB, GAO, etc.) the activity also includes posting all financial transactions to the general ledger, as well as the closing and review processes.	
Manage Geospatial Information and Services	Operational Activity	This activity provides planning, organizing, and executing the design, development, collection, maintenance, sustainment and analysis of geospatial information and systems.	
Manage Health Service Performance	Operational Activity	This activity is associated with managing resources, utilization, and cost management programs to support the objectives of managed care contracting and/or associated risk management. Management of these programs support compliance with health plan coverage, reimbursement, and benefit provisions. This activity also includes managing health information to include (but may not be limited to) health information technology resources, requirements, standards and infrastructure.	
Manage Healthcare Enrollment and Eligibility	Operational Activity	This activity is associated with managing healthcare services through a beneficiary enrollment process, which collects and maintains a core set of information. This information is used to determine what services an individual can receive.	
Manage Healthcare Information	Operational Activity	This activity is associated with documenting a clinical process that occurs as a byproduct of the delivery of health services. Information in the health record, such as care plans, is standardized and easily accessed from multiple sites to meet the needs of a mobile population. Information flows within the Military Health System and to/from civilian entities and the VA.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Human Resources Information	Operational Activity	This activity is associated with managing Human Resources Information (i.e., Human Resources Profiles and Human Resources Record). This activity includes the creation, maintenance, use, and execution of disposition actions. This activity also includes distributing and reporting Human Resources Information to support personnel record requests, interagency processes, mission requirements, and sharing of personally identifiable information for identity management purposes, visibility and availability of personnel. Human Resources Information is for limited access to authorized personnel only.	
Manage Human Resources Information Security	Operational Activity	This activity is associated with ensuring employees, contractors, and other designated persons have been approved and issued badges to enter federal buildings, utilize federal services, and serve in positions requiring certification of personal reliability. This activity also includes determining and tracking individual personnel security clearances as well as supporting the National Industrial Security Program.	
Manage Human Resources Interaction	Operational Activity	This activity is associated with managing labor relationships between the agency, its unions and bargaining units, and reviewing, validating and approving all survey requests that require participation of DoD personnel.	
Manage Human Resources Management Policy and Guidance	Operational Activity	This activity is associated with developing and coordinating the Human Resources Management (HRM) policy and guidance and providing a decision on the proposed HRM policy and guidance. This activity is also associated with establishing Human Resources policy and practices, establishing agency performance management strategy, establishing agency Human Resources development management strategy, reviewing laws, regulations, policies, and trends, identifying parity issues, establishing compensation, implementing compensation program, and creating compensation program communications approach and content.	
Manage Human Resources Organizational Infrastructure Support	Operational Activity	This activity is associated with overseeing the enterprise organizational infrastructure necessary to sustain legal mandates for legal personnel affairs; safety programs; law enforcement; human resources contact and relations; and managing equal opportunity programs.	
Manage Human Resources Profiles	Operational Activity	This activity is associated with the management of consolidated Human Resources Profiles (e.g., recruiting, assignment, personnel/pay, benefit and medical). This activity includes the creation, update, and consolidation of Human Resources Profiles.	
Manage Human Resources Record	Operational Activity	This activity is associated with managing the Human Resources Record (e.g., recruiting, assignment, personnel/pay, benefit and medical). The Human Resources Record includes (but may not be limited to) electronic data, document images, medical x-ray films, Military Morale, Welfare, and Recreation (MWR) workshop safety certifications, installation library resource checkouts, and On the Job Training (OJT) training checklists. This activity includes the creation, maintenance and correction of the Human Resources Record.	
Manage Human Resources Recovery Coordination Program	Operational Activity	This activity is associated with managing the Human Resources (HR) Recovery Coordination Program (RCP) for the wounded, ill, or injured service members identified as needing recovery, rehabilitation, and reintegration services. This activity also includes determining eligibility for enrollment in the HR RCP, managing HR RCP Needs Assessment development, managing and evaluating a HR recovery care plan, and conducting an evaluation of the HR RCP. Tools will be developed and utilized to categorize, collect, and manage the information needed to support a Recovering Service Member (RSM) and family.	
Manage Human Resources Survey Requests	Operational Activity	This activity is associated with reviewing, validating and approving all survey requests that require participation of personnel in more than one DoD Component, or Components other than the one(s) sponsoring. This activity may also include providing, upon request, copies of survey reports or results to appropriate authorized parties and consultative services in survey design and administration for any OSD staff element and designated survey offices of the DoD Components	
Manage Identity Credential	Operational Activity	This activity is associated with the management of all Department of Defense (DoD) identity credentials (Identity Cards (e.g., Common Access Card (CAC), Personal Identity Verification (PIV) Card, ID tags, unit controlled cards), and the management of information associated with them (e.g., Personal Identification Numbers (PIN) numbers, applets, identity and biometric information) for Employees, Members, contractors, and dependents. This includes reviewing personnel identification information as well as issuing, maintaining and revoking identity credentials for access control applications.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Import/Export Requirements - Enable Deliver	Operational Activity	The process of recording and maintaining regulations and rates, which constrain the ordering and delivering of product.	
Manage Import/Export Requirements - Enable Source	Operational Activity	The process of identifying and complying with import/export regulatory documentation and process standards set by external entities (e.g. government).	
Manage Inbound and Outbound Shipments	Operational Activity	This activity addresses the receiving, storing, and issuing of materiel at a storage location to produce shipping and packing information required to transport requested materiel/cargo to a specified destination. (SCOR D1.8, D1.9, D1.10, DR1.3)	
Manage Incoming Product	Operational Activity	The process of defining and maintaining the information that characterizes inbound logistics management of all supplier deliveries, including both physical and electronic goods and services. This includes carrier selection and management, tracking deliveries and import.	
Manage Individual Development Plan	Operational Activity	This activity is associated with a manager and employee identifying developmental opportunities to address competency goals and/or deficiencies, establishing a developmental action plan, and measuring attained skills and progress made against the Individual Development Plan.	
Manage Individual Training Course	Operational Activity	This activity is associated with developing and delivering individual training courses. This includes courses aimed at enhancing the capacity or competency to perform specific tasks and/or enhance a specific skill set (e.g., employment skills training, job training, resiliency training, financial planning, weapons training and mechanics).	
Manage Individual Training Course Enrollment	Operational Activity	This activity is associated with reviewing student information (e.g., physical, color vision, course prerequisites, waivers and priority listing) to ensure all prerequisites have been met and making a decision on enrollment, selection and non-selection into a training course based on available slots. This activity is also associated with reviewing waitlists and waivers.	
Manage Industrial Security Program	Operational Activity	This activity is associated with administrating implementation of the National Industrial Security Program (Presidential Executive Order 12829) for the Department of Defense and 23 other federal agencies. This activity includes providing oversight and assistance to cleared contractor facilities and assisting organizations in ensuring the protection of national security information. Planning of related industrial security education and training is also included.	
Manage In-Process Products - Work In Process	Operational Activity	The process of establishing and maintaining limits or levels, replenishment models, ownership, product mix and stocking locations for In-Process Product (Work in Process).	
Manage Integrated Program Activities	Operational Activity	This activity collects program specific integrated cost and schedule performance data at an appropriate level of summarization to monitor program execution. Data from contractors and government activities for use as an internal management control system for: relate time-phased budgets to specific tasks identified in the statement of work; produce data that indicate work progress; properly relate cost, schedule, and technical accomplishment; and produce data that is valid, timely, and auditable.	
Manage Integrated Supply Chain Capital Assets	Operational Activity	The process of defining capacity strategy (i.e. internal versus contract manufacturing or internal versus 3rd Party Logistics) and then acquiring, maintaining and dispositioning an organization's capital assets to operate the integrated supply chain.	
Manage Integrated Supply Chain Inventory	Operational Activity	The process of establishing total supply chain inventory strategy and planning the total inventory limits or levels (including Raw Material, Work In Process, Finished and Purchased Finished Goods) including replenishment models, ownership, product mix, and stocking locations, both inter and intra company.	
Manage Integrated Supply Chain Transportation	Operational Activity	The process of defining an integrated supply chain transportation strategy and maintaining the information which characterizes total supply chain transportation requirements, and the management of transporters both inter and intra company.	
Manage Investments	Operational Activity	This activity involves the management and recording of securities (including purchase, sale and amortization) held for the production of investment revenues, net of premiums and discounts.	
Manage Labor Relations	Operational Activity	This activity is associated with managing the relationship between the agency and its unions and bargaining units. This includes negotiating and administering labor contracts and collective bargaining agreements, managing negotiated grievances, and participating in third party proceedings.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Law Enforcement	Operational Activity	This activity is associated with protecting military members, families, and assets of the United States military by enforcing state and federal laws on the installations and have exclusive jurisdiction. Law enforcement activities include activities such as support for House Watch, Child Find, and other applicable programs, maneuver and mobility support operations, area security, police intelligence operations, law and order, and internment/resettlement operations.	
Manage Learning	Operational Activity	This activity is associated with managing individual training course and education.	
Manage Leave Request	Operational Activity	This activity is associated with receiving and reviewing a leave request. This activity also includes verifying the leave balance, counseling the Member leave status, and submitting the leave request to an approval authority for a decision. This activity also includes making a decision on the leave request, sending a notification on decision to appropriate parties, and updating the Time, Absence, and Labor profile.	
Manage Leave Sell Back	Operational Activity	This activity is associated with processing a request to sell leave. This activity includes determining if the sale of accrued leave is permissible, sending leave sell back notifications, and updating the Time, Absence and Labor profile.	
Manage Liabilities	Operational Activity	This activity includes recognizing and monitoring amounts owed to federal or nonfederal entities, including individuals, by the Department of Defense based upon physical performance or implied performance. It entails monitoring payables and accruals, recording the events related to the receipt of a request for payment; verification of payment for liabilities as related to either an asset and/or expense. The activity creates the pro forma entries to support the posting of the appropriate financial transaction.	
Manage Line of Duty Appeal Process	Operational Activity	This activity is associated with managing the Line of Duty (LoD) appeal process. This may include (but not be limited to) providing LoD appeal process counseling and providing a LoD appeal decision.	
Manage Line of Duty Determination Process	Operational Activity	This activity is associated with managing the Line of Duty (LoD) determination process to include validating LoD incident, investigating LoD incident, making LoD decisions, and managing LoD appeal process.	
Manage Lodging Reservation	Operational Activity	This activity is associated with making a lodging reservation, including activities such as: reviewing availability of hotels, booking a reservation, making changes to an existing reservation, and/or canceling an existing reservation.	
Manage Low Rate Initial Production	Operational Activity	This activity manages production of the minimum number of systems (other than ships and satellites) to provide production representative articles for Operational Test and Evaluation (OT&E), to establish an initial production base, and to permit an orderly increase in the production rate sufficient to lead to Full Rate Production (FRP) upon successful completion of Operational Testing (OT).	
Manage Maintenance Equipment and Facilities - Maintenance, Repair and Overhaul	Operational Activity	The process of specifying maintaining and dispositioning Maintenance's capital assets to operate the supply chain maintenance processes. This includes repair, alteration, calibration and other miscellaneous items to maintain production capabilities.	
Manage Maintenance Information	Operational Activity	The process of managing, collecting, maintaining, and communicating information to support Maintenance planning and execution processes. The information to be managed includes production, order and process data.	
Manage Maintenance Performance	Operational Activity	The process of developing and maintaining performance standards and analysis methods to compare actual maintenance performance against the established standards. This process allows the development and implementation of a course of action to achieve targeted performance.	
Manage Maintenance Rules	Operational Activity	The process of establishing, maintaining, and enforcing rules for managing maintenance details in line with business strategy, goals, and objectives. Maintenance details include part/item master, bills of materials/formulas, routings, processes, equipment requirements, tooling, and other information specifying the method of production for a particular product.	
Manage Major Range and Test Facility Base Test Infrastructure	Operational Activity	This activity consists of a broad base of Test and Evaluation activities managed and operated under uniform guidelines to provide Test and Evaluation support to the DoD Components responsible for developing and operating materiel and weapons systems.	
Manage Make Equipment and Facilities	Operational Activity	The process of specifying maintaining and dispositioning MAKE's capital assets to operate the supply chain production processes. This includes repair, alteration, calibration and other miscellaneous items to maintain production capabilities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Make Information	Operational Activity	The process of managing, collecting, maintaining, and communicating information to support MAKE planning and execution processes. The information to be managed includes production, order and process data.	
Manage Make Regulatory Environment	Operational Activity	The process of identifying and complying with regulatory documentation and process standards set by external entities (e.g. government).	
Manage Manpower Change	Operational Activity	This activity is associated with reviewing changes to Manpower brought about by an official directive or a request for change from the Service Components. The changes may result in the realignment of forces or a change in position attributes. This activity also includes coordinating Manpower changes with organizations and implementing the Manpower change request.	
Manage Members in Delayed Entry Program	Operational Activity	This activity is associated with managing members while in DEP to include maintaining motivation while building Service commitment to minimize attrition; preparing the DEP member mentally and physically for initial training and any specific program guarantees, ensuring the DEP member continues to meet enlistment criteria to ensure the member remains eligible to ship, and encouraging DEP member to provide quality referrals.	
Manage Military Health Services	Operational Activity	This activity is associated with providing direction, resources, healthcare providers, eligibility, enrollment, and other means necessary to promote the health of the Department of Defense (DoD) TRICARE beneficiary population. This activity also includes developing and promoting health awareness issues to educate customers, discovering and resolving environmentally based health threats, providing health services, providing preventive care and problem intervention, and improving the means and methods for maintaining the health of the beneficiary population by constantly evaluating the performance of the healthcare services system.	
Manage Military Personnel Retirement	Operational Activity	This activity is associated with processing retirement actions for voluntary and involuntary regular or reserve retirement. Reasons for retirement may include (but not be limited to) retirement actions related to being passed over twice for promotion, adverse action, medical (e.g., temporary/permanent disability), years of service (e.g., Member has met total number of years of creditable service) and age, and Member initiated requests. This activity also may include (but not be limited to) assessing retirement eligibility, counseling a Member on retirement decision, providing a retirement decision, managing a retirement checklist, issuing and updating checklist items (e.g., tasks and appointments), generating a retirement order, and executing a retirement.	
Manage Military Personnel Separation	Operational Activity	This activity is associated with terminating affiliation with accessed Members by the Department of Defense (DoD). This activity may include (but not be limited to) managing voluntary separations (e.g., resignations, contract completion), involuntary separations (e.g., adverse actions, death), and generating the separation order. Both involuntary and voluntary separations are implemented through appropriate activities which include confirming eligibility, issuing and updating checklist items (e.g., tasks and appointments), performing final out-processing functions (e.g., exit interview, travel arrangement), documenting the termination of the specific affiliation, initiating transfer actions where appropriate, and identifying losses which are used to identify replacement needs.	
Manage Military Personnel Transfer	Operational Activity	This activity is associated with transferring a Member to a different Military Service, component within a Military Service, Reserve Category, Military Personnel Class, transferring a Member to/from Active Duty, and generating a transfer order.	
Manage Military Police Installation Operations	Operational Activity	This activity is associated with managing Military Police installation operations, including traffic control, substance control, vehicle and weapon registration, and coordination with local law enforcement.	
Manage Military Police Law Enforcement Operations	Operational Activity	This activity is associated with managing military police law enforcement operations. These operations include maneuver and mobility support operations, area security, police intelligence operations, law and order, and internment/resettlement operations.	
Manage Military Recruiting and Accession	Operational Activity	This activity is associated with managing recruiting, managing accession, and managing the recruiting and accession waiver process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Miscellaneous Expense	Operational Activity	This activity is associated with capturing necessary travel and transportation related miscellaneous expenses incurred on official business. This activity also includes capturing the cost of traveler's checks, money orders, or certified checks for up to the amount of estimated per diem, visa/passport fees, parking fees, cost of birth certificates as directed by the Joint Federal Travel Regulation (JFTR), Joint Travel Regulation (JTR), and other applicable Department of Defense (DoD) references/policies.	
Manage Modifications and Upgrades to Fielded Systems	Operational Activity	This activity manages, coordinates and oversees modification requests and the subsequent upgrade of fielded systems.	
Manage Noncombatant Evacuation Operations	Operational Activity	This activity is associated with identifying the Noncombatant for evacuation, coordinating the Noncombatant for transportation, and closing out the Noncombatant Evacuation Operations (NEO) process. The Department of State directs the United States Military to the NEO incident, in order to provide for transportation of Noncombatant personnel from the area of evacuation to safety.	
Manage Officer Involuntary Retention	Operational Activity	This activity is associated with identifying, reviewing, and counseling an officer for their involuntary retention. Involuntary Retention can be due to numerous reasons (e.g., stop loss, medical reason). This activity also includes managing the appeals process for those officers requesting involuntary retention appeals, and executing involuntary retention (if necessary).	
Manage Operational Duty Experience Competency	Operational Activity	This activity is associated with capturing and maintaining operational duty (e.g., operational flying duty, operational submarine duty) experience in terms of hours, fractions of an hour, or minutes specified in standards for operational experience competencies. This information is used to determine years of operational duties required in the computation of pay entitlements (e.g., eligibility gates for minimum periods of operational aviation or submarine duty compared against years of specified service) authorized by law. Experience competencies are based on specified periods of time performing specific operational duties and are used in determining an occupation's qualification levels (e.g., intermediate vs. qualified air force pilot). This activity also includes capturing operational duty experience competencies and maintaining operational duty experience competencies.	
Manage Organization	Operational Activity	This activity is associated with managing the human resources infrastructure for Department of Defense (DoD) organizations. This activity includes managing the implementation of DoD mission plans by formulating force structure, strength projections, accession targets, and distributing peacetime authorizations and wartime requirements.	
Manage Organization Controlled Absence	Operational Activity	This activity is associated with reviewing, determining eligibility, and making a decision regarding an organization controlled absence request (e.g., pass and liberty, administrative absence, professional meetings, transition assistance programs, sporting events, and educational leave of absence). This activity also includes counseling the Member as needed on the decision made regarding the request.	
Manage Organizational Structure	Operational Activity	This activity is associated with forming Department of Defense (DoD) organizations within DoD command relationships that are needed to accomplish assigned missions within budgetary constraints. This activity also includes establishing, updating, reorganizing unit(s), developing organization specifications related to the allocation of human resources, Manpower requirements and tailoring organizations to reflect revisions of mission implementations. This activity is also associated with the formulation of specifications for peacetime authorizations and wartime requirements needed to accomplish tasked Department of Defense (DoD) missions. This includes the occupation, skill, position requirements, education, and training specifications that the position requires to perform the specified mission.	
Manage Other Contract Reporting	Operational Activity	This activity provides information related to updating contract requirements; planning and decision making on funding changes in contracts; determining funds in excess of contract needs and available for de-obligation; obtaining rough estimates of termination costs; and determining if sufficient funds are available by fiscal year to execute the contract.	
Manage Oversight Information	Operational Activity	This activity manages and integrates oversight performed by the program manager of DoD programs in the execution phase to determine current status, ascertain if the requirements are achievable and/or require modification. These activities include periodic and ad-hoc reporting, and acquisition assessments. Oversight shall be conducted in accordance with statutes, regulations, and Acquisition Policy.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Patient Appointment Scheduling	Operational Activity	This activity is associated with obtaining and verifying a core set of information (eligibility, enrollment, demographics, Primary Care Manager, case manager, special programs, and personal preferences) and scheduling a service or set of services for beneficiaries. The activity also includes managing events, such as when the beneficiary arrives at the care delivery site or service site for a scheduled appointment or unscheduled time period (walk-in). A beneficiary may also have scheduled an appointment, cancelled it at a later date, or may not come in for the scheduled appointment (no-show).	
Manage Patient Encounters Over Continuum Of Care	Operational Activity	This activity is associated with arranging and tracking a beneficiary's activities and movement across the continuum of care during peace and military operations. This activity also includes ensuring that the beneficiary's time is spent receiving service rather than waiting to receive it.	
Manage Performance	Operational Activity	This activity is associated with administering the performance evaluation process, personnel grade change (i.e., promotion and demotion), recognition programs, and physical fitness programs.	
Manage Performance Based Logistics	Operational Activity	This activity manages the preferred sustainment strategy for system product support that employs the purchase of support as an integrated, affordable performance package designed to optimize system readiness.	
Manage Performance Evaluation Appeals	Operational Activity	This activity is associated with managing performance evaluation appeals. This includes making a decision regarding the performance evaluation appeal, providing this decision to the appropriate parties, and updating the Member's record with the revised performance evaluation information.	
Manage Performance of Return Processes	Operational Activity	The process of measuring actual Return Process performance against internal and/or external standards to develop and implement a course of action to achieve targeted performance levels.	
Manage Performance of Supply Chain	Operational Activity	The process of measuring actual integrated Supply Chain performance against internal and/or external standards to develop and implement a course of action to achieve targeted performance levels. Performance targets established for the execution of supply chain processes are reflected in the process elements for PLAN, i.e. cost, delivery reliability, cycle time, responsiveness, and assets.	
Manage Performance Plan	Operational Activity	This activity is associated with establishing an individual performance plan and counseling personnel on a performance development plan.	
Manage Personnel and Pay	Operational Activity	This activity is associated with managing all functions related to entry to/exit from the organization; profile record management; career development and management; execution of Human Resources (HR) policies, procedures and employee information management; and administering, authorizing and calculating pay. This activity also includes accession, recruitment, strength management, placement and assignment, position fill management and classification, budget justification, resource utilization projections, adverse actions, time and attendance tracking, human resources reporting, education, training and development, competency management, performance review and administration (including the promotion process), pay administration and policy, leave calculation, annuitant and retirement pay, special pay and human resources entitlement, pay authorization and calculation, pay adjustment, allotments, bonds, garnishments and offsets, Thrift Saving Plan calculation, payroll and tax reporting, and travel pay and other reimbursables.	
Manage Personnel Casualty	Operational Activity	This activity is associated with identifying and determining casualty classification and categories (i.e., type, and status). This activity also includes producing casualty reports, conducting investigations to resolve casualty status, (e.g., deceased, missing, and injured), providing support (e.g. request for Line of Duty determination and coordinate casualty search and recovery teams) for casualty processes, and making a decision on the final casualty category.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Personnel Classification	Operational Activity	This activity is associated with approving or disapproving a Personnel Classification action, and creating and maintaining an occupation classification. It is also associated with assigning and removing an individual occupation classification. This includes determining occupation designation(s) of civilian employees and Members required to accomplish the mission taskings, or forecasted taskings, of the Department of Defense (DoD) within the overall context of the federal government. Classification specifications are the basis for the determination of the DoD recognized competencies required for a civilian employee or Member. This encompasses actions for both initial classification and reclassification. Identified deficiencies, and proposals from multiple sources, are also assessed with the generation of feedback and proposed actions.	
Manage Personnel Demotion	Operational Activity	This activity is associated with supporting the demotion of personnel to include receiving notification of a demotion, and updating a Member's personnel/pay record to reflect a demotion. This activity covers all activities associated with the demotion process of enlisted and officer personnel. The supporting activities include: reviewing a demotion decision and executing a demotion.	
Manage Personnel Development	Operational Activity	This activity is associated with enhancing a person's personal and professional skills, such as managing personnel classification, competency development, and career path. This activity also includes capturing a person's credential information, identifying training and education eligibility requirements, managing class seat quotas, courses, resources, as well as cataloging and scheduling personnel development resource utilization.	
Manage Personnel Distribution	Operational Activity	This activity is associated with managing the distribution of personnel consistent with the allotment of funds, availability of personnel, and guidance from manning documents. This activity also includes developing personnel distribution plans, coordinating the personnel distribution plan implementation, and providing personnel requirement request decisions.	
Manage Personnel Planning	Operational Activity	This activity includes (but is not limited to) conducting succession planning, providing human resources consultative support, and measuring human resources performance.	
Manage Personnel Promotion	Operational Activity	This activity is associated with supporting the management of the promotion eligibility, selecting promotions, and executing the promotion for both enlisted and Officer Members. This activity also includes using promotion criteria and a promotion appeal package to make a decision to promote personnel.	
Manage Personnel Retention	Operational Activity	This activity is associated with processing Members for enlistment extension, reenlistment, involuntary retention, and special category agreements. This activity also includes executing the personnel retention program, providing counseling to thoroughly explain each personnel agreement and corresponding service obligation, ensuring continued eligibility for retention, and finalizing the personnel agreement.	
Manage Personnel Security	Operational Activity	This activity is associated with ensuring employees, contractors, and other designated persons have been approved for access to classified information within appropriately cleared facilities. This activity includes oversight of investigation, certification, reallocation, and maintenance of clearance and unfavorable information related to individual employees, contractors, or other designated persons. Planning of related personnel security education and training is also included.	
Manage Physical Evaluation Process	Operational Activity	This activity is associated with conducting Physical Evaluation Board (PEB) or validating the physical evaluation appeal request that results in a physical evaluation disposition of a Member to return to duty or separate/retire.	
Manage Plan Data Collection	Operational Activity	The process of collecting, integrating and maintaining the accuracy of supply chain execution information necessary to plan the balance of supply chain resources to demand requirements at both the highest aggregate and lowest SKU planning levels. Each occurrence consumes time.	
Manage Plan Regulatory Requirements and Compliance	Operational Activity	The process of identifying and complying with regulatory documentation and process standards set by external entities (i.e. government, trade officials, etc.) when planning for the integrated supply chain network.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Planning Configuration	Operational Activity	The process of defining and maintaining the information about a unique supply chain network for a group of similar or complimentary products through their full life cycle, including the evaluation of market need, product realization (development, introduction and production), product discontinuation, and after-market support. This element also includes the management of critical sub processes needed to manage the life cycle of individual item numbers including item masters, routings, event planning (promotions, etc.), ABC classification, rationalization, and bill of materials.	
Manage Pre-Concept Refinement	Operational Activity	This activity supports the lead-in phase of the Defense Acquisition Management Framework. It supports the initial definition of a concept to develop a materiel and/or non-materiel approach to satisfy specific capability gaps in preparation for a Concept Decision. Activities would include compilation of an Analysis of Alternatives (AoA) Plan, a Preliminary Integrated Architecture and Initial Budget Estimations.	
Manage Procurement Entitlement	Operational Activity	This activity involves processing a request for payment from vendor, or other party owed by the government, as a result of having provided material or services to the DoD, including but not limited to payment for contracted goods or services, miscellaneous payments and the use of government purchase cards. The activity conducts a two-way or three-way match or reconciles artifacts to approve transactions to validate the payment request. The activity also applies any adjustments to the initial payable for holdbacks, discounts and interest due to the vendor in accordance with the contract and the Prompt Payment Act. Funding availability for payment is verified before a Certified Business Partner Payment is generated and submitted to Disbursing. Information related to disbursements for specific payments and communications with interested parties (i.e., vendor, contract administrator, Treasury Department) are maintained.	
Manage Product Inventory	Operational Activity	The process of establishing and maintaining physical inventories and inventory information. This includes warehouse management, cycle counting, physical inventories and inventory reconciliation. For Services, this may include tracking the number of service providers and the financial resources committed at any given point in time.	
Manage Product Life Cycle	Operational Activity	The process of defining and maintaining the distribution channel/ network for a specific product line (no capital asset or transportation management).	
Manage Product Support Package	Operational Activity	This activity monitors and adjusts the levels of personnel, training, logistics, and other support required to maintain and prolong operations of a product throughout its life-cycle.	
Manage Production and Deployment	Operational Activity	This activity is the fourth phase of the life cycle as defined and established by DoDI 5000.2. This phase consists of two efforts: Low Rate Initial Production (LRIP) and Full Rate Production and Deployment (FRP&D) separated by a Full Rate Production Decision Review (FRPDR). The purpose of this phase is to achieve an operational capability that satisfies the mission need.	
Manage Production Network	Operational Activity	The process of identifying and maintaining a network of intra-company production units that deliver specific semi-finished materials or product sets to the final production site.	
Manage Production Performance	Operational Activity	The process of developing and maintaining performance standards and analysis methods to compare actual production performance against the established standards. This process allows the development and implementation of a course of action to achieve targeted performance.	
Manage Production Rules	Operational Activity	The process of establishing, maintaining, and enforcing rules for managing production details in line with business strategy, goals, and objectives. Production details include part/item master, bills of materials/formulas, routings, processes, equipment requirements, tooling, and other information specifying the method of production for a particular product.	
Manage Property and Materiel	Operational Activity	This activity includes all activities associated with the management and movement of materiel and assets throughout the lifecycle from procurement/acquisition, production, end use and maintenance/sustainment to final disposition.	
Manage Provision Of Health Services	Operational Activity	This activity is associated with shifting the caregiver's focus from illness care to illness prevention and wellness promotion to achieve the optimal health status for individuals and populations. These processes are important both for the relatively static populations found at sustaining base locations and for military populations in a deployed environment. These processes are initiated early in the beneficiary's relationship with the Military Health System, often at time of enrollment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Quality of Life	Operational Activity	This activity is associated with maintaining or improving personnel's quality of life. This includes developing policies, future plans, revenue-producing and cost saving initiatives to support Quality of Life programs, providing budget and program related guidance, and policy oversight. Quality of Life needs and the programs and actions to address them, are categorized under two general headings: living conditions and duty environment. Quality of Life programs include support for Morale, Welfare and Recreation (MWR), Family Support Services, Recovery Coordination Program (RCP), Social Action Programs (e.g., equal opportunity programs, voting assistance, drug/alcohol treatment and education, and sexual harassment counseling), and Employee Assistance Programs.	
Manage Receivables	Operational Activity	This activity includes monitoring and taking actions for claims to cash or other assets against other entities, either based on legal provisions, such as a payment due date, or goods tendered or services rendered and debts due to the Department of Defense, within a specified accounting period. The management of receivables is the collection of amounts due to include administrative fees, interest, and penalties. The Manage Receivables activity also includes billing, aging, dunning, write-off, adjustment, and the assessment of interest and penalties on outstanding receivables.	
Manage Recruiting	Operational Activity	This activity is associated with managing the recruitment process for applicants who apply to the Armed Forces. This activity includes prospecting for potential recruitment applicants, conducting applicant interviews, and managing recruitment applicants (i.e., coordinating accession evaluations, formulating applicant mitigation plans, tracking applicants who are awaiting shipping).	
Manage Recruiting and Accession	Operational Activity	This activity is associated with recruiting, identifying, evaluating and selecting applicant(s) to fill a position or organizational requirement and hiring/accessing applicants against positions (e.g., planning and identifying placement requirements, determining applicant's eligibility and suitability, in-processing selected applicants, and accepting individuals into the DoD).	
Manage Recruitment Applicant	Operational Activity	This activity is associated with managing administrative operations (e.g., scheduling applicant for accession processing (MEPS) and providing the required accession documents (e.g., applicant's personal data, consent form), formulating applicant mitigation plans for those who failed any part of the accession process, and submitting and processing Service waivers or exception to policy (ETP), which may be as a result of a Congressional inquiry.	
Manage Recruitment Goals	Operational Activity	This activity is associated with tracking recruiters' goals and distributing goals based on quantity and quality across the sub groups within the organization.	
Manage Reimbursements	Operational Activity	This activity is associated with determining eligibility for reimbursements, submitting reimbursement claims (e.g., travel vouchers, relocation expenses, and adoption expenses), determining amount due, authorizing payment to reimburse personnel for expenses incurred, or expenses expected to be incurred, and executing reimbursements by certifying the reimbursement expense information.	
Manage Renewable Energy Production and Purchase	Operational Activity	This activity is where energy managers take all actions needed to manage renewable energy production and purchase, including performance of site renewable energy reviews, selecting renewable energy project to implement, determining renewable energy project schedules, performing energy project measurement and verification, determining renewable energy purchase requirements, and managing renewable energy purchases.	
Manage Retirement Checklist	Operational Activity	This activity is associated with creating, completing, and verifying a retirement checklist. This activity also includes correcting the Member's discrepancies in his or her military experience and training information, obtaining a referral for a medical review/exam, ensuring their eligibility for transition assistance programs, making retirement elections, entering a transition assistance program, or completing other retirement documentation. Checklists that are deemed incomplete will be returned to the Member for further completion.	
Manage Return Capital Assets	Operational Activity	The process of acquiring, maintaining and dispositioning capital assets such as fork lift trucks, information systems and equipment in receiving docks that are utilized in support of Return. Management activities would include defining asset requirements, determining resource availability and conducting gap analysis and resolution. The process includes lease-buy and outsourcing decisions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Return Data Collection	Operational Activity	The process of collecting, integrating and maintaining the accuracy of return execution information necessary to plan the recovery of supply chain resources.	
Manage Return Inventory	Operational Activity	The process of establishing a return process inventory strategy and planning the recovery process inventory limits or levels (including Raw Material, Work In Process, Finished and Purchased Finished Goods) including replenishment models, ownership, product mix, and stocking locations, both inter and intra company.	
Manage Return Network Configuration	Operational Activity	The process where customer and service provider locations involved in the flow of returns are defined and maintained throughout the supply chain. Locations include retail and wholesale customer and supplier sites, manufacturing facilities, distribution centers, warehouses, repair depots and military bases. How unserviceable material flow throughout the network is governed by the specific supply chain's business rules. (See ER1)	
Manage Return Regulatory Requirements and Compliance	Operational Activity	The process of identifying and complying with regulatory documentation and process standards set by external entities (i.e. government, trade officials, etc.) when planning for the Return of Assets. Includes Customs requirements and Import / Export Controls.	
Manage Return Transportation	Operational Activity	The process of providing the least cost transportation of a returned product from a customer location to the appropriate service provider location within specified time frames. Can include interim transportation activities conducted within more than one service provider locations. Includes defining and implementing a Return transportation strategy throughout the supply chain, maintaining transportation-related information (rates, lead times) and managing transportation performance.	
Manage Scheduled Payments	Operational Activity	This activity involves holding approved payments until either the scheduled payment date or any other approved release date.	
Manage Security Services	Operational Activity	This activity is associated with facilitating the personnel security clearance process, clearing industrial facilities, providing related technology implementations, and planning security education and training. This activity includes determining and tracking individual personnel clearances (managing personnel security) as well as supporting the National Industrial Security Program.	
Manage Separation and Retirement	Operational Activity	This activity is associated with terminating affiliation with accessed persons (e.g., military, civilian, coalition force members, volunteers, and contract personnel) by the Department of Defense (DoD). This activity may include (but not be limited to) managing voluntary military separations (e.g., resignations, contract completion), managing involuntary military separations (e.g., adverse actions, death), managing military retirements, managing civilian personnel separations/retirements, non-DoD personnel separations, and managing transition assistance programs. Both separations and retirements are implemented through appropriate activities which include issuing and updating checklist items (e.g., tasks and appointments), performing final out-processing functions (e.g., exit interview, travel arrangement), documenting the termination of the specific affiliation, initiating transfer actions where appropriate, and identifying losses which are then used to identify replacement needs.	
Manage Separation Checklist	Operational Activity	This activity is associated with providing access to required information using the Preseparation Counseling Checklist (DD Form 2648) as a guide, creating, completing, and verifying the required out-processing checklists and necessary documentation (e.g., medical and dental records, travel voucher), and acknowledging the receipt of a signed Preseparation Counseling Checklist (DD Form 2648). This activity also includes correcting the Member's discrepancies in his or her military experience and training information, obtaining a referral for a medical review/exam, ensuring their eligibility for transition assistance programs, and completing other separation documentation.	
Manage Separation of Non-DoD Personnel	Operational Activity	This activity is associated with the Department of Defense (DoD) terminating affiliation with accessed personnel (e.g., non-combatant evacuees, contractors, coalition force members, and volunteers).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Sourcing Business Rules	Operational Activity	The process of defining requirements and establishing, maintaining and enforcing decision support criteria, in alignment with business strategy, goals and objectives. The business strategy defines the criteria for sourcing business rules that are translated into guidelines and policies for conducting business within the enterprise and other legal entities. Sourcing business rules include: supplier selection and negotiation processes, fulfillment and delivery performance and relationship definition for specific levels of collaboration and partnership.	
Manage Special Category Retention	Operational Activity	This activity is associated with reviewing, validating special category (e.g. Critical Skills Retention Bonus (CSRB), Assignment or School such as Special Forces School), determining retention bonus eligibility and updating profile with special category retention information.	
Manage Standard Financial Information Structure	Operational Activity	This activity includes identifying the impact of internal or external requirements on the standard financial information structure. External requirements may come from various sources, including Federal authoritative sources such as FASAB, Treasury, and OMB. Internal requirements may come from DoD business mission partners. The activity includes drafting, coordinating, and updating the standard financial information structures to reflect agreed to changes.	
Manage Strategic and Critical Materials Program	Operational Activity	This activity manages national strategic products and natural resources, and their use, and their disposition for the national security goals and objectives for the United States.	
Manage Supplier Agreements	Operational Activity	The management of existing purchase orders or supplier contracts. This includes managing volume/step pricing, resolving issues, enforcing terms and conditions and maintaining an accurate status for existing purchase orders or contracts.	
Manage Supplier Network	Operational Activity	The process of defining and maintaining a unique network of suppliers to deliver a specific product set. This includes establishment of a new supplier or maintaining an existing supplier and all the tasks and activities associated with identifying and qualifying the supplier and finalizing on the sourcing terms and conditions. Also, the management of a supplier certification process, which includes certifying new suppliers and maintaining the current status of existing suppliers.	
Manage Supply Chain Deliver Risk	Operational Activity	The process of managing Deliver risks within an overall Supply Chain Risk Program. This includes identifying and assessing Deliver risks as well as and planning and implementing responses to Deliver risks. Delivery risks include all potential events that could impact company's ability to deliver on-time at a reasonable cost and quality. In particular, the risk areas addressed are Transportation (weather related transportation issues, ocean freight), Inventory management (accuracy, stock-out, damaged inventory.), Order management (fulfillment accuracy, delayed delivery), and Document compliance (invoicing issue, customs procedures).	
Manage Supply Chain Make Risk	Operational Activity	The process of managing Make risks within an overall supply Chain risk Program. This includes identifying and assessing make risks as well as and planning and implementing responses to Make risks. Make risks include potential events that could impact your ability to make on-time at a reasonable cost with good quality. The risks can occur internally within your organization, e.g. a matching breakdown or facility fire, or externally, e.g. a hurricane, that impacts your ability to Make. Response planning includes: mitigation, either reducing the impact of a Make risk event or reducing the likelihood it will occur; transfer; acceptance. An organization has a high level of control and flexibility of action concerning internal Make risks, so they are prime candidates for control Response planning can be aggregated for make risks across the organization.	
Manage Supply Chain Plan Risk	Operational Activity	The process of identifying, coordinating and managing Supply Chain Risk(s) by aligning with the overall business risk management program. Supply Chain Risk is defined as any uncertainty that can affect the organization in a potentially negative fashion. The Manage Supply Chain Plan Risk enabler includes identifying the potential risk, assessing the probability and potential impact of the risk, and planning risk mitigating strategies. This requires analysis and coordination with the assessment and mitigating activities of the other process areas (S, M, D, R) as it relates to Supply side, Demand side, Internal, and External Supply Chain Risks.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Supply Chain Return Risk	Operational Activity	The process of managing Return risks within an overall Supply Chain Risk Program. This includes identifying and assessing Return risks as well as and planning and implementing responses to Return risks. Return risks include potential events that could impact you or the customer's ability to Return goods in a timely manner at a reasonable cost with minimal damage. Risk Management includes: mitigation, either reducing the impact of a risk event or reducing the likelihood it will occur.	
Manage Supply Chain Source Risk	Operational Activity	The process of managing Source risks within an overall Supply Chain Risk Program. This includes identifying and assessing Source risks as well as planning and implementing responses to Source risks. Source risks include potential events that could impact the organization's or the suppliers' ability to deliver raw material in a timely manner at a reasonable cost with acceptable quality. Risk Management includes: migration, either reducing the impact of a risk event of reducing the likelihood of its occurrence.	
Manage System Demonstration	Operational Activity	This activity is the second effort of the System Development and Demonstration (SDD) phase. A program enters systems development after the Program Manager (PM) has demonstrated the system in prototype articles or Engineering Development Models (EDMs). The effort is intended to demonstrate the ability of the system to operate in a useful way consistent with the approved Key Performance Parameters (KPPs). This effort ends when the system is demonstrated in its intended environment using the selected prototype; meets approved requirements, industrial capabilities are reasonably available; and the system meets or exceeds exit criteria and Milestone C entrance requirements.	
Manage System Development and Demonstration	Operational Activity	This activity consists of two efforts, System Integration (SI) and System Demonstration (SD), and begins after Milestone B. It also contains a Design Readiness Review (DRR) at the conclusion of the SI effort. A successful Milestone B can place the program in either SI or SD. Activities include: mature system development, integration and demonstration to support Milestone C decisions; conducting of Live Fire Test and Evaluation (LFT&E); Initial Operational Test and Evaluation (IOT&E) of production representative articles; and ensuring development and production funding is evident in the Future Years Defense Program (FYDP) consistent with DoD's full funding policy.	
Manage System Integration	Operational Activity	This activity is the first effort of the System Development and Demonstration (SDD) phase. A program enters System Integration (SI) when there is a technical solution but the subsystems have not been integrated into a complete system. The Capability Development Document (CDD) guides the effort, which typically includes demonstration of prototype articles or Engineering Development Models (EDMs). A successful Design Readiness Review (DRR) ends the SI effort.	
Manage Technology Development	Operational Activity	This activity is the second phase of the Defense Acquisition Management Framework as defined and established by DoDI 5000.2. It is initiated by a successful Milestone A decision. The activities of this phase reduce technology risk and determine the appropriate set of technologies to be integrated into the full system. This effort is normally funded only for advanced development work and does not mean that a new acquisition program has been initiated.	
Manage the Department of Defense Business Mission	Operational Activity	This activity manages all DoD activities (planning, leadership and decision-making) required in response to the National Security Strategy which provides the grand strategy and overarching national security goals and objectives for the United States.	
Manage Transfer from Enlisted to Officer	Operational Activity	This activity is associated with changing a Member's class from Enlisted to Commissioned/Warrant Officer class. This activity may also include (but not be limited to) assessing commissioning program eligibility, making a decision on commissioning program request, and updating the member record with commissioning program admission decision.	
Manage Transfer from Officer to Enlisted	Operational Activity	This activity is associated with changing a Member's military personnel class from a Commissioned/Warrant Officer to an enlisted class. This transfer can also be performed for other reasons (e.g., Reduction in Force (RIF), two time non-select for promotion). This activity may include (but not be limited to) validating a voluntary resignation request, making a decision on a voluntary resignation request, and updating the Member profile with voluntary resignation decision.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Transition Assistance	Operational Activity	This activity is associated with managing support for transition assistance for Members, their families, newly separated members and civilian personnel from government service. This includes (but is not limited to) conducting an eligibility assessment for transition assistance, documenting transition assistance selections, and coordinating transition assistance.	
Manage Transportation - Enable Deliver	Operational Activity	The process of 1) defining and maintaining the information which characterizes product, containerization, vehicle, route, terminals, regulations, rates/tariffs and backhaul opportunity (Characterization include information necessary to support maintenance of internal Outbound Transportation equipment - CAPITAL ASSETS) and 2) the management of transporters.	
Manage Transportation - Work in Process - Enable Make	Operational Activity	The process of transporting In-Process Product (Work in Process). This includes management of the activities associated with in transit handling and movement of In-Process Product (Work in Process).	
Manage Transportation Reservation	Operational Activity	This activity is associated with making a transportation reservation, including activities such as reviewing availability of airlines, trains or buses, booking a reservation, making changes to an existing reservation, and/or canceling an existing reservation.	
Manage Travel	Operational Activity	This activity is associated with documenting all types of official travel (e.g., initial hire/first duty station travel, temporary duty [TDY] travel, and Permanent Change of Station [PCS] travel). This activity also includes verifying a travel authorization, verifying required documentation, validating a traveler's eligibility and credentials (e.g., security clearance, passport, visa, foreign area clearance); initiating and finalizing travel requests and authorizations; gathering information necessary to create a travel authorization for individual or group travel; verifying fund availability; arranging travel accommodations (e.g., airlines, rental car, lodging); estimating travel costs; processing obligations for the expenses estimated on the authorization by the traveler; and reimbursing the traveler for expenses incurred by means of a created and approved payment voucher.	
Manage Travel Accommodations	Operational Activity	This activity is associated with making a travel reservation, including activities such as: reviewing availability of airlines, hotels, and car rentals, booking a flight, renting a vehicle, making changes to an existing reservation, and/or canceling an existing reservation.	
Manage Travel Authorization	Operational Activity	This activity is associated with authorizing and documenting all types of official travel (e.g., initial hire/first duty station travel, Temporary Duty [TDY] travel, and Permanent Change of Station [PCS] travel). This activity also includes verifying a travel authorization, validating required documentation and traveler's eligibility and credentials (e.g., security clearance, passport, visa, foreign area clearance), initiating and finalizing travel requests and authorizations, gathering information necessary to create a travel authorization for individual or group travel, verifying fund availability, arranging travel accommodations (e.g., airlines, rental car, lodging), estimating travel costs, and completing and issuing travel authorizations to travelers requesting activity, as well as to accounting in order to obligate funds.	
Manage Travel Resource Scheduling	Operational Activity	This activity is associated with managing the arrangement of travel modes, accommodations (e.g., airlines, Department of Defense (DoD) conveyances, rental car, lodging), and related cost estimates needed to accomplish authorized travel.	
Manage Travel Voucher	Operational Activity	This activity is associated with managing the life cycle of a travel voucher, which includes creating, submitting, approving, and certifying a travel voucher. Also, initiating obligation adjustment travel voucher invoice. The certified voucher is sent to Financial Management for immediate payment to the traveler for expenses incurred.	
Manage Traveler Visibility	Operational Activity	This activity is associated with projecting a traveler's location based on scheduled travel related resources and managing noncombatant evacuation operations. This also utilizes direct feedback information from transportation modes (e.g., commercial carriers such as airlines or Department of Defense's Global Transportation Network (GTN)).	
Manage Unauthorized Absence	Operational Activity	This activity is associated with categorizing and resolving the status of Members who are absent without authorization. Categories of unauthorized absence may include (but not be limited to) Unauthorized Absence (UA) and Deserter.	
Manage Vehicle and Weapon Registration	Operational Activity	This activity is associated with registering vehicles and weapons of personnel with authorized access to military installations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Vehicle Rental Reservation	Operational Activity	This activity is associated with making a vehicle rental reservation, including activities such as reviewing availability car rentals, renting a vehicle, making changes to an existing reservation, and/or canceling an existing reservation.	
Manage Workforce Occupational Safety Analysis	Operational Activity	This activity is associated with managing human resources information and Environment, Safety and Occupational Health (ESOH) control requirements to develop work and training requirements for a job position.	
Measure Human Resources Performance	Operational Activity	This activity is associated with validating human resources performance measures and metrics, tracking human resources performance results, and analyzing human resources performance results.	
Modify Manpower Change Request	Operational Activity	This activity is associated with modifying the manpower change request based on the feedback received from other organizations.	
Modify Organization Structure	Operational Activity	This activity is associated with changing the structure of the organization to support mission requirements.	
Modify Unit Structure	Operational Activity	This activity is associated with changing the unit structure to meet mission requirements.	
Monitor Acquisition Policy Compliance	Operational Activity	This activity manages the compliance to the Department's acquisition policy to include policy, guidelines and procedures.	
Monitor and Support Program Deployment	Operational Activity	This activity monitors and supports the delivery and fielding of the system and its required support elements.	
Monitor Commercial Request for DoD Technology Export	Operational Activity	This activity provides DoD regulatory review and recommendation for the commercial business request to export DoD technology. This includes munitions and dual use technologies.	
Monitor Industrial Capability and Capacity	Operational Activity	This activity monitors and provides the analysis of the defense industrial base production capabilities, facilities and resource availability. This includes foreign industrial bases in the growing global economy.	
Monitor Operations and Support	Operational Activity	The activity is the fifth phase of the life cycle as defined and established by DoDI 5000.2. This activity consists of two efforts, sustainment and disposal. The phase is not initiated by a formal milestone, but instead begins with the deployment of the first system to the field, an act that initiates the sustainment effort of this phase. The sustainment effort overlaps the Full Rate Production and Deployment (FRP&D) effort of the Production & Deployment phase.	
Monitor Payment	Operational Activity	This activity involves the notification of the vendor, or other party owed by the government, contract administrator, and accounting functions of any payments made to include the final payment, the cancellation of any payments sent for disbursement, requests for refunds, and re-disbursement or re-calculation of payments returned or rejected by the payee.	
Monitor Performance of the Department of Defense Business Mission	Operational Activity	This activity measures progress towards satisfying the strategic objectives of the Department of Defense Business Mission.	
Monitor Personnel Security Clearance Eligibility	Operational Activity	This activity is associated with reporting, documenting, and notifying the appropriate parties of any events or circumstances that may have a substantial effect on a person's clearance eligibility or level of access. This process also includes determining if the clearance should be suspended as a result of these events so that additional investigation of the events can be conducted.	
Monitor Science and Technology Engineering Management	Operational Activity	This activity provides leadership and guidance for the integration of Component research and advanced technology development.	
Monitor System Deployment Schedule	Operational Activity	This activity monitors the fielding of systems as they are placed into operational use with units in the field/fleet.	
Negotiate and Receive Contract	Operational Activity	The process of negotiating order details with customer (e.g. price, schedule, product performance) and finalizing the contract. Optionally accept payment.	
Negotiate OMB Passback	Operational Activity	This activity describes the process of negotiating the DoD's proposed budget amount for inclusion to the President's budget submission. This activity also captures economic assumption as key factor in determining the appropriate funding for a specific program.	
Obtain and Respond to Request for Proposal/Request for Quote	Operational Activity	The process of receiving a request for proposal or request for quote, evaluating the request (estimating the schedule, developing costs estimates, establishing price), and responding to the potential customer.	
Obtain Current Structure of Unit Positions Performing Mission	Operational Activity	This activity is associated with acquiring the unit structure that is currently being used to perform the mission.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Obtain Labor Recognition	Operational Activity	This activity is associated with collecting petitions or interest cards from groups of employees. Union petitions Federal Labor Relations Authority (FLRA) for recognition, agency responds to petition, FLRA decides on petition and, if favorable, a FLRA-sponsored election takes place and employees vote.	
Obtain Organization Unique Identifier Seed	Operational Activity	This activity is associated with obtaining a seed (i.e., a seed is a unique four byte (32 bit) prefix provided by a Enterprise-wide Seed Server (ESS)) from the ESS or reassigning an existing seed to an organization. This activity also includes determining the usage levels for an Enterprise-wide Identifier (EwID) seed account.	
Pack Product - Stocked Product	Operational Activity	The activities such as sorting / combining the products, packing / kitting the products, paste labels, barcodes etc. and delivering the products to the shipping area for loading - Stocked Product	
Pack Product - Engineer-to-Order Product	Operational Activity	The activities such as sorting / combining the products, packing / kitting the products, paste labels, barcodes etc. and delivering the products to the shipping area for loading - Engineer-to-Order Product	
Pack Product - Make-to-Stock Product	Operational Activity	The activities such as sorting / combining the products, packing / kitting the products, paste labels, barcodes etc. and delivering the products to the shipping area for loading - Make-to-Stock Product	
Package - Engineer-to-Order	Operational Activity	The series of activities that containerize completed products for storage or sale to end-users. Within certain industries, packaging may include cleaning or sterilization - Engineer-to-Order.	
Package - Make-to-Order	Operational Activity	The series of activities that containerize completed products for storage or sale to end-users. Within certain industries, packaging may include cleaning or sterilization - Make-to-Order.	
Package - Make-to-Stock	Operational Activity	The series of activities that containerize completed products for storage or sale to end-users. Within certain industries, packaging may include cleaning or sterilization - Make-to-Stock	
Perform Absence Administration	Operational Activity	This activity is associated with managing organization controlled absences and managing unauthorized absences.	
Perform Accession Shipping	Operational Activity	This activity is associated with verifying positive identification of the applicant; determining if accession shipping requirement information is complete; preparing or canceling accession shipping arrangements and accession shipping orders; updating the Member's profile with accession shipping order information; determining if the Member is eligible to ship to assignment based on the external organization check results and notifying the appropriate parties (e.g., Member, Service); coordinating accession meal entitlement; generating the accession shipping packet; sending the accession shipping packet to the appropriate parties (e.g., Member, Service); and performing the accession shipping brief.	
Perform Analysis of Materiel Approaches	Operational Activity	This activity evaluates potential materiel solution approaches to meet a mission capability.	
Perform Applicant Prescreen	Operational Activity	This activity is associated with interviewing the applicant to determine qualifications, collecting additional personal information (e.g., address, birth certificate, and school transcripts) and medical information necessary to apply to the Armed Services, conducting medical prescreen, and completing accession forms (e.g., DD forms 2807-1, 2058, and 368). This may also include determining if the applicant has prior service and retrieving that information for use in the recruiting process.	
Perform Aptitude Qualification	Operational Activity	This activity is associated with administering the Armed Services Vocational Aptitude Battery (ASVAB) test and/or special purpose test (e.g., Defense Language Aptitude Battery, Army Flight Aptitude Selection and Auditory Perception) and determining aptitude eligibility.	
Perform Asset Accountability	Operational Activity	This activity records accountability and control for all real and personal property throughout its lifecycle. This activity establishes and maintains the Department's formal physical and fiscal property, irrespective of whether the property is in the Department's possession.	
Perform Assignment Screening	Operational Activity	This activity is associated with screening of eligible Candidates. This activity also includes reviewing open requisitions, identifying Candidates to fill requisitions, and selecting Candidates to fill requisition activities.	
Perform Benefit Program Management	Operational Activity	This activity is associated with developing, maintaining and assessing benefit programs for Military and Civilian personnel, Veterans and family members.	
Perform Budgeting	Operational Activity	The budgeting activity provides a platform for a detailed review of a program's pricing, phasing, and overall capability to be executed on time and within budget. The budgeting process addresses the years to be justified in the President's Budget and provides a forum to develop the Secretary's budget position. Budgeting also prepares the programs to be developed into appropriations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Build and Make and Maintenance and Sustainment	Operational Activity	This activity is associated with developing plant, property, and equipment assets, maintaining them in standard working condition, and extending their capacity, capability, or useful life through fabrication, assembly, mixing, separating, forming, machining and chemical processes. Examples of these activities include new footprint construction of buildings, and facilities and production of equipment, as well as repair, overhaul, restoration, and modernization of property and equipment. As referenced by the SCOR model for MAKE.	
Perform Calibration - Depot Maintenance	Operational Activity	The ability to compare an instrument with an unverified accuracy to an instrument of known or greater accuracy to detect and correct any discrepancy in the accuracy of the unverified instrument - Depot Maintenance.	
Perform Calibration - Field Maintenance	Operational Activity	The ability to compare an instrument with an unverified accuracy to an instrument of known or greater accuracy to detect and correct any discrepancy in the accuracy of the unverified instrument - Field Maintenance.	
Perform Capabilities Based Assessment and Analysis	Operational Activity	This activity is the Joint Capabilities Integration and Development System analysis process that includes the functional area, needs and solution analyses and post independent analysis.	
Perform Casualty Closeout Process	Operational Activity	This activity is associated with performing the close out of the casualty process by reviewing the casualty investigation findings in order to produce a final casualty report and determine whether a casualty incident requires further review and investigation. The final casualty report of the casualty incident may include (but not be limited to) providing casualty status on missing personnel and identification of casualty information which may be released to the media and next of kin (NOK).	
Perform Civilian Staff Programming	Operational Activity	This activity is associated with the process of analyzing civilian staffing needs to identify civilian staff requirements. This activity is also associated with developing a staff acquisition plan, developing a staff acquisition strategy, and establishing an evaluation approach.	
Perform Configuration and Data Management	Operational Activity	This activity identifies and documents physical and functional attributes of configuration items to include managing changes to configurations and product data, maintaining status records and performing product audits.	
Perform Cost Performance Analysis	Operational Activity	The Perform Cost Performance Analysis activity is initiated by a request for analysis being submitted from external or internal customers. Upon receiving this request, this activity scopes the request, generates an action plan, and applies one or more techniques (forecasting, comparative analysis, or trending). After performing the necessary calculations, the results are interpreted and packaged in such a way as to provide actionable information to the customer(s). This activity may yield reusable techniques that can be applied to future requests.	
Perform Data Reduction and Analysis	Operational Activity	This activity summarizes, organizes and interprets test data in preparation for evaluation.	
Perform Depot Maintenance	Operational Activity	The ability to perform materiel maintenance requiring major overhaul, or a complete rebuilding of parts, assemblies, subassemblies, and end items to include the manufacture of parts, modifications, testing, and reclamation as required, provide stocks of serviceable equipment, and support field maintenance by providing technical assistance or performing maintenance tasks beyond their responsibility.	
Perform Design Synthesis	Operational Activity	This activity converts functional and performance requirements into design solutions to include internal and external interfaces. Key outputs of this activity are the physical architecture and performance specifications.	
Perform Enterprise Funds Distribution	Operational Activity	This activity is the Department's primary tool for preparing an agency budget estimate to request funding and for establishing a system for ensuring that it does not obligate or disburse funds in excess of those appropriated.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Environment Safety and Occupational Health Service	Operational Activity	<p>Environment, Safety and Occupational Health Operations refers to distinct business areas within DoD that address environmental quality, restoration, range sustainability, occupational health, safety as well as fire and emergency services. While each program within these business areas operates in accordance with specific laws, regulations, DoD guidance, service level guidance and best practices, there are sets of common activities operating across these areas. Common activities include identifying and understanding the environment, safety, health or readiness issue, risk assessment, developing solutions, implementing solutions, developing agreements and the conduct of monitoring. Specific business areas addressed are:</p> <p>Compliance: The compliance business area of environmental management ensures effective and efficient compliance with existing Federal, host nation, state and local environmental laws and regulations. This business area deals with regulators and the base operations community in the several areas (e.g. clean water, clean air, safe drinking water, and reporting community right to know chemical information) to ensure that all laws are abided. The compliance community works with regulators, foreign governments and base operators to inspect/investigate base operations such as waste water treatment, well water, solid waste disposal, pesticides management, etc to ensure compliance in all areas. It also seeks to work with the base operation group to ensure they are aware of all current regulations (Federal, host nation, state and local) so that during a regular installation inspection, the base operator is not found to be in non-compliance.</p> <p>Pollution Prevention (P2): A successful pollution prevention program can avoid enforcement actions and reduce operation costs. A pollution prevention approach to environmental management seeks to eliminate or reduce pollution at its source and promote recycling. P2 programs are the preferred means of achieving environmental compliance, protecting human health and reducing the use of hazardous materials, and decreasing the volume of solid waste. Pollution prevention programs promote an environmental ethic that actively looks for opportunities to eliminate or reduce environmental impact of DoD activities through better product design, materials substitution, and environmental lifecycle costing considerations. These actions reduce costs by integrating cost-effective pollution prevention practices into all DoD operations and activities, while ensuring the performance of DoD's mission. Pollution Prevention programs include:                      Affirmative Procurement (buy green)                      Solid Waste Diversion and Recycling                      Recycling                      Prevention of Pollution from Ships                      Source Reduction - reducing or eliminating the use of hazardous materials                      Protecting the Ozone Layer                      Hazardous Waste Reduction - reducing hazardous waste generation                      Alternative Fuels, Alternative Fueled Vehicles, and Fuel Efficiency.</p> <p>Conservation: The conservation business area balances the responsibility of protecting cultural and natural resources with the requirements of military mission support. DoD must maintain healthy resources that offer maximum opportunities to carry out mission activities. First, conservation protects access to the land, sea, and airspace to support DoD requirements for realistic testing and training exercises. Second, it protects the valuable natural and cultural resources of these areas for the benefit of</p>	
Perform ESOH Aspect Assessment	Operational Activity	<p>This activity is the study or investigation of environment, safety, and occupational health aspects or issues and the determination of the nature and extent of the issue. A series of steps are taken to conduct this and can include, but is not limited to conducting environment, safety and occupational health inspection or investigation, comparing analysis result to criteria and characterizing nature and extent of the ESOH issue. This activity is where comprehensive data or sample collection and analysis are conducted, and the assessment results are documented.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform ESOH Aspect Identification	Operational Activity	This activity reflects the initial actions taken to identify the activities, locations, products, and services where environment, safety and health concerns may exist. This activity provides the initial check on the issue to ensure it falls within ESOH purview and collects enough information about the issue to proceed with the additional investigation as required. As an example, this activity may identify issues of cultural or natural resource or explosives safety concern, a site of interest for restoration, or a process that transports, uses, or handles hazardous materials. The outcome of this activity is the identification of any aspects, issues, and locations of environmental, range sustainability, safety, and occupational health, and a determination as to whether an ESOH aspect requires further evaluation to determine whether mitigation is necessary.	
Perform Executive Cost Performance Management	Operational Activity	This activity provides for the assembling and recording of all the elements of cost incurred to accomplish a purpose, to carry on an activity or operation, or to complete a unit of work or a specific job.	
Perform Executive Level Planning	Operational Activity	Perform executive level planning activity reviews the national military and national security strategies, develop the department's strategic goals, and align the priorities to effectively execute these strategic goals.	
Perform Executive Management	Operational Activity	Executive management is the collection of people who administer the Department of Defense. They provide the support necessary to implement the overall Federal Government and the Secretary of Defense's business objectives. They create or approve policies, make decisions regarding Departmental issues, certify financial results, and are the audience for financial and cost/performance reporting.	
Perform External Organization Check	Operational Activity	This activity is associated with sending the applicant's personal identifying information and/or fingerprints for an external organization check (e.g., citizenship, background investigation).	
Perform Field Maintenance	Operational Activity	The ability to perform organizational, on-system work and intermediate, shop-type work at maintenance levels other than depot.	
Perform Financial Management	Operational Activity	This activity measures, operates and predicts the effectiveness and efficiency of the Department's financial activities in relations to its financial objectives, and includes the responsibility for establishing financial policies, practices, standards and ensuring a system of controls exists that reliably captures and reports activity in a consistent manner.	
Perform Financial Management Governance	Operational Activity	This activity creates, maintains and disseminates policies, requirements and other directives governing the performance of financial management activities.	
Perform Functional Area Analysis	Operational Activity	This activity identifies the operational tasks, conditions, and standards needed to achieve military objectives. Analyzes a broad scope of related joint warfighting skills and attributes that may span the range of military operations. It also comprises specific skill groupings that make up the functional areas that are approved by the Joint Requirements Oversight Council (JROC).	
Perform Functional Needs Analysis	Operational Activity	This activity assesses the ability of the current and programmed warfighting systems to deliver the capabilities identified under the full range of operating conditions and to the designated measures of effectiveness. Using the capabilities and tasks identified in the Functional Area Analysis (FAA) as primary input, the Functional Needs Analysis (FNA) produces a list of capability gaps that require solutions and indicates the time frame in which those solutions are needed. It may also identify redundancies in capabilities that reflect inefficiencies. The FNA will also provide the relative priority of the gaps identified. The FNA serves to further define and refine the integrated architectures. The FNA must assess the entire range of DOTMLPF (Doctrine, Organization, Training, Material, Leadership, Personnel, and Facilities) and policy, as an inherent part of defining capability needs.	
Perform Head Agency Labor Review	Operational Activity	This activity is associated with reviewing an agreement for legality/compliance with government-wide Laws, Policies, and Regulations.	
Perform Healthcare Assessment and Plan For Care	Operational Activity	This activity is associated with determining a need for healthcare services and directs the beneficiary to the appropriate level of care to receive the identified service in a timely manner.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Human Resources Management	Operational Activity	This activity is associated with enterprise-level business activities essential to managing the human resources infrastructure of the Department of Defense (DoD). It includes activities necessary to formulate force structure and project strengths in peacetime authorizations and wartime requirements and personal debt owed to the DoD upon termination or separation. This infrastructure includes the execution of essential human resources policies and procedures that require documenting and tracking personnel visibility. It provides the capabilities to implement Cross-Service support, account for DoD civilian, military, family members, and contractor personnel especially in wartime, match organizations and people to find specific skill sets, scan employee information profiles for needed skills and competencies, and obtain accurate and current personnel and pay records (e.g., status change [active, guard, reserve], pay, benefits, credit for service). DoD sustains the essential key for documenting and tracking a person's information by creating and updating the Human Resource Profile.	
Perform Individual Training Course Evaluation	Operational Activity	This activity is associated with gathering and analyzing instructor and student evaluations of individual training courses after completion of each course for perceived short falls/requirements adjustments and proposed modifications.	
Perform Initial Capital Asset Valuation	Operational Activity	This activity executes the initiation, updating, and closing of initial capital asset valuation. Capital assets include, but are not limited to, military equipment, general equipment, internal use software and real property. Activities include establishment, accumulation and relief of initial asset valuation amount. This results in the establishment of recorded cost of a capital asset at the time it is placed in service. It includes accumulating all costs (direct and indirect) incurred to bring an asset to a form and location suitable for its intended use.	
Perform Inspection - Depot Maintenance	Operational Activity	The ability to determine faults or verify repairs or determine condition of an item of equipment based on established equipment maintenance and serviceability standards - Depot Maintenance.	
Perform Inspection - Field Maintenance	Operational Activity	The ability to determine faults or verify repairs or determine condition of an item of equipment based on established equipment maintenance and serviceability standards - Field Maintenance.	
Perform Installations Support	Operational Activity	This activity provides for the execution of DoD installation management requirements to include facilities operations, installations support services activities such as Real Property Space Management and Fire Protection.	
Perform Instrument Closeout	Operational Activity	Closeout of the procurement instrument or Intragovernmental (IGT) Order includes those processes that execute contract or IGT Order closeout procedures from physical completion confirmation to archiving contracts in accordance with statutory regulations. This also includes the requirements for records retention.	
Perform Leave Accounting	Operational Activity	This activity is associated with conducting all actions associated with the accrual and deduction of leave. This includes determining if unused leave can be carried over to the next fiscal year, based on special leave accrual (SLA) eligibility, determining all leave deductions and earnings for the current leave accounting period, calculating the new leave balance and updating the Time, Absence, and Labor Profile with the leave balance information (e.g., leave accrued, leave deducted, leave account balance).	
Perform Leave Administration	Operational Activity	This activity is associated with managing request for leave or selling leave based on Member's eligibility and notifying appropriate parties of the request outcome. This activity is also associated with identifying employees to receive pay or leave change, processing pay or leave change, and communicating pay or leave change.	
Perform Legal Investigation	Operational Activity	This activity is associated with gathering information about a given party (government agency, citizen, corporation) that would be admissible in a court of law in an attempt to determine a legal question or matter.	
Perform Legal Prosecution and Litigation	Operational Activity	This activity is associated with presenting a case in a legal proceeding, both in a criminal or civil court of law, in an attempt to prove guilt/responsibility.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Logistics	Operational Activity	This activity encompasses all Logistics Activities required to perform Plan, Source, Make (Includes Maintenance), Deliver, Return Capabilities. This requires the ability to supply materiel and logistics services to DoD units throughout the world, the DoD Components maintain a supply chain consisting of weapon system support contractors, retail supply activities, distribution depots, transportation networks including contracted carriers, Military Service and Defense Logistics Agency (DLA) integrated material managers, weapon system program offices, commercial distributors and suppliers including manufacturers, commercial and organic maintenance facilities, and other logistics activities (e.g. engineering support activities (ESAs), testing facilities, cataloging services, reutilization and marketing offices), maximizing customer service or warfighter support.	
Perform Manpower Budgeting	Operational Activity	This activity is associated with developing, reviewing, and adjusting budget estimates based on program requirements and in accordance with budgetary and congressional guidance. Program Budget Decisions are integrated with Department of Defense's (DoD) budget and incorporated into the President's budget.	
Perform Manpower Planning	Operational Activity	This activity is associated with projecting manpower requirements, identifying the mission list, and developing policy & procedure guidance, to support preparation of the Department of Defense budget, includes both budgetary and executionary requirements.	
Perform Manpower Programming	Operational Activity	This activity is associated with the process of compiling and projecting future manpower requirements, documenting these requirements, integrating them into the overall planning, programming, and budgeting process, and translating them into a form that provides a basis for personnel procurement, training, and assignment.	
Perform Medical Examination	Operational Activity	This activity is associated with verifying positive identification of the applicant, conducting the medical examination (e.g., physical examination and inspection), determining if additional medical information is needed, and requesting the additional medical information from appropriate parties (e.g., applicant, medical service providers).	
Perform Medical Management	Operational Activity	This activity is associated with confirming resources, utilization, and cost management programs to support the objectives of Military Health System managed care contracting and direct care provisioning and/or associated risk management. Programs support compliance with health plan coverage, reimbursement, benefit provisions, and necessary management support activities.	
Perform Medical Prescreen	Operational Activity	This activity is associated with determining if applicant medical information is complete or additional medical information is needed; conducting the medical prescreen; and documenting the results of the medical prescreen. This activity is also associated with providing medical assistance to the appropriate parties (e.g., Services, applicant).	
Perform Medical Qualification	Operational Activity	This activity is associated with performing medical prescreen, medical examination, and determining medical eligibility.	
Perform Medical Surveillance	Operational Activity	This activity is associated with the regular or repeated collection, analysis, and dissemination of uniform health information for monitoring the health of a population, and intervening in a timely manner when necessary. It is defined by the Centers for Disease Control and Prevention as the ongoing, systematic collection, analysis, and interpretation of health data essential to the planning, implementation, and evaluation of public health practice, closely integrated with the timely dissemination of these data to those who need to know. Such data includes occupational and environmental exposure information, as well as other health hazard exposures and medical outcomes, for each individual in a population. The final link of the military medical surveillance system is the application of these data to prevention and control. A military medical surveillance system includes a functional capability for data collection, analysis, and dissemination of information linked to public health programs. A comprehensive medical surveillance requirement is needed across the operational continuum to monitor, assess and provide reports regarding: the mental and physical health status of service members; the occurrence of illness, injury, and disease.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Modernization - Depot Maintenance	Operational Activity	The ability to change an item such that one or more measurable characteristics is altered to improve equipment performance, increase reliability, improve supportability, or enhance safety. Modernize includes conversion of items to change their mission performance or capability. The ability to prove, test, evaluate, inspect, and rework ammunition or ordnance items as required to their desired capability - Depot Maintenance.	
Perform Modernization - Field Maintenance	Operational Activity	The ability to change an item such that one or more measurable characteristics is altered to improve equipment performance, increase reliability, improve supportability, or enhance safety. Modernize includes conversion of items to change their mission performance or capability. The ability to prove, test, evaluate, inspect, and rework ammunition or ordnance items as required to their desired capability - Field Maintenance.	
Perform Personnel Budgeting	Operational Activity	This activity is associated with developing, reviewing, and adjusting personnel budget estimates based on program personnel requirements and in accordance with budgetary and congressional guidance.	
Perform Personnel In-Processing	Operational Activity	This activity is associated with managing arrived personnel at a new permanent or temporary duty location. This activity also includes signing in at an installation/unit/agency and tracking completion of in-processing requirements (e.g., pay and travel entitlements processing, travel voucher processing, TRICARE, and specific information captured for contractors or other designated individuals).	
Perform Personnel Out-Processing	Operational Activity	This activity is associated with tracking personnel departing from a permanent or temporary duty location. This activity also includes signing out at an installation/unit/agency and tracking completion of out-processing requirements (e.g., pay, travel, and transportation entitlements processing, TRICARE, and specific information captured for contractors or other designated individuals).	
Perform Personnel Readiness Assessment	Operational Activity	This activity is associated with managing, measuring and reporting the personnel readiness of the Department of Defense and its subordinate Components to execute the missions specified in the National Military Strategy. This includes conducting timely, modeling and scenario-based readiness assessments on a quarterly basis, to identify critical readiness deficiencies or capability shortfalls and risks in executing missions, developing and coordinating strategies to rectify these deficiencies or identifying appropriate measures to reduce these risks, ensuring these strategies are addressed in the program/budget plans, and reporting risks and findings to the appropriate parties (e.g., Senior Readiness Oversight Council (SROC)). This activity is also associated with providing reports on current and projected readiness issues, providing recommendations on readiness policy matters, and identifying deficiencies in the areas of training and personnel, to include issues such as medical, equipment, ordnance, and sustainment.	
Perform Population Health Management	Operational Activity	This activity is associated with optimizing the health, health planning, and health management of all beneficiaries (activity duty members, families, and retirees). This is equally important for beneficiaries located at sustaining base locations and for those who may be in a deployment location. It is a shift from clinical crisis interventions to a focus on health promotion, disease and injury prevention, and community-based wellness. Groups are identified and prioritized within the established population, and programs/processes are developed that are designed to improve the overall health status of these groups. A health risk profile and/or cost risk analysis is completed to target the healthcare needs of a population logical grouping. This includes identifying medical and environmental conditions that may impact the population's well being.	
Perform Pre-Accession Processing	Operational Activity	This activity is associated with updating the applicant profile with record of military processing, capturing the applicant's fingerprints, submitting the captured applicant fingerprints for external organization check, generating the record of emergency data and accession agreement, executing the oath, and updating the applicant profile with accession information.	
Perform Preliminary Screening	Operational Activity	This activity is associated with managing applicant personal data, submitting the applicant's identity information for external organization check, and determining accession screening eligibility.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Product Hazard Data Stewardship	Operational Activity	This is the parent activity for the two child activities: Validate Product Hazard Data Request and Validate Product Hazard Data. This activity contains all sub-activities required to steward the DoD's hazardous material information as defined by DoD requirements. Stewardship includes receiving, validating and fulfilling requests for new product hazard data (PHD) to be added to the master product hazard data (MPHD) warehouse, and updating incomplete or inaccurate records as necessary.	
Perform Programming	Operational Activity	This activity focuses on the development of POMs and the integration of those POMs into a coherent defense program to support the warfighting requirements of the combatant commanders. The programming activity describes how the planning decisions, programming guidance, and congressional guidance is converted into a detailed allocation of resources. The services and defense agencies match their available resources against their requirements and submit program proposals. These proposals are reviewed and alternatives are presented to the Deputy Secretary of Defense to address significant programmatic issues, such as airlift capacity, readiness, or modernization issues.	
Perform Quality of Life Program Management	Operational Activity	This activity is associated with managing Quality of Life (QoL) programs on military installations, on property controlled by a Military Department (MILDEP) or furnished by a Department of Defense (DoD) contractor. This activity includes establishing, maintaining, and assessing QoL programs.	
Perform Rebuild - Depot Maintenance	Operational Activity	The ability to recapitalize an item to a standard as nearly as possible to its original condition in appearance, performance, and life expectancy - Depot Maintenance.	
Perform Rebuild - Field Maintenance	Operational Activity	The ability to recapitalize an item to a standard as nearly as possible to its original condition in appearance, performance, and life expectancy - Field Maintenance.	
Perform Receipt Acceptance and Return	Operational Activity	Perform Receipt, Acceptance and Return involves confirming that goods and/or services were delivered as ordered, any errors were resolved, and formal acceptance was rendered by the government. This process may also include the generation of an acceptance document, government ownership of goods tendered, and the accrual of a liability and expenditure. When formal acceptance is not rendered by the government, items must be returned to vendors. Examples of returns include overages, damage, miss-orders, or miss-picks. This activity also includes physical receipt of goods. This process step connects to the asset accountability portion of the BEA.	
Perform Repair - Depot Maintenance	Operational Activity	The ability to restore an item to serviceable condition through correction of a specific failure or condition - Depot Maintenance.	
Perform Repair - Field Maintenance	Operational Activity	The ability to restore an item to serviceable condition through correction of a specific failure or condition - Field Maintenance.	
Perform Reporting	Operational Activity	This activity includes receiving financial and management reporting requirements, preparing the information product, and distributing the finished product to the requestor. The activity distributes information in a specified format for analysis and decision-making. This activity routinely involves summarizing and clearly communicating information collected through various means and provides output results based on specified reporting requirements such as format, frequency and type.	
Perform Reprogramming and Transfers	Operational Activity	This activity realigns funds from the original Congressional enactment or subsequent distribution of funds to new areas. Reprogramming moves budgetary resources within a Treasury account whereas transfer moves budgetary resources between two Treasury accounts. However, the shifting of budgetary resources within a single Treasury account should be considered a transfer if the action moves budgetary resources between separate statutory appropriations.	
Perform Service - Depot Maintenance	Operational Activity	The ability to conduct preventive maintenance checks and scheduled maintenance to detect, correct or prevent minor faults before these faults cause serious damage, failure, or injury - Depot Maintenance.	
Perform Service - Field Maintenance	Operational Activity	The ability to conduct preventive maintenance checks and scheduled maintenance to detect, correct or prevent minor faults before these faults cause serious damage, failure, or injury - Field Maintenance	
Perform Service Accession	Operational Activity	This activity is associated with determining entrance eligibility and performing pre-accession processing.	
Perform Test - Depot Maintenance	Operational Activity	The ability to evaluate the operational condition of an end item or subsystem thereof against an established standard or performance parameter - Depot Maintenance.	
Perform Test - Field Maintenance	Operational Activity	The ability to evaluate the operational condition of an end item or subsystem thereof against an established standard or performance parameter - Field Maintenance.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Treasury Operations	Operational Activity	This activity processes disbursements, collections, returns and replacement financial instruments and delinquent receivables for the Department of Defense. This activity also performs cash management and involves the management of securities held for the production of investment revenues, net of premiums and discounts.	
Perform Workforce Analysis	Operational Activity	This activity is associated with conducting workforce analysis, and providing workforce analysis information. This may include (but is not limited to) the analysis or modeling of strengths, work years, grade distribution, career paths, accession goals, and losses in relation to specified mission needs within budgetary constraints. This also includes strength planning, detailed formulation of force restructuring programs (e.g., Stop Loss, mandated retraining, Reduction-in-Force), reserve and active duty tour requirements, and support of reserve man days, mobilization, demobilization, and retention initiatives management. This activity is also associated with determining internal/external environment analysis scope and objectives, collecting internal/external environment data, analyzing internal/external environment data, disseminating internal/external environment analysis results, identifying external environment data collection protocols, and defining external environment analysis protocols.	
Perform Workforce Budgeting	Operational Activity	This activity is associated with the projection of Human Resource requirements in terms of specifications sufficient to support preparation of the Department of Defense (DoD) Human Resources budget. This activity also includes consideration of both budgetary and execution of requirement aspects of mission tasking.	
Perform Workforce Planning and Programming	Operational Activity	This activity is associated with the integration of force structure requirements into general personnel resource requirements, which enables effective utilization of Department of Defense (DoD) Human Resources. This activity includes both strength planning and executive management of programs required to support related strategic goals.	
Pick Product - Stocked Product	Operational Activity	The series of activities including retrieving orders to pick, determining inventory availability, building the pick wave, picking the product, recording the pick and delivering product to shipping in response to an order - Stocked Product.	
Pick Product - Engineer-to-Order Product	Operational Activity	The series of activities including retrieving orders to pick, verifying inventory availability, building the pick wave, picking the product, recording the pick and delivering product to packing area in response to an order - Engineer-to-Order Product.	
Pick Product - Make-to-Stock Product	Operational Activity	The series of activities including retrieving orders to pick, verifying inventory availability, building the pick wave, picking the product, recording the pick and delivering product to packing area in response to an order - Make-to-Stock Product.	
Pick Product from Backroom	Operational Activity	The process of retrieving restocking orders to pick, determining inventory availability, building a pick wave, picking item and quantity from a designated backroom warehouse location, recording the resulting inventory transaction, and delivering the product to point of stock.	
Plan	Operational Activity	The planning activities associated with operating a supply chain. This includes gathering customer requirements, collecting information on available resources, and balancing requirements and resources to determine planned capabilities and resource gaps. This is followed by identifying the actions required to correct any gaps.	
Plan Deliver	Operational Activity	The development and establishment of courses of action over specified time periods that represent a projected appropriation of delivery resources to meet delivery requirements.	
Plan for Disposal	Operational Activity	This activity plans the removal of weapons and legacy systems that require an acquisition program to provide for a replacement, is required to support demilitarization, or have special reclamation requirements.	
Plan Health Services	Operational Activity	This activity is associated with creating an individualized, issue-focused plan of services that uses the appropriate level of care and resources to ensure quality and cost-effective outcomes. All plans of care will incorporate care management, case management, wellness, and disease management strategies. This activity also includes the development of a tactical medical mission plan tailored to a group of individuals working in deployed areas. It identifies capabilities, training needs, resources, and evacuation plans necessary to maintain a successful mission.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Plan Maintenance	Operational Activity	The development and establishment of courses of action over specified time periods that represent a projected appropriation of maintenance resources to meet maintenance requirements.	
Plan Make	Operational Activity	The development and establishment of courses of action over specified time periods that represent a projected appropriation of production resources to meet production requirements.	
Plan Return	Operational Activity	A strategic or tactical process to establish and adjust courses of action or tasks over specified time periods that represent a projected appropriation of return resources and assets to meet anticipated as well as unanticipated return requirements. The scope includes unplanned returns of sold merchandise as well as planned returns of "rotatable" products that are refurbished for reissue to customers.	
Plan Source	Operational Activity	The development and establishment of courses of action over specified time periods that represent a projected appropriation of material resources to meet supply chain requirements.	
Plan Supply Chain	Operational Activity	The development and establishment of courses of action over specified time periods that represent a projected appropriation of supply chain resources to meet supply chain requirements for the longest time fence constraints of supply resources.	
Populate Cost Performance Model	Operational Activity	The Populate Cost Performance Model activity collects input data (financial and non-financial in nature) from Industry Partners, Government Partners and distributes it to the responsibility segments and cost objects outlined in the model framework. This is accomplished according to the methodologies incorporated by the Define Model activity and produces the cost and revenue measurements (populated model) to be consumed by user communities. The model results may also be utilized by the Perform Analysis activity. The start event for this activity is Model Completed. The core steps associated with this activity are capturing business event data, accumulating or allocating costs to final objects within a model, applying anomaly detection criteria to model results, and reviewing and publishing approved model results. The end event for the activity is Model Populated. The roles performing the steps of activity are the Cost/Revenue Manager, Cost/Revenue Modeler, and Cost/Revenue Analyst.	
Post to General Ledger	Operational Activity	This activity includes updating the DoD general ledger (and any related subsidiary ledgers) to reflect the results of operational business events.	
Prepare Assignment Order	Operational Activity	This activity is associated with reviewing an assignment order requirement to determine the order type and order action, populating the assignment order to include verification and compliance with Service policies, drafting the order, and forwarding for approval.	
Prepare Award Order	Operational Activity	This activity is associated with reviewing an award order requirement to determine the order type and order action, populating the award order to include verification and compliance with DoD policies, drafting the order, and forwarding for approval.	
Prepare Award Reclama Decision	Operational Activity	This activity is associated with researching and providing new evidence substantial enough to support reconsideration for an award, reviewing the reclama documentation, approving or disapproving an award request based on new evidence provided, and documenting the decision on the reclama.	
Prepare Award Recommendation Request	Operational Activity	This activity is associated with providing eligibility award criteria, preparing justification documentation for the recommended award based on the Member's profile, and completing the award recommendation request. This activity also includes submitting an award recommendation request, approving the Member's eligibility information, and submitting an award request reclama.	
Prepare Certified Business Partner Payment	Operational Activity	This activity involves the preparation of the Certified Business Partner Payment which is sent to Disbursing after being certified by a Certifying Officer in accordance with the Certifying Officer's Legislation. At this point the funds balance within the General Ledger is checked to verify the availability of funds. In the case of Foreign Military Sales, the payment is not released to Disbursing without an Expenditure Authority. The Electronic Funds Transfer information for the vendor, or other party owed by the government, is also included in the Certified Business Partner Payment, if applicable.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Prepare DoD Submission for President's Budget	Operational Activity	This activity consolidates the Services' and the Office of the Secretary of Defense's (OSD) final BES into the Department's initial submission of DoD's portion of the President's Budget. Final changes to the budget, including "passbacks" are incorporated to the final budget submission to OMB for inclusion to the President's Budget, which is submitted to Congress for funding. This activity also includes the creation of Line Item Detailed Justification Materials to be submitted to the Congress before the congressional budget hearing.	
Prepare Enlistment Extension Service Agreement	Operational Activity	This activity is associated with preparing the enlistment extension Service agreement for both Member's and witnessing official's signature, and facilitating the signing of the enlistment extension agreement by both the Member and the witnessing official(s).	
Prepare for Labor Negotiation	Operational Activity	This activity is associated with establishing the team, identifying a chief negotiator and negotiation approach, and training the team in areas of problem solving and negotiation skills. This activity also includes anticipating interests, identifying objectives, and preparing for negotiation sessions.	
Prepare Personnel Grade Change Order	Operational Activity	This activity is associated with reviewing a personnel grade change order requirement to determine the order type and order action, verifying personnel grade change eligibility to ensure that Members are not disqualified from the orders generation process, populating the personnel grade change order to include verification and compliance with Service policies, drafting the order, and forwarding the order for approval.	
Prepare Retirement Order	Operational Activity	This activity is associated with reviewing a retirement order requirement to determine the order type and order action, populating the retirement order to include verification and compliance with Service policies, drafting the order, and forwarding for approval.	
Prepare Separation Order	Operational Activity	This activity is associated with reviewing a separation order requirement to determine the order type and order action, populating the separation order to include verification and compliance with Service policies, drafting the order, and forwarding for approval.	
Prepare Transfer Order	Operational Activity	This activity is associated with reviewing a transfer order requirement to determine the order type and order action, populating the transfer order to include verification and compliance with Service policies, drafting the order, and forwarding for approval.	
Prepare Travel Authorization	Operational Activity	This activity is associated with gathering information necessary to create a travel authorization for temporary or relocation travel for individual or group travel (e.g., approved obligation, estimates of meals, lodging, miscellaneous expenses and transportation costs). This activity also includes assigning a unique identifying number to each travel authorization, furnishing an electronic notification to the fund-approving official, and sending an electronic update to the Human Resources profile. Human Resources will not be notified until approval of the travel authorization.	
Prepare Travel Cost Estimate	Operational Activity	This activity is associated with creating the official travel cost estimate that covers the majority of travel costs for a trip. The traveler or Non-DTS Entry Agent (NDEA/clerk) creates the should-cost estimate merely by creating an Authorization. The should-cost estimate lets everyone with access to the traveler's authorization know approximately how much the trip will cost before it actually starts. The should-cost is organized around and based on four types of travel expenses: transportation, lodging, meals and incidental expenses, other reimbursable expenses.	
Prioritize Manpower Requirement List	Operational Activity	This activity is associated with reviewing the projected force structure and prioritizing requirements submitted by the Service Headquarters.	
Process Benefit Application	Operational Activity	This activity is associated with reviewing and verifying the benefit application (e.g., tuition assistance and reinstating a Thrift Savings Plan [TSP]) to ensure completeness, determining eligibility, making a decision on the application, and notifying the appropriate parties on the decision.	
Process Benefit Selection	Operational Activity	This activity is associated with determining eligibility for selected benefit (e.g., MGIB, TSP, group life and health insurance) and completing benefit selection by enrolling a Member/Employee for a specific benefit, documenting benefit selection information and obtaining required documentation.	
Process Certifying Official Information	Operational Activity	This activity develops and provides information in support of Certifying Officer Legislation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Congressional Information	Operational Activity	This activity develops and provides information in support of the actions of the US Congress. The US Congress is the national legislative body of the United States, consisting of the Senate and the House of Representatives. The Congress of the United States was created by Article I, Section 1, of the Constitution, adopted by the Constitutional Convention on September 17, 1787, providing that "All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and a House of Representatives."	
Process Credit Bureau Information	Operational Activity	This activity gives Federal program agencies access to accurate data from credit reporting agencies for the purpose of conducting credit screening and collecting and verifying tax identification numbers. Further, the activity uses credit reports to conduct credit scoring, skip tracing, and asset determination. This activity reports the Government's entire debt portfolio, to include current and delinquent debts, and ensures that all relevant Federal debtor data are integrated into credit reporting agency databases and are available for consideration when credit decisions are being made.	
Process Defense Security Cooperation Agency Information	Operational Activity	Process FMS Trust Fund information to/from DSCA .	
Process Department of Commerce Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Department of Commerce information.	
Process Department of Energy Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Department of Energy information.	
Process Department of State Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Department of State information.	
Process DFAS Information	Operational Activity	This is an activity that processes DFAS information to or from a DoD component.	
Process Executive Office Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Executive Office information.	
Process External Organization Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for External Organization information.	
Process Financial Institution Information	Operational Activity	This activity develops and provides information related to the operation of Financial Institutions and their support for DoD business activities.	
Process Foreign Military Trust Fund Purchaser Information	Operational Activity	Process FMS Trust Fund purchaser information.	
Process Government Accountability Office Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Government Accountability Office information.	
Process GSA Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for GSA information.	
Process Implementing Agency Information	Operational Activity	Process information to/from the DoD component responsible for executing the case document implemented in the FMS Trust Fund.	
Process Individual Information	Operational Activity	This activity allows an individual to submit resume or other information (e.g., knowledge, skills, abilities, licenses, certification, award reclama, performance report issue) on themselves or another individual (e.g. family member) to the DoD for hiring, recruitment activities, or other personnel actions.	
Process Industry Information	Operational Activity	This activity develops and provides required information from the US industrial base.	
Process Inquiry and Quote - Make-to-Stock Product	Operational Activity	Receive and respond to general customer inquiries and requests for quotes - Make-to-Stock Product.	
Process Inquiry and Quote - Stocked Product	Operational Activity	Receive and respond to general customer inquiries and requests for quotes - Stocked Product.	
Process Legal Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Legal information.	
Process National Security Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for National Security information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Office of Management and Budget Information	Operational Activity	This activity develops and provides information in support of Office of Management and Budget (OMB) operations. The predominant mission of the OMB is to assist the President in overseeing the preparation of the federal budget and to supervise its administration in Executive Branch agencies. In helping to formulate the President's spending plans, OMB evaluates the effectiveness of agency programs, policies, and procedures, assesses competing funding demands among agencies, and sets funding priorities. OMB ensures that agency reports, rules, testimony, and proposed legislation are consistent with the President's Budget and with Administration policies. In addition, OMB oversees and coordinates the Administration's procurement, financial management, information, and regulatory policies. In each of these areas, OMB's role is to help improve administrative management, to develop better performance measures and coordinating mechanisms, and to reduce any unnecessary burdens on the public.	
Process Office of Personnel Management Information	Operational Activity	This activity develops and provides information in support of the operations of the Office of Personnel Management (OPM). The OPM works with the President, Congress, departments and agencies, and other stakeholders to implement human capital policies that assist Federal agencies in meeting their strategic goals. This is accomplished by recruiting citizens to Federal service, by serving as the main portal for employment information and connecting job applicants with Federal agencies and departments. OPM connects people and their skills and talents to Federal agencies that need specific human resources and provides these agencies with policies and guidance that enable them to capitalize on these skills and talents.	
Process Other Government Agency Information	Operational Activity	This activity develops and provides information in support of the operations of federal, state and local (i.e., county or municipality) government agencies, such as taxing authorities. Among others, these agencies include the US Treasury Department, Veterans Administration, Social Security Administration, the Office of Management and Budget (OMB), Department of Justice, the Office of Personnel Management (OPM), General Services Administration, Federal Reserve Bank, Central Intelligence Agency, National Security Agency, Federal Bureau of Investigation, Department of Commerce, Department of Transportation, Department of Energy, Department of State, and Department of Labor. These agencies provide policy and guidance to the Department of Defense and/or receive financial and nonfinancial data from them.	
Process Research Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Research information.	
Process Scientific Communities Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Scientific Communities information.	
Process Supplier Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Supplier information.	
Process Treasury Information	Operational Activity	This activity develops and provides information in support of the operations of the Department of the Treasury. The Department of the Treasury is the primary federal agency responsible for the economic and financial prosperity and security of the United States, and as such is responsible for a wide range of activities including advising the President on economic and financial issues, promoting the President's growth agenda, and enhancing corporate governance in financial institutions.	
Process Vendor or Customer Information	Operational Activity	This activity accumulates vendor or customer information that is then provided to the Department of Defense to ascertain if DoD will do business with the vendor or customer. The activity confirms if the information is accurate and complete and determines if this vendor or customer has previously conducted business with the Department of Defense. The activity also provides information concerning the unsuccessful collection on receivables or debts due the Department of Defense.	
Process Veterans Administration Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Veterans Administration information.	
Process Warfighter Information	Operational Activity	This is an activity that processes information to or from a function that is external to DoD for Warfighter information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce and Manage Data Package	Operational Activity	The ability to create and maintain the set of support and support-related engineering and logistics data needed to develop the necessary internal materiel management processes for sustaining a weapon system and the associated equipment. This includes data for maintenance planning, to include identification of resources like personnel, support equipment, facilities and transportation, initial provisioning, cataloging, item management and in-service feedback.	
Produce and Test - Engineer-to-Order	Operational Activity	The series of activities performed upon sourced/in-process product to convert it from the raw or semi-finished state to a state of completion and greater value. The processes associated with the validation of product performance to ensure conformance to defined specifications and requirements - Engineer-to-Order.	
Produce and Test - Make-to-Order	Operational Activity	The series of activities performed upon sourced/in-process product to convert it from the raw or semi-finished state to a state of completion and greater value. The processes associated with the validation of product performance to ensure conformance to defined specifications and requirements - Make-to-Order.	
Produce and Test - Make-to-Stock	Operational Activity	The series of activities performed upon sourced/in-process product to convert it from the raw or semi-finished state to a state of completion and greater value. The processes associated with the validation of product performance to ensure conformance to defined specifications and requirements - Make-to-Stock.	
Produce Award Recommendation	Operational Activity	This activity is associated with determining the award type requested, identifying the potential individual eligible for the award, preparing the award recommendation request and award justification, and submitting the award request for approval.	
Project Number of Travelers	Operational Activity	This activity is associated with projecting the number of travelers needed to support a business or mission need.	
Provide Assignment Action Decision	Operational Activity	This activity is associated with capturing the decision outcome for an assignment action to include counseling Member on the assignment action, documenting acceptance or declination of assignment, updating of the personnel/pay record, and documenting any recommendations and or comments from the Approval Authority.	
Provide Assignment Order Decision	Operational Activity	This activity is associated with authenticating assignment orders, reviewing the draft order, associating travel authorization information for approval/disapproval, and acknowledging (if required). This activity also includes updating personnel requisition status, Service obligation start date, Service obligation length, order effective date, order type, and order acknowledgement.	
Provide AT&L SOA Services	Operational Activity	This is an activity that provides various information regarding Acquisition Program, Subprogram, Contract, Milestone etc., to the Enterprise Service Consumer.	
Provide Award Order Decision	Operational Activity	This activity is associated with authenticating award orders and reviewing the draft order information for approval/disapproval. This activity also includes updating the order effective date and the order type.	
Provide Award Request Decision	Operational Activity	This activity is associated with reviewing, validating, making recommendations and adding comments on the award recommendation request, approving or disapproving the award recommendation, documenting the final decision, capturing the award specification, and processing any award reclama.	
Provide Benefits	Operational Activity	This activity is associated with conducting benefit counseling, processing benefits selections and applications, and maintain the benefit profile information.	
Provide Correction of Military Record Decision	Operational Activity	This activity is associated with reviewing an administrative package (e.g., correction of military record request, proof of proper interest, and evidence), making a decision on a correction of military record request, notifying appropriate parties of a request approval or disapproval, reviewing a recommendation from the Board for Corrections of Military Records (BCMR) for approval or disapproval, returning a case to the BCMR for reconsideration, and providing additional information to the BCMR upon request.	
Provide Decision on Human Resources Information Request	Operational Activity	This activity is associated with providing a decision on a Human Resources Information Request.	
Provide Decision on Leave Request	Operational Activity	This activity is associated with determining eligibility for leave, making authorization of leave decision, sending notification of leave authorization decision to appropriate parties, and updating the Time, Absence, and Labor profile with leave information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Decision on Organization Controlled Absence Request	Operational Activity	This activity is associated with making a decision on an organization controlled absence request, notifying the appropriate parties of the decision made, and updating the Time, Absence, and Labor profile with the decision information. This process may also include counseling the Member on absence status.	
Provide Departmental Guidance and Comment	Operational Activity	This activity is associated with reviewing, analyzing, and evaluating issued policies, as well as recommended legal guidance for departmental action and or comment.	
Provide Enlistment Extension Request Decision	Operational Activity	This activity is associated with validating enlistment extension terms, processing any extension waivers, making a decision on an enlistment extension request or enlistment extension appeal, notifying a Member of the approval or disapproval of the request, counseling a Member on the appeal process, and documenting the enlistment extension request or appeal decision.	
Provide Estate Planning Services	Operational Activity	This activity is associated with providing legal advice related to and assisting in the preparation of estate planning documents such as wills, military testamentary instruments, and trusts to manage the disposal of the client's property, and naming executors and guardians, as appropriate.	
Provide for Government-Wide Labor Consultation	Operational Activity	This activity is associated with providing national unions the opportunity to comment on proposed government-wide or agency rules, regulations, and policies prior to implementation (as appropriate).	
Provide Geospatial Analytical Services	Operational Activity	This activity uses geospatial data package and application package combined with geospatial tradecraft and techniques to perform geospatial and geostatistical analysis (e.g. wind farm siting analysis, proximity analysis), in support of DoD activities like Renewable Energy Initiative and Readiness and Environmental Protection Initiative (REPI).	
Provide Geospatial Data and Geospatial Data Services	Operational Activity	This activity manages and organizes validated geospatial information according to enterprise standards and guidance. This activity also provides geospatial data services for DoD business missions (e.g. geospatial geometry data to support Real Property Asset Management) and their geospatial Family of Systems.	
Provide Geospatial Visualization Services	Operational Activity	This activity manages geospatial information technology visualization applications and services for DoD business missions (e.g. a geospatial visualization web service like the DISDI Portal, interactive map viewers) and creates geospatial information products. Geospatial Information Products deliverables, a result of geospatial tradecraft and techniques, include hardcopy and/or electronic non-editable maps, presentation figures and graphics, to support DoD activities like master planning (e.g. land use maps) and soldier support activities (e.g. training and range management).	
Provide Grievance Resolution	Operational Activity	This activity is associated with reviewing a grievance and providing a resolution. This activity may include (but not be limited to) determining who has the appropriate jurisdiction to resolve the grievance, providing guidance on available resolution options (e.g., problem solving, mediation, fact-finding, facilitation, conciliation, settlement conferences, ombudsmen, peer review, and arbitration), counseling personnel if necessary, coordinating with the appropriate agency or organization to resolve the grievance, and documenting the resolution. This activity may include (but not be limited to) determining if the grievance requires assistance to be resolved and transferring the grievance to the appropriate parties (e.g., legal, commander, and Inspector General).	
Provide Human Resources Consultative Support	Operational Activity	This activity is associated with identifying consultative needs, developing consultative strategy and plan, developing content and tools, and providing counsel.	
Provide Human Resources Information	Operational Activity	This activity is associated with validating a Human Resources Information request, providing a decision on HR Information request, and distributing and reporting Human Resources Information (i.e., Human Resources Profile and Human Resources Record) either stored in an electronic or hard copy format. Human Resources Information is for limited access to authorized personnel only. This activity is also used to provide information to support personnel record requests, interagency processes (i.e., communication to state, federal, foreign and private organizations), mission requirements, sharing of personally identifiable information (e.g., name, date of birth, biometrics, and social security number) for identity management purposes, and visibility (e.g., where personnel are at specified date and time) and availability (e.g. duty status, assignment availability, deployment availability, and personnel tempo) of personnel.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Human Resources Management Policy and Guidance Decision	Operational Activity	This activity is associated with reviewing the proposed Human Resources Management (HRM) policy and guidance, and other information received (e.g., workforce analysis information), providing an HRM policy and guidance decision, and disseminating the final HRM policy and guidance to the appropriate parties.	
Provide Human Resources Profile Information	Operational Activity	This is an activity that provides information regarding Human Resources Profile information to external functions.	
Provide Immigration and Naturalization Law Services	Operational Activity	This activity is associated with providing legal advice and services related to immigration and naturalization.	
Provide Information Assurance Services	Operational Activity	This activity provides the basis for services that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. This activity also provides for restoration of information systems by incorporating protection, detection, and reaction capabilities.	
Provide Information Management Services	Operational Activity	This activity involves the coordination of information resources to support or provide a service for or to an organization and its components or users. Information Management Services involves the coordination of information collection, storage, and dissemination and destruction.	
Provide Involuntary Enlistment Extension Waiver Decision	Operational Activity	This activity is associated with requesting an exemption from involuntary enlistment extension by a Member (e.g., financial, educational, and compassionate hardships). This activity also includes making a decision on the waiver request by the Career Approval Authority, notifying the Member of the approval or disapproval, and recording the involuntary enlistment extension waiver approval.	
Provide Joint Staff Support for PPBE	Operational Activity	This activity supports the primary Resource Allocation Process of DoD.	
Provide Leave Sell Back Eligibility Notification	Operational Activity	This activity is associated with notifying the appropriate parties of the Member's eligibility or ineligibility to sell leave and updating the Member's profile with leave sell back information as necessary.	
Provide Legal Assistance Related to Military Rights and Protections	Operational Activity	This activity is associated with providing legal assistance and or advice related to military matters such as reprimands, bars to reenlistment, the Service Members' Civil Relief Act (SCRA), and Uniformed Services Employment & Reemployment Rights Act of 1994 (USERRA).	
Provide Legal Defense	Operational Activity	This activity is associated with representing a defendant in a criminal or civil proceeding.	
Provide Legal Planning Services	Operational Activity	This activity is associated with providing legal advice related to and or assisting in the preparation of planning documents for estate, medical services as well as durable powers of attorney.	
Provide Legal Representation to External DoD Organizations and Governments	Operational Activity	This activity is associated with providing legal advice and counsel in dealing with external Department of Defense (DoD) organizations (other US agencies and private organizations) and governments (state, local, foreign) on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	
Provide Legal Representation to Foreign Governments	Operational Activity	This activity is associated with providing the government with legal advice and counsel in dealing with other foreign governments on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	
Provide Legal Representation to Local Governments	Operational Activity	This activity is associated with providing the government with legal advice and counsel in dealing with local governments on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	
Provide Legal Representation to Other US Agencies	Operational Activity	This activity is associated with providing the government with legal advice and counsel in dealing with Other United States Agencies on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	
Provide Legal Representation to Private Organizations	Operational Activity	This activity is associated with providing the government with legal advice and counsel in dealing with private organizations on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	
Provide Legal Representation to State Governments	Operational Activity	This activity is associated with providing the government with legal advice and counsel in dealing with state governments on business and other matters (e.g., military law, criminal prosecution, international law and legal assistance, contract law, defense legal services, and judicial legal services).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Line of Duty Appeal Decision	Operational Activity	This activity is associated with providing a Line of Duty (LoD) appeal decision. This may include (but not be limited to) making a decision on an appeal request, documenting the appeal decision, and sending notification of the appeal decision to the appropriate parties (e.g., Member, Casualty Area Commander, family member).	
Provide Line of Duty Appeal Process Counseling	Operational Activity	This activity is associated with providing Line of Duty (LoD) appeal process counseling. This may include (but not be limited to) reviewing the LoD decision, explaining the LoD decision, and advising on LoD appeal procedures.	
Provide Manpower Accounting Information	Operational Activity	This activity is associated with tracking current and historical Department of Defense (DoD) Component strength, as well as all information required to support personnel management and force readiness determination (faces). This activity also provides Manpower data to Personnel for strength accounting.	
Provide Medical Planning Services	Operational Activity	This activity is associated with preparing living wills or military advance medical directives and designation of anatomical gifts. Advance Medical Directives (AMD), commonly referred to as living wills, are written declarations that provide for the withdrawal or withholding of life-prolonging procedures, when the declarant has a terminal physical condition or is in a persistent vegetative state.	
Provide Performance Evaluation Appeal Decision	Operational Activity	This activity is associated with preparing an appeal document, submitting the appeal document for disposition, reviewing the appeal package (package includes the appeal document and any other supporting documentation), approving or disapproving the appeal, conducting an appeal hearing if necessary, and capturing the decision on the appeal. This activity also includes processing evaluation refutals and sending appeal decision notification.	
Provide Personnel Grade Change Order Decision	Operational Activity	This activity is associated with authenticating the orders, which includes reviewing the draft order information for approval/disapproval. This may include (but not be limited to) an update of Service obligation start date, Service obligation length, order effective date, and order type.	
Provide Personnel Requirement Request Decision	Operational Activity	This activity is associated with capturing the decision outcome for a personnel requirement request to include documenting the validation or non-validation of the request. This also includes maintaining current status information on the personnel distribution plan as well as recording approved variances from the plan and assignment orders that satisfy personnel requirement requests.	
Provide Physical Evaluation Disposition	Operational Activity	This activity is associated with reviewing a Member's severity rating, applicable retention standards, and providing a disposition decision on fit for duty. This disposition can result in a Member action to return to duty or separate/retire.	
Provide Policy Support	Operational Activity	This activity is associated with reviewing, analyzing, evaluating, and commenting (recommending any legal guidance) on legal policies, both issued and drafted.	
Provide Powers of Attorney	Operational Activity	This activity is associated with preparing, notarizing, and delivering a power of attorney requested by a client.	
Provide Program and Budget Information	Operational Activity	This is an external entity that encompasses the generation of program and budget information for the enterprise by the components.	
Provide Protective Services	Operational Activity	This activity is associated with providing protective and/or emergency (fire and police) services, for members of the Leadership (both foreign and domestic), U.S. Citizens, and government and civilian property.	
Provide Reenlistment Request Decision	Operational Activity	This activity is associated with reviewing reenlistment requests, making decisions on reenlistment requests, updating Members' reenlistment eligibility, and processing reenlistment appeals.	
Provide Resolution Facilitation	Operational Activity	This activity is associated with facilitating resolution, which refers to those activities outside a court of law, such as mediation and arbitration, that may be used in an attempt to settle a dispute between two or more parties (government agency, citizen, corporation).	
Provide Resource Information	Operational Activity	This is an external entity that gathers, reviews and disseminates requirements for resources maintained by the Components.	
Provide Retirement Decision	Operational Activity	This activity is associated with assessing a Member's information, determining and documenting the retirement type (e.g., retirement from the Reserves to inactive status, pay, grade, and retirement date).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Retirement Order Decision	Operational Activity	This activity is associated with authenticating retirement orders to include the review of the draft order information for approval/disapproval. This activity also includes updating a Service obligation start date, a Service obligation length, an order effective date, and an order type.	
Provide Review and Interpretation of Draft Policies	Operational Activity	This activity is associated with reviewing and interpreting drafted policies for legal validity and consequence.	
Provide Separation Decision	Operational Activity	This activity is associated with determining if separation approval is required, determining if a separation board is required, conducting a separation board, providing a documented decision for separation, notifying the appropriate parties of a separation decision, generating a separation order requirement, and updating the separation profile with decision information. This activity may include (but not be limited to) reviewing information related to a reduction in force or stop loss.	
Provide Separation Order Decision	Operational Activity	This activity is associated with authenticating separation orders to include the review of the draft order information for approval/disapproval. This activity also includes updating a Service obligation start date, a Service obligation length, an order effective date, and an order type.	
Provide Substance Control	Operational Activity	This activity is associated with enforcing United States laws with regards to legal substances (e.g., alcohol and tobacco) and illegal narcotics including trafficking, possession, sale, distribution, and other related activities.	
Provide Time and Attendance Information	Operational Activity	This is an activity that provides information regarding Time and Attendance information from external functions.	
Provide Traffic Enforcement	Operational Activity	This activity is associated with providing traffic enforcement to include the following: supply of information, assistance and services, investigation of traffic accidents, conducting traffic reconnaissance, providing traffic escorts, assisting at traffic control points (TCP), encouraging voluntary compliance with traffic laws, enforcing traffic regulations, and crime deterrence.	
Provide Transfer Order Decision	Operational Activity	This activity is associated with authenticating the transfer orders to include reviewing the draft order information for approval/disapproval. This activity also includes updating the personnel/pay record, acknowledging (if required) Service obligation start date, Service obligation length, order effective date, and order type.	
Provide Workforce Analysis Information	Operational Activity	This activity is associated with providing the end result of workforce analysis (e.g., force and simulation modeling information, strength planning information, prospect location information and force restructuring programs information) to be utilized in aspects of workforce planning needed within DoD and may be provided to other branches of the federal government.	
Publish Performance Evaluation Rating Chain	Operational Activity	This activity is associated with preparing, publishing and distributing the performance evaluation rating chain to the appropriate parties.	
Publish Supply Chain Plans	Operational Activity	The establishment and communication of courses of action over the appropriate time-defined planning horizon and interval, representing a projected appropriation of supply-chain resources to meet supply-chain requirements.	
Reactivate Unit	Operational Activity	This activity is associated with activating an inactive unit.	
Reassign Personnel Security Clearance Sponsor	Operational Activity	This activity is associated with transferring and converting existing clearances and Commercial And Government Entity (CAGE) code reassignments to the appropriate clearance sponsors.	
Receive and Accept Purchase Request	Operational Activity	Receive and Accept Purchase Request consists of ensuring that a completed and usable procurement requisition for goods and/or services is delivered to an authorized procurement activity. This includes, but is not limited to the following activities: receiving a complete and valid request; reviewing the content, receiving the appropriate approvals from management indicating the validity of the request; validating that funds are available; reserving the funds necessary for the request via a financial commitment transaction; and routing the request to the buyer with the information necessary to develop the procurement strategy and award the procurement instrument.	
Receive and Verify Product by Customer - Stocked Product	Operational Activity	The process of receiving the shipment by the customer (either at customer site or at shipping area in case of self-collection) and verifying that the order was shipped complete and that the product meets delivery terms - Stocked Product.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Receive and Verify Product by Customer - Engineer-to-Order Product	Operational Activity	The process of receiving the shipment (either at customer site or at shipping area in case of self-collection) and verifying that the order was shipped complete and that the product meets delivery terms - Engineer-to-Order Product.	
Receive and Verify Product by Customer - Make-to-Stock Product	Operational Activity	The process of receiving the shipment at the customer (either at customer site or at shipping area in case of self-collection) and verifying that the order was shipped complete and that the product meets delivery terms - Make-to-Stock Product.	
Receive Defective Product - Includes Verify	Operational Activity	The process where the last known holder or designated return center receives and verifies the returned defective product against the return authorization and other documentation and prepares the item for transfer.	
Receive Excess Product	Operational Activity	The process where the designated return center receives and verifies the returned excess product and associated documentation against the return authorization and other documentation and prepares the item for transfer. Administrate any discrepancies that arise.	
Receive Goods and Services	Operational Activity	This activity includes all actions taken by a receiving activity from the performance of a service by a provider or from the physical turnover of material by a carrier until the on-hand balance of the accountable stock record file or in-process receipt file is updated to reflect the received material as an asset in storage, or the material is issued directly from receiving to the customer.	
Receive Maintenance, Repair and Overhaul Product	Operational Activity	The process where the service provider receives and verifies the returned Maintenance, Repair and Overhaul item against the return authorization and other documentation and prepares the item for transfer.	
Receive Product - Engineer-to-Order Product	Operational Activity	The process and associated activities of receiving product to contract requirements - Engineer-to-Order Product.	
Receive Product - Make -to-Order Product	Operational Activity	The process and associated activities of receiving product to contract requirements - Make-to-Order Product.	
Receive Product - Stocked Product	Operational Activity	The process and associated activities of receiving product to contract requirements - Stocked Product.	
Receive Product at the Store	Operational Activity	The activities such as receiving product, verifying, recording product receipt, determining put-away location, putting away and recording location that a company performs at its own stores. May include quality inspection.	
Receive Product from Source or Make - Stocked Product	Operational Activity	The activities such as receiving product, verifying, recording product receipt, determining put-away location, putting away and recording location that a company performs at its own warehouses. May include quality inspection - Stocked Product.	
Receive Product from Source or Make - Engineer-to-Order Product	Operational Activity	The activities such as receiving product, verifying, recording product receipt, determining put-away location, putting away and recording location for goods received from either Make or Source. May include quality inspection - Engineer-to-Order Product.	
Receive Product from Source or Make - Make-to-Stock Product	Operational Activity	The activities such as receiving product, verifying, recording product receipt, determining put-away location, putting away and recording location for goods received from either Make or Source. May include quality inspection - Make-to-Stock Product.	
Receive Travel Information	Operational Activity	This activity is associated with allowing an authorized official to receive travel information on an employee. This will include travel information which will capture whether an employee is in route, checked in to a hotel, and travel dates.	
Receive, Configure, Enter and Validate Order - Make-to-Stock Product	Operational Activity	Receive orders from the customer and enter them into a company's order processing system. Orders can be received through phone, fax, or through electronic media. Configure your product to the customer's specific needs, based on standard available parts or options. 'Technically' examine order to ensure an orderable configuration and provide accurate price. Check the customer's credit. Optionally accept payment - Make-to-Stock Product.	
Receive, Enter and Validate Order - Stocked Product	Operational Activity	Receive orders from the customer and enter them into a company's order processing system. Orders can be received through phone, fax, or electronic media. 'Technically' examine orders to ensure an orderable configuration and provide accurate price. Check the customer's credit. Optionally accept payment - Stocked Product.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Reconcile Manpower Allocation Discrepancy List	Operational Activity	This activity is associated with reconciling discrepancies between the Manpower Budget Requirements and the Manpower Allocation. Discrepancies that cannot be amended are sent back to the Manpower Programmers for necessary adjustments.	
Record Competency Test Results	Operational Activity	This activity is recording the results of entry level (e.g., Armed Services Vocational Aptitude Battery, Armed Forces Officer Qualifying Test) and in-service testing (e.g., promotion testing, Defense Language Aptitude Battery).	
Record Loans and Grants	Operational Activity	This activity records the financial impact of business events related to the award, origination, performance, payment, collection and closeout of direct loans, loan guarantees and grants.	
Re-Designate Unit	Operational Activity	This activity is associated with changing the attributes of an existing unit. Changes to unit attributes include unit number, unit name, and/or unit type. The structure of the organization may remain the same, but it performs a new mission or task. If new equipment is brought in, a reorganization may occur, since different operations and maintenance positions might be needed for the new equipment.	
Refine Acquisition Strategy	Operational Activity	This activity refines the approved business and technical management approach designed to achieve program objectives. Refinements include specific considerations resulting from the system integration and system demonstration phases.	
Release Finished Product to Deliver - Make-to-Order	Operational Activity	Activities associated with post-production documentation, testing, or certification required prior to delivery of finished product to customer. Examples include assembly of batch records for regulatory agencies, laboratory tests for potency or purity, creating certificate of analysis, and sign-off by the quality organization - Make-to-Order.	
Release Product to Deliver - Engineer-to-Order	Operational Activity	Activities associated with post-production documentation, testing, or certification required prior to delivery of finished product to customer. Examples include assembly of batch records for regulatory agencies, laboratory tests for potency or purity, creating certificate of analysis, and sign-off by the quality organization - Engineer-to-Order.	
Release Product to Deliver - Make-to-Stock	Operational Activity	Activities associated with post-production documentation, testing, or certification required prior to delivery of finished product to customer. Examples include assembly of batch records for regulatory agencies, laboratory tests for potency or purity, creating certificate of analysis, and sign-off by the quality organization - Make-to-Stock.	
Relieve Asset Valuation	Operational Activity	This activity relieves and transfers accumulated costs to the appropriate asset record and General Property, Plant and Equipment (PPE) account at the time the asset is accepted and placed in service.	
Remove Assigned Individual Occupation Classification	Operational Activity	This activity is associated with removing an assigned occupation classification from an individual's profile. These classifications may be removed from an individual's profile when they are no longer qualified to perform duties within the classification specifications, or when their assigned classification is removed from the classification index.	
Reorganize Unit	Operational Activity	This activity is associated with changing the structure of a unit or organization. A reorganization may include merging two or more units together, splitting a unit into two or more units, keeping the same mission with new equipment (e.g., from M-60 tanks to M1A1 tanks), or changing the mission (e.g., from a mechanized unit to light infantry unit).	
Report for In-Processing	Operational Activity	This activity is associated with recording a Member's arrival at a new permanent or temporary duty station.	
Report for Out-Processing	Operational Activity	This activity is associated with a Member reporting to begin out-processing and departure from an assignment or duty station.	
Request Defective Product Return Authorization	Operational Activity	The process of a customer requesting and obtaining authorization, from last known holder or designated return center, for the return of defective product. Additionally, the customer and last known holder or designated return center would discuss enabling conditions such as return replacement or credit, packaging, handling, transportation and import / export requirements to facilitate the efficient return of the defective product.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Request Excess Product Return Authorization	Operational Activity	The process of a customer requesting and obtaining authorization, from the designated return center, for the return of excess product. Additionally, the customer and designated return center would negotiate enabling conditions such as return credit or cash discount, packaging, handling, transportation and import / export requirements to facilitate the efficient return of the excess product.	
Request Maintenance, Repair and Overhaul Return Authorization	Operational Activity	The process of a customer requesting and obtaining authorization, from a service provider, for the return of an Maintenance, Repair and Overhaul product. In addition to discussing the Maintenance, Repair and Overhaul issue, the customer and service provider would discuss enabling conditions such as return replacement or credit, packaging, handling, transportation and import / export requirements to facilitate the efficient return of the Maintenance, Repair and Overhaul product to the service provider. The customer may need to go through several return authorization iterations with multiple service providers before authorization is received.	
Request Travel Duration Information	Operational Activity	This activity is associated with allowing an authorized official to make an inquiry on the travel duration of an employee.	
Request Travel Location Information	Operational Activity	This activity is associated with allowing an authorized official to make an inquiry to locate an employee on travel.	
Request Travel Purpose Information	Operational Activity	This activity is associated with allowing an authorized official to make an inquiry on the purpose of travel for an employee.	
Reserve Inventory and Determine Delivery Date - Stocked Product	Operational Activity	Inventory (both on hand and scheduled) is identified and reserved for specific orders and a delivery date is committed and scheduled - Stocked Product.	
Reserve Inventory and Determine Delivery Date - Make-to-Stock Product	Operational Activity	Inventory and/or planned capacity is identified and reserved for specific orders, and a delivery date is committed and scheduled - Make-to-Stock Product.	
Resolve Unauthorized Absence	Operational Activity	This activity is associated with performing actions to resolve the unauthorized absence or desertion of a Member. This includes reviewing all absence information received regarding an unauthorized absence or desertion offender, determining if the Member needs to be re-categorized. This also includes, once the Member has been accounted for, updating the Member's profile, notifying the appropriate parties of the unauthorized absence resolution, and performing the necessary close out actions for this unauthorized absence.	
Respond to Non-Materiel Solution	Operational Activity	This activity responds to changes in doctrine, organization, training, materiel, leadership and education, personnel, facilities or policy (including all human systems integration domains) to satisfy identified functional capabilities that are not associated with a new defense acquisition program. The materiel portion is restricted to commercial or non-developmental items, which may be purchased commercially, or by purchasing more systems from an existing materiel program.	
Return	Operational Activity	The return activities associated with operating a supply chain. This includes identification of the need for a return, scheduling of the return, the shipment and receipt of the returned goods, the disposition decision making, the screening of customers for disposed material, and the demil and scrap disposition actions.	
Return Defective Product	Operational Activity	The process where the customer packages, and handles the defective product in preparation for shipping in accord with pre-determined conditions. The product is then provided by the customer to the carrier who physically transports the product and its associated documentation to the last known holder or designated return center.	
Return Excess Product	Operational Activity	The process where the customer packages, and handles the excess product in preparation for shipping in accord with pre-determined conditions. The product is then provided by the customer to the carrier who physically transports the product and its associated documentation to the last known holder or designated return center.	
Return Maintenance, Repair and Overhaul Product	Operational Activity	The process where the customer packages, and handles the Maintenance, Repair and Overhaul product in preparation for shipping in accord with pre-determined conditions. The product is then provided by the customer to the carrier who physically transports the product and its associated documentation to the service provider.	
Review Budget Decision	Operational Activity	This activity is associated with reviewing the budget decision and identifying the impact to requirements.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Review Demotion Decision	Operational Activity	This activity is associated with receiving and reviewing the decision to demote a Member. Possible sources of this decision may include (but not be limited to) adverse action (e.g., non-judicial punishment, courts-martial, and inefficiency), failure to complete training (e.g., officer candidate training), and voluntary requests (e.g., to fill vacancies).	
Review Inter-Service Transfer Request	Operational Activity	This activity is associated with reviewing an Inter-Service transfer request, along with any waivers, validating the request, making a determination on whether the transfer is in the Service's best interest, and providing a recommendation to concur or nonconcur with the transfer request.	
Review Intra-Service Transfer Request	Operational Activity	This activity is associated with reviewing an Intra-Service transfer request, along with any waivers, validating the request, making a determination on whether the transfer is in the Service's best interest, and providing a recommendation to concur or nonconcur with the transfer request.	
Review Leave Request	Operational Activity	This activity is associated with reviewing a leave request and any supporting documentation and determining if chargeable leave is included. This process may also include determining the chargeable leave amount and counseling the Member on leave status.	
Review Manpower Allocation	Operational Activity	This activity is associated with reviewing the Manpower Allocation received against the Budget Requirements submitted, in order to identify any discrepancies.	
Review Open Requisitions	Operational Activity	This activity is associated with reviewing open requisitions and any information a Human Resources Specialist will need to propose a Member to fill the requisition.	
Review Organization Controlled Absence Request	Operational Activity	This activity is associated with reviewing all information related to a request for an organization controlled absence and determining a Member's eligibility for the requested organization controlled absence as needed.	
Review Reenlistment Request	Operational Activity	This activity is associated with receiving and reviewing the reenlistment request and any waivers included. This may include (but not be limited to) ensuring compliance with all pertinent regulations, verifying if a Member is qualified to reenlist, and assigning reenlistment codes. A reenlistment request includes all supporting documents, as well as waivers and recommendations from the chain of command.	
Revoke Identity Credential	Operational Activity	This activity is associated with revoking an identity credential (Identity Cards (e.g., Common Access Card (CAC), Personal Identity Verification (PIV) Card, ID tags, unit controlled cards) and the information associated with them (e.g., Personal Identification Numbers (PIN) numbers, applets, identity information)) so that an identity credential that is no longer valid will not grant access to Human Resources privileges and information. This includes (but is not limited to) collecting additional documentation as necessary, terminating the affiliation between the identity credential and the identity credential holder and carrying out all activities necessary to close out the revocation process.	
Route Shipments - Stocked Product	Operational Activity	Loads are consolidated and routed by mode, lane and location - Stocked Product.	
Route Shipments - Engineer-to-Order Product	Operational Activity	Loads are consolidated and routed by mode, lane, and location - Engineer-to-Order Product.	
Route Shipments - Make-to-Stock Product	Operational Activity	Loads are consolidated and routed by mode, lane, and location - Make-to-Stock Product.	
Schedule and Execute Disposal - Reuse, Transfer, Donate, Demil, Scrap, Public Sale	Operational Activity	The process of reutilizing, transferring, donating, selling, destroying, or other ultimate disposition of personal property.	
Schedule Defective Product Shipment	Operational Activity	The process where the customer develops the schedule for a carrier to pick-up for delivery of the defective product. Activities include selecting the carrier and rates, preparing the item for transfer, preparing scheduling documentation and managing overall scheduling administration.	
Schedule Defective Return Receipt	Operational Activity	The process where the last known holder or designated return center evaluates the defective product handling requirements including negotiated conditions and develops a schedule that tells the Customer when to ship the product. The scheduling activity would also inform Receiving when to expect the shipment and where to send the product, for disposition, upon receipt.	
Schedule Excess Product Shipment	Operational Activity	The process where the customer develops the schedule for a carrier to pick-up the excess product. Activities include selecting the carrier and rates, preparing the item for transfer, preparing scheduling documentation and managing overall scheduling administration.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Schedule Excess Return Receipt	Operational Activity	The process where the I designated return center evaluates an authorized excess material return to determine packaging and handling requirements. This assessment will lead to the development of a return disposition decision and a return schedule with terms and conditions that will tell the Customer how and when to ship the product. The scheduling activity would also inform the Return Center's Receiving department when to expect the shipment and where to send the product, for disposition, upon receipt.	
Schedule Installation - Engineer-to-Order Product	Operational Activity	The process of evaluating the design and build schedules relative to customer requested installation date to determine installation schedule - Engineer-to-Order Product.	
Schedule Maintenance, Repair and Overhaul Return Receipt	Operational Activity	The process where the service provider evaluates the Maintenance, Repair and Overhaul service requirements including negotiated conditions and develops a schedule that tells the Customer when to ship the part. The scheduling activity would also inform Receiving when to expect the shipment and where to send the part, for induction or storage, upon receipt.	
Schedule Maintenance, Repair and Overhaul Shipment	Operational Activity	The process where the customer develops the schedule for a carrier to pick-up and deliver the Maintenance, Repair and Overhaul product. Activities include selecting the carrier and rates, preparing the item for transfer, preparing scheduling documentation and managing overall scheduling administration.	
Schedule Product Deliveries - Engineer-to-Order Product	Operational Activity	Scheduling and managing the execution of the individual deliveries of product against the contract. The requirements for product deliveries are determined based on the detailed sourcing plan. This includes all aspects of managing the contract schedule including prototypes and qualifications - Engineer-to-Order Product.	
Schedule Product Deliveries - Make-to-Order Product	Operational Activity	Scheduling and managing the execution of the individual deliveries of product against the contract. The requirements for product deliveries are determined based on the detailed sourcing plan. This includes all aspects of managing the contract schedule including prototypes, qualifications or service deployment - Make-to- Order Product.	
Schedule Product Deliveries - Stocked Product	Operational Activity	Scheduling and managing the execution of the individual deliveries of product against an existing contract or purchase order. The requirements for product releases are determined based on the detailed sourcing plan or other types of product pull signals - Stocked Product.	
Schedule Production Activities - Engineer-to-Order	Operational Activity	Given plans for the production of specific parts, products, or formulations in specified quantities and planned availability of required sourced products, the scheduling of the operations to be performed in accordance with these plans. Scheduling includes sequencing, and, depending on the factory layout, any standards for setup and run. In general, intermediate production activities are coordinated prior to the scheduling of the operations to be performed in producing a finished product - Engineer-to-Order.	
Schedule Production Activities - Make-to-Order	Operational Activity	Given plans for the production of specific parts, products, or formulations in specific quantities and planned availability of required sourced products, the scheduling of the operations to be preformed in accordance with these plans. Scheduling includes sequencing, and, depending on the factory layout, any standards for setup and run. In general intermediate production activities are coordinated prior to the scheduling of the operations to be preformed in producing a finished product - Make-to-Order.	
Schedule Production Activities - Make-to-Stock	Operational Activity	Given plans for the production of specific parts, products, or formulations in specified quantities and planned availability of required sourced products, the scheduling of the operations to be performed in accordance with these plans. Scheduling includes sequencing, and, depending on the factory layout, any standards for setup and run. In general, intermediate production activities are coordinated prior to the scheduling of the operations to be performed in producing a finished product - Make-to-Stock.	
Schedule Return or Disposal	Operational Activity	This activity develops a return or disposal order for the delivery of the defective, excess, or repairable product. Functions include evaluating the defective, excess, or repairable product handling requirements including negotiated conditions, and informing the affected warehouse(s) of the product disposition in preparation for return or disposal actions. This activity also schedules the disposal actions of real property to include but not limited to demolition or transfer. (SCOR SR1.4, DR1.2)	
Select Candidate to Fill Requisition	Operational Activity	This activity is associated with selecting the best Member out of the eligible candidates. The best Member is eligible and qualified to meet the requirements of the assignment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Select Carriers and Rate Shipments - Stocked Product	Operational Activity	Specific carriers are selected by lowest cost per route and shipments are rated and tendered - Stocked Product.	
Select Carriers and Rate Shipments - Engineer-to-Order Product	Operational Activity	Specific carriers are selected by lowest cost per route and shipments are rated and tendered - Engineer-to-Order Product.	
Select Carriers and Rate Shipments - Make-to-Stock Product	Operational Activity	Specific carriers are selected by lowest cost per route and shipments are rated and tendered - Make-to-Stock Product.	
Select Final Supplier and Negotiate - Engineer-to-Order Product	Operational Activity	The identification of the final supplier(s) based on the evaluation of RFQs, supplier qualifications and the generation of a contract defining the costs and terms and conditions of product availability - Engineer-to-Order Product.	
Ship Product - Stocked Product	Operational Activity	The process of shipping the product to the customer site - Stocked Product.	
Ship Product - Engineer-to-Order Product	Operational Activity	The process of shipping the product to the customer site - Engineer-to-Order Product.	
Ship Product - Make-to-Stock Product	Operational Activity	The process of shipping the product to the customer site - Make-to-Stock Product.	
Source	Operational Activity	The sourcing activities associated with operating a supply chain. This includes issuing purchase orders, inventory accountability, scheduling deliveries, receiving, and shipment validation and storage.	
Source Candidate	Operational Activity	This activity is associated with finalizing applicant sources, conducting pre-announcement recruitment, announcing jobs, and receiving applicant documentation.	
Source Engineer-to-Order Product	Operational Activity	The processes of identifying and selecting sources of supply, negotiating, validating, scheduling, ordering and receiving parts, assemblies or specialized products or services that are designed, ordered and/or built based on the requirements or specifications of a specific customer order.	
Source Make-to-Order Product	Operational Activity	The processes of ordering and receiving product or material that is ordered (and may be configured) only when required by a specific customer order. The intention of Source-to-Order is to maintain inventory ordered (and/or configured) specifically for customer orders only. The product is ordered, received and identified in stock using this customer order reference (order designated inventory). The product is typically identifiable throughout the sourcing process, by the reference to the customer order attached to or marked on the product or packaging and in the warehouse management or ERP system. Examples of alternative or related names for Source-to-Order are: purchase-to-order, special ordering (retail industry), kitting and line sequencing (manufacturing industries).	
Source Return Defective Product	Operational Activity	The return and disposition determination of defective products as defined by the warranty claims, product recall, non-conforming product and/or other similar policies including appropriate replacement. The Return Defective Product supports any type of product not conforming to specifications (including order non-conformance such as late or otherwise improper delivery); company business rules determine the definition of 'defective'. The physical disposition of the product may not be part of the return process.	
Source Return Excess Product	Operational Activity	The return of excess or aging inventory or obsolete products as defined by the terms and conditions of a customer/supplier contract. The intention of excess product returns is to reallocate inventory to a location or organization that can sell the product that is considered in excess in the current location. The physical disposition of the product may not be part of the return process.	
Source Return Maintenance, Repair and Overhaul Product	Operational Activity	The return of Maintenance, Repair and Overhaul (MRO) products or company assets for the purpose of servicing, repairing or upgrading it, as defined by Maintenance Plans or the occurrence or anticipation of risk of failure. Generally company assets managed through a MRO process are expected to be refurbished to a useable condition and returned to service. The Return process does not represent the actual maintenance, repair or overhaul activities; these are generally represented by Make processes. The physical disposition of the product may not be part of the return process.	
Source Return Maintenance, Repair and Overhaul Product Condition	Operational Activity	The process where the customer utilizes pre-determined Maintenance, Repair and Overhaul policies, business rules and product operating conditions as criteria to identify and confirm that an item requires maintenance, repair, overhaul or disposal. Includes operating failures and planned maintenance requirements.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Source Stocked Product	Operational Activity	The process of ordering, receiving and transferring raw material items, sub-assemblies, product and or services based on aggregated demand requirements. The intention of Source-to-Stock is to maintain a pre-determined level of inventory for these materials, sub-assemblies or products. No customer reference or customer order detail is exchanged with the supplier, attached to or marked on the product, or recorded in the warehousing or ERP system for Source-to-Stock products. Examples of alternative or related names for Source-to-Stock are: replenishment inventory, drip parts, kan-ban, and on, and bulk or generic stock.	
Stage Finished Product - Engineer-to-Order	Operational Activity	The movement of packaged products into a temporary holding location to await movement to a finished goods location. Products that are made to order may remain in the holding location to await shipment per the associated customer order. The actual move transaction is part of the Deliver process - Engineer-to-Order.	
Stage Finished Product - Make-to-Order	Operational Activity	The movement of packaged products into a temporary holding location to await movement to a finished goods location. Products that are made to order may remain in the holding location to await shipment per the associated customer order. The actual move transaction is part of the Deliver process - Make-to-Order.	
Stage Product - Make-to-Stock	Operational Activity	The movement of packaged products into a temporary holding location to await movement to a finished goods location. Products that are made to order may remain in the holding location to await shipment per the associated customer order. The movement to finished goods is part of the Deliver process - Make-to-Stock.	
Stock Shelf	Operational Activity	For restocks, the tasks associated with identifying the item location, stocking the shelf according to merchandise plans, and recording the appropriate inventory transaction. For promotional items and stock repositioning the tasks associated with shelf and point of sale preparation, stock placement, and end of sale activities.	
Submit Assignment Action Request	Operational Activity	This activity is associated with submitting an assignment action for review and approval by an Approval Authority. This activity will also include coordinating the assignment action to capture recommendations and comments.	
Submit Enlistment Extension Request	Operational Activity	This activity is associated with preparing, counseling, and submitting a voluntary enlistment extension request by a Member. Voluntary enlistment extension reasons may include (but not be limited to) obtaining obligated Service requirements, retaining medical benefits for a Member or a family member (e.g., pregnancy), completing an operational deployment, or awaiting an opening for a position/assignment, and others.	
Submit Manpower Change Request	Operational Activity	This activity is associated with submitting the manpower change request for approval after coordination with other organizations.	
Submit Officer Involuntary Retention Waiver Request	Operational Activity	This activity is associated with the Officer completing and submitting an Officer Involuntary Retention Waiver request. This activity includes the Officer submitting any supporting documentation to substantiate waiver request.	
Submit Reenlistment Appeal	Operational Activity	This activity is associated with preparing a reenlistment appeal for a Member whose reenlistment has been disapproved. This may also include counseling or reviewing the reenlistment decision with the Member, providing guidance on what documentations are needed for the appeal, sending an appeal memorandum to the approval authority for reconsideration, and reviewing any reenlistment appeal to the Member's reenlistment request, which was previously disapproved by his/her Commander, to the Senior Official on the Commander's chain of command.	
Submit Reenlistment Request	Operational Activity	This activity is associated with preparing, completing, and submitting a reenlistment request (e.g., DA Form 3340-R, DD Form 4/1). The reenlistment request will also include all recommendations from the chain of command.	
Submit Reenlistment Waiver	Operational Activity	This activity is associated with processing any waivers for criteria needing a waiver by the Member (e.g., physical qualification, medical standards, Conscientious Objector).	
Submit Travel Voucher	Operational Activity	This activity is associated with capturing the submission of a travel voucher for reimbursement of expenses incurred in the performance of official travel, including Permanent Change of Station (PCS) travel. An electronic update is made to the human resources profile when the voucher is approved/certified for processing.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Support Acquisition Decision Review	Operational Activity	This activity supports the point at which a recommendation is made and approval sought regarding starting or continuing an acquisition program, i.e., proceeding to the next phase.	
Support Administration of Clemency and Parole Policies and Procedures	Operational Activity	This activity is associated with administering clemency actions to include the mitigation, remission, and suspension of court-martial sentences, as well as the return to military service (restoration/reenlistment) of prisoners with approved sentences and the administration of parole policies and procedures.	
Support Administration of Confinement Operations	Operational Activity	This activity is associated with supporting the administration of confinement operations and all related activities to include operation of correctional facilities, administration of correctional programs and clemency and parole policies and procedures.	
Support Administration of Correctional Programs	Operational Activity	This activity is associated with administering correctional programs to include the following: prisoner activities, inmate classification, classification plans, prisoner counseling, prisoner employment, vocational training and education, prisoner compensation, academic instruction, and prisoner welfare activities.	
Support Area Security Operations	Operational Activity	This activity is associated with managing reconnaissance operations, as well as conducting critical site, asset, and high-risk personnel security operations, which includes securing high-value convoys (Class III or V) and conducting combat patrols throughout the Area of Operation (AO) (to include cordon and search operations).	
Support Citizenship Protection	Operational Activity	This activity is associated with protecting the general population of the United States from criminal activity.	
Support Civil and Domestic Legal Services	Operational Activity	This activity is associated with providing legal assistance and/or advice on matters regarding property and financial Affairs, family and domestic relations, consumer law, and matters concerning immigration and naturalization.	
Support Civilian Criminal Investigative Services	Operational Activity	This activity is associated with collecting evidence required to determine responsibility for a crime and monitoring and questioning affected parties during Civilian Criminal Investigations.	
Support Congressional Budget Review	Operational Activity	This activity describes the roles and responsibilities of the department in the congressional hearing budget review. At this activity, the department will have the opportunity to present their testimony and additional information concerning their budget proposal.	
Support Consumer Laws	Operational Activity	This activity is associated with providing legal information and advice related to consumer and contract matters, such as credit card protection, identity theft, fair credit billing, consumer scam resources, automobile leasing, Lemon laws, and auto insurance.	
Support Controlled Substance Programs	Operational Activity	This activity is associated with enforcing United States Law with regards to the proper use of controlled pharmaceuticals and controlled chemicals.	
Support Coordination with Civilian Law Enforcement	Operational Activity	This activity is associated with coordinating military and civilian law enforcement.	
Support Criminal Investigative Services	Operational Activity	This activity is associated with supporting all levels (Military Police, Civilian Law Enforcement and non-department of defense agencies) of criminal investigative services related to collecting evidence required to determine responsibility for a crime and monitoring and questioning affected parties.	
Support Defense Acquisition System	Operational Activity	This activity supports the management process by which the Department of Defense provides effective, affordable, and timely systems to the users.	
Support Defense Science Board	Operational Activity	This activity supports the Defense Science Board. This includes infrastructure, resources, technology and information dissemination.	
Support Executive Assessment Review	Operational Activity	This activity supports Executive Assessment Reviews performed by the Defense Acquisition community.	
Support Family and Domestic Relations Affairs	Operational Activity	This activity is associated with providing legal advice related to family law and domestic relations matters such as adoption, divorce, separation, annulment, marriage and prenuptial agreements, paternity, and the Uniformed Services' Former Spouses' Protection Act.	
Support Healthcare Benefit Education and Community Service	Operational Activity	This activity is associated with orienting the beneficiary to their benefits and the available services. In addition, receipt of services is tracked and beneficiary profiles are updated to reflect status, achievement of healthcare services and education. This activity also includes providing education services and medical advice to the community, including beneficiaries.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Support Illegal Substance Control Programs	Operational Activity	This activity is associated with enforcing United States Law with regards to illegal narcotics including trafficking, possession, sale, distribution, and other related activities.	
Support in Service Review	Operational Activity	This activity conducts a multi-disciplined product and process assessment to ensure that the system under review is operationally employed with well-understood and managed risk. This review is intended to characterize the in-service technical and operational health of the deployed system. It provides an assessment of risk, readiness, technical status, and trends in a measurable form. These assessments substantiate in-service support budget priorities.	
Support Internment and Resettlement Operations	Operational Activity	This activity is associated with conducting internment and resettlement operations. These operations include coordination with various entities, such as the Office of the Staff Judge Advocate, the Civil Affairs Office, various engineering offices, military intelligence, medical and dental offices, liaison with International Committee of the Red Cross, public affairs organizations, and Chaplain's Office.	
Support Joint Interoperability and Supportability Validation	Operational Activity	This activity collects and compiles information to certify that the technical exchange of information and the end-to-end operational effectiveness of that exchanged information is compliant and meets mission integration standards.	
Support Joint Interoperability Test Command Certification Testing	Operational Activity	This activity supports the process within the Office of the Secretary of Defense (OSD) for cooperative Research and Development (R&D) projects authorized under Title 10 U.S.C. § 2350a, whereby candidate projects are screened and those meeting the selection criteria are certified (approved) for implementation pending Memorandum of Understanding (MoU) negotiation and signature and release of funds.	
Support Judicial Hearings	Operational Activity	This activity is associated with supporting proceedings (usually by a court of law) where evidence is taken for the purpose of determining an issue of fact and reaching a decision based on that evidence.	
Support Law and Order Operations	Operational Activity	This activity is associated with supporting law and order operations. These operations include managing Law enforcement patrols, conducting of criminal investigations through coordinating and synchronizing Criminal Investigation Division assets, conducting crowd and riot control operations, and training/mentoring local police forces.	
Support Leadership Protection	Operational Activity	This activity is associated with protecting the health and well being of the President, Vice-President, their families, foreign leaders and dignitaries, and other high-level government officials.	
Support Legal Aspects of Property and Financial Affairs Management	Operational Activity	This activity is associated with providing legal assistance and or advice on housing/real estate, homeowner's assistance programs, leasing/renting property, landlord/tenant matters, and taxes.	
Support Litigation and Judicial Functions	Operational Activity	This activity is associated with administering justice, such as legal defense, judicial hearings, legal investigations, litigation, resolution facilitation, and legal assistance related to military rights and protections.	
Support Logistics Strategy Development	Operational Activity	This activity develops a life-cycle support strategy, which addresses the necessary actions to assure sustainment and continually improve product affordability for programs in initial procurement, re-procurement, and post-production support. The support strategy defines the supportability planning, analyses, and trade-offs conducted to determine the optimum support concept for a materiel system and strategies for continuous affordability improvement throughout the product life-cycle.	
Support Maneuver and Mobility Support Operations	Operational Activity	This activity is associated with managing counterinsurgency operations through maneuver and mobility support operations. These operations include supporting straggler and displaced person operations, conducting route reconnaissance and surveillance missions, conducting main supply route regulation, and enforcing operations (to include checkpoints and roadblocks).	
Support Military Police Criminal Investigative Services	Operational Activity	This activity is associated with collecting evidence required to determine responsibility for a crime and monitoring and questioning affected parties during Military Police Criminal Investigations.	
Support Non-DoD Agency Criminal Investigative Services	Operational Activity	This activity is associated with collecting evidence required to determine responsibility for a crime and monitoring and questioning affected parties during non-Department of Defense (DoD) agency criminal investigations.	
Support Operation of Confinement Facilities	Operational Activity	This activity is associated with the administrative operation of confinement facilities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Support Operation of Correctional Facilities	Operational Activity	This activity is associated with the administrative operation of facilities for providing correctional treatment to military prisoners to motivate and retrain them for return to military duty or for return to civilian life as better citizens. It applies to a retraining brigade, confinement facilities, regional corrections facilities, disciplinary barracks, rehabilitation training center, and disciplinary training center.	
Support Operation of Regional Corrections Facilities	Operational Activity	This activity is associated with the administrative operation of regional corrections facilities.	
Support Operation of United States Disciplinary Barracks	Operational Activity	This activity is associated with the administrative operation of the military correctional treatment facility for confinement, retraining, and restoration of prisoners to honorable duty status or return to civil life.	
Support Operations and Sustainment	Operational Activity	This activity provides support for operational systems to include sustainment.	
Support Personnel Security Clearance Certification Process	Operational Activity	This activity is associated with managing pre-investigation, Personnel Security Investigation (PSI), and adjudication processing for the purpose of reviewing, issuing, denying, recertifying, revoking, or reinstating a personnel security clearance.	
Support Police Intelligence Operations	Operational Activity	This activity is associated with supporting intelligence operations, which include working closely with military intelligence personnel and turning the information into actionable intelligence products, integrating patrols (both mounted and dismounted) coordination with joint, interagency, and multinational assets.	
Support Property Protection	Operational Activity	This activity is associated with ensuring the security of civilian and government property as well as foreign diplomatic missions.	
Support Quality Management	Operational Activity	This activity supports Government Contract Quality Assurance (GCQA) through activities conducted by the program manager with Defense Contract Management Agency (DCMA).	
Support Special Operations and Low Intensity Conflict	Operational Activity	This activity provides support of special operations and low intensity conflict operations that encompass the use of small units in direct or indirect military actions that are focused on strategic or operational objectives. These small units require specialized personnel, equipment, training, transportation or tactics that exceed the routine capabilities of conventional military forces.	
Support Unfavorable Personnel Security Clearance Determinations	Operational Activity	This activity is associated with processing any of several adverse actions relative to a person's employment or retention in a sensitive or risk position to include counseling, appeals, reassignment, termination, and security clearance revocation or downgrading.	
Suspend Personnel Security Clearance	Operational Activity	This activity is associated with temporarily suspending a person's personnel security clearance so that further investigation and adjudication can be performed on the clearance as necessary.	
Track Congressional Action	Operational Activity	This activity occurs between the time the President's Budget is submitted to Congress and up to and including the time that appropriations are enacted. This activity also captures the markups and markdowns as result of the budget negotiation between the Congress, DoD, and OMB.	
Transfer Defective Product	Operational Activity	The process where the last known holder or designated return center transfers the defective product to the appropriate process to implement the disposition decision.	
Transfer Excess Product	Operational Activity	The process where the designated return center transfers the excess product to the appropriate process to implement the disposition decision.	
Transfer Maintenance, Repair and Overhaul Product	Operational Activity	The process where the service provider transfers the Maintenance, Repair and Overhaul product to the appropriate process to implement the disposition decision.	
Transfer Product - Engineer-to-Order Product	Operational Activity	The transfer of accepted product to the appropriate stocking location within the supply chain. This includes all of the activities associated with repackaging, staging, transferring, and stocking product - Engineer-to-Order Product.	
Transfer Product - Make-to-Order Product	Operational Activity	The transfer of accepted product to the appropriate stocking location within the supply chain. This includes all of the activities associated with repackaging, staging, transferring, and stocking product and or application of service - Make-to-Order Product.	
Transfer Product - Stocked Product	Operational Activity	The transfer of accepted product to the appropriate stocking location within the supply chain. This includes all of the activities associated with repackaging, staging, transferring and stocking product. For service this is the transfer or application of service to the final customer or end user - Stocked Product.	
Transfer Technology	Operational Activity	This activity promotes and enables the use of DoD technologies in applications outside the DoD.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Transition Technology	Operational Activity	This activity promotes matured technologies and makes them available to DoD through outreach, demonstration, and technical support.	
Transport Materiel and Forces	Operational Activity	This activity addresses those functions required to deliver product and personnel requested to fulfill a specific order to a specified destination. These functions include embarkation, transit operations processing, and physical movement, as well as the recording of deliveries at each node and the transmittal of performance information for management analysis. (SCOR D1.11, D1.12)	
Update Asset Valuation	Operational Activity	This activity involves the updating and capture of all direct and indirect costs associated with a real property construction project or military equipment. It accumulates the construction and work in progress costs.	
Update Enlistment Information	Operational Activity	This activity is associated with updating the Member's enlistment information. This activity may include (but not be limited to) updating the Member's profile with the enlistment extension request decision; the new Service end date as a result of voluntary extension or involuntary extension due to stop loss, a declaration of war, or administrative hold; or personnel restriction code as a result of involuntary extension for administrative hold.	
Update FYDP	Operational Activity	Upon receipt of a PDM the COCOMs, components, DOD agencies and activities incorporate the decision in their POM/Budget submission and update the FYDP. Updates to the FYDP are required coincident with the Program and Budget Review and the President's Budget.	
Update Human Resources Personal Information	Operational Activity	This activity is associated with updating personal information for any person with a Human Resources Profile. This activity also includes managing information that a person provides (e.g., local address, biometric information, email address, request for savings bond withholding, financial closures, request for a military pay allotment, birth certificate information, citizenship documentation, family care plan, and documentation that an individual is a military dependent for the purpose of receiving military medical care). Implementation can be accomplished by self service automation, face to face interaction, FAX in addition to interactions with a central call center, video conference methods, or other technical means.	
Update Leave Balance Information	Operational Activity	This activity is associated with calculating the leave balance based on accrued and deducted leave amounts, and updating the Member's information with the current leave balance after the accruals and deductions are applied.	
Update Manpower Document	Operational Activity	This activity is associated with updating Manpower documents with changes to the position data.	
Update Member Profile with Active Duty Tour Information	Operational Activity	This activity is associated with updating a Member's profile with active duty tour information (e.g., medical, dental, training, legal, HRM information (e.g., record of emergency data, duty status, benefit information, time served on active duty)).	
Update Member Profile with Commissioning Program Admission Decision	Operational Activity	This activity is associated with updating a Member's profile with information to include (but not be limited to) a review board's decision on a commissioning program admittance request, applicable board title, convening authority, decision date and documenting the Member's elections.	
Update Member Profile with Reenlistment Information	Operational Activity	This activity is associated with notifying a Member of a reenlistment decision, updating a Member's reenlistment eligibility, and documenting the reenlistment decision.	
Update Member Profile with Voluntary Resignation Decision	Operational Activity	This activity includes updating a Member's profile to document the voluntary resignation decision, as well as the new rank the Member will be assigned.	
Update Personnel Award Information	Operational Activity	This activity is associated with updating a Member's profile with the award information.	
Update Profile with Identity Credential Information	Operational Activity	This activity is associated with updating the Employee's, Member's, contractor's, or dependents' profile with their identity credential information so they may be accurately identified and be able to gain or not gain access to Human Resources privileges and information.	
Update Profile with Officer Involuntary Retention Waiver Outcome	Operational Activity	This activity is associated with updating a Officer's profile with involuntary retention information to include decision to retain or not retain an officer beyond Service obligation. This activity may include (but not be limited to) updating information on involuntary retention timeline, pay, and benefits.	
Update Profile with Performance Evaluation Appeals Information	Operational Activity	This activity is associated with updating a Member's profile to reflect the revision of a recorded performance evaluation. This may include (but is not limited to) removing erroneous information from the evaluation, correcting evaluation information, amending current evaluation information, or removing the appealed evaluation and requesting a new evaluation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Update Profile with Special Category Retention Information	Operational Activity	This activity is associated with updating an Member's profile with special category retention information and any approved bonus or incentive related to retention. This activity may include (but not be limited to) updating information on special category retention timeline, pay, and benefits.	
Update Unit	Operational Activity	This activity is associated with redesignating, inactivating, and reactivating units. Updating a unit is strictly organizational in nature and any updates to positions will be captured under position management. This activity does not include the process of updating the Manpower document. The Manpower document is updated for any changes that occur within a unit or a position.	
Validate Active Duty Tour Requirements	Operational Activity	This activity is associated with validating active duty tour requirements (e.g., court martial proceedings, training, national emergency, deployment) to transfer a Member to and from active duty.	
Validate Alleged Offense	Operational Activity	This activity is associated with obtaining the initial facts of an alleged offense, determining if an administrative hold (a flag placed on the member's profile immediately when a soldier's status changes from favorable to unfavorable) is required, conducting an internal or external investigation, and documenting the findings as to the validity of the charges.	
Validate Award Recommendation Request	Operational Activity	This activity is associated with validating the award recommendation request for completeness and validating the Member's eligibility for the recommended award.	
Validate Geospatial Information	Operational Activity	This activity is an acknowledgement by an authorized government official (e.g. Program Manager) that geospatial information meets requirements and conforms with standards, accuracy and enterprise data quality guidelines. This activity performs a technical review of created or updated geospatial features to ensure conformance with published I&E standards and guidance as well as specific project requirements.	
Validate Human Resources Information Request	Operational Activity	This activity is associated with validating a Human Resources Information Request. This activity also includes determining if the information is complete and if the requester is authorized to receive the requested information.	
Validate Manpower Requirement List	Operational Activity	This activity is associated with validating the projected force structure to ensure that it is within the defense guidance and allowed number for positions, performing analysis of current workload, and studying ways to improve efficiency by business process reengineering. This activity also includes both analyzing and building succession plans by ensuring that there are enough allocated lower grade billets to replace natural losses in higher grade billets.	
Validate Officer Involuntary Retention Information	Operational Activity	This activity is associated with receiving notification to involuntarily retain Officer(s) due to a declaration of war, stop loss, or administrative reasons (e.g., medical, UCMJ). This activity may also include counseling the Officer on the type of retention, the anticipated duration, actions/activities that must occur prior to the retention being lifted, waivers, and required supporting documentation for waivers.	
Validate Physical Evaluation Appeal	Operational Activity	This activity is associated with validating the Member's appeal request to determine if it is complete.	
Validate Product Hazard Data	Operational Activity	This activity validates, prepares and enters product hazard data (PHD) into the master product hazard data (MPHD) warehouse. The validation ensures that the PHD meets the needs of the request, is accurate, and in compliance with DoD requirements. The preparation of the PHD includes creating a new record and updating existing records in the MPHD warehouse.	
Validate Product Hazard Data Request	Operational Activity	This activity processes requests for product hazard data (PHD) to be added to the master product hazard data (MPHD) warehouse. This includes receiving, recording and reviewing of the request submitted by the Component. It also includes requesting the needed PHD from an external non-DoD source (eg, manufacturer, supplier or vendor) and recording and reviewing the response. After the received PHD is reviewed it is then forwarded to the Validate Product Hazard Data activity and processes.	
Validate Special Category Retention Information	Operational Activity	This activity is associated with receiving a request from a Member on special category retention and validating the Member's special category status for an authorized payment of bonus or incentive for a signed agreement to remain in the Service.	
Validate Travel Funds Availability	Operational Activity	This activity is associated with requesting for the obligation of funds to authorize a travel request for temporary or Permanent Change of Station (PCS) travel. Travel and transportation at government expense may be directed only when officially justified, as well as by means which meet mission requirements consistent with good management practices.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Validate Voluntary Resignation Request	Operational Activity	This activity is associated with validating information within a voluntary resignation request to ensure it is complete and correct. This information may include (but not be limited to) Member name, rank, Date of Rank, and Total Active Federal Military Service date.	
Verify Completeness of Benefit Application	Operational Activity	This activity is associated with receiving and reviewing the benefit application and any supporting documents, validating the application and supporting documents for completeness, and requesting additional information where necessary.	
Verify In-Processing Checklist is Complete	Operational Activity	This activity is associated with receiving and verifying the completion of the in-processing checklist. This activity also includes verifying the assignment order. Upon checklist verification, a notification of the person's arrival is sent to the gaining command, as well as other affected parties.	
Verify Out-Processing Checklist is Complete	Operational Activity	This activity is associated with receiving and verifying the completion of the out-processing checklist. This activity also includes verifying the assignment order. Upon checklist verification, a notification of the person's departure is sent to the gaining command, as well as other affected parties.	
Verify Product - Engineer-to-Order Product	Operational Activity	The process and actions required determining product conformance to requirements and criteria - Engineer-to-Order Product.	
Verify Product - Make-to-Order Product	Operational Activity	The process and actions required determining product conformance to requirements and criteria - Make-to-Order Product.	
Verify Product - Stocked Product	Operational Activity	The process and actions required determining product conformance to requirements and criteria - Stocked Product.	
Verify Retirement Checklist is Complete	Operational Activity	This activity is associated with verifying the completion of the retirement checklist.	
Verify Separation Checklist is Complete	Operational Activity	This activity is associated with verifying the completeness of the separation checklist (e.g., Preseparation Counseling Form, out-processing documentation), identifying discrepancies to ensure requirements have been met by the Member, and documenting the completion information.	
Verify System Performance	Operational Activity	This activity evaluates system or software components to determine whether the product satisfies performance specifications.	
Verify Travel Voucher	Operational Activity	This activity is associated with capturing the verification and validation of a travel voucher.	
Waste Disposal - Engineer-to-Order	Operational Activity	Activities associated with collecting and managing waste produced during the produce and test process including scrap material and non-conforming product - Engineer-to-Order.	
Waste Disposal - Make-to-Order	Operational Activity	Activities associated with collecting and managing waste produced during the produce and test process including scrap material and non-conforming product - Make-to-Order.	
Waste Disposal - Make-to-Stock	Operational Activity	Activities associated with collecting and managing waste produced during the produce and test process including scrap material and non-conforming product - Make-to-Stock.	
Enterprise	Operational Node	The Enterprise Node is a collection of activities that perform services in support of the operations of the Department of Defense Business Mission Area.	
External	Operational Node	A collection of organizations outside of DoD doing business with the Department of Defense.	
FM	Operational Node	Financial Management (FM) - Objectives: Provide accurate and reliable financial information in support of the Planning, Programming, Budgeting, and Execution (PPBE) process to ensure adequate financial resources for warfighter mission requirements. Provide accurate financial information to reliably cost: (1) the conduct, output, and performance of warfighter operations and missions both in total and in varying levels of organizational, operational, and resource detail; and (2) ongoing, completed, or projected programs in support of warfighter requirements. The key elements of this CBM include greater integration of PPBE processes and supporting defense business systems. The key elements also include all aspects of processes and controls necessary to routinely capture and provide accurate financial information that also complies with public law, regulations, standards, and established policy.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FM Accounting Office	Operational Node	This office is responsible for the following activities: (1) Performance Cost Modeling, which includes defining the models, populating and managing the models over time and analyzing the results of the cost models for both internal and external customers. (2) Accounts Receivable and associated revenue recognition, which includes establishing receivables and managing receivables over time (e.g. aging, collections, delinquency actions and write-offs). (3) Manage Liabilities, which includes establishing and liquidating Accounts Payable as well as validation of funds availability prior to incurring liabilities. Inherent in all these activities is the requirement to update DoD general ledger and any related subsidiary ledgers as a result of these activities.	
FM Commercial Entitlement Office	Operational Node	This office is responsible for the timely and accurate computation of entitlements owed by DoD to contractors and vendors. It also verifies that propriety, adequacy and completeness of documentation to substantiate three way match to authorize amounts to be paid. This office also manages commercial debts and provides a customer service function to include inquiries from vendors regarding a wide variety of issues associated with commercial entitlements.	
FM Planning and Policy Office	Operational Node	This office is responsible for internal or external accounting and budgetary requirements pertaining to DoD accounting policy, budget policy and identifying the internal or external requirements on the DoD's standard chart of accounts. This is in relationship with the standard financial information structure (SFIS). Also, it is responsible to perform executive level planning, reviews and integration of the national military strategies and the national security strategies when aligning the department's strategic goals, and priorities.	
FM Program and Budget Office	Operational Node	This office is responsible for managing the overall budget formulation and execution for the Department of Defense. It is responsible to evaluate, develop, and integrate strategic goals into program guidance and decisions that update the FYDP and issue budget/fiscal guidance to formulate and prepare DoD's submission to the President's Budget. This encompasses issuing budget guidance in conjunction with programming plans. It requires coordination efforts to develop and resolves programmatic issues. The development of budget through the formulation phase to include activities that supports the budget hearing review with OSD and OMB. This review process addresses all perspectives including those of the Chairman of the Joint Staff, Under Secretaries of Defense, Service Secretaries, and OMB are considered as an integral part of the decision-making process. This phase ensures that the planning goals and programming objectives are consistent with the National Military and National Security strategies. They also identify and focus on priorities that will be used to develop fiscal and program guidance. Once the above is developed guidance is issued, then they collect the POMs and BES from the military services and defense agencies for review. Each program and budget information is based on the programs and fiscal guidance contained in the JPG; and includes the prior, current, and two budget fiscal years. Budget estimates are collected from Components and reviewed by the OSD and OMB to ensure proper pricing and reasonableness, and excitability. This office with OMB conducts budget hearings with components to ensure that the budget estimates are in alignment with the areas of interest of the Administration and maintain tracking of ongoing Congressional action that could impact. The Major Budget Issues are identified for resolution. Based on the results of the evaluation, draft Program Budget Decisions (PDBs) are written for review and coordination. This occurs between the time the President's Budget is submitted to Congress and up to and including the time that appropriations are enacted. This activity also captures the markups and markdowns as result of the budget negotiation between the Congress, DoD, and OMB. Finals changes to the DoD budget, including "passbacks" are incorporated to the final budget submission to OMB for inclusion to the President's Budget, which is submitted to Congress for funding. The phase called Budget Execution is the allocating funds, monitoring and executing programs and applicable funds during the current budget year. During the budget year the office captures economic assumption as key factor in determining the appropriate funding for a specific program. It realigns funds from the original Congressional enactment or subsequent distribution of funds to new areas through reprogramming, transfers, rescission deferrals and cancellations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FM Reporting Office	Operational Node	This office is responsible for the timely and accurate preparation of all financial reports. This includes formatting and distributing the financial information in accordance with prescribed statutory and regulatory requirements. This also, includes the closing adjustments and reconciliation of the general ledger prior to generating the financial reports.	
FM Treasury Operations Office	Operational Node	This office is responsible for timely and accurate processing of all disbursements and collections. This includes the crediting of deposited amounts to the proper appropriations and the debiting of appropriations for amounts disbursed. The office also manages the investments and overall cash position of the agency and prepares daily and monthly statement of accountability reports for distribution to the Department of the Treasury. It is required to perform the reconciliation of the Department of Defense fund balances with the Treasury fund balance accounts. This office is also responsible to management and record of securities (including purchase, sale and amortization) held for the production of investment revenues, net of premiums and discounts.	
HRM	Operational Node	Human Resources Management (HRM) - The Human Resources Management Core Business Mission Area has the responsibility for key initiatives that directly impact and improve personnel management and readiness throughout the Department of Defense. The Human Resources Management Core Business Mission Area's goal is to improve and transform business practices and information systems to better support the Service members, Department of Defense (DoD) military and civilian employees, the warfighter, and others with a total force approach. Human Resources Management is the fusion of accurate human resources information, with respect to numbers, competencies (occupations, skills, education, and training), reception accounting, individual readiness, patient accountability and status reporting, person's unit and location, and assigned duty within organizations. This includes ensuring timely and accurate access to compensation and benefits for DoD personnel and their families and ensuring that Combatant Commanders have access to the timely and accurate data on personnel and their skill sets. Supporting warfighters with the right types of people, in the appropriate quantity, at the right place and time will significantly increase the opportunity for mission success.	
MSSM	Operational Node	The Materiel Supply and Service Management (MSSM) Core Business Mission Area is the CBMA that covers DoD's supply chain, responsible for ensuring enterprise business capability to maintain readiness for the warfighter and sustain the force at a level of performance that meets or exceeds Combatant Commander's requirements. The key elements of MSSM include the conduct of planning, requesting materiel, sourcing, making/manufacturing/repairing, performing logistics and field services, sustainment operations, delivery of property and forces, receipt and acceptance of items, monitoring payment, calculating supply chain entitlement, retail sales as required, and the return or retrograde of all classes of supply (materiel), personnel, and forces (deployments). When required, MSSM elements include disposal and demilitarization. Field services include such activities as laundry, bath services, and mortuary services. These capabilities are represented in the architecture as conduct planning, manage request, conduct sourcing, perform build, make, maintenance, and sustainment operations, deliver property and forces, manage receipt and acceptance, manage payment, and dispose or return property and materiel.	
RPILM	Operational Node	Real Property and Installations Lifecycle Management (RPILM) - Real Property and Installations Lifecycle Management provides installation assets and services that are available when and where needed, with the joint capabilities and capacities necessary to effectively and efficiently support DoD missions.	
WSLM	Operational Node	Weapon System Lifecycle Management (WSLM) - Represents full lifecycle management, cradle-to-grave, of Defense acquisition of weapon systems and automated information systems to include requirements, technology, development, production, and sustainment.	
Accession Approval Authority	Participant	This performer represents personnel who have decision-making authority to approve/disapprove and record accession-related personnel actions. Accession Approval Authority may include (but not be limited to) a US Military Entrance Processing Command (USMEPCOM) oath official, initial training officer, or unit commander.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accession Shipping Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., creation, verification, validation) associated with shipping related personnel actions: preparing, arranging and coordinating the accession shipping arrangements (e.g., airlines, rental car, lodging) and orders; generating the accession shipping packet and sending it to appropriate parties; and performing the accession shipping brief.	
Accession Specialist	Participant	This performer represents personnel who perform all functions pertaining to the management of Candidate accessions. They are the primary persons responsible for, and with authority to perform accessions processing. These responsibilities include, meeting accession goals for both officer and enlisted personnel, developing direct commissioning and appointment policies for their respective Services, and capturing information for non-military personnel.	
Accountant	Participant	The employee responsible for daily accounting and maintaining financial records for the agency.	
Acquisition Management Oversight	Participant	The management and integration oversight performed by the program manager and/or PEO of DoD programs in the execution phase to determine current status, ascertain if the requirements are achievable and/or requires modification.	
Acquisition Program Management	Participant	The activities performed by the Program Manager to define, develop, execute, monitor, and control a program during its acquisition lifecycle.	
Adverse Actions Approval Authority	Participant	This performer represents personnel who have decision making authority to approve/disapprove adverse actions related personnel actions. This may include the Commander, or next superior authority, role includes a person who is responsible for the overall administration of personnel and pay programs within his/her command authority. (Note: The Commander may delegate authority for some personnel and pay actions to a designated person.)	
Adverse Actions Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., counseling, creation, documenting, verification, and validation) associated with adverse actions related personnel actions. The adverse actions related personnel actions may include (but not be limited to) placing a Member on administrative hold, documenting disciplinary action results, and updating a Member's personnel and pay record with the adverse action information.	
Assignment Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval of requests for assignment related personnel/pay actions (e.g., temporary and permanent assignment orders, waivers, and assignment actions).	
Assignment Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., counseling, creating, documenting, verifying, and validating) associated with assignment related personnel actions. The assignment related personnel actions may include (but not be limited to) creating assignment actions, generating of assignment orders, making recommendations on assignment Personnel Action Requests (PAR), and performing personnel in and out-processing.	
Award Approval Authority	Participant	This performer represents personnel who perform activities associated with reviewing and recommending appropriate action on awards submitted for approval.	
Award Recommender	Participant	This performer represents personnel who perform activities associated with identifying the award type requested for a Member, preparing the award justification, preparing and submitting the award recommendation request, and submitting any award reclama. Recommending Official is the individual who initiates the Award Recommendation Request. Normally the Recommending Officials are the first command supervisors.	
Award Specialist	Participant	This performer represents personnel who perform activities associated with the administration of awards, decorations, and special recognition programs to include individual, unit/organizational and special recognition awards.	
Benefit Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval of requests for benefit related personnel/pay actions.	
Benefit Program Administrator	Participant	This performer represents personnel who perform activities associated with developing, maintaining and assessment benefit programs for for Military and Civilian personnel, Veterans and family members.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Benefit Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., counseling, documenting, verifying, assessing and coordinating) with benefit related personnel actions. The benefit related personnel actions may include (but not be limited to) conducting benefit needs assessment, coordinating benefit services, evaluating benefit plans, providing benefit counseling, processing benefit request, and maintaining benefit profile information.	
Billing Technician	Participant	A role that processes billing transactions to receive collections for outstanding receivables.	
Career Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval and disapproval of all personnel agreement requests, and determine their disposition.	
Career Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., creation, verification, validation) associated with Career Management related personnel actions. The Career Specialist responsibilities include assisting in completing agreement request forms, preparing and processing all supporting documentation (e.g., waiver requests), ensuring accurate completion of all forms pertinent to career planning, and sending all requests to the proper approval authority for authorization. They are also responsible for identifying members eligible for reenlistment and counseling members on their career in the Service. They prepare or update a member's personnel agreement information, execute the oath of enlistment, and facilitate the signing of the personnel agreement.	
Cashiers	Participant	The employee responsible for processing cash inflows and outflows.	
Casualty Approval Authority	Participant	This performer represents personnel who have decision-making authority for casualty related personnel actions. Casualty related actions may include (but not be limited to) making a casualty decision and determining whether an incident requires further review.	
Casualty Specialist	Participant	This performer represents personnel who perform the administrative activities associated with identifying and categorizing casualties (e.g., deceased, missing, and injured), producing casualty reports, coordinating casualty processes (e.g., line of duty determination, legal counsel, search and recovery teams, and assignment of Casualty Assistance Officer), and updating casualty information to resolve casualty status.	
Classification Approval Authority	Participant	This performer represents personnel who have decision-making authority for personnel classification related personnel actions. Personnel classification related actions may include (but not be limited to) reviewing an occupation classification request and making a personnel classification decision.	
Classification Specialist	Participant	This performer represents personnel who perform the personnel classification administrative activities (e.g., assigning, removing, creating, and maintaining individual occupation classifications).	
Cost and Revenue Performance Management	Participant	The Cost and Revenue Performance Manager provides cost, revenue, and performance information to support executive decision making within the Department of Defense. The Cost and Revenue Performance Manager develops cost/performance methods and models, measures the cost and revenue of Department of Defense responsibility segments and other cost objects of interest to executive management, analyzes costs and operational performance across Department components and missions, and forecasts for future needs. These functions are performed for all objects that require a value to be derived; that is, those objects whose monetary value is not otherwise explicitly known.	
Disbursing Officer	Participant	The disbursing officer is accountable to Treasury for cash or cash like transactions including all collections, disbursements and reporting.	
DoD HRM Business Affiliate	Participant	This performer represents the roles of DoD organizations (e.g., Military Services, Financial Management, Common Supplier Engagement, Office of the Secretary of Defense) that have a business relationship with Human Resources Management (i.e., request, receive, or support Human Resources Management services/information). This may also include organizations that have a vested interest in the decision(s) made, are directly impacted by an action taken, or are given an opportunity to provide feedback.	
DoD HRM Individual Customer	Participant	This represents personnel that have an individual relationship with Human Resources Management for which some form of personnel profile/record will be or is established.	
DoD or Non-DoD Source	Participant	The category of the entity providing Perform, Receipt, Acceptance and Return information for award transactions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Operations	Participant	ESOH Operations refers to distinct business areas within DoD that address environmental quality, restoration, range sustainability, occupational health, safety as well as fire and emergency services. While each program within these business areas operates in accordance with specific laws, regulations, DoD guidance, service level guidance and best practices, there are sets of common activities operating across these areas. Common activities include identifying and understanding the environment, safety, health or readiness issue, risk assessment, developing solutions, implementing solutions, developing agreements and the conduct of monitoring.	
External Non-DoD User or Non-DoD Source	Participant	The External Non-DoD User or Non-DoD Source includes external transactions that have both direct and indirect impact on several processes. It includes external non-DoD buyer and seller transactions (e.g., Government as seller of Goods or Services and Intra-Governmental transactions).	
Financial Management	Participant	Financial Management is engaged at all levels within the DoD and throughout the operational theater because accounting and finance underpins every function, transaction, and management decision. Financial Management processes provide timely, reliable, and accurate financial information to enable a shared understanding of how funds are brought into the Department, how allocation decisions are made, how resources are being used to achieve the mission, and how DoD's investments are reported to the American people.	
Force Manager	Participant	This performer represents personnel who perform all activities associated with managing the human resources infrastructure for Department of Defense (DoD) organizations. These activities include managing the implementation of DoD mission plans by formulating force structure, strength projections, accession targets, distributing peacetime authorizations and wartime requirements, and managing personnel inventory.	
Grievance Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., analyzing, transferring, and resolving grievances) associated with grievance-related personnel actions. The grievance-related personnel actions may include (but not be limited to) conducting inquiries, determining the type of grievance, and documenting the resolution.	
Healthcare Team Staff	Participant	Healthcare Team Staff is the entire team providing patient care, to include the Case Manager, other Care providers (e.g., Civilian providers in- and out-of-network) and ancillary support staff. Could also be anyone authorized to add documentation to a patient's clinical record. Includes Managed Care Support Contractors.	
Human Resources Information Approval Authority	Participant	This performer represents personnel who have decision-making authority on management of human resources information related actions. Management of human resources information related actions may include (but not be limited to) providing findings and recommendations, requesting additional justification to support a correction of military record request, making a decision on a correction of military record or Human Resources Information request, requesting and accessing Human Resources Information (i.e., Human Resources Profile and Human Resources Record) and determining what information in the profile becomes an official part of the record.	
Human Resources Management	Participant	Human Resources Management is the fusion of accurate human resources information, with respect to numbers, competencies (occupations, skills, education, and training), reception accounting, individual readiness, patient accountability and status reporting, person's unit and location, and assigned duty within organizations. This includes ensuring timely and accurate access to compensation and benefits for DoD personnel and their families and ensuring that Combatant Commanders have access to the timely and accurate data on personnel and their skill sets. Supporting warfighters with the right types of people, in the appropriate quantity, at the right place and time will significantly increase the opportunity for mission success.	
Human Resources Profile Administrator	Participant	This performer represents personnel who perform activities associated with the management of the Human Resources Information to include the creation, update, and archival of information associated with personnel as authorized by the proper approval authority.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Identity Credential Specialist	Participant	This performer represents personnel responsible for managing the issuance, maintenance, and revocation of all identity credentials. This includes (but is not limited to) the verification of the appropriate parties' (e.g., requester, DoD HRM Individual Customer (e.g., civilian, Member, contractor, dependent)) identity and all actions involved in the management of identity credentials.	
Individual Training Course Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval/disapproval of Individual training course evaluations.	
Individual Training Course Instructor	Participant	This performer represents personnel who perform activities associated with selecting from available resources needed to conduct the individual training course, scheduling time and date of the course, and teaching and testing students on course material.	
Individual Training Course Specialist	Participant	This performer represents personnel who perform activities associated with identifying training course requirements, training course resources, creating training courses and evaluating training courses.	
Investigation Officer	Participant	This performer represents personnel who perform activities associated with conducting an investigation (e.g., Line of duty, Casualty, Adverse Actions).	
Labor Relations Specialist	Participant	This performer represents personnel who perform all functions pertaining to the management of labor relations. They are the primary persons responsible for, and with authority to perform, activities related to labor relations. These responsibilities may include (but not be limited to) obtaining recognition, clarifying bargaining unit and representation, establishing communication protocol, initiating the bargaining process, preparing for and conducting negotiations, performing head agency reviews, administering agreements, and providing for government-wide consultation.	
Line of Duty Approval Authority	Participant	This performer represents personnel who have decision-making authority to approve/disapprove Line of Duty (LoD) related personnel actions. The LoD-related personnel actions may include (but not be limited to) LoD decisions (e.g., interim and final) and appeals.	
Line of Duty Specialist	Participant	This performer represents personnel who perform non-decision activities (e.g., administrative processing, providing investigation recommendations, and distributing information to appropriate parties) associated with determining whether the circumstance of a Member's disease, injury, illness or death was in the Line of Duty (LoD) or not in the LoD. They are also responsible for documenting and updating LoD related information in a Member's profile.	
Materiel Supply and Service Management	Participant	Materiel Supply and Service Management includes supply chains for the provision of materiel supply to maintain readiness of non-deployed Warfighters and for deployed Warfighters to support operations at required Operational OPTEMPO levels with required responsiveness. The key elements of this Core Business Mission include all aspects associated with requesting, acquiring, sourcing, storing, transporting, receiving and accepting, and monitoring payment of all classes of supply, up to the point where those supplies are provided to operational units and deployed Warfighters.	
Medical Provider Approval Authority	Participant	This performer represents personnel who are U.S. military privileged (licensed) healthcare providers or U.S. privileged (licensed) healthcare providers employed by, or under contract/subcontract to the U.S. Government or U.S. Government contractor, who have privileges to make medical qualification decisions and is responsible for performing medical prescreenings, medical examinations, and determining medical qualification. The Medical Provider Approval Authority may include (but not be limited to) Chief Medical Officer, Assistant Chief Medical Officer, HQ/J-7/Medical Plans and Policy Directorate, or Command Surgeon.	
Medical Provider Specialist	Participant	This performer represents personnel who are U.S. military privileged (licensed) healthcare providers or U.S. privileged (licensed) healthcare providers employed by, or under contract/subcontract to the U.S. Government or a U.S. Government contractor, who are responsible for performing medical prescreenings and medical examination actions but have no privileges to make medical qualification decisions.	
Medical Technician	Participant	This performer represents personnel that are non-medical providers who are responsible for transcribing the medical prescreen information, requesting additional medical information if necessary, conducting medical briefings and tests, and notifying the Services.	
Member	Participant	This performer represents personnel serving in the US Army, Navy, Air Force, Marine Corps (e.g., regular reserve and Guard components; active; inactive; retired) or Coast Guard (when transferred to operational control under the Navy).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Milestone Decision Authority	Participant	The MDA is the designated individual with overall responsibility for a program. The MDA shall have the authority to approve entry of an acquisition program into the next phase of the acquisition process and shall be accountable for cost, schedule, and performance reporting to higher authority, including Congressional reporting.	
Military Services	Participant	This performer represents personnel who are part of a Department of Defense (DoD) Armed Force. A DoD Armed Force is an Armed Force regularly under the control of the Department of Defense: the Army, Navy, Air Force, Marine Corps, and Department of Homeland Security Coast Guard.	
Non-DoD HRM Business Affiliate	Participant	This performer represents any roles from non-DoD organizations (e.g., Federal, state and local governments; Department of State; Congress; Veterans Affairs) that have a business relationship (i.e., request, receive, or support Human Resources Management (HRM) services) with HRM.	
Organization Manager	Participant	This performer represents personnel who perform activities associated with the formulation of Department of Defense (DoD) organizations within DoD command relationships that are needed to accomplish assigned missions within budgetary constraints. This also includes development of organization specifications related to the allocation of human resources and manpower requirements, establishing and maintaining the Organization Unique Identifier (OUID) and relationships between the OUID and the organization, and tailoring organizations to reflect revisions to mission implementations.	
Pay Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval/disapproval and certification of payroll processing actions (e.g., verify and validate pay eligibility and certify pay and reimbursements).	
Pay Specialist	Participant	This performer represents personnel who perform the pay administrative activities (e.g., counseling, creation, documenting, verification, and validation) associated with payroll processing actions (e.g., determining pay, allowances, deductions, reimbursements, and calculation of pay).	
Performance Evaluation Administrator	Participant	This performer represents personnel who perform activities associated with administering performance evaluation Members and employees.	
Performance Evaluation Approval Authority	Participant	This performer represents personnel who perform activities associated with ensuring accuracy and completion of Performance Report form, providing periodic performance feedback, and approving requests for personnel/pay actions (e.g., performance evaluations, refusals, appeals). The Senior Rater has the final say over evaluation decisions.	
Performance Evaluation Specialist	Participant	This performer represents personnel who perform activities associated with managing the personnel evaluation process to include identifying personnel due for evaluation reports and raters that will provide their input to the individual's evaluation report and closing out the process by maintaining performance files and updating performance evaluation records.	
Personnel Development Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval/disapproval of functions pertaining to managing the development of personnel.	
Personnel Development Education Instructor	Participant	This performer represents personnel who perform activities associated with selecting available resources needed to conduct the education course, scheduling time and date of the course, and teaching and testing students on course material.	
Personnel Development Specialist	Participant	This performer represents personnel who perform activities (e.g., competency management, course formulation, and instruction) associated with enhancing a person's personal and professional competencies. They are also responsible for documenting and updating personnel development related information in a Member's profile.	
Personnel Distribution Approval Authority	Participant	This performer represents personnel who perform activities associated with validating or non-validating personnel requirement requests.	
Personnel Distribution Specialist	Participant	This performer represents personnel who perform activities associated with implementing the personnel distribution plan and processing personnel requirement requests.	
Personnel Grade Change Approval Authority	Participant	This performer represents personnel who perform decision-making activities associated with personnel grade change. This may include (but not be limited to) approving or disapproving promotion grade change orders and demotion grade change orders.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Personnel Grade Change Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., identifying, conducting, administering, reviewing, generating, and executing) associated with promotion and demotion related personnel actions. The promotion and demotion related personnel actions may include (but not be limited to) identifying promotion candidates, conducting promotion selection, executing promotion, administering promotion appeals, reviewing demotion authorizing documentation, generating demotion authorizing documentation, and executing the demotion.	
Personnel Readiness Approval Authority	Participant	This performer represents personnel who have decision-making authority for personnel readiness related actions. These actions may include (but not be limited to) making decisions on risk management plans.	
Personnel Readiness Specialist	Participant	This performer represents personnel who perform activities associated with managing, measuring, and reporting the readiness of the Department of Defense (DoD) and its subordinate Components to execute the DoD missions.	
Personnel Security Approval Authority	Participant	This performer represents personnel who are responsible for making decisions associated with personnel security clearances and conducting the adjudication process.	
Personnel Security Specialist	Participant	This performer represents personnel responsible for managing personnel security clearances. This includes conducting personnel security investigations, adjudicating security clearances, enforcing the outcomes of the determination made and monitoring any changes that may affect a person's clearance eligibility status.	
PHD Stewardship	Participant	The responsibility for performing stewardship of DoD's hazardous material information as defined by DoD requirements. Stewardship includes receiving, validating and fulfilling requests for new product hazard data (PHD) to be added to the master product hazard data (MPHD) warehouse, and updating incomplete or inaccurate records as necessary.	
Physical Evaluation Approval Authority	Participant	This performer represents personnel who have decision-making authority in the physical evaluation process. This may include (but not be limited to) assigning personnel restrictions, providing personnel classification recommendations, placing the Member on probation status, retaining the Member in specialty, sending the Member to Medical Evaluation Board (MEB), and providing disposition(s) on fit for duty classification and/or physical evaluation severity rating.	
Physical Evaluation Specialist	Participant	This performer includes personnel that perform activities associated with managing the physical evaluation process to include (but not limited to) counseling a Member on the physical evaluation process, submission of reports and notifications to appropriate parties, processing any requests from the Member and closing out the physical evaluation process.	
Physical Fitness Approval Authority	Participant	This performer represents personnel who have decision-making authority to approve/disapprove physical fitness-related personnel actions. The physical fitness-related personnel actions may include (but not be limited to) approving or disapproving a physical fitness program.	
Physical Fitness Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., resourcing, training, evaluating) associated with physical fitness-related personnel actions. The physical fitness-related personnel actions may include (but not be limited to) determining physical fitness objectives, identifying requirements, creating physical fitness tasks, and conducting and assessing a physical fitness program.	
Position Manager	Participant	This performer represents personnel who perform the activities associated with formulating specifications for the peacetime authorizations and the wartime requirements needed to accomplish tasked Department of Defense missions. Managing a position includes the occupation, skill, position requirements, education, and training specifications that the position requires to perform the specified mission.	
Product Hazard Data Source Subscription Service	Participant	The external non-DoD source (e.g., manufacturer, supplier, vendor) that provides product information used in the management of hazardous materials.	
Quality of Life Program Specialist	Participant	This performer represents personnel who perform Quality of Life (QoL) program management activities (e.g., identifying a candidate QoL program, establishing a QoL program, maintaining a QoL program) associated with Quality of Life programs (e.g., Family Support programs, and Morale, Welfare and Recreation programs).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Quality of Life Specialist	Participant	This performer represents personnel who perform Quality of Life (QoL) administrative activities (e.g., performing enrollment processes, providing services, collecting and documenting information, performing follow-up, collecting feedback and producing reports) associated with delivering Quality of Life programs (e.g., Family Support programs, and Morale, Welfare and Recreation programs).	
Rater	Participant	This performer represents personnel who perform activities associated with providing periodic performance feedback, initiating performance reports (usually the Member's immediate supervisor), and passing the report through the Rating Chain. Raters may include (but not be limited to) Rater and Intermediate Rater (optional in the Army, Marine Corps, and Navy). The Intermediate Rater is the second evaluator in the rating chain, after the Rater, to endorse a performance report. (a.k.a. additional rater, secondary rater).	
Real Property and Installation Lifecycle Management	Participant	Real Property and Installations Lifecycle Management Core Business Mission governs the execution of Real Property Construction, Restoration, Modernization, Sustainment, Installation Support Services, Real Property Disposal and Environmental Safety and Occupational Health Services to fulfill a business requirement.	
Recovery Coordination Program Approval Authority	Participant	This performer represents personnel who have decision-making authority in matters related to Human Resources (HR) Recovery Coordination Program (RCP). These decision-making activities may include (but not be limited to) enrolling Recovering Service Member(s) in the RCP, approving Human Resources (HR) Recovery Plan and assigning a Recovery Care Coordinator.	
Recovery Coordination Program Specialist	Participant	This performer represents personnel who perform non-decision-making activities (e.g., administrative processing, collection of enrollment information, collection of needs assessment information, and submitting reports and notifications to appropriate parties) associated with the Human Resources (HR) Recovery Coordination Program. This may include (but not be limited to) the Recovery Care Coordinator, Non-Medical Case Manager, and the Medical Case Manager.	
Recruitment Approval Authority	Participant	This performer represents personnel who have decision-making authority to approve/disapprove and record recruiting-related personnel actions, to include waivers.	
Recruitment Specialist	Participant	This performer represents personnel who perform all functions pertaining to recruitment. They are the primary authorized persons responsible for performing recruitment processes. These responsibilities may include (but not be limited to) recruiting both officer and enlisted personnel to begin the transition from civilian life to military life and to act as a liaison between the military and the general populous.	
Retirement Approval Authority	Participant	This performer represents personnel who are officials that approve/disapprove actions pertaining to the retirement process.	
Retirement Specialist	Participant	This performer represents personnel who perform the functions pertaining to the management and execution of retirement. They are the primary authorized persons responsible for performing retirement processing. These responsibilities may include (but not be limited to) meeting reduction-in-force quotas, ensuring the correct amounts of eligible retirements from each grade and rank and specialty, managing voluntary and involuntary retirements, and sending retirement data to the proper authority.	
Separation Approval Authority	Participant	This performer represents personnel who perform activities associated with the approval of separation-related personnel actions. The separation-related personnel actions may include (but not be limited to) making a final separation determination, creating separation order requirements, and issuing separation notifications.	
Separation Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., creation, verification, validation) associated with separation related personnel actions. The separation-related personnel actions may include (but not be limited to) the creation of a separation request, Member counseling, executing the separation decision, and updating separation record information.	
Shared	Participant	The Shared pool contains processes (and related diagram objects) that are executed by organizations in more than one Core Business Mission. Processes, gateways, data objects and events in this pool are tagged with the appropriate stakeholder attributes to indicate the Core Business Missions using these objects.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Staff Acquisition Approval Authority	Participant	This performer represents personnel who are responsible for making a hiring decision on a position candidate.	
Staff Acquisition Specialist	Participant	This performer represents personnel who perform all functions pertaining to the management of staff acquisition. They are the primary persons responsible for, and with authority to perform, staff acquisition processing. These responsibilities may include (but not be limited to) developing staff acquisition strategies and plans, sourcing and evaluating candidates, and extending offers of employment to selected candidates.	
Temporary Pool for IGT	Participant	This is a temporary pool to hold Intragovernmental (IGT) Order objects for BEA 9.0. The objects were removed from P2P and will be placed in other E2E's (e.g. O2C) in a future release.	
Time, Absence, and Labor Approval Authority	Participant	This performer represents personnel who perform activities associated with the certification and/or re-certification (for adjustments) of time, absence, and labor information (e.g., enabling payroll labor costs to be distributed and charged to appropriate cost centers, approving or disapproving absence requests (e.g., organization controlled absence) , leave requests and leave sell-back requests, categorizing unauthorized absence personnel, deciding the actions to be taken concerning unauthorized absences). This may also include personnel who review missing person information, deliberate, and make recommendations for categorizing missing individuals.	
Time, Absence, and Labor Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., counseling on excess leave, documenting labor allotted to specific tasks, projects and/or programs, verifying recorded or adjusted time worked) associated with authorized (e.g., leave, organization controlled absence) and unauthorized absence personnel actions, labor information, leave balance, absence requests, leave requests, leave sell-back requests, and updating the Member's record.	
Transfer Approval Authority	Participant	This performer represents personnel who have decision-making authority to approve/disapprove transfer-related personnel actions. The transfer-related personnel actions may include (but not be limited to) the concurrence/nonconcurrence of a transfer, conducting transfer review, and making final transfer determination.	
Transfer Specialist	Participant	This performer represents personnel who perform the administrative activities (e.g., counseling, creation, documenting, verification, and validation) associated with transfer-related personnel actions. The transfer-related personnel actions may include (but not be limited to) verifying transfer eligibility, processing waivers, executing the transfer decision, and updating transfer record information.	
Warfighter or DoD User or DoD Source	Participant	The Warfighter or DoD User or DoD Source includes warfighting combatant commanders, commanders, military, civilian, contractor personnel and other DoD agency users.	
Weapon System Lifecycle Management	Participant	Weapon System Lifecycle Management represents full lifecycle management, cradle to grave, of Defense acquisition of weapon systems and automated information systems to include requirements, technology, development, production, and sustainment.	
Work Unit	Participant	The personnel at the Installation or Component that submits a request for product hazard data (PHD) to the PHD Steward on behalf of the Installation or Component.	
Workforce Analyst	Participant	This performer represents personnel who perform all activities associated with performing workforce analysis. These activities include conducting analysis for required workforce information (e.g., strength, authorization, strength planning and grade distribution), and providing workforce analysis information (e.g., force and simulation modeling information, strength planning information, prospect location information and force restructuring programs information) to DoD and other branches of the federal government.	
Workforce Budget Manager	Participant	This performer represents personnel who perform the administrative activities associated with the projection of human resources requirements in terms of specifications sufficient to support preparation of the Department of Defense (DoD) Human Resources budget. This also includes developing, reviewing and adjusting budget estimates based on program requirements and in accordance with budgetary and congressional guidance.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Workforce Planner	Participant	This performer represents personnel who perform activities associated with projecting manpower requirements (both budgetary and executionary) and personnel inventory to support preparation of the Department of Defense (DoD) budget. This also includes personnel who perform activities associated with projecting end-strength based on budgeted funds, developing and publishing the personnel plans (e.g., personnel distribution plan).	
Workforce Programmer	Participant	This performer represents personnel who perform the administrative activities associated with compiling and projecting future manpower requirements, documenting these requirements, integrating them into the overall planning, programming, and budgeting process, and translating them into a form that provides a basis for personnel procurement, training, and assignment.	
1.1 Recruit/retain right qlty skilled personnel	Project	Recruit and retain the right quality skilled personnel to meet mission requirements. (USD(P&R))	
1.2 Improve the Readiness of the CEW	Project	Improve the readiness of the Civilian Expeditionary Workforce (CEW). (USD(P&R))	
1.3 Increase Special Forces Personnel	Project	Increase the number of Special Forces Personnel. (USD(P&R))	
1.4 Develop transparent decision-making process	Project	Develop and institutionalize a transparent systemic decision-making process to appropriately balance the DoD Total Workforce to ensure mission readiness. (USD(P&R))	
2.1 Execute FIAR strategy and plans - audit ready	Project	Execute the Financial Improvement and Audit Readiness (FIAR) strategy and plans to achieve audit readiness by Fiscal Year (FY) 2017. (USD(C)/CFO)	
2.2 Ensure Processing of JUON Reprogramming	Project	By FY 2012, once detailed supporting documentation is finalized, the DoD will ensure processing of the Joint Urgent Operational Needs reprogrammings to meet a goal of approval within two (2) congressional calendar months. (USD(C)/CFO)	
2.3 Achieve a Commercial Payment	Project	BY FY 2012, the DoD will achieve a commercial payment improper payment of 0.11 percent or less. (USD(C)/CFO)	
2.4 Complete 16 FIAR Plan Milestones	Project	By FY 2013, the DoD will complete sixteen interim milestone, which include validations of entities where ERPs have been integrated, MDAPs, FBwT Reconciliations, and Existence, and Completeness. (USD(C)/CFO)	
3.1 Execute the DoD IT Enterprise strategy and map	Project	Execute the DoD IT Enterprise Strategy and Roadmap. (DoD CIO)	
3.2 Strengthen oversight of IT investments	Project	Strengthen the oversight of Information Technology investments. (DoD CIO)	
3.3 Integrate cyber sec across DoD Info Enterpr	Project	Integrate cyber security across the DoD Information Enterprise. (DoD CIO)	
3.4 Strategy for Mission Critical Access	Project	Develop long term strategy to provide for and protect mission critical access to radio frequency spectrum. (DoD CIO)	
4.1 Implement & enforce affordability constraints	Project	Implement and enforce affordability based constraints on program acquisition and sustainment costs. (USD(AT&L))	
4.2 Improve Acq processes - MDAPs and MAIS	Project	Improve Acquisition processes to reduce costs and improve productivity for major defense acquisition programs (MDAPs), major automated inforamtion systems (MAIS), and services. (USD(AT&L))	
4.3 Increase use of competition	Project	Increase the use of competition to control costs of goods and services. (USD(AT&L))	
4.4 Improve DoD's rate of successful buying plans	Project	Improve the Department's rate of successful execution of buying plans reflected in the FYDP. (USD(AT&L))	
4.5 Increase the ROI on S&T spending	Project	Increase the ROI on S&T Spending. (USD(AT&L))	
4.6 Identify & preserve essential capabilities	Project	Identify and preserve essential capabilities in the U.S. defense industrial base. (USD(AT&L))	
4.7 Provide incentives to industry - economies	Project	Provide incentives to industry to seek economies that drive down DoD procurement and life-cycle costs. (USD(AT&L))	
4.8 Increase productivity of acquis systems	Project	Increase the productivity of each Military Department's Acquisition System. (USD(AT&L))	
5.1 Improve capability to measure facility energy	Project	Improve DoD's capability to measure and verify individual facility energy use. (USD(AT&L))	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
5.2 Improve timeliness/accuracy of energy decisions	Project	Improve the timeliness and accuracy of DoD's facility energy business decisions by exposing effective data to every authorized user in an automated and integrated manner. (USD(AT&L))	
5.3 Reduce risk from disrupt to commercial grid	Project	Reduce the risk from potential disruptions to the commercial grid to improve the energy security of installations. (USD(AT&L))	
5.4 Pursue DoD procurement of PEV	Project	Pursue DoD procurement or lease of plug-in electric vehicles (PEV) for non-tactical fleet. (USD(AT&L))	
5.5 Expand use of 3rd party financing for energy	Project	Expand the use of 3rd party financing for energy projects (ESPC/UESC, PPAs and EULs). (USD(AT&L))	
5.6 Effectively manage Op Energy use	Project	Effectively manage Operational Energy (OE) use to reduce consumption. (USD(AT&L))	
6.1 Improve the supply chain E2E process	Project	Improve the supply chain end-to-end process. (USD(AT&L))	
6.2 Improve cycle time to hire civ employees	Project	Improve the cycle time to hire civilian employees. (USD(P&R))	
6.3 Improve bus ops thru d.bus systems & BEA	Project	Improve business operations through optimal use of defense business systems and the Business Enterprise Architecture (BEA). (DoD DCMO)	
6.4 Complete mapping of E2E H2R & P2P in FY12	Project	Complete mapping of End-to-End processes ("Hire-to-Retire" and "Procure-to-Pay" in FY 12-13). (DoD DCMO)	
7.1 Institutionalize operational contract support	Project	Institutionalize operational contract support. (USD(AT&L))	
7.2 Establish visibility on contingency bus. ops	Project	Establish complete visibility on contingency business operations to achieve accountability and build a comprehensive common operating picture. (USD(AT&L)), (USD(C)/CFO), (DoD DCMO)	
7.3 Adapt bus processes for COMISAF/USFOR-A	Project	Adapt business processes to include operational criteria in order to execute the COMISAF/USFOR-A campaign plan. (USD(AT&L)), (USD(C)/CFO), (DoD DCMO)	
Budget Lookup	SvcV-1 Service	This service provides access to the last President's Budget, Current Estimate, and POM/BES submissions.	
Contract Lookup	SvcV-1 Service	This service provides access to EV data for Acquisition Contract for MDAPs using various search criteria.	
Critical Technology Lookup	SvcV-1 Service	This service provides access to unclassified Key Performance Parameter data for MDAPs.	
Milestone Lookup	SvcV-1 Service	This service provides access to Milestone data for MDAPs.	
Program Lookup	SvcV-1 Service	This service provides access to program data for MDAPs.	
Unit Cost Lookup	SvcV-1 Service	This service provides access to Nunn-McCurdy Unit Cost information.	
Enterprise Service Consumer	Service Consumer	A collection of users, systems, organizations of DoD doing business with the Department of Defense.	
AIM - Budget Lookup	SvcV-1 Service Interface	This system interface represents the requirements to exchange data between AIM - Budget Lookup.	
AIM - Contract Lookup	SvcV-1 Service Interface	This system interface represents the requirements to exchange data between AIM - Contract Lookup.

Acceptance Data	System Data Exchange	Transaction data detailing that constructive acceptance has occurred or that ownership of legal title and accountability of goods and services has been transferred to the government buyer that allows the government supplier to record a receivable transaction.	
Acceptance Evidence	System Data Exchange	Documentation of the act of assuming ownership of legal title and accountability of goods tendered and services rendered, excluding Real Property Placed in Service Notification. This serves as proof that the deliverables received or services rendered have been provided fulfilling specified terms and conditions against the previously agreed upon obligating document, contract, and/or intragovernmental order between the supplier and the buyer.	
Accepted Intragovernmental Order	System Data Exchange	Data of an intragovernmental order that has been accepted by the government supplier that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute.	
Accepted Letter of Offer and Acceptance Document	System Data Exchange	Accepted Letter of Offer and Acceptance is a Foreign Military Sales Trust Fund case document that has been countersigned by USG and signed by the purchaser, if required, accepting terms and conditions of the offer. The document provides information necessary to execute the case in the Foreign Military Sales Trust Fund and is the official document for recording contract (budget) authority at the case level.	
Accepted Purchase Request	System Data Exchange	Document which has been reviewed by the procurement organization and found to adequately describe the required supplies or services so that a procurement can be initiated. Some procuring activities actually refer to the document by this title, others use different titles such as Procurement Directive. Combined with specifications, the Statement of Work (SOW) and Contract Data Requirements List (CDRL), it is called the PR Package, a basis for solicitation.	
Accounts Payable Adjustments	System Data Exchange	Adjustment made to outstanding payable that may result from payments made to vendor or credits received from vendor. It also includes adjustments to reflect discrepancies found during periodic account reconciliation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Accounts Payable Offset Pro Forma Entries	System Data Exchange	This is the general ledger impact of offsetting the balance of an accounts payable. Offsetting accounts payable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	
Accounts Payable Pro Forma Entries	System Data Exchange	The debit and credit affects of accounts payable pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Accounts Receivable Offset Pro Forma Entries	System Data Exchange	This is the general ledger impact of offsetting the balance of an accounts receivable. Offsetting accounts receivable can be a result of overpayment, changes in the terms and condition of a contract, or any other adjustments during a specific accounting period.	
Accounts Receivable Principal Balance	System Data Exchange	This is the receivable principal balance used to establish the initial amount of the accounts receivable for specific customer.	
Accrued Liabilities Pro Forma Entries	System Data Exchange	The debit and credit affects of accrued liability pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Acknowledged Intragovernmental Order	System Data Exchange	An intragovernmental order that has been accepted by the government supplier and subsequently acknowledged by the government buyer that includes terms and conditions agreed upon between the government supplier and the government buyer and meets the requirements of applicable regulations, policy and statute. The intragovernmental order may contain the original or modified order that has been mutually agreed upon between the buyer and government supplier.	
Acquisition Program Baseline Revision	System Data Exchange	Revision to the existing program baseline for cost, schedule, performance parameters, constraints, objectives and milestones. This information is developed by the Program Manager for submission to the Decision Authority for approval, which will then guide the PM in the execution of the acquisition program.	
Additional Information Request	System Data Exchange	The form used to request additional financial or non-financial information to satisfy cost/performance requirements. Request includes, in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Additional Reconciliation Data	System Data Exchange	Additional supporting documentation that describes the discrepancies between the Treasury and Department of Defense Fund Balance account.	
Administrative Procurement Change Request	System Data Exchange	Requirement to modify a procurement instrument as a result of administering the contract.	
Advance Ship Notice Data	System Data Exchange	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail and provides an ordered flexibility to convey information.	
Advice of Payment	System Data Exchange	A detail explanation of a payment sent to the vendor, or other party owed by the government.	
AFS Reports	System Data Exchange	These are automated financial statements (AFS Reports) for external agencies that have been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Alternate Means Product Hazard Data Information	System Data Exchange	The product hazard data (PHD) which was pursued by alternate means from an external source is received.	
Alternate Means Product Hazard Data Request	System Data Exchange	The product hazard data (PHD) which is needed is pursued by alternate means from an external source.	
Amortization and Interest	System Data Exchange	The schedule and amount of investment premiums or discounts recognized on securities through the maturity date of the investment.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Analytical Results	System Data Exchange	The collection of one or more of the following: forecast, comparative analysis, trend analysis. A forecast might represent a prediction of future financial needs or trends based on analysis of available historical cost information and planned changes in capabilities. A comparative analysis might represent a comparison of how similar budget programs or business activities are executed by multiple organizations from a cost and performance management perspective. A trend analysis might represent how a single budget program or business activity has performed over multiple reporting periods. These analytical results will support many types of business decision making, to include planning, future years budget formulation, and other resource tradeoffs.	
Anticipated Adjustment	System Data Exchange	The amount recorded by the Government for a change in the amount to be paid or owed by the Government supplier. (Examples of causes for an adjustment include change in quantity ordered, Approved additional work, etc.)	
Anticipated Customer Requirements	System Data Exchange	Projected demand for products or services.	
Apportionment	System Data Exchange	An apportionment is a distribution made by the Office of Management and Budget of amounts available for obligation in an appropriation. The apportioned amount limits the obligations that may be incurred. An apportionment may be further subdivided by an agency into allotments, sub allotments, and allocations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Approved Apportionment	System Data Exchange	Approved apportionment is the notification from OMB that the DoD's apportionment request has been approved and available for distribution to the components and/or services.	
Approved Emergency Implementation	System Data Exchange	The DSCA's approval to implement a case in the Foreign Military Sales Trust Fund prior to receipt of the amount due with acceptance. The emergency implementation action is taken only when the case document is in accepted status.	
Approved Government Purchase Card Statement	System Data Exchange	A request for payment from a vendor or other party owed by the government that has been approved by a government approver and confirmed to comply with the terms and conditions of the contract. For payment to Government Purchase Card providers, approval constitutes certification. Approved Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Performance-Based Payment Requests, Progress Payment Requests, Grants, and Cost Vouchers.	
Approved Payment Request	System Data Exchange	Data from a supplier that has been confirmed to comply with the terms and conditions of the contract that will allow a payment to be made.	
Approved Request for Proposal	System Data Exchange	A request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been approved by a contracting officer for release to suppliers. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Architect-Engineer Qualifications (Part II)	System Data Exchange	General qualification information such as past experience profiles, employee type by discipline and average annual revenue supplied for Architecture and Engineering firms. This information may be kept on file for future contract determination use.	
Arrival Data	System Data Exchange	Acknowledgement of the arrival or delivery of passengers or cargo at a destination.	
Assignment Order Requirement	System Data Exchange	This includes information related to an official requirement to generate an assignment order. An official order requirement may be initiated by an approved assignment action. The information may include (but not be limited to) personnel action status, assignment start and stop date, and personnel action identifier. The information contained in this ICOM will be the basis for a financial commitment and/or obligation of funds in the Financial Visibility Business Area.	
Assignment Profile Data	System Data Exchange	This includes assignment information associated with a personnel/pay record. The information may include (but not be limited to) assignment type, assignment start and stop date, and assignment location.	
Assignment Profile Update Data	System Data Exchange	This includes updated assignment information associated with a personnel/pay record. This may include (but not be limited to) assignment type, duty start and stop date, and duty location.	
Assignment Request	System Data Exchange	This includes the career preferences and applicant data of potential candidates for an assignment. The information may include (but not be limited to) assignment preferences, career goals, and training.	
Authorization to Receive Financing Payment	System Data Exchange	Authorization from the contracting officer or their representative for the contractor to submit financing payment requests.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Award Order Requirement	System Data Exchange	This includes information related to an official requirement to generate an award order. An official order requirement may include an approved award recommendation which requires an order. The information contained in this ICOM will be the basis for a financial commitment and/or obligation of funds in the Financial Visibility Business Area.	
Awarded Agreement	System Data Exchange	An agreement awarded to a commercial supplier. An agreement is a written instrument of understanding following negotiations between an agency, contracting activity, or contracting office and a contractor, where terms, such as pricing and/or discounts have been negotiated. An agreement does not guarantee a purchase volume, level, or value to the supplier; however, contains contract terms and clauses applying to future contracts between the parties during its term; a description, as specific as practicable, of supplies or services to be provided; and methods for pricing, issuing, and delivering future contracts or orders under the agreement. It may include comprehensive terms and conditions, performance criteria or service level requirements that are expected and agreed to. Future contracts or orders will incorporate by reference or attachment the required and applicable clauses agreed upon in the agreement. An agreement is not a contract or order.	
Awarded Procurement Instrument or Supplemental Procurement Instrument	System Data Exchange	A procurement instrument that has been awarded to an external supplier and is a mutually binding legal relationship obligating the supplier to furnish the goods or services (including construction) that can be invoiced, and the buyer to provide payment for those goods and services as agreed upon by the procurement instrument. The awarded procurement instrument may contain the original or modified procurement instrument that has been mutually agreed upon between the buyer and supplier. It includes all types of actions that obligate the DoD to an expenditure of funds and that, except as otherwise authorized, are in writing. In addition to bilateral instruments, procurement instruments include, but are not limited to, awards and notices of awards; job orders or task letters issued under basic ordering agreements; letter contracts; and orders, such as purchase orders, under which the contract becomes effective by written acceptance or performance. Procurement Instruments could include Fixed-price, Cost-reimbursement, Incentive, Cooperative Agreements, Other Transactions, Indefinite-Delivery type orders, order against Basic Agreements, Basic Ordering Agreements and Federal Supply Schedules. A procurement instrument may be funded or unfunded and does not necessarily create an obligation of funds (an example of no funding would be a basic ordering agreement or a contract modification changing the period of performance).	
Base for Programming	System Data Exchange	This information establishes the base from which reprogramming actions may be taken. It identifies line items for each appropriation covered in the DoD Appropriations, except those appropriations having no budget activity subdivisions in the budget document presentation.	
Benefit Administration Data	System Data Exchange	This is data required by external organizations such as Veterans Affairs (VA) or Office of Personnel Management (OPM) to control participation in programs supporting Department of Defense Human Resources.	
Benefit Data	System Data Exchange	This is data on a person, or related general population information, regarding benefit enrollment, costs, and benefit program availability.	
Benefit Debt Disposition	System Data Exchange	This is an overall flow of benefit debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Budget Authority	System Data Exchange	This is the legal funding document that enables the component to incur obligations. In addition to the funding information, the document includes statutory limitations imposed on a particular appropriation or individual line item. The basis for the release is the program authority.	
Budget Data	System Data Exchange	The comprehensive financial plan for a program. It includes the on-budget and off-budget amounts combined to derive a total of program fiscal activity. Also includes data related to operations for a fiscal period in terms of estimated costs, obligations and expenditures; source of funds for financing including anticipated reimbursements and other resources, and history and workload data for the projected program and activities.	
Budget Lookup Service Information Reply	System Data Exchange	Transaction data detailing about the last President's Budget, Current Estimate, and POM/BES submissions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Budget Lookup Service Information Request	System Data Exchange	Request transaction data for Budget Lookup Service.	
Budget Review Analysis	System Data Exchange	Budget review analysis reflects the result of the joint budget review between OMB and OSD on budget submissions from the components. The analysis should reflect the results of the following budget review activities: - Open forum for deliberation on key issues within DoD and across all organizations - Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs - Review of budget submission that conforms with legal and regulatory guidance on budgetary resources - Review of budget submission that is well justified and balances mission requirements with available resources.	
Budgetary Resources Temporary not Available	System Data Exchange	The identification of authority transferred to or from the General Fund of the Treasury that is identified as temporarily not available to incur obligations and expenditures. Congress can specify availability and criteria for spending these funds. Funds temporarily not available may include budgetary resources subject to the cancellation of expired and no-year accounts, enacted rescissions, capital transfers, budgetary resources issued pursuant to public law, and other authority withdrawn.	
Cancel Payment Notification	System Data Exchange	Notification received by the disbursing officer from authorized official that certifies that a payment cancellation request has been received and processed.	
Candidate Non-Selection Data	System Data Exchange	Notification that a candidate has not been selected, has declined an offer, or has terminated processing for a position.	
Capital Asset Valuation Data	System Data Exchange	This is the information that establishes the initial and updates to capital asset recorded costs. It includes the full cost incurred to bring an asset to form and location suitable for its intended use.	
Cash Receipt and Payment Data	System Data Exchange	This is any supporting documentation related to remittance (i.e. copy of checks, demand letter, advise of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Cash Receipts	System Data Exchange	This is any supporting documentation related to remittance for payments for goods or services (i.e. copy of checks, demand letter, advice of payment documentation). This information is used in conjunction with deposit information to collect funds to the appropriate appropriation.	
Certified Business Partner Payment Data	System Data Exchange	Generated as a result of the supply chain entitlement function that identifies the amount that should be paid to a specific payee. Includes scheduled payment date, and the net amount due that has been determined in accordance with the terms and conditions of the contract and in accordance with the Prompt Payment Act. Entitlements are only approved after proper authorization, verification of fund availability, and review for duplicate payment. The Certified Business Partner Payment is certified by the Certifying Officer in accordance with the Certifying Officer Legislation.	
Certified Business Partner Payment Rejection	System Data Exchange	A vendor payment submitted to Disbursing that has been rejected and returned to Supply Chain Entitlement.	
Certified Financial Statement Data	System Data Exchange	This is information derived from financial statements for external agencies that have been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Financial Statement Package	System Data Exchange	This is the financial statement package for external agencies that has been certified as meeting Federal Accounting Standards Advisory Board and other compliance requirements by the Accounting Process.	
Certified Human Resources Management Pay Data	System Data Exchange	This is the record, approved by a designated official, of gross pay earnings and entitlements by category, less deductions (statutory and elective) that results in the net disbursement. This record also reflects active employee debt balance.	
Certified Investment Payment Request	System Data Exchange	This is the record, approved by a designated official, detailing investment payment request.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Characterized ESOH Issue	System Data Exchange	An issue, problem, concern, or aspect that is reviewed, scoped, analyzed, studied so that the nature and extent of the issue is properly characterized and understood. For example, a Characterized ESOH Issue within the context of a clean-up program may define the speed, direction, and contaminant content of a ground water plume. Within the context of a safety program effort, a Characterized ESOH Issue may define the hazards to be addressed. A fire response would identify the specific hazards (i.e., smoke, fire, potential for explosion), and the degree of hazard. (Note: This output also incorporates the ESOH Issue Description).	
Check Payment	System Data Exchange	Document containing the actual check and associated Check Disbursement Voucher information that is passed on to the Federal Clearinghouse for distribution to the payee.	
Chemical and Regulatory Information	System Data Exchange	Information on chemicals and hazardous material regulations that is received from a subscription service and maintained in the master product hazard data (MPHD) warehouse.	
Chemical and Regulatory Reference Data	System Data Exchange	This includes chemical and regulatory reference information such as Chemical Abstract Service numbers.	
Civilian Pay	System Data Exchange	This is the civilian pay record, approved by a designated official, of gross pay earnings and entitlements by category, less deductions (statutory and elective) that results in the net disbursement. This record also reflects active civilian employee debt balance.	
Closeout Information from External Sources	System Data Exchange	The required information from the External Source to perform instrument closeout process.	
Closure Certificate for Case Implemented in Foreign Military Sales Trust Fund	System Data Exchange	The Case Closure Certificate provides the information necessary for DFAS to close the case implemented in the Foreign Military Sales Trust Fund. The Certificate supports budgetary and/or proprietary impact in the general ledger to balance budget authority ceilings, cash receipts, total disbursements and the value of delivered articles and services for the case implemented in the Foreign Military Sales Trust Fund.	
Collection Activity Termination Notice	System Data Exchange	This is the notification from an external entity that collection action related to a debt has been terminated.	
Collection Confirmation	System Data Exchange	This is the confirmation of collections from Treasury which includes deposit number, confirmation date, deposit amount, etc. In addition, detailed information on Non Sufficient Funds (NSF) checks is provided.	
Collection Data	System Data Exchange	This is information associated with collections which have been processed to include intergovernmental collections made via the Intra-governmental Payment and Collection (IPAC) system and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository, which have been processed. This collection information encompasses the associated deposit ticket or debit voucher and the associated cash collection voucher, as well as the collection of debt and resolution of administrative offsets.	
Collection Pro Forma Entries	System Data Exchange	The debit and credit affects of collection pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Collection Receipts	System Data Exchange	This is information associated with collections which have been processed to include intergovernmental collections made via Intra-governmental Payment and Collection and commercial collections processed via deposit of funds to an established Treasury General Account at a commercial depository. Collection receipts could also include the associated deposit ticket, debit voucher, the associated cash collection voucher, administrative offsets, as well as the collection information for the debt management and accounting general ledger activities.	
Collection Voucher	System Data Exchange	A form used to record collections that includes Disbursing office collection voucher number, Receiving office collection voucher number, period, name of remitter or description of remittance, detailed description of purpose for which collections were received, amount, and accounting classification.	
Collection Voucher Control Log	System Data Exchange	Collection Voucher Control Log is prepared regularly by each functional area and/or branch disbursing office that summarizes regular collections, identifies payment mode (check, cash, Electronic File Transfer), and assures all voucher numbers are accounted for and all collection vouchers are entered in the accountability records.	
Commercial Banking Change Data	System Data Exchange	This is a notice of change passed from the Federal Reserve Bank to the originating disbursing activity via Fedline. This notification includes information about changes which impact electronic funds transfer payments such as changes in a commercial bank's routing number.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Commitment Modification Request	System Data Exchange	Data of a request to either increase or decrease the commitment amount needed to fulfill the requirement.	
Commitment Pro Forma Entry	System Data Exchange	The debit and credit affects of commitment pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Commitment Request	System Data Exchange	This is a request for a commitment or decommitment that has been approved based on the existence of available funding. This commitment/decommitment is an administrative reservation/dereservation of funds for a procurement request, order, directive, or equivalent instrument. This also identifies commitments that have been rejected due to insufficient funding or management discretion.	
Component Product Hazard Data Request	System Data Exchange	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Component Product Hazard Data Request Additional Information	System Data Exchange	Additional information that is received in order to complete a Component product hazard data (PHD) request.	
Component Product Hazard Data Request Status Update	System Data Exchange	Notification about the status of a Component request for product hazard data (PHD) that is sent to the requestor at the work unit.	
Comptroller Update	System Data Exchange	Comptroller's updates that include prior year updates of accounting actuals, congressional actions, or other miscellaneous adjustments (e.g. corrections) that will be used to generate other budget decisions.	
Consolidated Budget Estimate Submission	System Data Exchange	This is a consolidation of all BES submitted during the On Year budget planning and submission. It is the primary document used by the services and agencies to submit budget estimates. It is based on the program and fiscal guidance contained in the POM.	
Consolidated Program Objective Memorandum	System Data Exchange	The Consolidated Program Objective Memorandum (POM) is the collaboration of the primary documents used by the services to submit programming proposals. The Program Objective Memorandum includes an analysis of missions, objectives, alternative methods to accomplish objectives, and allocation of resources.	
Continuing Resolution Amount	System Data Exchange	Calculated amount available for execution under the Continuing Resolution Act.	
Continuing Resolution Pro Forma Entry	System Data Exchange	The debit and credit affects of continuing resolution pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Contract Action Report	System Data Exchange	Report on all Federal Acquisition Regulation (FAR) contract actions as required by FAR 4.6. This includes information that identifies the type of report and reporting activity, the transaction, the type of contract, and the business size and socio-economic program data.	
Contract Lookup Service Information Request	System Data Exchange	Request transaction data for Contract Lookup Service	
Contract Lookup Service Reply	System Data Exchange	Transaction data detailing about the EV Contract for MDAPs	
Contract Modification	System Data Exchange	Contract Modification is any written change in the terms of a contract including bilateral and unilateral modifications. A bilateral modification (supplemental agreement) is a contract modification that is signed by the contractor and the contracting officer. Bilateral modifications are used to make negotiated equitable adjustments resulting from the issuance of a change order; define letter contracts; and reflect other agreements of the parties modifying the terms of contracts. A unilateral modification is a contract modification that is signed only by the contracting officer. Unilateral modifications are used, for example, to make administrative changes; issue change orders; make changes authorized by clauses other than a changes clause (e.g., Property clause, Options clause, or Suspension of Work clause); and issue termination notices.	
Contract or Order Closure Data	System Data Exchange	All data related to completion of the buyer's final contract or intragovernmental order closeout process including, but not limited to, closeout details and requesting deobligations and decommitments, if necessary. This also includes any adjustments to closure data.	
Contractor Receipt of Government Furnished Property	System Data Exchange	Contractor acknowledgement that they have received government property on the performance of the contract.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Correcting Pro Forma Entries	System Data Exchange	Document contains all financial information needed to post and update the general ledger based on the anomalies correction business event, including the specific general ledger accounts that should be debited or credited and other financial information needed to support general ledger requirements.	
Cost Analysis Data	System Data Exchange	Assessment information of a contractor's performance and provides a record, both positive and negative, on a given contract during a specific period of time. Each assessment is based on objective facts and supported by program and contract management data, such as cost performance reports, customer comments, quality reviews, technical interchange meetings, financial solvency assessments, construction/production management reviews, contractor operations reviews, functional performance evaluations, and earned contract incentives.	
Cost Model Template	System Data Exchange	A cost model template that will be used to accumulate the costs of performance for all orders. Those cost accounts shall serve as a historical basis for determining the amount reimbursable for cost-reimbursement Economy Act orders and as a basis of determining a fixed price for similar future fixed-price Economy Act orders.	
Cost Model Template Request	System Data Exchange	A request for a template that is used to accumulate the costs of performance for all orders.	
Cost Performance Information Request	System Data Exchange	The form used by internal or external customers to request cost/performance information. Request includes in as much detail as possible: purpose, objective, originating organization, description of request, priority, deadline, one-time or recurring, specific exceptions or considerations, and output parameters (format, delivery instructions, frequency).	
Critical Technology Lookup Service Reply	System Data Exchange	Transaction data detailing about the unclassified Key Performance Parameter data for MDAPs.	
Critical Technology Lookup Service Request	System Data Exchange	Request transaction data for Critical Technology Lookup Service.	
Customer and Vendor Data	System Data Exchange	This is information about people and organizations to which payments will be made. Information includes full name, mailing address, bank account information, SSN, DUNS, DUNS+4 and if an organization, an indication of whether the organization is a public or private sector entity.	
Debit Voucher Data	System Data Exchange	This is information associated with the debit vouchers debiting a disbursing activity. This information includes agency location code, amount, date and the debit voucher number.	
Debt Adjudication Decision	System Data Exchange	This is information regarding the results of debt adjudication proceedings to include request for waiver, debt determination proceedings, or other administrative hearings conducted within the Component.	
Debt Compromise	System Data Exchange	This is the notification to the originator of a debt that a debt is to be reduced in part or in whole due to the establishment of a debt compromise agreement.	
Debt Correspondence	System Data Exchange	This is a variety of debt related correspondence going to external entities. Examples of documents include: responses to inquiries, responses to US bankruptcy court requests, and schedule of payments.	
Debt Write-off Notification	System Data Exchange	This is an overflow of debt disposition (either via a write-off or a closeout) for both vendor and individual debts. For individual debt closeout, this is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties. For individual debt write-offs, this is information detailing an agreed-upon partial payment of a debt made by an individual or employee allowing for a Department of Defense write-off to occur in lieu of paying the full amount of the debt. For vendor debt closeouts, this is a notification that a debt case has been closed out and no further collection action will be pursued relative to the associated claims receivable. For vendor debt write-offs, this is the notification to accounting that collection action related to a debt has been terminated and the associated receivable is to be written off.	
Debtor Response	System Data Exchange	This is the debtor's response to a demand letter or notice of administrative offset. This may request the debt be satisfied through installment payments or via salary offset. The request may also request an installment payment schedule, waiver, debt determination consideration or administrative hearing within the Component.	
Decision to Refer	System Data Exchange	This is a U.S. industry request from the Department of Commerce for threat evaluation and recommendation regarding the export of DoD technology.	
Defense Acquisition Executive Summary Data	System Data Exchange	The data required to track programs between milestone reviews.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Deferral Proposal	System Data Exchange	Proposal for deferral of appropriated budgetary resources to be temporarily withheld from obligation.	
Deferral Report	System Data Exchange	Report submitted to the OMB containing a detailed description of the amount, affected accounts, project, government functions involved, reasons for deferral, effects of the deferrals, and any other relevant facts supporting the deferral decision.	
Deferred Amount	System Data Exchange	Deferred amount approved through congressional action in response to the Impoundment Act.	
Deliver Return Metrics Data	System Data Exchange	This is the narrative and metrics data that when aggregated describes the execution of delivery activities associated with a return.	
Department of Defense Fund Balance	System Data Exchange	The Department of Defense Fund Balance is the authoritative source for all funds information, including execution transactions and funds availability. A Department of Defense Fund Balance is based on the general ledger data and provides the current balance of funds available for use associated with a specific budget program or any subdivision of a budget program. This information also contains funds availability within a particular program by comparing the fund request with fund balance of the activity providing the goods or services to ensure that the seller has the funding authority to incur the costs that will be associated with providing the buyer's request. In addition, the Department of Defense Fund Balance includes funding originally appropriated, apportioned, allotted, or otherwise distributed and any subsequent execution activity that has occurred, including commitments, obligations, and expenditure activity. This information is also comprised of many views of financial information at various levels of detail.	
Deployed ESOH Solution	System Data Exchange	This result of the assessment action outlines the actual solution that has been implemented. This may include any details of variances in the actual implementation from the planned implementation, and any requirements for future monitoring or action.	
Deployment Data	System Data Exchange	Passenger list or numbers and associated materiel and equipment related to a force movement. Includes updated and validated Unit Deployment List (UDL) and Unit Equipment List (UEL).	
Deposit Data	System Data Exchange	This is information associated with the deposit of funds creditable to a disbursing activity. This information includes agency location code, amount, date of deposit and the deposit ticket number.	
Depreciation and Amortization Data	System Data Exchange	This represents depreciation and amortization information from the physical asset record, to the fiscal asset record to update asset values based on the depreciation schedule.	
Detailed Budget Data	System Data Exchange	The detailed budget information as found in budget exhibits (e.g. M-1, R-1, P-1). This information identifies types of levels for specific budget requirements that will be used to update FYDP. The level and type of budget information vary depending on appropriation and major programs. Some examples are as follows: - Appropriation - Program Element - Budget Line Number - Project - Force Resource Identification - Manpower Resource Identification	
Disapproved Payment Requests	System Data Exchange	Payment request where payment is based on approval of a government official and the request has been disapproved. A governmental official may approve, may approve for a lesser amount or disapprove the payment request. The Approved Payment Requests will then go to the Entitlement process. Disapproved requests go back to the vendor.	
Disbursement Confirmation	System Data Exchange	This is the confirmation of disbursements from Treasury. Schedule number, Control totals, Confirm date, range of tracer numbers, payment medium. In addition, detailed information on cancelled checks is provided.	
Disbursement In-Transit Pro Forma Entries	System Data Exchange	Disbursements In-Transit Pro Forma entry represents the specific debit and credit effects to the general ledger. This entry reflects outlays transmitted to a designated disbursing office or the Treasury that have not been received and/or processed as outlays prior to the reporting period.	
Disbursement Log	System Data Exchange	A daily log prepared and maintained by the Disbursing Officer to record all the disbursing information which has been processed to include intergovernmental payments made via Intra-governmental Payment and Collection and commercial payments processed via electronic funds transfer and Treasury Check.	
Disbursement Pro Forma Entries	System Data Exchange	The debit and credit affects of disbursement pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Disbursing Data	System Data Exchange	This is data associated with disbursements which have been processed to include intergovernmental payments made via IPAC and commercial payments processed via electronic funds transfer and Treasury checks. This process encompasses preparation and distribution of the payment instrument and the associated disbursement voucher, as well as the passing of disbursement information to the entitlement and accounting general ledger activities.	
Discharged Debt Tax Notification	System Data Exchange	This is the issuance of the IRS Form 1099-C documenting that delinquent debt has been closed out and should thus be treated as taxable income of the recipient.	
Discrepancy Report Data	System Data Exchange	Report generated upon either Receipt or Acceptance documenting any variance from the terms and conditions of the agreement, Procurement Instrument or intragovernmental order with the supplier.	
Disposal Hazardous Process Description	System Data Exchange	Information that identifies a potential hazardous process(es) in a property disposal activity described to the level of granularity necessary to define effective ESOH controls.	
Dispose or Return Performance Data	System Data Exchange	This is the narrative and metrics data that when aggregated describes the execution of Dispose or Return activities.	
Disposition of Loss	System Data Exchange	Disposition of a contractor's notice of loss.	
DoD Apportionment Request	System Data Exchange	DoD Apportionment request contain all funding request from the services/components to be submitted to OMB for approval. This apportionment request is the department's request to make funding available for obligation as stated in the Appropriation Act and general provisions.	
DoD Budget Submission for President's Budget	System Data Exchange	On-year--DoD's submittal of the program and budget information to the President's Budget. This includes the adjusted Program Objective Memorandum (POM) and Budget Estimate Submission (BES) for the DoD Future Years Defense Program addressing major defense budget issues. Off-year--The DoD set of fully resourced changes to the program and budget submission in the off-years of the Planning, Programming, Budgeting, and Execution process. This comprises both Program Change Proposals (PCPs) and Budget Change Proposals (BCPs) for the off-years. BCPs cover fact of life changes (e.g.. cost increases, schedule delays, management reform savings, and workload changes) and changes resulting from Congressional actions.	
DoD Position	System Data Exchange	This is the recommendation to Department of Commerce or Department of State regarding the request for the export of DoD technology.	
DoD Topline Passback Response	System Data Exchange	The DoD's response to OMB contains the comments and feedback from the Department on OMB's topline passback. The response reflects the results of the previous negotiations on key issues within DoD and realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs.	
Draft Budget Decision	System Data Exchange	Draft budget decision is the result of the joint review between OSD/OMB. This is submitted to the components for review, acceptance and/or comments.	
Earned Value Management Data	System Data Exchange	Data that measures cost overrun or cost underrun relative to the program performance measurement baseline.	
Electronic Fund Transfer Payment Data	System Data Exchange	Electronic Fund Transfer provides for electronic payments and collections. The information needed to process an Electronic Fund Transfer transaction is the payee's name, all relevant bank identifying information, amount and invoice information.	
Energy Project Execution Data	System Data Exchange	Information needed to enter a contract to execute an energy project.	
Environmental Liability Information Rejected	System Data Exchange	This is the aggregated financial information for environmental liabilities that has been rejected based on various factors and not applied as applicable. It is not posted to the general ledger, and may be disclosed as a footnote on the financial statements.	
ESOH Assessment Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used in the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Analysis Results	System Data Exchange	This is a set of information needed during the process of assessing an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Assessment Geospatial Data	System Data Exchange	This is the geospatial information needed during the process of assessing an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Assessment Geospatial Data Requirements	System Data Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to assess an ESOH aspect.	
ESOH Assessment Geospatial Product Request	System Data Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of assessing an ESOH aspect.	
ESOH Assessment Service Request	System Data Exchange	Information required to request the provision of contract services to perform an approved ESOH Aspect Assessment.	
ESOH Control Requirement	System Data Exchange	This is the required set of operational controls implemented by a mission activity to comply with environment, safety, and occupational health legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by agreement between stakeholders such as the owner or operator of the mission activity; supporting environment, safety, and occupational health organizations; permitting agencies; and the public. A documented terms and conditions agreement might be a: process authorization, permit, license, exemption, explosives safety site plan and management decision or operating exception. Environment, safety, and occupational health controls influence the doctrine, organization, training, materiel, leadership and education, personnel and facilities (DOTMLPF) of mission activities. They may also define standard operating procedures, specify safety requirements, detail experience levels and training requirements, prescribe monitoring and reporting requirements, or specify other required activities.	
ESOH Identification Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used in the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Analysis Results	System Data Exchange	This is a set of information needed during the process of identifying an ESOH aspect that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Identification Geospatial Data	System Data Exchange	This is the geospatial information needed during the process of identifying an ESOH aspect for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Identification Geospatial Data Request	System Data Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of identifying an ESOH aspect.	
ESOH Identification Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of identifying an ESOH aspect.	
ESOH Issue Communication	System Data Exchange	A communication to responsible authorities that an issue of actual or potential ESOH concern exists. The communication may describe an event such as an accident or spill, refer to a set of circumstances of interest to the ESOH community (e.g., paint fumes, archeological discovery) or may be a request for a process authorization. The communication may be from the public, regulatory notices from authorities, or be identified as a result of an internal study or inspection or explosives safety management and site plan review request. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
ESOH Issue Description	System Data Exchange	This is a narrative that details the problem, issue, or concern. Example components include: statement of understanding, process parameters, issue location, work function, identified hazard, and ESOH issue profile. This output also feeds the environmental inventory.	
ESOH Solution Development Request	System Data Exchange	Information required to request the provision of contract services to perform an approved ESOH Solution development.	
ESOH Solution Development Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used in the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the process of developing an ESOH solution.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ESOH Solution Development Geospatial Analysis Results	System Data Exchange	This is a set of information needed during the process of developing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Development Geospatial Data	System Data Exchange	This is the geospatial information needed during the process of developing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Solution Development Geospatial Data Request	System Data Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Data Requirements	System Data Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and needed to develop an ESOH solution.	
ESOH Solution Development Geospatial Product Request	System Data Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of developing an ESOH solution.	
ESOH Solution Development Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of developing an ESOH solution.	
ESOH Solution Implementation Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used in the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Analysis Results	System Data Exchange	This is a set of information needed during the process of implementing an ESOH solution that is the outcome of analyzing data using accepted geospatial tools, techniques, knowledge, and standards.	
ESOH Solution Implementation Geospatial Data	System Data Exchange	This is the geospatial information needed during the process of implementing an ESOH solution for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
ESOH Solution Implementation Geospatial Product Request	System Data Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of implementing an ESOH solution.	
ESOH Solution Implementation Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of implementing an ESOH solution.	
ESOH Solution Service Request	System Data Exchange	Information required to request the provision of contract services to perform an approved ESOH Solution implementation plan.	
Evidence of Goods Tendered and Services Rendered	System Data Exchange	Data from suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for billing, collection and shipment planning.	
Evidence of Goods Tendered and Services Rendered from External	System Data Exchange	Data from commercial suppliers that documents the rendering of services or tendering of goods including, but not limited to, data for collection and shipment planning.	
External Carrier Data	System Data Exchange	A movement plan for specific cargo or passengers. Includes the Manifest document that details the passengers or items carried for a specific destination. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (origin, destination), mode - to include (a) inland surface transportation (rail, road, and inland waterway); (b) sea transport (coastal and ocean); and (c) air transportation. Information concerning commercial or organic transportation mode availability and contract rates and tariffs from carriers by commodity, lane, and mode for shipments including ports, airlift, sealift, railway, highway, customs, and traffic management. Used to track the identity, status, and location of DoD units and non-unit cargo and passengers, medical patients, and personal property from origin to consignee or destination across the range of military logistics operations. (Defense Transportation Regulation -DTR Part I-IV).	
External Energy Goal Data	System Data Exchange	Information about energy goals issued by an entity other than DoD.	
External Energy Reporting Data	System Data Exchange	Information generated in response to a requirement to report DoD energy information to an entity other than DoD.	
External Energy Reporting Requirements	System Data Exchange	Information about DoD energy that must be reported to an entity other than DoD.	
External Shipping Data	System Data Exchange	Legal documentation of the contents of a shipment from an external source provider.	
Facility Energy Conservation Data	System Data Exchange	Information about the energy reporting category, conservation reporting, and conservation related goals that are required to manage facility energy conservation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Facility Energy Conservation Management Data	System Data Exchange	The information generated for program management of facility energy conservation.	
Facility Energy Consumption Data	System Data Exchange	Information about the energy reporting category, consumption reporting, and consumption related goals that are required to manage facility energy consumption.	
Facility Energy Data	System Data Exchange	Programmantic information needed for facility energy analytics, goal tracking, and reporting.	
Family Care Completion Report	System Data Exchange	This includes an aggregated report which may contain (but not be limited to) information related to the times, dates, and locations of Casualty Assistance Program service deliveries. This may also include feedback related to issues related to vendors and casualty assistance offerings.	
Final Foreign Military Sales Trust Fund Bill	System Data Exchange	Upon closing of the Case implemented in Foreign Military Sales Trust Fund, DoD sends the Final Case Bill to the purchaser.	
Final Government Export License Decision	System Data Exchange	Notification of final determination of the Federal government's position regarding export application for DoD technology.	
Financial Position	System Data Exchange	Status of a firm's assets, liabilities, and equity accounts as of a certain time, as shown in its trial balance or financial statement.	
Financial Transaction Report	System Data Exchange	The Financial Statement Data shall include, financial results, narrative and or footnote information, value added analysis in order to provide management with a final assessment of the financial condition of the Department of Defense.	
Force and Simulation Modeling Data	System Data Exchange	Force and Simulation Modeling Information is used to represent a mission in order to provide guidance on the numbers and kinds of manpower requirements/personnel needed to perform a group of specific functions.	
Foreign Currency Conversion	System Data Exchange	Disbursing officer reports the amount of currency available for conversion to foreign currency or to US currency.	
Foreign Military Sales Trust Fund Expenditure Authority Request	System Data Exchange	This is a request for expenditure authority associated with a payment which cites a case implemented in the Foreign Military Sales Trust Fund. No payments citing a case implemented in the Foreign Military Sales Trust Fund will be released for disbursement processing prior to receipt of expenditure authority.	
Foreign Military Sales Trust Fund Expenditure Authority Response	System Data Exchange	This is a response regarding a submitted request for permission to disburse payments against a line on a case implemented in the Foreign Military Sales Trust Fund. Responses include approved, denied, and in-process.	
Funds Availability Request	System Data Exchange	This is a request for Notification of Funds Availability.	
Funds Distribution Reporting Data	System Data Exchange	Information generated during the funds distribution process for reporting (both internal and external). Examples of the types of information that may be created are: ODS Dashboard data, DD 1002 Funds Distribution Data, SF 133 Funds Distribution Data and Summary Distribution Data.	
Future Years Defense Program	System Data Exchange	The Future Years Defense Program is the program and financial plan for the Department of Defense as approved by the Secretary of Defense. The FYDP arrays cost data and force structure over a 6-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.	
Gain or Loss on Sale of Investment	System Data Exchange	Upon the sale of an investment, the gain or loss data is posted to the general ledger as other revenues and expenses.	
General Ledger Account Balance	System Data Exchange	The balance or dollar amount associated with a general ledger account. This could be a positive or negative balance and could represent beginning of year, current point in time, or end of year.	
General Ledger Detail Transaction Report	System Data Exchange	The General Ledger Detail Transaction Report provides general ledger account information and balances to support the review and research of all activities relative to a specific USSGL account including general ledger account reconciliation, analysis, and reporting.	
General Program Level Data	System Data Exchange	This is the data regarding a defined acquisition effort funded by appropriations with the express objective of providing a new or improved capability in response to a stated mission need or deficiency. This includes Program Manager narrative comments regarding the program and may include discussions of current estimates, program management documentation and other data.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Geographic Requirement	System Data Exchange	Geographic requirements identify the requirements needed for a specific geographic location. This includes the number of positions and equipment that can be accommodated in a location or needed in a location. This list is updated quarterly but submitted yearly to the Office of Management and Budget (OMB).	
Government Furnished Materiel Request	System Data Exchange	This is a request for equipment in the possession of, or directly acquired by, the Government.	
Historical Return Rate Data	System Data Exchange	Information accumulated based upon the return history that is analogous to a present situation, such as the return history on a similar product, and using the past pattern to predict future returns.	
Housing Entitlement Notification	System Data Exchange	This is a person's validated requirement for DoD housing with mission impact information to be utilized in priority determinations.	
Human Resources Data	System Data Exchange	This is an extraction of selected data related to a human resources application and human resources profile request.	
Human Resources Hazardous Process Description	System Data Exchange	A description of a potential hazardous process, related to human resources, described to the level of granularity necessary to define effective ESOH controls.	
Identification Budget Request	System Data Exchange	This is a request for appropriation funding to perform ESOH aspect identification that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Implement Solution Budget Request	System Data Exchange	This is a request for appropriation funding to implement an ESOH solution that includes an estimation of costs (future obligations and expenditures) with historic and workload data that support projected activities.	
Implemented Case in Foreign Military Sales Trust Fund	System Data Exchange	The information necessary to establish the initial budget authority and funds control to implement the case in the Foreign Military Sales Trust Fund.	
Implemented Case Line Budget Authority in Foreign Military Sales Trust Fund	System Data Exchange	The Foreign Military Sales Trust Fund budget authority released to the Implementing Agency for execution of the case implemented in the Foreign Military Sales Trust Fund. This records the actual distribution of budget authority to the Implementing Agency at case line level.	
Individual Assignment Response	System Data Exchange	This includes a response to an approved assignment action. The information may include (but not be limited to) an acceptance or declination of an assignment, response date, and response status.	
Individual Debt Data	System Data Exchange	This includes data required to support a Department of Defense Human Resources collection action on a delinquent individual whose affiliation has been separated or terminated from the Department of Defense. This is information regarding a dollar amount owed to the Department of Defense. This occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid.	
Individual Enlistment Extension Response	System Data Exchange	This includes any reversal of intentions by the Member. The Member may, up until the enlistment extension contract is signed, choose not to extend. The information may include (but not be limited to) Member's decision to extend, extension status, and decision date.	
Individual Reenlistment Response	System Data Exchange	This includes any reversal of intentions by the Member. The Member may, up until the reenlistment contract is signed, choose not to reenlist. The information may include (but not be limited to) Member's decision to reenlist, reenlistment status, and decision date.	
Individual Travel Authorization	System Data Exchange	This includes the authorization for physical relocation and related funds obligation of a person in support of DoD business and/or operations. The information contained in this ICOM will be the basis for a financial obligation of funds in the Financial Visibility Business Area.	
Inspection Report for Goods and Services	System Data Exchange	Documentation of the results of the inspection of service provided or goods received. This includes quantifiable quality performance information on procurement instruments or intragovernmental orders, at the line item level. Any discrepancies from the requirements of the procurement instrument or intragovernmental orders are fully documented.	
Inspection Results Data	System Data Exchange	This is a record created from the real property inspection. Data included would be the original inspection specification, specific task identified, Asset ID, Work Order ID, Work Order Description, Work Order Type, Work Order Diagnosis Type, Work Order Symptom Type, and Work Order Root Cause Type.	
Integrated Program and Budget Data	System Data Exchange	The information that represents the integration of program decision and data to the Program Budget Decision or other budget decisions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Interest Rate	System Data Exchange	This is the interest rate established by the Department of Treasury as published in the Federal Register used to calculate the amount of interest needed to apply to the outstanding debt.	
Interfund Bill	System Data Exchange	Interfund Bills are transactions that represent the payments from one fund group (either Federal or trust funds) to the other fund group.	
Intragovernmental Payment Collection	System Data Exchange	Document containing the intra-governmental payment and payee information that is passed on to the U.S. Treasury for distribution to the payee.	
Inventory Availability Data	System Data Exchange	This is information on those stocks or items on hand used to support production (raw materials and work in process items), supporting activities (maintenance, repairs, and operating supplies), and customer service (finished goods and spare parts).	
Investment Asset Record	System Data Exchange	This is the continuous aggregation of the U.S. Treasury certificates or securities under Department of Defense accountability.	
Legal Personnel Programs Debt Disposition	System Data Exchange	This is an overall flow of legal personnel programs debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Liquidated Penalty Administrative Fees and Interest Pro Forma Entries	System Data Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the application of collections against penalties, administrative charges, and interest fees on overdue receivables.	
Logistics Order	System Data Exchange	A validated request for internally sourced goods or services requested by a DoD customer that contains information relative to the source, location, required delivery date, product or service description, and special handling requirements e.g. hazardous materiel, wounded and deceased casualty transport.	
Logistics Order Modification	System Data Exchange	A modification to a previously submitted logistics order.	
Manpower Allocation Data	System Data Exchange	Manpower allocation shows the distribution of manpower billets based on funding received.	
Manpower Allocation Discrepancy List	System Data Exchange	Manpower allocation discrepancies show the differences between the Manpower Allocation received and the Manpower Requirements submitted.	
Manpower Directive	System Data Exchange	A Manpower directive is an official directive received to change the force structure. This includes both changes to the organizations structure as well as position attributes. A Manpower directive can include an increase or decrease in manpower. This change is requested from the top-down.	
Manpower Document	System Data Exchange	A Current Manpower Document (e.g., Table of Distribution and Allowances, Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization's structure and the Authorized Full Time Support for the current fiscal year.	
Manpower Document Update Information for New Unit	System Data Exchange	This includes the organization structure information which is needed when establishing a new unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Reorganized Unit	System Data Exchange	This includes the organization structure information when there is a reorganization of a unit. The information may include (but not be limited to) organization name, organization type, organization code, and unit identifier.	
Manpower Document Update Information for Updated Unit	System Data Exchange	This includes the updates to unit information to reflect the redesignating, inactivating, and reactivating of units. The information may include (but not be limited to) unit identifier, position occupation code, and unit position grade authorized strength level (number of positions authorized for a grade within a unit).	
Manpower Estimate Report	System Data Exchange	The Manpower Estimate Report (MER) defines the proposed force structure. The manpower estimate shall report the total number of personnel needed to operate, maintain, support, and provide training for the program upon full operational deployment. It shall report the number of military (officer, warrant officer, and enlisted), DoD civilian, and contract manpower requirements for each fiscal year of the program beginning with initial fielding and ending with full operational deployment. A separate estimate shall be provided for each Component (for joint programs) and separately for the Active, Reserve, and National Guard forces.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manpower Information Request	System Data Exchange	This includes any request for manpower data for reporting purposes.	
Master Product Hazard Data	System Data Exchange	New or updated product hazard data (PHD) that is required to be associated with DoD asset information.	
Materiel and Forces Status Data	System Data Exchange	Data that permits the monitoring of events across a supply chain. It tracks and traces inventory, and forces globally on a line item/individual level and provides information such as item unique identification, location, condition, custody, and embedded items.	
MAX Data Structure	System Data Exchange	Format for submitting data into the OMB MAX system to create a new account, process an apportionment, or submit a budget.	
Milestone Lookup Service Reply	System Data Exchange	Transaction data detailing about the about Milestone.	
Milestone Lookup Service Request	System Data Exchange	Request information to the Milestone Lookup Service.	
Military Lift Request	System Data Exchange	Military Transportation resources scheduling inquiry for personnel movement (may include cargo specifications) within mission guidelines.	
Military Pay	System Data Exchange	This is the military record, approved by a designated official, of gross pay earnings and entitlements by category, less deductions (statutory and elective) that results in the net disbursement. This military pay record also reflects active employee debt balance.	
Modified Accepted Letter of Offer and Acceptance Document	System Data Exchange	A USG unilateral change to a case implemented in the Foreign Military Sales Trust Fund that has been approved by DSCA.	
Need for Additional Component Product Hazard Data Information	System Data Exchange	A notification sent to the work unit that indicates the additional information required to process the Component request for product hazard data (PHD).	
Notification of Collection	System Data Exchange	This is a notification that a collection has been processed. The information could include the associated deposit ticket or debit voucher and the associated cash collection voucher, administrative offsets.	
Notification of Foreign Military Sales Trust Fund Closure of Case	System Data Exchange	Notification to the Implementing Agency that the case is closed in the Foreign Military Trust Fund.	
Notification of Funds Availability	System Data Exchange	This is a notification that funds are available or not available for the commitment or obligation request.	
Notification of Insufficient Funds	System Data Exchange	This includes information associated with a notification that funds are not available for the commitment or obligation request.	
Notification of Loss from Supplier	System Data Exchange	Contractor notification to the government of loss of government property while in their custody.	
Obligation Pro Forma Entry	System Data Exchange	The debit and credit affects of obligation pro forma entries to proprietary, budgetary, or memorandum general ledger accounts associated with a specific business event as communicated through a specific transaction type and specific set of delineating data attributes.	
Obligation Request Data	System Data Exchange	This is a signed contract or order that provides obligations or deobligations request.	
Occupational Safety Analysis Data	System Data Exchange	Information from Workforce Occupational Safety Analysis supporting determination of Human Resources Management actions such as formulation of force structure and development of personnel.	
Offset Pro Forma Entries	System Data Exchange	The general ledger impact of offsetting the balance of an accounts payable with a previously recorded accounts receivable. Perhaps resulting from a contract overpayment.	
OMB Decision	System Data Exchange	A decision sent from OMB to the Comptroller responding to the request for additional continuing resolution act amount request from the Comptroller.	
OMB Feedback	System Data Exchange	During the budget review, OMB provides feedback to OSD on the budget estimates submitted by the components. The feedback could be related to the outyear policy and baseline estimates that must be consistent with the economic assumptions provided by OMB. OMB's feedback could also be the enforcement on the compliance of the budget estimates with OMB's policies regarding mandatory and discretionary programs.	
OMB Passback	System Data Exchange	This is a recommended change to DoD's proposed budget for inclusion in the Presidents Budget. Recommended changes could be based on the outyear policy and baseline estimates that must be consistent with economic assumptions (e.g. inflation).	
Order Status Data	System Data Exchange	This is current information containing details about an order or a shipment.	
Organization Change Request	System Data Exchange	This includes a bottom-up request to change the current organizational structure. This request includes a Mission or Force Structure Change.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Organization Level Manpower Document Update Data	System Data Exchange	Identifies the changes from the current organization level Manpower document. A Manpower document (e.g., Table of Organization and Equipment, Modified Table of Organization and Equipment, Table of Organization, Table of Equipment, Staffing Document, and Unit Manpower Document) contains the organization structure.	
Other Budget Decision	System Data Exchange	Other budget decisions include both internal and external decisions that are not incorporated in a Program Budget Decision (e.g. Congressional Decision).	
Other Receipts	System Data Exchange	Any receipts other than those included with a Debit Voucher or those that are a collection against an open receivable (established when goods or services were provided).	
Passback Final Decision	System Data Exchange	The passback final decision represents the agreement between OSD and OMB on the final DoD's budget for inclusion to the President's Budget submission. This decision will be incorporated in a new Program Budget Decision or other budget decision memorandum. The decision should reflect result of the following activities: Agreement on the deliberation on key issues within DoD and across all organizations; Realignment of resources from marginal or overpriced programs to cover shortfalls in higher priority programs; and results of negotiation with OMB on top-line considerations.	
Payment Request for Goods	System Data Exchange	A request for payment for goods from a vendor or other party owed by the government. It describes an amount due for the acquisition of tangible goods as "billable events", which will include the pricing including freight, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition. Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Final Cost Vouchers, Performance-Based Payment Requests, Progress Payment Requests, Commercial Invoices, Fast-Pay Invoices, Direct Cost Vouchers, Grants, and Non-Direct Cost Vouchers.	
Payment Request for Services	System Data Exchange	A request for payment for services from a vendor or other party owed by the government. It describes an amount due for the acquisition of services as "billable events", which will include the pricing including freight, the cash discount terms, the date of the billing, the payment due date, and the amount of the money owed to the supplier for an acquisition. Payment Request types may include 2-in-1 Invoices, Commercial Item Financing Requests, Final Cost Vouchers, Performance-Based Payment Requests, Progress Payment Requests, Commercial Invoices, Fast-Pay Invoices, Direct Cost Vouchers, Grants, and Non-Direct Cost Vouchers.	
Penalties Administrative Fees and Interest Pro Forma Entries	System Data Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with calculated penalties, administrative charges, and interest fees on overdue receivables.	
Perform Build and Make and Maintenance and Sustainment Performance Data	System Data Exchange	This is the narrative and metrics data that when aggregated describes the execution of Build and Make and Maintenance and Sustainment activities.	
Performance Data	System Data Exchange	This is the flow of actual performance data back into the control system so that actual performance can be compared with planned performance.	
Performance Evaluation Input	System Data Exchange	This includes documented achievements and comments related to an individual's performance. This may include (but not be limited to) award name, award type, promotion information, training, and education.	
Performance Evaluation Profile Data	System Data Exchange	This includes performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) evaluation status, evaluation start and stop date, performance composite scores, and comments from the evaluator.	
Performance Evaluation Profile Update Data	System Data Exchange	This includes updated performance evaluation information associated with a personnel/pay record. This may include (but not be limited to) evaluation status, evaluation start and stop date, performance composite scores, and comments from evaluator.	
Performance Evidence	System Data Exchange	Information provided to the buyer, confirming that the rendering of services or tendering of goods has been performed, including information for billing, collection and shipment planning. Order performance evidence is also used to update the Government supplier's asset record, to update goods in transit accounts, and to trigger the suppliers' receivables process for services.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Performance Parameter Data	System Data Exchange	Those operational and support characteristics of the system that allow it to effectively and efficiently perform its assigned mission over time. The support characteristics of the system include both supportability of the design and the support elements for system operation. This includes Acquisition Program Baseline Data.	
Personnel Action Decision	System Data Exchange	This includes all decisions made by an Approval Authority on a personnel action. The information will include documentation of a person's rights associated with the decision (e.g., right to appeal). The personnel action decision may include (but not be limited to) personnel action identifier, personnel action status, and personnel action status date and time.	
Personnel Allocation Data	System Data Exchange	This is the current distribution of Personnel within the current organizational structure.	
Personnel Allocation Update Data	System Data Exchange	This is the updated distribution of Personnel based on the current Manpower allocation.	
Personnel and Pay Debt Disposition Data	System Data Exchange	This is an overall flow of personnel and pay debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Personnel Award Request	System Data Exchange	This includes the award request information related to an award recipient, candidate or unit. The information may include (but not be limited to) award name, award recommendation, and award nominator.	
Personnel Distribution Plan	System Data Exchange	This includes a plan for the distribution of personnel resources against mission priorities. This information may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Personnel Grade Change Profile Data	System Data Exchange	This includes the personnel grade change information associated with a personnel/pay record. The information may include (but not be limited to) promotion recommendations, promotion status, and demotion reasons.	
Personnel Requirement Request	System Data Exchange	This includes a request for personnel implementing the requirements within the personnel distribution plan. This information may include (but not be limited to) request date, justification, recommendation, request quantity, occupational code, and Unit Identification Code (UIC).	
Personnel Requirement Request Response	System Data Exchange	This includes any over or under requisitioning. This information may include (but not be limited to) requestor name, request date, requested quantity, discrepancy information, occupational code, Unit Identification Code (UIC), current authorization information, and current gain and loss information.	
Personnel Requisition	System Data Exchange	This includes information used to identify the need for personnel to fill a validated permanent or temporary position requirement. The information may include (but not be limited to) personnel requisition fill priority, personnel requisition identifier, and personnel requisition status.	
Personnel Retention Profile Data	System Data Exchange	This includes reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	
Personnel Retention Profile Update Data	System Data Exchange	This includes updated reenlistment information associated with a personnel/pay record. The information may include (but not be limited to) reenlistment type, assignment start and stop date, and assignment location.	
Physical Asset Inventory Data	System Data Exchange	Information which indicates the physical inventory has been completed based on a temporal or ad hoc requirement. It is used to update the capital asset record that enables asset accountability either as an update to the capital asset record or the creation of the asset record, based on an inventory found event. This information also enables asset valuation.	
Plant Clearance Disposition	System Data Exchange	The disposition of a contractor's request relative to property remaining at the end of contract performance.	
Plant Clearance Schedule	System Data Exchange	The contractor notification to the government of property remaining at the end of performance of the contract.	
Position Change Data	System Data Exchange	A position change identifies the position attribute modifications that occur due to changes to the organizational structure.	
Position Change Request	System Data Exchange	A position change request is a bottom-up request (i.e., from the unit level to the Major Commands) to change number of positions or position attributes (i.e., grade change).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Post-award Submission of Documentation	System Data Exchange	This is the submission of additional information or clarification required to support the award.	
Pre Payment Data	System Data Exchange	The prepayment information to the seller. This is to notify the seller that a prepayment has been made before goods and/or services are received.	
Pre Payment Pro Forma Entries	System Data Exchange	Prepayment pro forma entries are the general ledger transactions generated to record an expense that was paid in advance. These pro forma entries consist of using business information pertaining to prepaid expenses captured during operations to determine the appropriate general ledger account updates (debits or credits to proprietary, budgetary, or memorandum accounts).	
Pre Solicitation Notice	System Data Exchange	Notification to the commercial marketplace of an existing or potential requirement.	
Procurement Change Request	System Data Exchange	A request for modification to a sourced procurement.	
Procurement Instrument Execution Information	System Data Exchange	Assessment data of a contractor's performance and provides a record, both positive and negative, on a given contract during a specific period of time. Each assessment is based on objective facts and supported by program and contract management data, such as cost performance reports, customer comments, quality reviews, technical interchange meetings, financial solvency assessments, construction/production management reviews, contractor operations reviews, functional performance evaluations, and earned contract incentives.	
Procurement Instrument Execution Information from External	System Data Exchange	Information from external sources such as audits (e.g. DCAA). Used in evaluating the vendor performance on the current contract.	
Product Hazard Data Deficiency Notification	System Data Exchange	Notification that product hazard data (PHD) in the master product hazard data (MPHD) warehouse may have incorrect, incomplete or missing data. This notification requires the PHD to be reviewed and if necessary, corrected or updated.	
Product Hazard Data Request to Source	System Data Exchange	The notification that is sent by the work unit to request that product hazard data (PHD) be added to the master product hazard data (MPHD) warehouse.	
Product Hazard Data Response from Source	System Data Exchange	A response (eg. email or letter) from a source (eg. manufacturer, supplier or vendor) to a DoD request for product hazard data (PHD). The response may include the requested PHD or an indication as to whether the PHD is available.	
Product Hazard Data Status Update	System Data Exchange	The update on the status of the Component request for PHD that is sent to the requestor. This update may contain instructions on how to access the requested PHD, notification that the PHD is pending or notification that the PHD is not available.	
Product Surveillance Information	System Data Exchange	Report of monitoring contractor performance to the delivery schedule of the contract.	
Program Analysis Data	System Data Exchange	This is the corporate knowledge resulting from programmatic analysis regarding functional performance, cost effectiveness, contract instruments and interoperability across selected groupings (e.g., capabilities, systems, services, agencies and Areas of Responsibility) for the purpose of managing portfolios.	
Program and Funding Document	System Data Exchange	This document establishes legal and fiduciary responsibility of funds. This is an OSD released document that reflects OSD's approval of program funding levels. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	
Program Assessment	System Data Exchange	This information provides program analysis regarding functional performance, cost effectiveness, contract instruments and interoperability (e.g. systems and services) for the purpose of managing the program portfolio.	
Program Budget Decision	System Data Exchange	A budget decision document issued during the joint review of DoD Component budget submissions by analysts of the OSD and the OMB. PBDs reflect the decisions of the SECDEF as to appropriate program and funding to be included in the annual defense budget request which, in turn, is included in the President's Budget.	
Program Cancellation Cost	System Data Exchange	The amount to be expensed resulting from the cancellation of funding for a research and development effort.	
Program Data	System Data Exchange	Program information consists of Operations and Maintenance TOA, Procurement TOA data, RDT&E TOA data and Military Construction TOA data which are used to update the FYDP.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Program Decision	System Data Exchange	This is the outcome from the "Develop and Resolve Programmatic Issues" activity that addresses program issues across Component. It is the documentation produced after completing coordination within OSD and Components to reach agreements/resolution. After the issues are considered by the SLRG, the Deputy SECDEF makes a preliminary decision on each one as input to the PDM process.	
Program Decision Memorandum	System Data Exchange	The Program Decision Memorandum formally documents the directives from the Deputy and Secretary of Defense to the Defense Components on issues raised during POM review. The issuance of the Program Decision Memorandum to DoD Components, the Chairman, Joint Chiefs of Staff, and OMB completes the Programming process.	
Program Deviation Reporting Data	System Data Exchange	This is the data describing baseline deviations (also called breaches) to the Defense Acquisition Executives (DAEs) and Component Acquisition Executives (CAEs), and when appropriate to Congress.	
Program Lookup Service Reply	System Data Exchange	Transaction data detailing about the Program for MDAPs	
Program Lookup Service Request	System Data Exchange	Request transaction data for Program Lookup Service.	
Program Objective Memorandum	System Data Exchange	Issued during the even-numbered On-Budget years, contains recommended programming and resource allocations. Document includes the projected force structure and list of priorities. The Program Objective Memorandum (POM) includes the dollar amount. The POM (DoDI 7045.7): Annually, each Military Department and Defense Agency shall prepare and submit to the Secretary of Defense a POM that is consistent with the strategy and guidance, both programmatic and fiscal, as stated in the DPG. Major issues that are required to be resolved during the year of submission must be identified. Supporting information for POMs will be in accordance with the annual POM Preparation Instructions or requirements established by DoD Directive or Instruction.	
Program Review Analysis	System Data Exchange	Program review analysis is the result of the review, analysis, and evaluation of submitted programs from components. The information could include the OSD/JCS assessment on the capabilities of the programs in executing approved strategies and policies. In addition, the review and analysis also includes the compliance to the guidelines and constraints set by OSD for the development of the component's POMs.	
Project Approval Request	System Data Exchange	This is information that is required when an architectural design has reached a certain milestone (currently 35% completion). This authorization request enables the technical, business and financial review of the engineering of architectural design to ensure it meets the stated objectives and requirements. If approved the design project can be completed. If the project is not approved the design may be deferred or cancelled.	
Project Approval Response	System Data Exchange	This is documentation informing the executing agent that the design project has been approved and can be completed.	
Promotion Appeal Documentation	System Data Exchange	This includes the appeals package which contains the appeals memorandum, as well as any supporting documentation. The information may include (but not be limited to) justification, recommendations, and appeal date.	
Promotion Criteria	System Data Exchange	This includes promotion information that is needed to determine if a Member has satisfied the requirements for a promotion. The information may include (but not be limited to) composite score, test date, time in service, time in grade, and Service cutoff scores.	
Promotion List	System Data Exchange	This includes the final approved promotion list which consists of Members that have been approved to receive a promotion. The information may include (but not be limited to) grade, rank, occupation code, and position.	
Promotion Notification	System Data Exchange	This includes the notification information to reflect the details of a promotion decision. The information may include (but not be limited to) decision recipient, notification date, personnel action identifier, and promotion status.	
Promotion Requirement Results	System Data Exchange	This includes the results associated with the completion of promotion requirements. The information may include (but not be limited to) Promotion Board or Special Selection Board outcomes and promotion test scores.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Property Expense	System Data Exchange	This represents expensed costs associated with both personal and real property assets or items. For real property, it includes costs that are expensed from the CIP account based on the cancellation of a construction design project. It also includes costs such as costs associated with federal dollars that are expended on non-federal constructed assets. These costs are posted to the general ledger.	
Proposal	System Data Exchange	A legal offer from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost within a specified schedule. It also includes proposed contract terms and conditions under which the goods or services will be provided. For sole source, this includes cost or pricing data.	
Proposed Personnel Requirement Request	System Data Exchange	This includes a request for un-forecasted personnel requirements from appropriate parties. This information may include (but not be limited to) requestor name, request date, justification, request quantity, occupational code, and Unit Identification Code (UIC).	
Public Draft Request for Proposal	System Data Exchange	A draft request for proposals, quotes, bids, offers, or information to meet a specified requirement or need that has been made public for comment. It includes information about the sourcing requirement so that suppliers can submit a proposal or solicitation quote.	
Purchase Card Holder Information Request	System Data Exchange	This is a request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) request date and time, requested information, and requestor name.	
Purchase Card Holder Information Response	System Data Exchange	This is a response to an information request for verification that a purchase card holder is currently a member or a government civilian. This information may include (but not limited to) response date and time and member's or government civilian's information.	
Purchase Card Transactions	System Data Exchange	A listing of purchase card transactions transmitted from the Bank.	
Purchase Investment Request	System Data Exchange	Request sent to the Department of U.S. Treasury to purchase Treasury certificates for investment.	
Real Property Asset Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used for maintaining asset information.	
Real Property Asset Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the process of maintaining asset information.	
Real Property Asset Geospatial Analysis Results	System Data Exchange	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Data	System Data Exchange	This is the geospatial information needed during the process of maintaining asset information for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Asset Geospatial Data Request	System Data Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Data Requirements	System Data Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed for a real property asset.	
Real Property Asset Geospatial Product Request	System Data Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during the process of maintaining asset information.	
Real Property Asset Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of maintaining asset information.	
Real Property Build and Maintenance Geo-enabled Visualized Data	System Data Exchange	This is geo-enabled information needed for visualized products used for real property construction and maintenance.	
Real Property Build and Maintenance Geospatial Analysis Requirements	System Data Exchange	This is a request for geospatial analysis of information needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Analysis Results	System Data Exchange	This is a set of information that is the outcome of analyzing data, using accepted geospatial tools, techniques, knowledge, and standards, which is needed during the processes supporting the building or maintaining of real property.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Real Property Build and Maintenance Geospatial Data	System Data Exchange	This is the geospatial information needed during the processes supporting the building or maintaining of real property for understanding the location, size, orientation, and/or height or depth of phenomena in the environment.	
Real Property Build and Maintenance Geospatial Data Request	System Data Exchange	This is a request for existing geospatial information of sufficient accuracy and quality that is needed during the processes supporting the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Data Requirements	System Data Exchange	This is a listing of criteria sufficient for creating geospatial information content (e.g. geometry, attribution, accuracy, quality and precision) that does not currently exist and is needed to support the building or maintaining of real property.	
Real Property Build and Maintenance Geospatial Product Request	System Data Exchange	This is a request for development of a geospatial product, such as a map or 'distance to' measurements, that is needed during construction or maintenance of real property.	
Real Property Build and Maintenance Geospatial Update Request	System Data Exchange	This is a request for updated geospatial information that meets specified requirements (e.g., data currency, data accuracy, data quality) which is needed during the process of building and maintaining real property.	
Real Property Placed in Service Data	System Data Exchange	Information that a real property asset is available for use by DoD. This acknowledges that an interim Transfer and Acceptance of Military Real Property document is signed, title for assets listed on the acceptance form is transferred, and the punch list of additional work and certificate of occupancy by local authorities are attached to the acceptance form. This information confirms that the government assumes liability and the warranties begin for the asset to which DoD has received title.	
Reapportionment Request	System Data Exchange	Request submitted to OMB within 10 days of appropriation or substantive act providing budget authority asking for apportionment of unapproved deferral or rescission funds.	
Receipt Account Trial Balance and Ledgers	System Data Exchange	Receipt Account Trial Balance and Ledgers statement contains detailed receipt transactions and balances reported by the Department of Defense during the month. This statement discloses information related to balances forwarded, current month receipts and month end account totals. It also provides the receipt balances by fund account symbol and department and collections and/or deposits of funds in accounts that are not immediately available for expenditure.	
Receivable File	System Data Exchange	Receivable file that includes the sale of the investment asset for recording accounts receivable and recognizing revenue associated with that receivable.	
Recognition Program Profile Data	System Data Exchange	This includes the recognition information associated with a personnel/pay record. The information may include (but not be limited to) award type, unit identification code (UIC), and award start and stop date.	
Recognition Program Profile Update Data	System Data Exchange	This includes updated recognition program information associated with a personnel/pay record. The information may include (but not be limited to) award type, unit identification code (UIC), and award start and stop date.	
Recommendation on Export Request	System Data Exchange	This is the recommendation to Department of Commerce or the Department of State regarding the request for the export of DoD technology.	
Recommended Acquisition Program Baseline	System Data Exchange	This is the submission of recommended key cost, schedule, performance parameters, and other cost constraints, objectives, or thresholds for program milestones for approval by the Milestone Decision Authority.	
Recovered Property Information	System Data Exchange	This is information on property that has been recovered during a disposal action (e.g., demolition). This may include disposition of recovered real property installed equipment such as a Heating, Ventilation, and Air Conditioning (HVAC) system.	
Recoveries from Unobligated Balance	System Data Exchange	Broad responsibility by Congress that Government agencies have the power to spend federal funds recovered from prior year obligations, both expired and unexpired. Congress can specify availability and criteria for spending these funds. Recoveries from unobligated balances includes the both actual and anticipated funds, regardless of whether expired and unexpired at the time of recovery.	
Referred Debt	System Data Exchange	This is the referral of debts to external sources for collection action. This includes referral of uncollected debts to Department of the Treasury, Department of Justice or private collection agencies.	
Reimbursable Bill	System Data Exchange	The reimbursable bill is a request for payment for specific goods or services provided within the terms and conditions of the contract.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Rejected Purchase Request	System Data Exchange	Document which has been reviewed by the procurement organization and found to not adequately describe the required supplies or services for a procurement to be initiated.	
Rejection of Goods or Services Notification	System Data Exchange	Notification that goods or services have not been accepted.	
Remittance Data	System Data Exchange	This is information associated with remittance forwarded to the disbursing activity and may include copies of IPAC listings, checks, coupons, food stamp vouchers, WIC vouchers and various forms of correspondence.	
Renewable Energy Production and Purchase Data	System Data Exchange	Information about the energy reporting category, renewable energy reporting, and renewable energy related goals that are required to manage renewable energy production and purchase.	
Renewable Energy Project Execution Data	System Data Exchange	Information needed to enter a contract to execute a renewable energy project.	
Replacement Financial Instrument Request	System Data Exchange	This is the request for the issuance of a replacement check due to the original check being lost, stolen, mutilated or not received by the payee. This request will be processed by the disbursing activity resulting in the generation of a stop pay request to the Department of Treasury.	
Replenishment Stock Request	System Data Exchange	Demand that is generated at that point at which a stock replenishment requisition shall be submitted to maintain the predetermined or calculated stockage objective. For demand-based computations, the reorder point equals the sum of the safety level of supply, the level for ordering and shipping time, repair-cycle level (for reparable items), and authorized additive levels.	
Representations and Certifications	System Data Exchange	Data required as part of vendor offers that make representations such as a small, disadvantaged or women-owned business and certifies specific characteristics such as meeting non-segregated facility requirements and previous contract compliance.	
Reprogramming Action	System Data Exchange	Realignment of budget authority from the purpose for which it was originally appropriated to finance another (usually emergent, unfunded) requirement. A necessary, desirable, and timely device during execution of Defense programs for achieving flexibility in the use of DoD funds provided in appropriation acts.	
Reprogramming Package	System Data Exchange	Describes the Agency's requests and justifications to move funds among programs and may include more than one reprogramming.	
Reprogramming Request	System Data Exchange	Reprogramming request sent to OMB to realign funds from one program to another.	
Reprogramming Request Response	System Data Exchange	This is OMB's response on the department's reprogramming request.	
Request for Additional Continuing Resolution Amount	System Data Exchange	A request for additional continuing resolution act amount sent to OMB for review and comment.	
Request for Administrative Offset	System Data Exchange	This includes information for an administrative offset against amounts payable to indebted parties. This would be a salary offset for employees or an administrative payable offset for vendors.	
Request for Corrective Action	System Data Exchange	Request to DoD's functional area for recording correcting business event identified during initial Trial Balance analysis.	
Request for Disposition	System Data Exchange	This is an inquiry into the terms and conditions of the contract and a request to receive weapons systems lifecycle guidance to determine if returns or disposals are warranted and to receive final settlement instructions.	
Request for DoD Technology Export	System Data Exchange	This is a U.S. industry request from the Department of Commerce or the Department of State for threat evaluation and recommendation regarding the export of DoD technology.	
Request for Increased Reimbursable Authority	System Data Exchange	Data supporting a request for an increase of budgetary reimbursable authority to allow the government supplier to enter an intragovernmental transaction.	
Request for Non DoD or Operational Threat Assessment	System Data Exchange	This is a request for threat assessment considerations and information from Federal Agency, Joint Warfighter or scientific community.	
Request for Supplemental Industry Data	System Data Exchange	This is a request for additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Request to Cancel Case Implemented in Foreign Military Sales Trust Fund	System Data Exchange	A request from either the purchaser or USG to cancel a case implemented in Foreign Military Sales Trust Fund.	
Request to Return	System Data Exchange	This request triggers the reintroduction of an item to the supply chain.	
Request to Sell Investment	System Data Exchange	Request sent from the Department to the U.S. Treasury initiating the sale of a Department owned Treasury security.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Rescission Data	System Data Exchange	This is a rescission enacted by Congress. This rescission will affect the baseline for reprogramming.	
Rescission Language	System Data Exchange	The language used to complete the rescission report such as OMB identification code, agency and rescission proposal number.	
Rescission Proposal	System Data Exchange	Proposal for rescission of appropriated budgetary resources to be withheld from availability.	
Rescission Report	System Data Exchange	A rescission report to be submitted to OMB for inclusion on the President's special message to Congress regarding proposed rescission.	
Research Data	System Data Exchange	This is information resulting from internal DoD research for the purpose of investigating an issue or determining the capabilities, technology, and competitive forces of the marketplace to meet an organization's needs for supplies or services or identified as a result of an internal study. Examples of research include medical or human resources studies. Research information may include information such as academic journals, methodologies, standards, studies, relevant government publications and other information necessary to support the research objective.	
Response to Congressional and Federal Inquiry	System Data Exchange	This is the response to a formal request for information from Congress or the Federal government regarding the status of an acquisition effort within the Department.	
Returned Payment	System Data Exchange	This is information associated with a payment which has been returned. For check payments this could be due to improper mailing address information or perhaps a deceased payee. For Electronic Fund Transfer (EFT) payments this could be due to improper American Bankers Association (ABA) routing number, improper account number or the payment being rejected by the recipient.	
Returned Payment Notice	System Data Exchange	This is a notification that a previously issued payment has been returned and the reason(s) why. The payment was returned for at least one of the following reasons: invalid account number, invalid routing transcript number, account closed, or rejected by payee.	
Revenue Data	System Data Exchange	Revenue data includes gain on sale of asset, unearned revenue from collect, advance from a non-Department of Defense buyer, and net change in inventory.	
Sales Reimbursement Data	System Data Exchange	This is reimbursement data from the sale of goods or services (e.g., commissary receipts, training).	
Schedule Data	System Data Exchange	This is a sequential series of activities with milestones to be accomplished related to the development, production, testing and deployment of a system(s). This includes Acquisition Program Baseline Data.	
Selected Acquisition Reporting Data	System Data Exchange	This is a standard, comprehensive, summary status data of a Major Defense Acquisition Program (MDAP) (Acquisition Category (ACAT) I) required for periodic submission to Congress. Includes key cost, schedule, and technical data.	
Selected ESOH Solution	System Data Exchange	This is the solution that has been evaluated and has been determined as a course of action to pursue by the ESOH professional.	
Senior Rater Profile	System Data Exchange	This includes the evaluation history of the Senior Rater. This may include (but not be limited to) individuals rated, position, and evaluation scores.	
Separated or Terminated or Transferred Individual Debt Data	System Data Exchange	This is data required to support a DoD Human Resources collection action on a delinquent person whose affiliation has been separated or terminated from Department of Defense or transferred to another federal entity. This information regards a dollar amount owed to the Department of Defense (e.g., this occurs when a Department of Defense Member or Non-Member damages or loses Department of Defense property, or has been overpaid, or has any other outstanding debt).	
Service Procurement Request	System Data Exchange	A document which describes the required services so that a procurement or a request for quote can be initiated.	
Shipping Status	System Data Exchange	Advanced notification regarding shipments from a distribution location or storage activity (i.e., advance shipping notice).	
Solicitation Quote	System Data Exchange	A quote from the supplier, in response to an Approved Request for Proposal, to provide goods or services at a specified cost and within a specified schedule based on appropriate funding limitations. It may include proposed contract terms and conditions under which the goods or services will be provided.	
Sourcing Planning Information Request	System Data Exchange	A sources sought synopsis for market research purposes only containing the buyer's planning requirements and needs. This does not reflect a commitment by the buyer to issue a request for proposal, award a contract or otherwise pay for the information provided in response to the synopsis.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Spending Authority from Offsetting Collections	System Data Exchange	Broad responsibility by Congress that Government agencies have the power to spend federal funds received through offsetting collections. Congress can specify availability and criteria for spending these funds. Spending authority from offsetting collections includes earned collections and earned receivables from Federal sources, changes in unfilled customer orders, anticipated authority without an advance, and transfers from non-FMS trust funds and special funds.	
Statement of Accountability	System Data Exchange	Monthly report submitted from federal agency that outlines changes to the fund balance with Treasury should balance with FBWT.	
Statement of Difference	System Data Exchange	Statement of Difference provides the discrepancies between disbursements and deposits generated by the Treasury. Differences resulting from deposits indicate there is a discrepancy between the monthly totals submitted through the banking system and the totals provided by the Department of Defense. Differences resulting from disbursement transactions reveal discrepancies between monthly totals reported by the Regional Financial Center and/or through On-line Payment and Collection System between the Department of Defense and other agencies disbursement transactions and/or report.	
Statistical Reporting Delivery Data	System Data Exchange	Quantifiable on-time delivery performance data on contracts or orders valued at less than one million dollars. This data is used to classify each supplier's performance by Federal Supply Code (FSC).	
Statistical Reporting Quality Data	System Data Exchange	Quantifiable quality performance data on contracts or orders, at the line item level, valued at less than one million dollars. This data is used to classify each supplier's performance by Federal Supply Code (FSC).	
Stop Loss Notification	System Data Exchange	This includes information from the Service Headquarters identifying Members for involuntary retention based on Service specific criteria. The information may include (but not be limited to) notification recipient, notification date, and notification type.	
Stop Payment Confirmation	System Data Exchange	Confirmation received from DoD/Treasury confirming stop payment.	
Stop Payment Notification	System Data Exchange	A message from the US Treasury confirming that a stop payment has occurred.	
Stop Payment Request	System Data Exchange	This is the request for stop payment issued to the Department of Treasury associated with a check payment previously issued by the disbursing activity.	
Strategic Objectives	System Data Exchange	Guidance from leadership that provides vision, goals, priorities, and desired performance outcomes for specified mission requirements.	
Strength Authorization Data	System Data Exchange	Strength Authorization is the specification of military manpower strength ceilings, within a specified fiscal year, authorized by Congress for each of the armed forces. This includes, but is not limited to, service end strength; specified limitations on the number of members of a reserve component permitted to be on active duty; and Dual Status Military Technician end strength for each reserve component of the Army and Air Force.	
Subcontracting Report	System Data Exchange	Data on prime contractors' subcontracting activities to identify how contracting dollars are being distributed among small and disadvantaged businesses.	
Summarized Balance of Accounts for Procurement	System Data Exchange	This information is created from all transactions in the monitor payment portion of the Entitlement process and provides a summarized balance of accounts needed for administering the procurement instrument.	
Supplemental Industry Data	System Data Exchange	This is the submission of additional information or clarification required for threat analysis regarding the request for export of DoD technology.	
Supplemental Information Response	System Data Exchange	This is a standard, comprehensive, summary status data of a Major Defense Acquisition Program (MDAP) (Acquisition Category (ACAT) I) required for periodic submission to Congress. Includes key cost, schedule, and technical information.	
Supplier Advance Ship Notice Data	System Data Exchange	Advanced notification of scheduled materiel deliveries to a receiving location or storage activity directly from the supplier. It lists the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment. This information enables the sender to describe the contents and configuration of a shipment in various levels of detail, including actual departure date/time, and provides an ordered flexibility to convey information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Supplier Data	System Data Exchange	External Customer or supplier data such as the Point of Contact (POC) information, business type (buyer or seller), the Business Partner Network (BPN) Number, general transaction details, supplier identifiers (Data Universal Numbering System number, Commercial and Government Entity (CAGE) Code, Taxpayer identification number), and supplier socio-economic information.	
Supplier Inventory Data	System Data Exchange	Product and inventory data for goods and services available for government purchase.	
Supply Request	System Data Exchange	A request for supply support from any Component distribution system and from the GSA for requisitioning, issuing, lateral redistribution, and returning of DoD materiel.	
TBD	System Data Exchange	This is a system data exchange that will be determined in the future.	
Time and Attendance Data	System Data Exchange	This is a person's number of hours worked, attendance, and leave data for a specific pay cycle.	
Transaction Confirmation	System Data Exchange	Treasury confirmation of purchases, sales or redemption of Marketable, Non-marketable and Market Based securities held by Department of Defense components.	
Transfer of Government Property	System Data Exchange	Notification that government property in the custody of a contractor has been transferred to the government, to another contractor location or to a new contract.	
Transportation Data	System Data Exchange	Data pertaining to the physical shipment or actual transportation movement that is used to facilitate the processing of materiel at the delivery location or the arrival of forces at their destination (e.g. shipping label, manifest, customs information, bill of lading, or Materiel Safety Data Sheet (MSDS) information).	
Transportation Schedule	System Data Exchange	A movement plan for specific cargo or passengers. For example, scheduled intermediate stops, marshaling area information, movement times, specific locations (e.g., origin, destination), mode, etc.	
Travel Debt Bill Data	System Data Exchange	This includes information associated with the execution of a debt disposition directing a waiver, remittance, partial payment for a travel related debt. This information may include (but not be limited to) debt type, debt amount, effective date of indebtedness, amount of to be written off from the original indebtedness. This information is the basis for an action in the Financial Visibility business area.	
Travel Debt Disposition	System Data Exchange	This is an overall flow of travel debt disposition for individual debt closeouts. It is information detailing a final bill generated by Human Resources Management for goods or services that are sent to the appropriate party for payment. The final bill will capture all costs such as interest and penalties.	
Travel Requirement	System Data Exchange	This requirement defines an organization's or person's need for travel, including movement of goods, using the travel card (where authorized). It may be an unfunded or funded requirement.	
Travel Substantiation Data	System Data Exchange	This is the auditable record of the details and related costs of a person's authorized travel.	
Treasury Certificate	System Data Exchange	Certificate of ownership of Marketable, Non-marketable and Market Based securities held by DoD components	
Treasury Fund Balance	System Data Exchange	The Fund Balance with Treasury (FBWT) is an asset account that reflects the available budget spending authority of federal agencies. Collections and disbursements by agencies will, correspondingly, increase or decrease the balance in the account. Agencies report changes to this account to the Financial Management Service (FMS), Department of Treasury through monthly reporting on Statements of Transactions (FMS 224, 1220, or SF 1221) and Statements of Accountability (FMS 1219 and SF 1218).	
Treasury Offset Request	System Data Exchange	The Treasury Offset Program uses this process to match delinquent debtor files against payment files. When a match occurs, the payment is intercepted and the debt is offset up to the amount of the debt plus assessed administrative fees. Under the Treasury Offset Program, delinquent accounts are subject to administrative offset of United States Government funds due individuals from various sources such as Federal Income Tax refunds, federal salary offset, and payments from other Government agencies.	
Treasury Report on Receivables	System Data Exchange	TROR provides public receivables and delinquencies information and statuses. This report is required by Treasury on a quarterly basis.	
Treasury Warrant	System Data Exchange	The Treasury warrant is a financial control document, issued after enactment of the Appropriation Act by the Treasury Department. This document is the basis for reporting cash on the books authorized to be withdrawn from the central account maintained by the Treasury, essentially maintaining the bottom line for all appropriations. This document is one of the three main sources that must be approved prior to issuing the Budget Authority to the component.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Trial Balance Data	System Data Exchange	The trial balance summarizes the general ledger and provides financial data by fund, fiscal year, etc., for various reporting purposes.	
Trial Balance Data and Statement of Transactions	System Data Exchange	The Trial Balance is the accumulation of all financial and accounting transactions captured in General Ledger Accounts that represent the financial position of the organization at any point in time, to include aging reports. This is the logical representation of the Trial Balance that is reviewed, certified and published. The Statement of Transactions is the central accounting document used to report monthly accounting activity to Treasury. This report provides Treasury with information on agency deposits and disbursements and captures data by appropriation, fund and receipt accounts.	
Unapproved Deferred Funds	System Data Exchange	These are the Unapproved Deferred funds based on congressional actions. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed deferrals, funds must be made available for obligation.	
Unapproved Rescinded Funds	System Data Exchange	These are the unapproved rescinded funds based on congressional action. As mandated by Impoundment Act, after receiving congressional decision that denies the proposed rescission, funds must be made available for obligation.	
Unique Item Data	System Data Exchange	This data is provided by the vendor, program manager, or item manager about an item which includes item description, Unique Item Identifier (UII), original acquisition cost, and embedded items. It is used to enable asset management, accountability, and valuation either as an update to the asset record or the creation of the initial asset record, based on receipt or a conditional update of the item.	
Unit Cost Lookup Service Reply	System Data Exchange	Transaction data detailing about the Nunn-McCurdy Unit Cost.	
Unit Cost Lookup Service Information Request	System Data Exchange	Request transaction data for Unit Cost Lookup Service.	
Unit Cost Reporting Data	System Data Exchange	This covers both Program Acquisition Unit Cost and Procurement Unit Cost data for use as a metric that is related to the cost associated with a single unit of the product to include direct costs, indirect costs, traced costs and allocated costs. Program Acquisition Unit Cost with respect to a major defense acquisition program, means the amount equal to the total cost for development and procurement of, and system specific military construction for, the acquisition program, divided by the number of fully-configured end items to be produced for the acquisition program. Procurement Unit Cost, with respect to a major defense acquisition program, means the amount equal to the total of all funds programmed to be available for obligation for procurement for the program, divided by the number of fully-configured end items to be procured.	
Unsolicited Product Information	System Data Exchange	Product information received from an external non-DoD source (eg. manufacturer, supplier, vendor) pertaining to a product that contains hazardous material. The product information has not been requested by the DoD.	
Updated Asset Valuation Data	System Data Exchange	This is the data that establishes the updates to asset recorded costs.	
Updated Liability Data	System Data Exchange	Upon partial liquidation of a liability, the liability is recalculated to show new amount outstanding.	
Updated Maintenance or Production Schedule	System Data Exchange	This identifies changes to the workload plan resulting from the accomplishment of tasks.	
Updated Materiel Asset Data	System Data Exchange	This is the aggregation of the physical, legal and financial characteristics of materiel asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Updated Real Property Asset Data	System Data Exchange	This is the aggregation of the physical, legal and financial characteristics of a real property asset under DoD accountability. It includes all information about the state of the asset such as disposed, transferred, excess, obsolete, unserviceable, operation ceased, physical inventory information and all asset valuation information.	
Validated ESOH Assessment Geospatial Data	System Data Exchange	This is geospatial information needed during the process of assessing an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Validated ESOH Identification Geospatial Data	System Data Exchange	This is geospatial information needed during the process of identifying an ESOH aspect that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Development Geospatial Data	System Data Exchange	This is geospatial information needed during the process of developing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated ESOH Solution Implementation Geospatial Data	System Data Exchange	This is geospatial information needed during the process of implementing an ESOH solution that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Real Property Asset Geospatial Data	System Data Exchange	This is geospatial information needed during the process of maintaining asset information that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Validated Real Property Build and Maintenance Geospatial Data	System Data Exchange	This is geospatial information needed during the processes supporting the building or maintaining of real property that an authorized government official has acknowledged to conform with standards, accuracy, and enterprise data quality guidelines.	
Wage Determination Data	System Data Exchange	Salary Information for an official contract, based on the Service Contract Act (SCA) and the Davis-Bacon Act (DBA).	
Waiver Pro Forma Entries	System Data Exchange	The appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the waiver on overdue receivables.	
Wire Transfer Data	System Data Exchange	Information that is provided to the U.S. Treasury for the wire transfer transaction. Information could include payee's name, bank account and routing number, amount of transfer, and transaction date.	
Withdraw Funds Data	System Data Exchange	Information sent to the Treasury regarding the line item amount to be withdrawn from the agency's appropriation.	
Withhold or Holdback Payment	System Data Exchange	The withhold of a portion of a payment to a contractor in accordance with the terms of the contract.	
Workforce Occupational Safety Issue Communication	System Data Exchange	A communication to responsible authorities that an issue of actual or potential Occupational Safety concern exists. The communication may refer to a set of circumstances of interest to the ESOH community or may be a request for a process authorization. The communication will generally be identified as a result of an internal study or inspection. Example Attributes: Time/date of Communication Issue description Name of Notifier Issue area/location.	
Workforce Occupational Safety Issue Data	System Data Exchange	Information about an issue of actual or potential Occupational Safety concern. This information provides interim guidance for human resources planning while the identification and assessment of an ESOH aspect is underway. This information will be replaced with the ESOH Control Requirement once the ESOH Control Agreement is reached.	
Write-Off Pro Forma Entries	System Data Exchange	The general ledger impact of writing off eligible debts and adjusting accounts receivable balance. This generates the appropriate debit and credit affects to proprietary, budgetary, or memorandum general ledger accounts associated with the debt write offs.	
AIM	System Entity	A non-ACAT, web-based system that supports Program Managers and Headquarters personnel in Acquisition Program oversight, statutory and regulatory reporting. It also supports them by providing required capabilities related to program management, budget development and funds management, procurement and contract management, and acquisition logistics planning and management. These capabilities include Probability of Success support to the program oversight process, Acquisition Program Baseline development support to Program Managers, Chief Information Officer Assessment to support the Clinger-Cohen Act, and SmartCharts to support the budget planning process in Congress. AIM has establishing a substantial portion of the Service Oriented Architecture for the Army Acquisition Domain utilizing an Enterprise Service Bus with the creation of the Army Acquisition Universal, Description, Discovery, and Integration (UDDI) directory which will be federated to the DISA UDDI. AIM is integrating COTS Business Intelligence (BI) into the Acquisition Business Enterprise (ABE) Hub for Army executives at PEO and Army Headquarters.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
BEIS	System Entity	The Business Enterprise Information Services (BEIS) program will build upon existing infrastructure to provide timely, accurate, and reliable business information from across the Department of Defense to support auditable financial statements as well as provide detailed financial information visibility for management in support of the Warfighter. BEIS shall report disbursements, reimbursements, deposits, and receipts to the United States Treasury, as well as, all other transactions which would affect the status of funds. The reporting of expenditure data to the U.S. Treasury includes the processing of transactions by others and for others, the management of interfund and intergovernmental activity, and the performance of other Treasury and departmental functions.	
CAMS-ME	System Entity	The Capital Asset Management System-Military Equipment (CAMS-ME) is a DoD Enterprise system that accounts for and reports all material costs incurred to acquire and bring a military equipment (ME) asset to a form and location suitable for its intended use, in accordance with federal accounting standards (Statement of Federal Financial Accounting Standards (SFFAS) No. 6 and 23).	
CCR	System Entity	The Central Contractor Registration (CCR) system primary objective is to provide the Federal Government insight to its commercial supplier base. CCR is the single point of entry for commercial suppliers to provide organization information. CCR is the authoritative source of commercial supplier information in support of the sourcing and payment processes of the Federal Government. CCR is a system in the Federal Integrated Acquisition Environment (IAE) initiative.	
CPARS	System Entity	The Contractor Performance Assessment Reporting System (CPARS) is the authoritative source of commercial supplier performance information reported by Department officials. CPARS is a web-enabled application that collects and manages an automated library of assessment reports of contractor performance completed by government officials, which provides a record, both positive and negative, on a given contract for a specific period of time. Each assessment is based on objective facts and is supported by program and contract management data. Assessment reports are then used in source selection processes as a qualitative input.	
DAI	System Entity	The Defense Agencies Initiative (DAI), capitalizing on the business acumen of twenty-eight Defense Agencies, has the objective to implement a compliant business solution with common business processes and data standards for the following business functions within budget execution requirements: procure to pay; order to fulfill; acquire to retire; budget to report; cost accounting; grants accounting; time and attendance; and re-sales accounting. Each Defense Agency is committed to leveraging its resources and talents to build an integrated system that supports standardized processes and proves that the Department of Defense (DoD) is capable of using a single architecture and foundation to support multiple, diverse components.	
DAIS	System Entity	I&E Data Analytics and Integration Support platform is the DoD's secure, net-centric, integrated environment for aggregating, accessing and managing accurate, reliable, authoritative and complete physical, legal, and financial data for I&E information. It aggregates and integrates all I&E business information models for improved decision support, situational awareness, reporting, analytics, and asset management.	
DAMIR	System Entity	The Defense Acquisition Management Information Retrieval (DAMIR) system streamlines acquisition management reporting by creating a net-centric environment where data will be made available as quickly as possible to those who need it. DAMIR provides a shared solution for end users enabling them to collaborate on enterprise program management. Through its tools, DAMIR will allow users to drill down to relevant data, organize data collection, and facilitate managers' proactive ability owing to timeliness and depth of data analysis. The system enable users to customize the way they search, view information in real-time, and display previously unavailable combinations of information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Dashboard	System Entity	The HQ 554 ELSW Dashboard provides a web based information management capability to all levels of the HQ 554 ELSW organization. The Dashboard allows Staff offices, along with SPO/SPM managers a single entry point for managing their project data and eliminates non standard format/requirements. It also provides senior leadership with program management information, such as: Program scheduling data/status, EMA Status, Program System Engineering Process (SEP) Audit Reports, Wing Program Master List, system performance metrics, etc. The HQ 554 ELSW Dashboard is accessible only via the GCCS-AF Portal. The actual application is accessed using the RSO application. This system meets the criteria for Internal Use Software (IUS) reporting and data has been entered into the AFEMS/AIM system.	
DCPDS	System Entity	The Defense Civilian Personnel Data System (DCPDS) is a human resources information system that will support civilian personnel operations in the Department of Defense (DoD). The DCPDS allows the Department to move from multiple systems to a single information system for DoD civilian employees.	
DoD EMALL	System Entity	The DoD Electronic Mall (DoD EMALL) provides the entry point for DoD, Federal, Industry (as agents for government) and Allied Nation purchasers to research and acquire off-the-shelf, finished goods and services from the commercial marketplace and government sources. DoD EMALL provides an advanced, web-based government e-procurement application while enabling a Common Supplier Engagement model.	
DTS	System Entity	The Defense Travel System (DTS) is a seamless, paperless, temporary duty travel system that meets the needs of travelers, commanders, and process owners.	
EDA	System Entity	Electronic Document Access (EDA) provides secure online, electronic storage and retrieval capabilities of procurement information and documents across the DoD.	
EPLS	System Entity	The Excluded Parties List System (EPLS) is the on-line authoritative source of parties excluded from Federal procurement and non-procurement programs, commonly referred to as the debarred list. EPLS identifies those parties excluded throughout the U.S. Government from receiving Federal contracts or certain subcontracts and from receiving certain types of Federal financial and non-financial assistance and benefits. EPLS is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	
eSRS	System Entity	The Electronic Subcontracting Reporting System (eSRS) provides a single point of entry for commercial suppliers to report subcontracting actions. It is the authoritative source to provide the government with insight as to how its subcontracting dollars are being distributed among small and disadvantaged businesses in relation to socioeconomic goals. eSRS is within the Federal Integrated Acquisition Environment (IAE) initiative.	
EVM Central Repository	System Entity	The EVM Central Repository provides and supports the centralized reporting, collection, and distribution for Key Acquisition EVM Data, such as Contract Performance Reports (CPRs), Contract Funds Status Report (CFSR), and the Integrated Master Schedule (IMS) for ACAT 1C & 1D (MDAP) as well as ACAT 1A (MAIS) programs.	
FBO	System Entity	Federal Business Opportunities (FBO) / Technical Data Solutions (FedTeDS) provides the single Government point-of-entry (GPE) for Federal Government procurement opportunities. Government buyers publicize opportunities by posting solicitation information directly to FBO/FedTeDS via the Internet. Commercial suppliers can search, monitor and retrieve opportunities solicited by the entire Federal contracting community. FBO/FedTeDS is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	
FedReg	System Entity	Federal Agency Registration (FedReg) provides the single authoritative source of Federal and Departmental entities engaged in intragovernmental transactions. FedReg allows each intragovernmental transaction to have information attached to it about each trading partner. FedReg is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Asset Management	System Entity	<p>The Asset Management Family of Systems encompasses systems which align with Dispose or Return Property and Materiel, Perform Build and Make and Maintenance and Sustainment, and Perform Asset Accountability Core Business Mission Capabilities, i.e., process asset information related to disposal/return, maintenance, and accountability. Systems in this Family perform the system functions such as:</p> <ul style="list-style-type: none"> <li>- Identify Return Requirement</li> <li>- Process Order Return</li> <li>- Identify Return Resource</li> <li>- Retrieve Item Status and Availability</li> <li>- Execute Return Schedule</li> <li>- Manage Disposal</li> <li>- Process Returned Materiel/Asset</li> <li>- Manage Asset Record</li> <li>- Perform Asset Accountability</li> <li>- Perform Build and Make and Maintenance and Sustainment.</li> </ul>	
FoS AT&L Data Sources	System Entity	The AT&L Data Sources Family of Systems encompasses systems such as EVM Central Repository, SMART, AIM and Dashboard.	
FoS Benefits Management	System Entity	<p>The Benefits Management Family of Systems comprises systems that support management of specified benefit programs (e.g., Federal Employee Health Benefit Plan, life, long-term care and unemployment insurance programs) for persons within Department of Defense oversight to include eligibility determination, counseling, and enrollment. This includes medical, dental, life and long-term insurance; pension/retirement; flexible spending; disability benefits; human resources entitlements; benefits eligibility, including management of housing and educational benefits, enrollment and termination; savings management (Thrift/Bonds); and benefits reporting.</p>	
FoS Budgetary Resource Management	System Entity	<p>Article I, section 9, of the Constitution of the United States provides that "no money shall be drawn from the Treasury, but in Consequence of Appropriations made by law ...". From this basic provision, a body of laws and regulations has evolved to govern the Federal budget process and prescribe generally uniform procedures for obtaining, expending, administering, and controlling resources. Federal appropriations law, U.S. Comptroller General Decisions, and OMB Circular A-11, Preparation, Submission, and Execution of the Budget, constitute authoritative guidance and set government wide policy for budgetary resource management. To comply with OMB Circular A-11, each agency of the Federal Government is responsible for preparing an agency budget estimate to request funding and for establishing a system for ensuring that it does not obligate or disburse funds in excess of those appropriated or authorized. The Budgetary Resource Management function of the Core financial system is an agency's primary tool for carrying out this responsibility. In addition to supporting the government wide policies, the Budgetary Resource Management function must support agency policies on internal funds allocation methods and controls.</p> <p>An agency will likely have many other systems in addition to the Core financial system that affect budgetary resources. For example, procurement and travel systems generate documents that commit and obligate funds. These and other systems that affect funds availability should access data in and use processes of the Core financial system to verify that funds are available and to update balances. These systems typically access the funds availability editing activity before allowing an obligation to be incurred, such as when entering into a contract. However, in some cases, such as payroll, this may not be practical.</p>	
FoS Chemical Management	System Entity	The Chemical Management Family of Systems is comprised of non-enterprise, Component and DLA systems that provide support for product hazard data stewardship operations which includes the creation, maintenance, and validation of DoD product hazard data in support of logistics, environmental and occupational health services.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Core Accounting System	System Entity	The FoS Core Accounting System entity represents the Component ERPs (i.e., DEAMS, GFEBS, Navy ERP) as they are identified in the Financial Management Functional Strategy with the purpose of defining a Target environment. These systems provide specific functional capabilities necessary for managing a general ledger, controlling spending, making payments, managing receivables, measuring costs, reconciling the agency's Fund Balance with Treasury, and reporting in the Federal environment.	
FoS Cost Management	System Entity	<p>The Cost Management function encompasses the capability to accumulate, recognize, and distribute the cost of an agency's activities in the financial system for management information purposes. Managerial cost accounting concepts and standards for the Federal Government are prescribed in SFFAS 4, Managerial Cost Accounting Concepts and Standards for the Federal Government, promulgated by FASAB.</p> <p>The term "cost" universally refers to monetary value of resources used or sacrificed, or liabilities incurred, to achieve an objective: such as to acquire or produce a good, or to perform an activity or service. However, the level of sophistication needed within the Cost Management function of the Core financial system is dependent upon an agency's requirements and the nature of the programs within the agency. For example, if an agency's primary mission is to produce a product or service for sale, the costing function typically will be accomplished in the Managerial Cost Accounting System that is integrated with the Core financial system. Programs with less crucial cost information needs might perform cost management functions by analytical or sampling methods.</p> <p>The managers and executives who have the need for cost information should drive cost management in agencies. Regardless of agency need, the Core financial system must contain basic cost management functions. For example, SFFAS 4 requires that cost information developed for different purposes should be drawn from common data sources and that cost reports should be reconcilable to each other. Once management has identified the cost objects it needs and the corresponding structure has been set up in the accounting system, the system accumulates cost data accordingly. A "cost object" is any activity, output, outcome, or item whose cost and revenue are to be measured, such as organizational units, programs, projects, targeted outputs, specific contracts, specific customers, work orders, GPRA programs and activities, etc. After cost information is accumulated and prepared, it is distributed to managers.</p>	
FoS Defense Acquisition Management	System Entity	Defense Acquisition Management Family of Systems encompasses authoritative data sources that are required to support the Defense Acquisition System (DAS) business and decision-making processes, including full lifecycle management from concept through disposal as required by statutory, regulatory, and policy requirements, for the acquisition and delivery of Major Defense Acquisition Programs (MDAPs) and Major Automated Information Systems (MAISs).	
FoS Distribution	System Entity	<p>The Distribution Family of Systems encompasses systems which align with Deliver Property and Forces Core Business Mission Capability, i.e. process information relating to reserving resources, managing shipments and assembling forces, and transportation of goods. Systems in this Family perform the system functions such as:</p> <ul style="list-style-type: none"> <li>- Distribute Products</li> <li>- Execute Materiel Resource Schedule</li> <li>- Plan Materiel Resources</li> <li>- Provide Order Status</li> <li>- Identify Transportation Resource</li> <li>- Accept Materiel/Personnel for Transportation</li> <li>- Package/Handle/ Transport Material/Personnel</li> <li>- Process Shipments</li> <li>- Record Receipt</li> <li>- Execute Transportation Schedule</li> <li>- Track Transportation Status.</li> </ul>	
FoS Energy	System Entity	The combination of Component energy systems that enable the EEIM capability through management of energy consumption, energy conservation, and renewable energy production and purchase information.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Enterprise System	System Entity	The FoS Enterprise System Entity is a place holder that represents all other interfacing systems that are not part of this BEA release.	
FoS ESOH	System Entity	The Environment, Safety, and Occupational Health Family of Systems comprise systems that support the environmental, safety and occupational health aspects of the DoD mission. These systems support program execution, management, oversight and reporting for cleanup at active, closing bases, and formerly owned, operated, and controlled properties; compliance with environmental laws; conservation of natural and cultural resources; pollution prevention; environmental technology; fire protection; safety and explosive safety; and pest management and disease control for Defense activities worldwide.	
FoS External Systems	System Entity	The FoS External Systems is a place holder that represents all Non-DoD interfacing systems that are not part of this BEA release.	
FoS Force Management	System Entity	The Force Management Family of Systems comprises systems that support the Force Manager roles, which are involved with total force management, including the development, analysis and implementation of position plans, management of strength levels against those plans, and acceptance of individuals into the Department of Defense to ensure the efficient and effective support of wartime and peacetime operations, contingency planning, and preparedness. In addition, the Force Management Family of Systems supports all activities associated integrating workforce analysis results into force structure requirements and personnel functions such as Stop Loss. This Family of Systems enables proper utilization of Department of Defense human resources through structuring organizations, validating organizations against budgetary constraints, establishing and allocating positions, and managing programs required to support these strategic goals.	
FoS Fund Balance with Treasury Management	System Entity	The Fund Balance with Treasury (FBWT) represents the money an agency can spend on future authorized transactions. Agencies record transactions that increase and decrease their FBWT to U.S. SGL account 1010 in their general ledger. Appropriation warrants, non-expenditure transfers, collections, and disbursements are some of the transactions that impact an agency's FBWT. Treasury requires that agencies reconcile their FBWT accounts regularly. RFCs, Disbursing Offices, and other depositories provide Treasury with receipt and disbursement activity of the government. A comparison of this receipt and disbursement activity with agency records ensures the integrity and accuracy of internal and government wide financial report data.	
FoS General Ledger Management	System Entity	General Ledger Management Family of Systems is the central function of the Core financial system. All transactions to record financial events must post to the general ledger, regardless of the origin of the transaction. Transactions originating in other systems may post to the general ledger at a summary level, depending on an agency's overall financial management system design and need. At a minimum, however, summary transactions must post at a level that maintains the accounting classification elements and attributes needed to support central agency reporting. The general ledger must summarize and maintain account balances at the U.S. SGL account and attribute level. In addition, it must maintain balances by the accounting classification elements established in the System Management function. For example, account balances must be maintained at the internal fund and organization level. An agency might choose to classify financial data at a lower level by establishing general ledger subaccounts or agency-specific accounting classification elements in order to support internal reporting needs or program management performance reporting. The general ledger must maintain account balances at these agency-specific levels, as well.	
FoS GIS	System Entity	Systems that are sanctioned by the DoD Component IGI&S programs. Examples include: Army Mapper, GeoFidelis web viewer, GeoBase, GeoReach, etc.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS HR Decision Support Management	System Entity	The Human Resources Decision Support Management Family of Systems comprises systems that analyze human resources information and other permanent records from multiple sources. The related automated workforce analysis models and report generation capabilities are needed to support the information requirements of policy formulation and decision support within DoD and other federal government applications. The Readiness Assessment applications, as well as the numerous service Recruiting and Promotion forecasting models, are examples of how systems within this family can provide the information needed to support senior leadership decisions.	
FoS HR Organizational Infrastructure Support Management	System Entity	The Human Resources Organizational Infrastructure Support Management Family of Systems comprises systems that support oversight of the enterprise human resources organizational infrastructure necessary to sustain DoD mandated responsibilities for safety and accident-reduction activities as well as human resources communications, labor relations and equal opportunity programs.	
FoS Human Resources Information Security Management	System Entity	The Human Resources Information Security Management Family of Systems comprises systems that support the Personnel Security Specialist roles, which are involved with ensuring members, employees, contractors, and others have been approved to enter Federal buildings, utilize Federal services, and access sensitive information. In addition, the Human Resources Information Security Management Family of Systems supports all activities associated with eligibility determination, badge issuance, clearance tracking, and security verification services.	
FoS Installations	System Entity	The Installations Family of Systems is comprised of systems that manage installations and facilities that support Defense activities with the acquisition, operation, sustainment, recapitalization, and disposal of real property assets, and the delivery of selected services in support of a Defense Installation's or Defense Agency's assigned mission.	
FoS IUID Registry	System Entity	The Unique Item Identifier (IUID) Registry Family of Systems is a repository where all IUID data for materiel items are captured. It serves as an acquisition gateway to identify what the item is, who receives the item originally, the initial value of the item, the contract and organization the item is acquired from, and the unique item identifier (UII). For new items, the IUID Registry also captures pedigree information about the item at the time of delivery, providing acceptance evidence.	
FoS Law Enforcement Management	System Entity	<p>The Law Enforcement Management Family of Systems comprises systems that support the Law Enforcement Professional roles, which are involved with the protection of people, places, and things from criminal activity resulting from non-compliance with U.S. laws.</p> <p>In addition, the Law Enforcement Management Family of Systems supports all activities associated with law enforcement patrols, undercover operations, responses to emergency calls, as well as arrests, raids, and seizures of property.</p>	
FoS Legal Services Management	System Entity	The Legal Services Management Family of Systems comprises systems that support the Legal Services Professional roles, which are involved with resolution facilitation, the administration of adverse actions (judicial and non-judicial), and analysis of the legal aspects of other actions.	
FoS Logistics Planning	System Entity	<p>The Logistics Planning Family of Systems encompasses systems which align with Deliver Property and Forces and Dispose or Return Property Materiel Core Business Mission Capabilities, i.e. determining resources, forecasting demand, balancing resources and demand, and publishing supply chain plans. Systems in this Family perform the system functions such as:</p> <ul style="list-style-type: none"> <li>- Assess Capacity</li> <li>- Assess Demand</li> <li>- Develop Integrated Logistics Plan</li> <li>- Develop Logistics Strategy</li> <li>- Identify Materiel Requirement</li> <li>- Plan Distribution</li> <li>- Plan Logistics Services</li> <li>- Plan Materiel Resources.</li> </ul>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Manage Receipt and Acceptance	System Entity	The Manage Receipt and Acceptance Family of Systems encompasses systems which align with the Manage Receipt and Acceptance Core Business Mission Capability, i.e., process information related to receiving and accepting goods and services. Systems in this Family perform the system functions such as Manage Agreement and Contract and Order, Manage Electronic Catalog and Ordering and Manage Receipt and Acceptance.	
FoS Manage Request	System Entity	The Manage Request Family of Systems encompasses systems which align with the Manage Request Core Business Mission Capability, i.e., assist in collecting and analyzing requirements, conducting market research, forecasting demand, analyzing spend data, developing or refining sourcing plans, and identifying agreements. Systems in this Family perform the system functions such as: <ul style="list-style-type: none"> <li>- Aggregate Spend Data</li> <li>- Manage Buyer or Seller Registration Information</li> <li>- Manage Performance Information, Manage Requirement</li> <li>- Manage Solicitation, Manage Supplier Eligibility</li> <li>- Manage Supplier Representation and Certification.</li> </ul>	
FoS Manage Sourcing	System Entity	The Manage Sourcing Family of Systems encompasses systems which align with the Manage Sourcing Core Business Mission Capability, i.e. assist in establishing a sourcing vehicle with government and commercial sources, conducting a solicitation, executing the contract, administering the contract through closeout, and monitoring and improving processes. Systems in this Family perform the system functions such as: <ul style="list-style-type: none"> <li>- Manage Contract Wage Determination</li> <li>- Manage Federal Technical Data</li> <li>- Manage Contract Award</li> <li>- Manage Procurement Information</li> <li>- Manage Subcontractor Activity Information.</li> </ul>	
FoS Medical Administration	System Entity	The Medical Administration Family of Systems comprises systems that support the Medical Administrator roles, which are involved with providing direction, resources, health care providers, eligibility, enrollment, and other means necessary to promote the health of the Department of Defense TRICARE beneficiary population. In addition, the Medical Administration Management Family of Systems supports all activities associated with health affairs, which includes providing health services, support force medical readiness; developing and promoting health awareness issues to educate customers; discovering and resolving environmentally based health threats; providing preventive care and problem intervention; and improving the means and methods for maintaining the health of the beneficiary population by constantly evaluating the performance of the health care services system.	
FoS Monitor Payment	System Entity	The Monitor Payment Family of Systems encompasses systems which align with the Management Payment Core Business Mission Capability, i.e. assist in calculating entitlement, and managing and monitoring payments. Systems in this Family perform the system functions such as: <ul style="list-style-type: none"> <li>- Calculate Supply Chain Entitlement</li> <li>- Manage Disbursements</li> <li>- Manage Scheduled Payments</li> <li>- Monitor Payment</li> <li>- Prepare Certified Business Partner Payment.</li> </ul>	
FoS Other Financial Management	System Entity	The Other Financial Management Family of System encompasses all financial system functions that fall outside of the core financial systems as defined by OFFM 0106. This Family of Systems included, but is not limited to, the management of investments.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Payment Management	System Entity	<p>The Payment Management Family of Systems function deals with accounts payable. Depending on an agency's system architecture, specific activities relating to payments may be supported in Core by other systems that provide payment data to the Core financial system for control and management. For example, payroll systems usually trigger actual disbursements to employees through direct deposit or by check, and send only the expense and disbursement information to the Core financial system for recording the impact on the general ledger, funds control, and cost management processes. Likewise, loan and grant programs might be supported by systems that maintain their own information on payees and payments and send transaction data to the Core financial system.</p> <p>Other systems may support activities that lead up to the payment stage, such as recording obligations and expenditures and establishing payables, but depend on the Core financial system to manage the actual payment process itself. For example, a travel system might calculate the amount to be paid on a travel voucher and send transactions to the Core financial system to record the expenses and a payable to the traveler. The Core financial system would then schedule the payment for disbursement and confirm that the disbursement has been made.</p>	
FoS Personnel and Pay Management	System Entity	<p>The Personnel and Pay Management Family of Systems comprises systems that support the Human Resources Specialist roles, which are involved with a Member's entry to/exit from the organization; Human Resources profile and record management; career development and management; execution of human resources policies and procedures; and pay administration, authorization and calculation. In addition, the Integrated Personnel and Pay Management Family of Systems supports all activities associated with , recruiting, accessions, civilian personnel acquisitions, individual assignment and transfer, force distribution execution, , budget justification, resource utilization projections, discipline, time and attendance tracking, casualty assistance, human resources general reporting, occupational classification, education, training, competency management, disability evaluation, retirement/separation management, recognition, performance review and administration (including the promotion process), pay administration and policy, leave calculation, annuitant and retirement pay, special pay and entitlement, pay authorization and calculation, pay adjustment, allotments, bonds, garnishments and offsets, Thrift Saving Plan calculation, payroll and tax reporting, compensation, travel pay and other reimbursables.</p>	
FoS Quality of Life/MWR Management	System Entity	<p>The Quality of Life/MWR Management Family of Systems comprises systems that supports the Family Support Manager roles, which are involved with maintaining or improving people's quality of life and individual dignity/rights, providing family support, counseling services, financial planning, off installation housing general information, child care, military spouse employment and career opportunities, dependents' education, schools, children's educational transitions, commissary and military exchange systems, support for victims of domestic violence, support during the deployment cycle, recreational opportunities, and tuition assistance.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Receivable Management	System Entity	<p>Receivables are established to account for amounts due from others as the result of performance of services by the agency, delivery of goods sold, the passage of time (e.g., interest earned), overpayments, or other actions. Receivables are accounted for as assets until funds are collected, or determined to be uncollectible in whole or in part. In addition, some receipts may be collected without the prior establishment of a receivable, as in the case of goods sold for cash. Federal debt management regulations are documented in several different sources. The Debt Collection Act of 1982 authorized agencies to charge interest, penalties, and administrative costs against delinquent non-Federal debtors, and on debts due from state and local governments. OMB Circular A-129, Policies for Federal Credit Programs and Non-Tax Receivables, prescribes policies and procedures for collecting non-tax receivables and sets standards for servicing these receivables and for collecting delinquent debt. DCIA established a framework for improved Federal debt collection by requiring agencies to take prompt action to recover debts, screen potential borrowers related to credit programs, and resolve outstanding debt through various options. DCIA centralized the management of delinquent non-tax obligations overdue by 180 days in the Department of the Treasury for administrative offset and cross-servicing. In addition, DCIA allows referral of the delinquent debt to the Department of Justice for litigation. To remain in compliance with these requirements, Federal agencies, unless otherwise precluded from statute, must accurately and timely report on receivables by submitting all required information on the TROR. Depending on an agency's system architecture, servicing and collection activities for some receivables may be supported by other systems that provide data to the Core financial system. This would be particularly appropriate for receivables resulting from large programs with complex data requirements, such as loan programs, grant programs, or fee-for-service programs. Servicing and collection of receivables with simpler requirements for supporting data, such as those resulting from erroneous payments, may be supported directly by the Core financial system with no support by other systems. Servicing of payroll collections (benefits, judgments, etc.), however, should be maintained in the payroll system and made available to the Core system for recording the general ledger impact. The Receivable Management function includes recording, billing, monitoring, and collecting amounts due the government whether previously established as a receivable or not. These activities must be supported by aging schedules, exception reports, and reports used to monitor due diligence efforts.</p>	
FoS Travel Management	System Entity	<p>The Travel Management Family of Systems comprises systems that support the Travel Specialist roles which are involved with authorizing and documenting all types of official travel (e.g., initial hire/first duty station travel, temporary duty (TDY) travel, Noncombatant Evacuation Operations, and permanent change of station (PCS) travel). In addition, the Travel Management Family of Systems supports all activities associated with verifying a travel authorization, required documentation, and traveler's eligibility and credentials (e.g., security clearance, passport, visa, and foreign area clearance); initiating and finalizing travel requests and authorizations; gathering information necessary to create a travel authorization for individual or group travel; verifying funds availability; arranging travel accommodations (e.g., airlines, rental car, and lodging); estimating travel costs; and completing and issuing travel authorizations to the traveler and accounting to obligate funds.</p>	
FoS Treasury System	System Entity	<p>The FoS Treasury System is a place holder that represents Treasury interfacing systems to DoD.</p>	
FPDS-NG	System Entity	<p>The Federal Procurement Data System-Next Generation (FPDS-NG) provides visibility into all federal contract sourcing arrangements with commercial suppliers. It is a web-based system that offers both the public and Federal Government with a self-service, near real-time, searchable repository for information about unclassified government contracts with third party vendors. FPDS-NG will collect contract reporting data from all federal agencies. FPDS-NG is a system within the Federal Integrated Acquisition Environment (IAE) initiative.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
HMIRS	System Entity	The Hazardous Materials Information Resource System (HMIRS) is a DoD automated system developed and maintained by the DLA to satisfy DoDI 6050.5 by storing Material Safety Data Sheets (MSDS) and other related data for hazardous material procured by the Department of Defense (DoD), the General Services Administration (GSA), and other Federal Agencies. HMIRS was the DoD system designated by OSD as the solution for one location to store the MSDSs for DoD, making it the authoritative source. The MSDS data is available on the world wide web and via compact disk (CD). HMIRS is the central repository for Material Safety Data Sheets (MSDS) and value added information including HAZCOM warning labels and transportation information on the four major modes of transport for hazardous materials purchased by the Federal Government, Department of Defense (DoD) and Civil Agencies. MSDS data is usually available at the time of material acquisition through DoD focal points, who scan the MSDS into HMIRS then review and place the transportation, labeling, environmental, and disposal information into the system. MSDS information includes chemical constituency and hazard communications information needed to comply with the Occupational Safety and Health Administration (OSHA), and with regulations promulgated by the Environmental Protection Agency (EPA) and the Department of Transportation (DOT) regulatory guidance. The MSDS data is currently rekeyed into like fields to allow for ease of data sharing with other systems. Future XML enhancements for companies providing MSDS in XML format will automate this process.	
JCCS	System Entity	JCCS is a real time contract data repository and reporting tool for reconstruction contracts in Iraq and Afghanistan. The goals of the system include 1) allow the posting of Iraqi and Afghani reconstruction solicitations, 2) the functionality to review vendor past performance, 3) provide a web-based location for vendors to submit proposals, 4) track all historical reconstruction data, 5) allow oversight of in-theatre contracts to monitor cost, schedule, performance, and vendor activities, and 6) track spend analysis for strategic sourcing and staffing.	
KBCRS	System Entity	A web-based, DITSCAP certified application that provides environmental program data to OSD for the entire Department. The Knowledge Based Corporate Reporting System (KBCRS) maintains environmental cost estimate data, related to environmental, safety, and occupational health (ESOH) solutions, that is extracted from DoD's Component organizations. It also performs validity checks on the information and consolidates various program areas' data for broader decision-making and reporting purposes. Current programs include Cleanup (Defense Environmental Restoration Program), the Military Munitions Response Program (MMRP), and Solid Waste reporting. KBCRS incorporates Cleanup action data from 1997 forward and MMRP data from 2001 inception forward. Some data is provided to the general public, but most detailed ESOH solution implementation information is reserved for authorized users within the DoD or its Components and authorized users from state and Federal EPA offices, Federal Land Managers, and selected Native American tribes. KBCRS includes predefined reports (many published in Annual Report to Congress) and several user-selectable queries. A powerful ad hoc reporting tool exists for power users. It provides detailed appendices to the Environmental Management Annual Report to Congress and the ability to conduct analyses at the corporate level.	
MOCAS	System Entity	Contract Management and Entitlement system for complex contracts (Administer Procurement Instrument).	
NGRMS	System Entity	NGRMS is a system used to formulate, justify, present, and defend the DoD budget, including equipment maintenance support, software upgrades, and software licenses.	
ORCA	System Entity	The Online Representations and Certifications Application (ORCA) is the single entry point for suppliers to assert their compliance with Federal law via submission of Federal Acquisition Regulation (FAR)-required Representations and Certifications. It provides Government Contracting Officers the authoritative source of that information. ORCA is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
PBAS	System Entity	The Program Budget Accounting System (PBAS) is used by the DoD to control and distribute funds from the department level to the DFAS field Sites. PBAS performs the funds distribution electronically by allowing the user to create the funding documents on the PBAS system and transmitting receipts. PBAS prevents over distribution of funds from occurring by the use of system controls which limits the amount of funds distributed to the amount loaded into the PBAS system by the appropriated sponsor. The PBAS system controls also prevent over distribution of funds by restricting the dollar amount of the funds reprogrammed to the threshold amount determined by congressional programming rules.	
PPIRS	System Entity	The Past Performance Information Retrieval System (PPIRS) is the authoritative source for contract Performance Assessment Reports (PARs) submitted by Federal government officials. It compiles data from several report card systems in the Federal government for a consolidated view. PPIRS is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	
RPAD	System Entity	The Real Property Asset Database (RPAD) is the central repository of DoD real property inventory (RPI) data for the Office of the Secretary of Defense. RPAD is a Net-centric data warehouse with a multi-tiered Service Oriented Architecture (SOA). This system is being developed in response to an I&E Business Enterprise Integration study recommending DoD Real Property Inventory (RPI) data be near real-time data, Web assessable to known and unanticipated users, trustable (auditable), and support projected real property inventory requirements. RPAD will also be used to compute and report estimated facility-related operation, sustainment, and recapitalization costs on financial statements and to capture acquisition costs and assign to responsibility segments. RPAD uses the Military Departments' and WHS authoritative RPI databases as its data sources and is used to populate a variety of real property resourcing predictive models. It is also used to answer DoD senior leadership and Congressional RPI inquiries and is the data source for OSD RPI studies.	
RPUIR	System Entity	The Real Property Unique Identifier Registry (RPUIR) supports the Enterprise Capability requirement for a Real Property Inventory. Consistent with the Real Property Inventory Requirements processes and data standards, the system objective is to enable visibility of financial, physical (including environmental), and legal information on the Department's real property inventory through the assignment and tracking of site and real property unique identifiers. The RPUIR stores and maintains individual asset record information, including the physical, legal and financial information necessary to establish unique identities and maintain current status of real property assets throughout their lifecycle. The Registry thereby enables accurate consistent valuation of real property and ensures accountability. This net-centric, service-oriented, and secure information technology system also provides secure interfaces with Component real property and non-real property systems to distribute authoritative real property data throughout the DoD.	
SDI	System Entity	The Standard Disbursing Initiative (SDI) addresses current disbursing challenges by consolidating existing functionality to meet DFAS customer needs for enterprise and tactical disbursing. SDI encompasses all current and future disbursing systems operated by DoD. The target disbursing systems are ADS for enterprise and DDS for tactical. Legacy system SRD1 is being retired, while CDS is being merged with ADS. In addition, SDI supports the implementation of ERPs.	
SMART	System Entity	A collaborative web-based tool that adheres to OSD and SAF/AQ acquisition policy/business rules to: (1) enable program managers to simplify management of acquisition programs and (2) standardize command and control of acquisition programs across the Air Force. It allows acquisition program managers and their staff to accurately and efficiently assess the health of their programs and provides near-real time reporting to senior Air Force and DoD leaders. SMART allows senior executives review of program health for a single program or across a portfolio of programs. SMART products include deliverable schedule reports, monthly acquisitions reports, and risk impact assessments.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
SPOT-ES	System Entity	Synchronized Pre-deployment and Operational Tracker (SPOT) acts as the Joint Enterprise system for tracking contractors who deploy with the military. It's the only system that supports the DoDI 3020.41 requirements to relate contract level information with individual contingency contractor employee information. The system is populated by Company personnel via secure, Internet access and updated with current locations as individuals move throughout the area of responsibility. Government Agencies use SPOT to analyze available contract services and to support their mission needs, Defense Contractors use SPOT to process and track the individuals who deploy to provide required capabilities and Combatant Commanders use SPOT reports to maintain overall visibility of contractors within their area of responsibility and integrate contractor support into their operational plans.	
SPS	System Entity	The Standard Procurement System (SPS) provides Enterprise-wide contract writing and management capabilities and is a key enabler providing visibility into materiel and services sourcing actions of the Department. It allows for a standard method for producing agreements with suppliers.	
Treasury-CARS	System Entity	This system covers central accounting and reporting functions and processes associated with budget execution, accountability, and cash/other asset management, including collection and dissemination of financial management and accounting information.	
USXPORTS	System Entity	The US Export Systems (USXPORTS) is a \$30 million plus, congressionally mandated, mission essential IT system, which is having a positive and lasting impact on our national security, homeland defense, and the US economy. USXPORTS, which rolled out Version 3.0 on May 16, 2005, is expediting the license application decision process while concurrently improving protection of national security interests and industry proprietary data. The program, which automates a predominantly paper-based process, projects a return on investment of over 200% as a result of reduced use of paper, manpower savings, reduced cycle times and productivity enhancements. These benefits are realized by both DoD and Industry. The system improves throughput of export applications within DoD, resulting in a direct and dramatic impact on exports and the U.S. economy. This initiative will design, develop, and deploy enhancements to USXPORTS IAW DoDD 5000.2, the Clinger-Cohen Act, GPEA, and other regulations/policies. Enhancements include: Expanding Service Component's requirements to include auto-staffing and databases; Expanding the intelligence capability within DoD organizations and among export control Government Agencies; Expanding the advanced analysis capability to include indirect analysis/data mining and document comparison. Providing capability to capture export "shipped" data and build additional interagency interfaces as appropriate.	
VIPS	System Entity	VIPS will modernize and automate the IT capabilities for qualifying Applicants into the Military Service during wartime, peacetime, and mobilization. VIPS will enable a responsive, flexible and efficient means to qualify Applicants to meet manpower resource requirements for the uniformed Services, Coast Guard, and National Guard routine and contingency operations. VIPS will be the future accessioning system to be used by the USMEPCOM which serves as the single entry point for determining the physical, aptitude, and conduct qualifications of candidates for enlistment. VIPS will provide the capability to electronically acquire, process, store, secure, and seamlessly share personnel data across the ACOI. When fully implemented, VIPS will reduce the cycle time required to induct enlistees to meet the needs of Homeland Defense, reduce the number of visits to the MEPS, reduce manual data entry errors, and reduce attrition through better pre-screening practices. The implementation of SOA technology will enable accession data to be securely available to applicants and ACOI partners such as Recruiting and Training Commands, DMDC, Military Health System, HRM, and DTMO. VIPS will support compliance with DoD direction for a net-centric environment and take advantage of automated data capture technology, such as medical equipment with the capability to capture and electronically transmit exam results. The accessioning system of the future will be location independent, virtually paper-free, and automated to assist with bringing the right people at the right time to operational commanders. On November 1, 2008, the BTA assumed program lead. Funds are being transferred to BTA starting in FY 2010.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
WAWF	System Entity	Wide Area Workflow (WAWF) provides the Department and its suppliers the single point of entry to generate, capture, and process invoice, acceptance, and payments related documentation and data to support the DoD asset visibility, tracking, and payment processes. It provides the nexus of information related to acceptance of goods and services in support of the DoD supply chain.	
WDOL	System Entity	Wage Determinations Online (WDOL) provides a single location for federal contracting officers to obtain appropriate Service Contract Act (SCA) and Davis-Bacon Act (DBA) wage determinations (WD) for each official contract action. WDOL is a system within the Federal Integrated Acquisition Environment (IAE) initiative.	
Accept Materiel/Personnel for Transportation	System Function	This function prepares the manifest/shipping documents that are used in the transportation process. This function updates the records to show status in-transit.	
Aggregate Spend Data	System Function	This system function gathers, consolidates, and aggregates historical DoD procurement expenditure data that is used to enable strategic sourcing. The intent is to discover historical spend information and use that information to develop better sourcing strategies. This system function generates specific spend reports to support development of sourcing plans. Spend data includes post-award data used to identify strategic sourcing opportunities, such as total obligated amount per fiscal year, socio-economic information, and supplier concentration.	
Assess Capacity	System Function	This function records into the planning database an assessment of the impact of logistics capacities on the logistics planning objectives. Capacities may apply to any materiel resource or means of production or delivery used for logistical purposes. The assessments may be based on calculations or forecasts dealing with existing capacity, current and planned use of capacity, and the degree to which a capacity limit is approached or exceeded.	
Assess Demand	System Function	This function records into the planning database an assessment of the impact of logistics order backlogs on the logistics planning objectives. Order backlogs may pertain to orders for materiel, transportation, or other logistics services. Based on the assessment of backorders, aggregate projections and forecast demands are revised.	
Assess Operational Requirement	System Function	This function provides for the creation and maintenance of assessments of operational requirements included in alternative strategies and objectives. The assessments relate to budget data and business plans. This function supports scenarios and 'what-if' statements.	
Calculate Supply Chain Entitlement	System Function	The system function processes claims for payments that are tendered against valid purchase contracts. It determines the validity of payment claims, calculates the appropriate payment date and determines the exact amount of each qualified payment. It computes the appropriate interest and penalties for late payments and discounts based upon established business rules. It calculates the initial payment date based on business rules, such as the Prompt Payment Act.	
Chemical Management	System Function	This system function collects, stores, updates, and disseminates product hazard data (PHD) and PHD-related information (e.g., requests for PHD) associated with the management of hazardous materials. Examples of PHD include Material Safety Data Sheets, chemical and regulatory information and DoD value added data.	
Collect Adverse Actions Data from External Source	System Function	Functionality includes capturing adverse actions data from interfacing systems or data files sent by external systems (e.g., information from civilian law enforcement systems). These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database (e.g., information from civilian law enforcement systems).	
Collect Assignment Action Data from External Source	System Function	Functionality includes capturing assignment action data (e.g. individual assignment response data, funded position identification data, assignment request data, force structure data, strategic planning guidance data, asset data, program and funding document data, and personnel distribution requirement data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect Assignment Order Data from External Source	System Function	Functionality includes capturing assignment order data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This data may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, and accommodations), and order type.	
Collect Civilian Personnel Separation and Retirement Data from External Source	System Function	Functionality includes capturing civilian personnel separation and retirement data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Civilian Staff Acquisition Management Data from External Source	System Function	Functionality includes capturing civilian staff acquisition management data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing civilian staff acquisition management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Collect Compensation and Reimbursements Data from External Source	System Function	Functionality includes capturing compensation and reimbursements data (e.g., collection data, individual allotment data, individual tax levy data, individual indebtedness acknowledgement data, debt disposition data, individual in-service indebtedness data, debtor response data, department of defense fund balance data, individual reimbursement request data, and individual travel authorization data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Deliver Morale, Welfare and Recreation Program Data from External Source	System Function	Functionality includes collecting Morale, Welfare and Recreation (MWR) program data (e.g., MWR program usage request data, individual human resources data, retirement checklist action requirement data, separation checklist action requirement data, and debtor response data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Education Benefit Data from External Source	System Function	Functionality includes capturing education benefit data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Education Management Data from External Source	System Function	Functionality includes capturing education management data (e.g., Department of Defense Fund Balance, market information, workforce analysis, aggregated spend, commitment modification request, program and funding document, notification of insufficient funds, contract or order closure, procurement change request, discrepancy report, contract or order, receiving report, advance ship notice, supplier advance ship notice, acceptance) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing education management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Collect Equal Opportunity Data from External Source	System Function	Functionality includes capturing equal opportunity data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Family Support Data from External Source	System Function	Functionality includes collecting family support data (e.g., Family Support Service Request, and HR Recovery Coordination Program Assistance Request) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Grievance Data from External Source	System Function	Functionality includes capturing grievance data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Health Insurance Benefit Data from External Source	System Function	Functionality includes capturing health insurance benefit data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect HR RCP Data from External Source	System Function	Functionality includes capturing Human Resources (HR) Recovery Coordination Program (RCP) data (e.g., recovering service member information response, RCP information, HR RCP evaluation response) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Human Resources Data from External Source	System Function	Functionality includes capturing Human Resources (HR) data (e.g., recruitment applicant data, HR personal change request data, military record correction request data, investigating officer report data, HR data request data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing HR data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement). This data may include (but not be limited to) updates to the HR profile.	
Collect Human Resources Interaction Data from External Source	System Function	Functionality includes capturing Human Resources interaction data, workforce communication request data, workforce analysis data, union relation program request data, labor rights issue request data, individual Human Resources personal data, military record correction request data, and investigating officer report data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Identity Credential Management Data from External Source	System Function	Functionality includes collecting Identity Credential Management data (e.g., employment status, national agency check, passport, driver's license) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Individual Assignment Data from External Source	System Function	Functionality includes capturing individual assignment data (e.g., assignment order requirements, assignment order acknowledgements, individual travel authorizations, and personnel development assignment requests) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Individual Training Course Management Data from External Source	System Function	Functionality includes capturing (individual training course data (e.g., workforce analysis information, individual training course resources availability information, department of defense fund balance, market information, aggregated spend information, notification of insufficient funds, program and funding document, commitment modification request, contract or order information, contract or order closure information, procurement change request, advance ship notice information, supplier advance ship notice information, acceptance evidence, receiving report information, discrepancy report information, and individual training course student enrollment request) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing individual training course data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Collect Interagency Support Data from External Source	System Function	Functionality includes capturing interagency support data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Law Enforcement Data from External Source	System Function	Functionality includes capturing law enforcement data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Leave Sell Back Data from External Source	System Function	Functionality includes capturing leave sell back data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include (but not limited to) unused leave balance and the amount of leave to be sold.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect Legal Personnel Program Data from External Source	System Function	Functionality includes capturing legal personnel program data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Line of Duty Determination Process Management Data from External Source	System Function	Functionality includes capturing line of duty determination process management data (e.g., incident notification, adverse action notification, line of duty legal recommendation documentation, line of duty request documentation, and line of duty appeal request) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Logistics Network Infrastructure Information	System Function	This function provides maximum capacity with the logistics supply chain. This function captures all logistics resources by location, availability and capacity. This function also captures leading practice/ historical information to support alternative strategies and objectives.	
Collect Manage Casualty Assistance Programs from External Destination	System Function	Functionality includes capturing personnel casualty management data (e.g., incident notification, casualty incident corrective information, casualty response information, transportation schedule, casualty legal recommendation information, and personnel recovery request information) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Manpower Data from External Source	System Function	Functionality includes capturing data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Manpower Document Data from External Source	System Function	Functionality includes capturing manpower document data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Military Health Benefit Data from External Source	System Function	Functionality includes capturing military health benefit data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Military Personnel Retirement Data from External Source	System Function	Functionality includes capturing military personnel retirement data (e.g., retirement inquiry data, retirement request data, retirement appeal request data, retirement checklist action completion data, military experience and training discrepancies data, retirement order acknowledgement data, and individual travel authorization data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Military Personnel Separation Data from External Source	System Function	Functionality includes capturing military personnel separation data (e.g., separation request data, separation appeal request data, separation order acknowledgement data, stop loss criteria data, reduction in force data, transfer eligibility concurrence data, military experience and training discrepancies data, separation checklist action completion data, involuntary separation acknowledgement data, and individual travel authorization data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Military Recruiting and Accession Management Data from External Source	System Function	Functionality includes capturing military recruiting and accession management data (e.g., competency testing results report, personnel requisition, personnel distribution plan, prospect location data, candidate recruitment data, competency testing results, individual travel authorization, classification action response, background investigation report, and assignment order) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing recruiting and accession waiver management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Collect Non-DoD Personnel Separation Data from External Source	System Function	Functionality includes capturing non-DoD personnel separation data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect Other Benefits Data from External Source	System Function	Functionality includes capturing other benefits data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Performance Evaluation Data from External Source	System Function	Functionality includes capturing performance evaluation data (e.g. performance evaluation shell, performance evaluation input, performance evaluation appeal request) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Performance Program Data from External Source	System Function	Functionality includes capturing performance program data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Availability Tracking Data from External Source	System Function	Functionality includes capturing personnel availability tracking data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Casualty Management Data from External Source	System Function	Functionality includes capturing personnel casualty management data (e.g., incident notification, casualty incident corrective information, casualty response information, transportation schedule, casualty legal recommendation information, and personnel recovery request information) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Development Data from External Source	System Function	Functionality includes capturing personnel development data (Request Data, Personnel Plan Data, Deficiency Data, Proposal Data, Buyer Materiel Data, Maintenance Data, Service Status Data, Aggregate Spend Data, Contract or Order Data, Force Structure Data, Market Data, Notification of Insufficient Funds Data, Occupational Safety Analysis Data, Personnel Distribution Requirement Change Data, Program and Funding Document Data, Strategic Planning Guidance, Department of Defense Fund Balance Data, Operational Experience Data, Individual Human Resources Data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Distribution Guidance Data from External Source	System Function	Functionality includes capturing personnel distribution guidance data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Distribution Plan Data from External Source	System Function	Functionality includes capturing personnel distribution plan data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This data may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Collect Personnel Grade Change Data from External Source	System Function	Functionality includes capturing personnel grade change data (e.g., program and funding document, Department of Defense fund balance, promotion criteria, promotion appeal package, individual promotion response, and personnel grade change final order) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Readiness Data from External Source	System Function	Functionality includes capturing personnel readiness data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Requirement Request Data from External Source	System Function	Functionality includes capturing proposed personnel requirement request data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect Personnel Retention Data from External Source	System Function	Functionality includes capturing personnel retention data (e.g., Enlistment Extension Appeal Data, Individual Enlistment Extension Response Data, Individual Reenlistment Response Data, Officer Involuntary Retention Appeal Data, Stop Loss Criteria Data, Stop Loss Notification Data, Individual Human Resources Data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Personnel Security Data from External Source	System Function	Functionality includes capturing personnel security data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Physical Evaluation Process Data from External Source	System Function	Functionality includes capturing physical evaluation process data (e.g., medical evaluation findings data, continuation of service request data, Veterans Affairs disability severity data, and physical evaluation appeal request data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This may include capturing physical evaluation process data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Collect Physical Fitness Program Data from External Source	System Function	Functionality includes capturing physical fitness program data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Quality of Life Program Management Data from External Source	System Function	Functionality includes collecting Quality of Life (QoL) program management data (e.g., QoL program proposal, department of defense fund balance, workforce analysis information) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Recognition Program Data from External Source	System Function	Functionality includes capturing recognition program data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This data may include (but not be limited to) award name, award recommendation, and award nominator.	
Collect Retirement Benefit Data from External Source	System Function	Functionality includes capturing retirement benefit data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Time, Absence, and Labor Data from External Source	System Function	Functionality includes capturing time, absence, and labor data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database. This data may include (but not limited to) documenting labor allotted to specific tasks, duty participation, projects, and/or programs.	
Collect Transfer Data from External Source	System Function	Functionality includes capturing transfer data (e.g., transfer order data, transfer appeal request data, individual transfer response data, transfer order acknowledgement data, individual travel authorization data, transfer request data, transfer order requirement data) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Transition Assistance Program Data from External Source	System Function	Functionality includes capturing transition assistance program data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Travel Management Data from External Source	System Function	Functionality includes capturing travel management data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Unauthorized Absence Data from External Source	System Function	Functionality includes capturing unauthorized absence data (e.g., unauthorized absence notification, Federal Bureau of Investigation deserter information, return of unauthorized absence notification, inapprehensible unauthorized absence report, and unauthorized absence information request) from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Collect Workforce Analysis Data from External Source	System Function	Functionality includes capturing workforce analysis data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Collect Workforce Occupational Safety Analysis Data from External Source	System Function	Functionality includes capturing workforce occupational safety analysis data from interfacing systems or data files sent by external systems. These data files can be retrieved from a common server where the system will be able to parse the data and store into its own database.	
Create Materiel Resource Plan	System Function	This function establishes a schedule for the materiel resources required for operational demand. In order to establish a materiel resource schedule, this function uses acquisition requirements, forecasted costs, estimated costs, and integrated time-phased actions and resources information. This function provides the capability to revise the materiel resource schedule based on changed requirements.	
Create Return Plan	System Function	This function creates a return plan that addresses all return capabilities and requirements needed to perform a materiel return and the disposal of excess, obsolete, or unserviceable materiel. It uses acquisition requirements, forecasted costs, estimated costs, integrated time-phased actions and resources, and non-financial information.	
Create Transportation Plan	System Function	This function establishes a plan for the transportation of materiel/personnel. Based on the movement/staging/dependencies, an overall plan for delivery of materiel/personnel is generated.	
Deliver Information Product	System Function	This function delivers information products to the information requestor using requirement details such as method of delivery, audience, time, and scope of product. The format of the delivered information product includes both distributed reports and analysis stores. The analysis stores support the use of executive dashboards, decision support tools, executive information tools, and ad-hoc query tools. Due to the wide range of decision making support needs, this system entity will need the flexibility to deliver single answers to operational users, data sets for analysis to analytic users, and the simultaneous delivery of information products to a single strategic user. Information products are delivered to both internal Department of Defense and external requestors on a scheduled and on-demand (ad-hoc) basis.	
Develop Integrated Logistics Plan	System Function	This function produces the integrated logistics plan from the various plans produced by materiel inventory, transportation, maintenance, returns, and logistics services. The integrated logistics plan is then distributed for execution of functions related to asset/materiel.	
Develop Logistics Strategic Plan	System Function	This function provides for the balancing and extending of existing logistics networks in support of alternative strategies and objectives. It develops an overall logistics plan based on outputs from collective logistics network infrastructure information and assessment of operational requirements.	
Develop Logistics Strategy	System Function	This function supports the development of strategic and business unit plans and objectives.	
Distribute Products	System Function	This function distributes the final information product to the end users specified in the delivery detail requirements. The distribution mechanism includes the delivery of both paper and electronic products. If the original information requirement could not be met, instead of distributing a product this function responds to the requestor with a reason why the request could not be met.	
Establish Transportation Movement Requirement	System Function	This function captures transportation requirements. This transportation planning function assesses movement requirements required to meet operational needs. All associated financial and non-financial special handling requirements such as environmental are captured.	
Execute Materiel Resource Schedule	System Function	This function triggers a detailed executable schedule from prior plans for all activities performed that involve the appropriation of material or supplies to meet actual or expected requirements.	
Execute Return Schedule	System Function	This function triggers a detailed executable schedule from planning that addresses all return capabilities and requirements needed to perform a materiel return into the logistics process or back to the vendor. This function also triggers a detailed executable schedule for the disposal of excess, obsolete, or unserviceable materiel.	
Execute Transportation Schedule	System Function	This function triggers a detailed executable schedule from planning for all activities performed that address the transportation capabilities and requirements needed to perform a transportation obligation to an organization.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Forecast Cash	System Function	This system function uses the general ledger and supporting subsidiary records/ledgers to establish and forecast a cash position for a DoD organization. The system function also monitors receivables/payables and projected disbursements.	
Formulate Program and Budget	System Function	This system function supports the collection and analysis of program data and the subsequent development of the Department of Defense resource allocations and budget proposal for inclusion to the President's Budget. The Formulate, Program, and Budget System function enables key decision-makers to synthesize strategic goals and set departmental focus areas. This function facilitates the detailed review of a program's capability, pricing, phasing, and overall probability to be executed on time and within budget. The formulation of the program and budget addresses the years to be justified in the President's Budget and prepares the programs to be developed into appropriations. This function includes updating the FYDP, development of budget guidance, review of component's budget proposals, and the budget hearing review between OSD, OMB, Congress and the components. This function also includes the negotiation of top-line passback information from the OMB to ensure consistency with the President's Management Agenda.	
Generate Payment Notification	System Function	This system function generates notifications of any payments made to include the final payment, the cancellation of any payments sent for disbursement, requests for refunds, and re-disbursement or re-calculation of payments returned or rejected by the payee.	
Get All Programs	System Function	Gets all Programs available.	
Get Budget by URI & Estimate Type	System Function	Gets all Budget information for a given program URI and Estimate Type such as Current Estimate, POM, BES and President's Budget.	
Get Contracts by Program URI	System Function	Gets all EV contracts for a given program URI.	
Get Critical Technologies by URI	System Function	Gets all Critical Technologies and associated KPPs for a given program URI.	
Get Milestones by Program URI	System Function	Gets all milestones for a given program URI.	
Get Program by Program URI	System Function	Gets the program and all sub-program information for a given program URI.	
Get Sub Programs by Program URI	System Function	Gets all Subprograms for a given program URI.	
Get Unit Costs by Program URI	System Function	Gets all Unit Costs for a given Program URI.	
Identify Materiel Requirement	System Function	This function captures materiel and asset requirements. This planning function for materiel and assets assesses the requirements needed to meet operational demand. All associated special requirements are captured. Environmental information is captured in order to plan for the hours, resources, and expected costs associated with materiel or assets containing environmental substances.	
Identify Resource for Activities	System Function	This function identifies the resources required to manage the incoming materiel to support the aggregate logistics plan. The resource plan is created based on materiel or asset resource requirements, capabilities, and capacity information. The status of all resources is maintained to help with materiel scheduling. Environmental information is captured and is used to help identify procedures for handling these products.	
Identify Return Requirement	System Function	This function captures requests for returns and disposal, including item, reason, responsible party, date expected, financial data, and environmental impacts.	
Identify Return Resource	System Function	This function identifies the availability and capability of resources for the return or disposal of an asset or materiel, non-compliant materiel or assets, incorrect shipments, incorrect shelf pulls, and excess materiel.	
Identify Transportation Resource	System Function	This function determines transportation routings, modes, and the resources necessary to move identified materiel. The status of all available transportation assets is maintained to help with scheduling of materiel/personnel movement. Environmental information is captured and is used to help identify transportation options.	
Implement Case in Foreign Military Sales Trust Fund	System Function	This system function is used to establish the contract (budget) authority at the case level and funds control to implement the case in the Foreign Military Sales Trust Fund. It receives the Accepted Letter of Offer and Acceptance document necessary to begin the execution of the case.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Implement Case Line Budget Authority in Foreign Military Sales Trust Fund	System Function	This system function distributes the budget authority of the case in the Foreign Military Sales Trust Fund to the Implementing Agency at the case line level.	
Maintain Adverse Actions Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting adverse actions data (e.g. non-judicial proceeding data, adverse action authoritative source document data, administrative hold notification data, and investigation report data) via user interface.	
Maintain Assignment Action Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting assignment action data transactions (e.g. candidate nomination for assignment, assignment action request, and assignment order) via a user interface.	
Maintain Civilian Personnel Separation and Retirement Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting civilian personnel separation and retirement transactions via a user interface.	
Maintain Civilian Staff Acquisition Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting civilian staff acquisition management transactions via a user interface.	
Maintain Compensation and Reimbursements Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting compensation and reimbursements transactions (e.g., earnings and deduction data) via a user interface.	
Maintain Deliver Morale, Welfare and Recreation Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Morale, Welfare and Recreation (MWR) data via a user interface.	
Maintain Education Benefit Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting education benefit transactions via a user interface.	
Maintain Education Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting education management transactions (e.g., occupation competencies, personnel development plans, course evaluation and instructor assessments, education course deficiencies, education requirements, education course curriculum, education resource requirements, education course scheduling, student enrollment, and student and instructor course evaluations) via a user interface.	
Maintain Equal Opportunity Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting equal opportunity transactions via a user interface.	
Maintain Family Support Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Family Support Needs Assessment Information transactions (e.g., case number, assessment of problem presented, and primary services recommended) via a user interface.	
Maintain General Ledger	System Function	This system function maintains visibility of the status of all DoD resources and financial obligations as reflected in proprietary, budgetary, and memorandum general ledger account balances. This system function represents both the general ledger and supporting subsidiary ledgers. The general ledger and supporting subsidiary ledgers are the single source for a DoD organization's trial balance and fiscal control in support of operations. This system function governs posting of transaction details to the subsidiary ledger and consolidation of those balances into the general ledger in accordance with the appropriate business rules. The general ledger and supporting subsidiary ledgers are maintained in accordance with the chart of accounts and accounting classification structure. The Maintain General Ledger system function also maintains centralized trial balances and ensures government-wide funds control over budgetary resources, cash, borrowing, and other means of financing. This system function reconciles agency and Treasury accounts (fund balances, outlays and receipts, intra-governmental transactions). This system function also closes the General Ledger according to appropriate business rules.	
Maintain Grievance Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting grievance transactions via a user interface.	
Maintain Health Insurance Benefit Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting health insurance benefit transactions via a user interface.	
Maintain HR RCP Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Human Resources (HR) Recovery Coordination Program (RCP) transactions (e.g., recovering service member care category information, HR RCP comprehensive needs assessment information, HR recovery plan assessment information, HR RCP enrollment report) via a user interface.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Maintain Human Resources Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Human Resources (HR) transactions (e.g., HR profile data, HR record data) via a user interface. This data may include (but not be limited to) updates to the HR profile.	
Maintain Human Resources Interaction Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting associated Human Resources interaction transactions (e.g., negotiated labor agreements) via a user interface. The information may include (but not be limited to) signatory personal information (e.g., name, official title, organization), agreement narrative, date of final ratification.	
Maintain Individual Assignment Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting individual assignment data transactions (e.g., in- and out-processing checklists, and assignment orders) via a user interface.	
Maintain Individual Training Course Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting individual training course transactions (e.g., individual training course information, individual training course resource requirements information, course evaluation assessment information, instructor assessment information, individual training course requirements information, individual training course scheduling information, student enrollment information, student course evaluation, instructor course evaluation, personnel development plan, occupation competencies information, and individual training course deficiency) via a user interface.	
Maintain Interagency Support Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting interagency support transactions via a user interface.	
Maintain Law Enforcement Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting law enforcement transactions via a user interface.	
Maintain Leave Sell Back Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting leave sell back transactions via a user interface.	
Maintain Legal Personnel Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting legal personnel program transactions via a user interface.	
Maintain Line of Duty Determination Process Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting line of duty determination process management transactions (e.g., line of duty determination request, line of duty data, line of duty investigation request, and line of duty investigation findings ) via a user interface.	
Maintain Manage Casualty Assistance Programs Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Manage Casualty Assistance Programs transactions (e.g., casualty assistance request, casualty assistance delivery request) via a user interface.	
Maintain Manpower Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Manpower transactions via a user interface.	
Maintain Military Health Benefit Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting military health benefit transactions via a user interface.	
Maintain Military Personnel Retirement Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting military personnel retirement data transactions (e.g., retirement eligibility concurrence data, retirement counsel completion data, retirement order requirement data, retirement checklist data, and retirement order data) via a user interface.	
Maintain Military Personnel Separation Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting military personnel separation transactions (e.g., separation order requirement data, separation order data, separation concurrence data, and separation checklist data) via a user interface.	
Maintain Military Recruiting and Accession Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting military recruiting and accession management transactions (e.g., recruiting prospect, list of recruitment applicants, accession agreement, and waiver request) via a user interface.	
Maintain Non-DoD Personnel Separation Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting non-DoD personnel separation transactions via a user interface.	
Maintain Other Benefits Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting other benefits transactions via a user interface.	
Maintain Performance Evaluation Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting performance evaluation transactions via a user interface.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Maintain Performance Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting performance program transactions via a user interface.	
Maintain Personnel Availability Tracking Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel availability tracking via a user interface.	
Maintain Personnel Casualty Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel casualty management transactions (e.g., casualty findings and recommendations information, and casualty incident review request) via a user interface.	
Maintain Personnel Development Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel development transactions (Personnel Classification Catalog Data, Personnel Occupation Competency Data, Scheduling Data) via a user interface.	
Maintain Personnel Distribution Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel distribution data transactions (e.g., personnel distribution plan and personnel requirement request) via a user interface.	
Maintain Personnel Distribution Plan Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel distribution plan data transactions via a user interface. This data may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Maintain Personnel Grade Change Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel grade change transactions (e.g., promotion order requirement, demotion order requirement, promotion package, potential promotion eligibility list, recommended promotion list, promotion list) via a user interface.	
Maintain Personnel Readiness Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel readiness transactions via a user interface.	
Maintain Personnel Requirement Request Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel requirement request data transactions via a user interface. This data may include (but not limited to) request date, justification, recommendation, request quantity, occupational code, and unit identification code (UIC).	
Maintain Personnel Retention Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel retention transactions (e.g., Enlistment Extension Agreement, Involuntary Enlistment Extension Candidate List, Officer Agreement Change Counseling Data, Reenlistment Candidate List, Reenlistment Waiver, Reenlistment Waiver Request, Reenlistment Request, Reenlistment Appeal Request, Enlistment Extension Request, Involuntary Enlistment Extension Waiver Request) via a user interface.	
Maintain Personnel Security Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting personnel security transactions via a user interface.	
Maintain Physical Evaluation Process Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting physical evaluation process transactions via a user interface.	
Maintain Physical Fitness Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting physical fitness program transactions via a user interface.	
Maintain Quality of Life Program Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting Quality of Life (QoL) program management transactions (e.g., QoL program planning document and QoL program standards document) via a user interface.	
Maintain Recognition Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting recognition program data transactions (e.g., award recommendation request, personnel award reclama, award order requirement, award data, and award order) via a user interface.	
Maintain Retirement Benefit Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting retirement benefit transactions via a user interface.	
Maintain Time, Absence, and Labor Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting time, absence, and labor transactions (e.g., time worked data, absence data, labor data, and retirement points data) via a user interface.	
Maintain Transfer Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting transfer data transactions (e.g., transfer order, transfer package, transfer eligibility concurrence) via a user interface.	
Maintain Transition Assistance Program Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting transition assistance program transactions via a user interface.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Maintain Travel Management Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting travel management transactions via a user interface.	
Maintain Unauthorized Absence Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting unauthorized absence transactions (e.g., unauthorized absence resolution notification) via a user interface. This data may include (but not be limited to) the date and duration of the absence, the location that the member was absent from, and the date and location where the absence was resolved.	
Maintain Workforce Occupational Safety Analysis Data via User Interface	System Function	Functionality includes entering, modifying, and/or deleting workforce occupational safety analysis transactions via a user interface.	
Manage Agreement and Contract and Order	System Function	This system function collects, stores, and evaluates information throughout all stages of an agreement, contract, or intragovernmental order. This may include receiving requirements, generating solicitations and award information, evaluating offers and proposals from suppliers, creating and releasing the contract or order document, making the contract or order available for other systems, enforcing Federal Acquisition Regulation (FAR) and Defense Federal Acquisition Regulation Supplement (DFARS) compliant business rules and completing contract closure procedures.	
Manage and Develop Plan Criteria	System Function	This function includes the development of basic planning information such as planning premises and assumptions. Premises and assumptions may be derived from transaction summaries, forecasts and historical records.	
Manage and Track Issues	System Function	This function tracks issues related to potential product matches, delivery, form, content, or scheduling and sends them to the requestor for resolution.	
Manage Apportionment and Allocation	System Function	This system function is used to establish the budget authority and allocation of funds to appropriate services and agencies as the beginning of the execution process. It receives the approved apportionment and program authority data from Office of Management and Budget (OMB) and Treasury Warrant data from U.S. Treasury to create the Program and Funding Document for allocation and allotment to different level of services and agencies.	
Manage Asset Record	System Function	This system function ensures that individual physical asset records contained in the asset management system are fully consistent with the actual status of the asset item, including the item's physical, legal and financial status. This system function ensures that any state or condition change to the asset throughout its lifecycle of the asset is maintained. For example this system function enables the creation of an initial asset record based on the execution of a contract, order, real estate instrument, or the performance of a physical inventory which results in identification of an asset which is not recorded in the inventory system, it updates asset records with information based on a change to the quantity, condition or interest of ownership of an asset. For Real Property this includes, but is not limited to, actions such as construction, restoration, modernization, disposal, purchase, transfer, ingrats, outgrants, donation, or exchange. This system function also calculates a depreciation and amortization amount based on the depreciation schedule that is used to adjust the value of assets is and reported to the general ledger as an expense. For Personal Property this includes, but is not limited to, actions such as the purchase, transfer, make, issuance, repair and overhaul, return, sale, or disposal, and it stores or flags asset records that are no longer in active status. These records can be retrieved upon request for future liability issues, reporting and audit trail purpose.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Asset Valuation	System Function	This system function calculates and records asset values, depreciation, amortization, depletion of assets, and any adjustment to the valuation as a result of a change in the condition of the asset. It uses rules and requirements to determine how to value the asset. Such examples are, funding type (Research and Development, procurement, Operation and Maintenance), costs (direct and indirect), types of assets (capital and expensed), the useful life of end-items and major components, salvage value, depreciation type, which costs are to be aggregated into the end item cost (e.g., direct labor, government furnished parts), which items are to be valued separately (e.g., support equipment), expensed costs, and whether there is government furnished material or government furnished labor being provided to the contractor. This system function also accumulates all direct and indirect costs used in producing an end item (real property or personal property) or service, whether fabricated by a governmental business operation fund, or by a non-governmental organization under contract and then transfers that value to the appropriate asset account once the asset is placed in service. It establishes and records the fair value measurement of Department assets through valuation methods that include, but not limited to, recorded cost (the amount, net of both trade and cash discounts, paid for the asset, plus transportation costs and other ancillary costs), fair market value, net realizable value, replacement value, and like asset value and changes to value as a result of depreciation, amortization and depletion. Upon completion of the valuation, the asset record is updated.	
Manage Billing	System Function	This system function provides the capability to automatically generate bills to customers, both internal and external to DoD. Specific functionality includes gathering billing information, determining type of bill, calculates and applies interest or penalty charges, aggregates this information, and generates a bill.	
Manage Business Enterprise Reporting	System Function	The Manage Business Enterprise Reporting system function aggregates and distributes information according to requirements. Received information requests and requirements result in packaged, assembled, and analyzed data that is distributed according to user requirements. This system function also supports the reporting of financial management and program performance information including agency financial statements.	
Manage Buyer or Seller Registration Information	System Function	This system function maintains a common, shared repository of customer or supplier data such as the Point of Contact (POC) information, business type (buyer or seller), the Business Partner Network Number (Data Universal Numbering System or DoDAAC), Commercial and Government Entity (CAGE) Code, Taxpayer identification number, and supplier socio-economic information. It provides the user with the ability to collect customer and supplier information and validate potential customers or suppliers for the sale and purchase of goods and services.	
Manage Capabilities Based Acquisition	System Function	The Manage Capabilities Based Acquisition system function provides seven Functional Capability Areas (FCAs) to manage Major Defense Acquisition Programs (MDAPs) and Major Automated Information Systems (MAIS) programs. Managing by FCAs allows Enterprise visibility of like functionality of programs rather than the traditional Service or Agency views. The FCAs are Battlespace Awareness, Command and Control, Focused Logistics, Force Application, Force Protection, Net Centric, and Business Infrastructure.	
Manage Collections	System Function	This system function receives data on payments, donations, and other receipts from both internal and external sources, matches those payments to the appropriate Main Account, account receivable, or claim receivable and forwards collection notifications to appropriate system functions.	
Manage Commitments	System Function	This system function receives requests to commit funds, validates the commitment transaction amount so that it does not exceed the current available fund balance, posts the commitment transaction to the subsidiary ledger, and adjusts the fund balance.	
Manage Contract Award	System Function	This system function collects, stores and updates data regarding all unclassified government contracts with third party suppliers.	
Manage Contract Wage Determination	System Function	This system function manages the process of determining the salary rates for an official contract action, based on the Service Contract Act (SCA) and the Davis-Bacon Act (DBA).	
Manage Contractor Qualifications	System Function	This system function is responsible for the maintenance of qualifications data related to a particular contractor; this includes education, training, clearances and proficiencies.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage Cost	System Function	This system function provides the ability to accumulate, classify, summarize, interpret, analyze, and report cost and performance information in support of DoD executive decision-making. This system function will also provide appropriate information that will be used as the foundation for performance based-management. It serves as a general tool to support the development of cost estimates for major programs (e.g. F18, AV-8), projects (e.g. construction), and processes. Historical cost and performance information may be utilized and updated. This system function utilizes data elements developed or maintained by the Manage Financial Information Structure system function as cost objects in the processes, systems, and applications that that support the DoD performance based management system. It also allows for the management of pre-established cost models.	
Manage Cross-Domain Communications	System Function	USXPORTS has instances of the application on both classified and unclassified domains. Deploying an unclassified application provides those users who do not have classified network access with the ability to review export license data and submit positions accordingly. Cross-domain communication mechanisms have been developed to keep the case data synchronized between the classified and unclassified applications.	
Manage Data	System Function	The Manage Data system function manages the exchange of data between systems and data stores using enterprise data structures. This includes sharing in real-time or batch, scheduling interfaces, transferring data between the BEA and external systems, aggregating data into a data warehouse, and populating data marts. This function also supports the archiving, backup, and recovery of data in addition to the retention of meta data.	
Manage Delinquent Debt	System Function	This system function receives, tracks and ages delinquent debt, ensures legal due process requirements are met, refers uncollectible debt to another government agency based upon business rules and liquidates delinquent debt upon collection. The system function receives a delinquent debt transaction, calculates all appropriate interest and penalty charges and initiates due process procedures. The delinquent debt is aged and a determination is made, based upon pre-established business rules, as to whether the debt is uncollectible. If it is determined that the debt is uncollectible, the debt is referred to another government agency (i.e. U.S. Treasury) by an analyst and write-off actions are initiated. This information is returned to the manage receivables function. Collection data will be sent upon collection of the delinquent debt and the system function will liquidate the debt.	
Manage Disbursements	System Function	This system function identifies, tracks and issues authorized payments for the payment of legal obligations of the Department of Defense. This system function records the distribution of funds, either by currency (e.g., cash, check) or Electronic Funds Transfer (EFT), and disbursement of such funds in accordance with U.S. Treasury and DoD regulations. This system function creates payments based upon certified pay files, pre-established business rules, consolidates multiple payments and prepares schedules for various classifications of payment, such as vendor payments, transportation payments and payments in foreign currency. This system function receives return payments and deposit collections through the customer, vendor and the United States Department of Treasury. The function also reports disbursements to the U.S. Treasury.	
Manage Disposal	System Function	This system function supports the sale, disposal, recycling, or destruction of property or inventory items and performs any processing pertinent to effectively executing the disposal of material or assets. The Manage Delivery and Perform Build and Make and Maintenance and Sustainment system functions can generate disposal requirements for excess, obsolete and unserviceable material or assets. Disposal requirements can also be provided through a plan (which would include the disposal schedule, material and assets for disposition, resources, etc). The Manage Disposal system function can generate real property disposal requirements and updates the disposition of any material and assets. Finally, the Disposal function sends performance data to the appropriate system function and stores all disposal data.	
Manage Electronic Catalog and Ordering	System Function	This system function stores product and inventory information for commercial off-the-shelf finished goods available for government purchase. It provides the user with the ability to select and purchase these products.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage End-User Check	System Function	This function is enabled by the creation of a structure that can support sharing of information among enforcement and intelligence agencies involved in the license review process. The sharing of information about end users and consolidating end user reviews makes the process more robust and more effective. USXPORTS automatically brings published data about pre-existing parties in the system and linked license requests to license reviewers' fingertips. As a party is involved in more transactions over time, pieces of information will accumulate. Each transaction will be associated with the party, along with the details of the transaction, and provide raw material for reviews. In addition, unclassified notes and reviews created by the enforcement and intelligence community will be associated to the party, and as such, available to reviewers, based on permissions. Queries on parties will allow users to view party data as well as all cases associated with the party.	
Manage Environment Safety and Occupational Health	System Function	This system function supports the business areas within DoD that address environmental quality, restoration, range sustainability, occupational health, safety as well as fire and emergency services. This system function processes data for an Environment Safety and Occupational Health Issue Communications and generates a description of the issue.	
Manage Facility Energy Information	System Function	This system function supports the business areas within DoD that generate, use, and report facility energy information. This system function processes facility energy data for analysis and reporting to organizations and systems external to and within DoD.	
Manage Federal Technical Data	System Function	This system function collects, stores, updates, and disseminates acquisition-related sensitive-but-unclassified (SBU) technical information associated with an active acquisition or solicitation to Federal Government vendors. Examples of SBU information can include construction drawings, building layouts, security system installations, and any other information related to publicly accessible Government solicitations, but which contains contents that, when aggregated and obtained, could become a threat to national security.	
Manage Financial Information Structure	System Function	This system function maintains standard financial, operational, and program classification structures, including accounting classification data, associated with financial transactions. This system function provides the ability for a user to establish a chart of accounts consistent with the U.S. Standard General Ledger (USSGL), establish transaction edit and posting rules to record financial events, and maintains general ledger mapping rules.	
Manage Funds	System Function	This system function receives program and funding data, collections data, disbursing data, commitments and obligations and monitors and updates the fund balance associated with a DoD program.	
Manage Geospatial Information and Services	System Function	This system function represents all functions required to execute the design, development, collection, maintenance and sustainment of geospatial data assets and visualization capabilities.	
Manage Investments	System Function	This system function supports the planning and management of the investment trust fund portfolio. Its purpose is to manage and optimize return on the trust fund. This system function collects, tracks, invests personnel funding allocated for investment. An investment is an asset that meets prescribed capitalization criteria established by the Comptroller General.	
Manage Liabilities	System Function	This function records and updates the status of amounts owed to other entities as a result of the formal acceptance/receipt of goods or services by the Department of Defense. Upon acceptance/receipt the liability is accrued; upon request for payment the liability is reclassified as a payable; upon the triggering of events associated with payment terms the payable is modified; and upon payment to a liability, the liability is reduced or extinguished. This function provides liability pro forma entries to the general ledger for posting.	
Manage Mission Support Requirements	System Function	This system function stores and analyses a requirement established during mission planning, and identifies appropriate sourcing vehicles. The requirements indicate the need for contractor support, location of and period of performance.	
Manage Obligations	System Function	This system function receives and records obligation transactions. Each request to obligate funds is verified against funds committed and made available for obligations. The system function validates the obligation transaction amount so that it does not exceed the current available fund balance. The obligation transaction is posted to the subsidiary ledger.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Manage One-Time Staffing	System Function	One of USXPORTS initial requirements was to provide a mechanism to staff individual cases for review to individuals who are not registered users of the application. This functionality allows a registered user of USXPORTS with appropriate permissions to staff a case to an outside individual with an approved '.mil' email address in a secure fashion. This allows USXPORTS licensing officers to electronically staff a case to external subject matter experts who can provide a more thorough case review.	
Manage Performance Information	System Function	This system function collects and manages contract assessment information based on a supplier's performance. This information is aggregated from various sources and is accessible to contracting officers.	
Manage Procurement Information	System Function	This system function collects, stores, updates, and disseminates acquisition-related business information. This may include post-award contracts, contract modifications, personal property and freight government bills of lading (GBLs), vouchers, Contract Deficiency Reports (1716s), Summaries of Voucher Line Data (110 Reports), Materiel Acceptance and Accounts Payable Reports (MAAPRS), and Government Transportation Requests. EDA provides payment technicians at the Defense Finance and Accounting Service (DFAS), DoD contract officers, procurement officers, program and financial managers, and transportation officers with the ability to view and process documents without paper copies.	
Manage Quality Control	System Function	This system function includes quality planning, inspection and control. It identifies the relevant quality standards and identifies ways to satisfy them, tracks random inspections of the quality of a product or service, and determines whether the product or service meets user requirements.	
Manage Receipt and Acceptance	System Function	This system function provides users the ability to create or receive invoices, receive reports, and access contract documents related to receipt, inspection, and acceptance of goods and services. It also populates the unique identification (UID) registry.	
Manage Receivables	System Function	This system function establishes a receivable, ages a receivable, and liquidates the receivable. The system function receives sales evidence and establishes as a receivable in the subsidiary ledger. The system function ages the receivable based upon business rules. The receivable is then liquidated upon collection. If the receivable has not been liquidated based upon pre-established business rules, the receivable then becomes a delinquent debt. If a write-off is warranted, the Manage Delinquent Debt function will send write-off data to close-out the transaction.	
Manage Requirement	System Function	This system function provides the ability to collect, aggregate and process validated and approved requirements based on compliance with DoD standards.	
Manage Scheduled Payments	System Function	This system function automatically identifies and selects payments to be disbursed in a particular payment cycle based on the due or approved release date.	
Manage Solicitation	System Function	This system function uploads and manages government procurement opportunities and supplier and government procurement activities by agency and office. It also processes queries and searches of suppliers interested in government procurements.	
Manage Subcontractor Activity Information	System Function	This system function collects, stores and updates spend information regarding how contracting dollars are being distributed among small and disadvantaged businesses.	
Manage Supplier Eligibility	System Function	This system function collects, stores and updates information regarding suppliers who are excluded from contracting with the federal government. This information is obtained from the Lists of Parties Excluded from Federal Procurement and Non-procurement Programs (the debarred list).	
Manage Supplier Representation and Certification	System Function	This system function collects and manages supplier representation and certification necessary for contracting with the government.	
Monitor Auto-Staffing	System Function	USXPORTS was designed to be able to automatically route cases to one or more recipients at a time based on the user's organization, need to know, type of commodity and the end-user involved. The application supports rule-sets, customizable at the agency level for controlling access to case data and transfer of case ownership. Users are able to override the system-generated routing and develop various tools from automatic routing to pre-filled routing for efficiently routing cases and establishing an audit log that becomes part of the case record.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Monitor Contract Performance	System Function	This system function uses Earned Value Management data input to provide managers with performance measurement tools to assess cost, schedule and performance of Major Defense Acquisition Programs (MDAPs) and Major Automated Information Systems (MAIS) programs. It does this by integrating work scope, schedule and budget resources using EVM variables and metrics. These are the budgeted cost of work scheduled (BCWS); budgeted cost of work performed (BCWP), representing earned value and work accomplishment; and the actual cost of work performed (ACWP). The system uses these metrics to provide graphical trend analysis of Schedule Variance (SV), Cost Variance (CV) and Variance at Completion (VAC). The SV variance metric is determined by subtracting the BCWS from the BCWP and measures work accomplishment against the current schedule plan. The CV is determined by subtracting the ACWP from the BCWP and measures actual cost against budgeted cost. The VAC forecasts overruns or underruns by subtracting the estimate at completion from the budget at completion.	
Package/Handle/ Transport Material/Personnel	System Function	This function supports the packaging, handling and transportation of materiel and personnel to meet operational requirements and customer orders received. This function also supports the movement of goods by military and or commercial means. This system provides information to the inventory system to update the materiel records.	
Perform Acquisition Assessment	System Function	The Perform Acquisition Assessment system function provides an early warning capability for identifying potential and actual problems and facilitates the exchange of information between the Program Manager (PM), Senior Managers and OSD. The process identifies ten assessment indicator areas to rate or assess the progress/health of individual programs. The indicator areas are Performance, Test and Evaluation, Logistics Requirements and Readiness, Cost, Funding, Schedule, Contracts, Production, and Interoperability. Red, Yellow, Green and Advisory, respectively, are used as values for rating the indicator areas.	
Perform Asset Accountability	System Function	This system function includes record accountability and control for all property throughout its lifecycle from when the government takes title to possession of means. This function also enables the responsibility imposed by law, lawful order, or regulation, accepted by the Department for keeping accurate records, to ensure control of property, with or without physical possession. The responsibility, in this context, refers to the Departments fiduciary duties to protect the public interest. This function aids in establishing and maintaining the Department's formal property records, systems and financial records, in conjunction with the government property, irrespective of whether the property is in the Department's possession.	
Perform Basic and Advanced Search of Structured and Unstructured Data	System Function	USXPORTS provides users with a query capability to associate similar data against new license requests. Users can perform data searches, both basic and complex, that will treat parties, commodities, policies and supporting documentation as distinct entities and associate them to cases. This will allow data re-use, the ability to trace associations across a chain of related entities, and easy access to data in the case view. USXPORTS enables users to tailor searches according to their needs and save queries to run them ad hoc.	
Perform Build and Make and Maintenance and Sustainment	System Function	This system function accounts for all actions taken to initiate and support the building and sustainment of real property and the manufacturing and maintenance of material. It includes maintaining material in an operational status through scheduled and unscheduled maintenance activities and ensuring that real property sustains its functional utility through build or modification. Also includes developing overall schedules, identifying resources (parts/items, skill sets) for creating the plan, recording results of inspection and suitability for use, tracking status and completion of tasks performed (time, materials, and supplies expended), and provides status updates to the asset record. Also determine disposal or return status of material and property.	
Perform Cross-Cutting Analysis and Reporting	System Function	This system function uses current and historical cost and schedule information to track and report metrics and trends across programs. This system function receives cost and schedule information from individual programs and aggregates it for analysis and reporting. Examples include: percent cost growth, average cycle time, funding summaries by Service and for the Department, and breach analysis.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Perform Data Checks	System Function	This system function uses detailed current and historical program information to calculate and report data errors and inconsistencies. Data checks are categorized as informational, critical and non-critical. Checks are performed both within the current report and against historical information.	
Perform Precedent Search	System Function	Important associations between case data should be defined and established to support prescreening cases and analysis. By defining the significant relationships between data, the system can present information in such a way that the conclusions drawn during analysis will be more accurate. For example, the system could display links to all cases that have a relationship with the current case so that case precedent analyses can be performed easily, without complex querying of the database. When the system associates like data the system identifies all other cases that have some data feature(s) that resembles the target case. These other license requests are potentially valuable in precedence analysis. For instance, if the target case has State Oil Company as the end user, and the system identifies all other cases that involve State Oil Company, there is a higher than random probability that the other cases have a bearing on the decision of the target case. For this reason, users can trace not only the decisions of related cases, but also the policies and reports that might have bearing.	
Perform Program Analysis	System Function	This system function uses detailed current and historical cost and schedule information to calculate, track and report breaches, metrics and trends within a program. Calculations include categorizing cost variances, determining SAR and APB breaches, determining Nunn-McCurdy unit cost breaches, calculating cost growth, calculating percent complete.	
Perform Reporting	System Function	USXPORTS provides users with a means for customizing and re-using reports. This includes a means for storing queries developed for generating reports. This function enhances cumulative effect analysis by providing the capability to perform keyword and/or metadata queries against the repository of reports. When the system associates like data the system identifies all other cases that have some data feature(s) that resembles the target case.	
Plan Distribution	System Function	This function determines where, when and how to distribute materiel. Transportation routings, modes, packaging and handling requirements, and warehousing requirements for initial receipt, during transit and at final destinations are considered.	
Plan Logistics Services	System Function	This function enables the planning of services to be performed by balancing and scheduling service requirements versus resources available. The logistics services include health services, general engineering and quality of life.	
Plan Materiel Resources	System Function	This function determines when inventory replenishment is needed and calculates inventory replenishment quantities. It determines order quantity based on demand, lead time-history, and current stock levels. Order information is provided to the acquisition system for fulfillment through the appropriate procurement vehicle.	
Plan Return	System Function	This function supports the creation and maintenance of return planning information. Return planning information is generated for materiel not in compliance with warranties or specifications, recalled items, excess, obsolete, or unserviceable items.	
Prepare Certified Business Partner Payment	System Function	This system function generates a Certified Business Partner Payment to the Manage Disbursements system function. It identifies the agency and appropriation from which the payments are requested and checks the funds balance in the general ledger to verify available funds for payment. This function also provides Electronic Funds Transfer (EFT) data for the provider in the pay file and permits the review and approval by the certifying official.	
Process Adverse Actions Data	System Function	Functionality includes enforcing business rules and performing validation and calculations when adverse actions data is captured in the system.	
Process Assignment Action Data	System Function	Functionality includes enforcing business rules and performing validation and calculations when assignment action data (e.g. individual assignment response data, funded position identification data, assignment request data, force structure data, strategic planning guidance data, asset data, program and funding document data, personnel distribution requirement data, candidate nomination for assignment data, assignment action request data, and assignment order requirement data) is captured in the system. Functionality also includes approving or disapproving personnel actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Assignment Order Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when assignment order data is captured in the system.	
Process Civilian Personnel Separation and Retirement Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when civilian personnel separation and retirement data is captured in the system.	
Process Civilian Staff Acquisition Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when civilian staff acquisition management data is captured in the system.	
Process Compensation and Reimbursements Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when compensation and reimbursements data is captured in the system.	
Process Deliver Morale, Welfare and Recreation Program Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when Deliver Morale, Welfare and Recreation (MWR) program data (e.g., MWR program usage request data, individual human resources data, retirement checklist action requirement data, separation checklist action requirement data, debtor response data) is captured in the system. Functionality also includes enforcing business rules on making decisions, providing recommendations, and how data can be manipulated in the system.	
Process Education Benefit Data	System Function	Functionality includes enforcing education benefit business rules and performing validation and calculations when education benefit data is captured in the system.	
Process Education Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when education management data (e.g., personnel occupation competencies, personnel development plans, course evaluation and instructor assessments, education course deficiencies, education requirements, education course curriculum, education resource requirements and availability, education course scheduling, student admission enrollment, student enrollment, student and instructor course evaluation, Department of Defense Fund Balance, market information, workforce analysis, aggregated spend, commitment modification request, program and funding document, notification of insufficient funds, contract or order closure, procurement change request, discrepancy report, contract or order, receiving report, advance ship notice, supplier advance ship notice, acceptance) is captured in the system.	
Process Equal Opportunity Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when equal opportunity data is captured in the system.	
Process Family Support Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support "what-if" scenarios) when Family Support data is captured in the system. Functionality also includes enforcing business rules on making decisions, providing recommendations, and how data can be manipulated in the system.	
Process Grievance Data	System Function	Functionality includes enforcing grievance business rules and performing validation and calculations when grievance data is captured in the system.	
Process Health Insurance Benefit Data	System Function	Functionality includes enforcing health insurance benefit business rules and performing validation and calculations when health insurance benefit data is captured in the system.	
Process HR RCP Data	System Function	Functionality includes enforcing Human Resources (HR) Recovery Coordination Program (RCP) business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when medical information, Recovering Service Member (RSM) personal information, benefit information, needs assessment information data is captured in the system.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Human Resources Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when Human Resources (HR) data (e.g., HR profile data, HR profile update data, HR record data, recruitment applicant data, HR personal change request data, military record correction request data, investigating officer report, HR data request) is captured in the system.	
Process Human Resources Interaction Data	System Function	Functionality includes enforcing business rules and performing validation and calculations when negotiated labor agreements, workforce communications, workflow analysis, union relations program requests, labor rights issue requests, individual Human Resources personal data, military record correction requests, and investigating officer data is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Identity Credential Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., employment status, national agency check, passport, or the signature of the appropriate documents) when Process Identity Credential Management data is captured in the systems. Functionality also includes enforcing business rules on making decisions, providing recommendations, and how data can be manipulated in the system.	
Process Individual Assignment Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when individual assignment data (e.g., in- and out-processing checklists, assignment orders, assignment order requirements, assignment order acknowledgements, individual travel authorizations, and personnel development assignment requests) is captured in the system.	
Process Individual Training Course Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when individual training course data (e.g., individual training course information, individual training course resource requirements information, course evaluation assessment information, instructor assessment information, individual training course requirements information, individual training course scheduling information, student enrollment information, student course evaluation, instructor course evaluation, personnel development plan, occupation competencies information, individual training course deficiency, workforce analysis information, individual training course resources availability information, department of defense fund balance, market information, aggregated spend information, notification of insufficient funds, program and funding document, commitment modification request, contract or order information, contract or order closure information, procurement change request, advance ship notice information, supplier advance ship notice information, acceptance evidence, receiving report information, discrepancy report information, and individual training course student enrollment request) is captured in the system.	
Process Interagency Support Data	System Function	Functionality includes enforcing interagency support business rules and performing validation and calculations when interagency support data is captured in the system.	
Process Law Enforcement Data	System Function	Functionality includes enforcing law enforcement business rules and performing validation and calculations when law enforcement data is captured in the system.	
Process Leave Sell Back Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what if scenarios) when leave sell back data (e.g., leave balance) is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Legal Personnel Program Data	System Function	Functionality includes enforcing legal personnel program business rules and performing validation and calculations when legal personnel program data is captured in the system.	
Process Line of Duty Determination Process Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when line of duty determination process management data (e.g., incident notification, adverse action notification, line of duty determination request, line of duty legal recommendation documentation, line of duty data, line of duty investigation request, and line of duty investigation findings, line of duty request documentation, and line of duty appeal request) is captured in the system.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Manage Casualty Assistance Programs Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support "what-if" scenarios) when Manage Casualty Assistance Programs data is captured in the system. Functionality also includes enforcing business rules on making decisions, providing recommendations, and how data can be manipulated in the system.	
Process Manpower Data	System Function	Functionality includes enforcing business rules and performing validation and calculations when manpower data is captured in the system. Functionality also includes approving or disapproving organization and position management actions.	
Process Manpower Document Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what-if scenarios) when manpower document data is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Military Health Benefit Data	System Function	Functionality includes enforcing military health benefit business rules and performing validation and calculations when military health benefit data is captured in the system.	
Process Military Personnel Retirement Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what if scenarios) when military personnel retirement data (e.g., retirement eligibility concurrence data, retirement counsel completion data, retirement order requirement data, retirement checklist data, retirement order data, retirement inquiry data, retirement request data, retirement appeal request data, retirement checklist action completion data, military experience and training discrepancies data, retirement order acknowledgement data, and individual travel authorization data) captured in the system. Functionality also includes the verification of personnel actions.	
Process Military Personnel Separation Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when military personnel separation data (e.g., separation order requirement data, separation order data, separation concurrence data, separation checklist data, separation request data, separation appeal request data, separation order acknowledgement data, stop loss criteria data, reduction in force data, transfer eligibility concurrence data, military experience and training discrepancies data, separation checklist action completion data, involuntary separation notification acknowledgement data, and individual travel authorization data) is captured in the system. Functionality also includes the verification of personnel actions.	
Process Military Recruiting and Accession Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when military recruiting and accession management data (e.g., competency testing results report, recruiting prospect, list of recruitment applicants, accession agreement, waiver request, personnel requisition, personnel distribution plan, prospect location data, candidate recruitment data, competency testing results, individual travel authorization, classification action response, background investigation report, and assignment order) is captured in the system.	
Process Non-DoD Personnel Separation Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when non-DoD personnel separation data is captured in the system.	
Process Order Return	System Function	This function provides for the return of an order by a customer for any reason (unneeded, change of specification, etc). A return authorization may be established based on the customer's request to return an item.	
Process Other Benefits Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when other benefits data is captured in the system.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Performance Evaluation Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g. defining algorithms to process data and perform model simulation to support what if scenario) when performance evaluation data (e.g. list of personnel requiring performance evaluation, personnel action decision, performance evaluation notification, final performance evaluation, performance evaluation refusal) is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Performance Program Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when performance program data is captured in the system.	
Process Personnel Availability Tracking Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel availability tracking data is captured in the system.	
Process Personnel Casualty Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel casualty management data (e.g., incident notification, adverse action notification, line of duty determination request, line of duty legal recommendation documentation, line of duty data, line of duty investigation request, and line of duty investigation findings, line of duty request documentation, and line of duty appeal request) is captured in the system.	
Process Personnel Development Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel development data (e.g., occupation competencies proposal data, individual training course proposal data, education course proposal data, occupational competency testing proposal data, personnel development resource scheduling proposal data, credential proposal data) is captured in the system. Functionality also includes validating or verifying personnel actions.	
Process Personnel Distribution Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel distribution data is captured in the system.	
Process Personnel Distribution Guidance Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel distribution guidance data is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Personnel Distribution Plan Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what-if scenarios) when personnel distribution plan data is captured in the system.	
Process Personnel Grade Change Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel grade change data (e.g., promotion order requirement, demotion order requirement, promotion package, potential promotion eligibility list, recommended promotion list, promotion list, program and funding document, Department of Defense fund balance, promotion criteria, promotion appeal package, individual promotion response, personnel grade change draft order, and personnel grade change final order) is captured in the system. Functionality also includes the verification of personnel actions.	
Process Personnel Readiness Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel readiness data is captured in the system.	
Process Personnel Requirement Request Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what-if scenarios) when personnel requirement request and proposed personnel requirement request data is captured in the system. Functionality also includes approving or disapproving personnel actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Personnel Retention Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when personnel retention data (e.g., Individual Reenlistment Response Data, Enlistment Extension Appeal Data, Individual Enlistment Extension Response Data, Stop Loss Notification Data, Stop Loss Criteria Data, Officer Involuntary Retention Appeal Data, Reenlistment Candidate List Data, Officer Agreement Change Counseling Data, Reenlistment Waiver Request Data, Involuntary Enlistment Extension Candidate List Data, Enlistment Extension Agreement Data, Reenlistment Waiver Data, Reenlistment Request, Reenlistment Appeal Request, Enlistment Extension Request, Involuntary Enlistment Extension Waiver Request, Individual Human Resources Data) is captured in the system. Functionality also includes the verification of personnel actions.	
Process Personnel Security Data	System Function	Functionality includes enforcing personnel security business rules and performing validation and calculations when personnel security data is captured in the system.	
Process Physical Evaluation Process Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when physical evaluation process data (e.g., medical evaluation findings data, continuation of service request data, Veterans Affairs disability severity data, and physical evaluation appeal request data) is captured in the system. Functionality includes approving or disapproving personnel actions.	
Process Physical Fitness Program Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when physical fitness program data is captured in the system.	
Process Quality of Life Program Management Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when Quality of Life program management data is captured in the system. Functionality also includes enforcing business rules on making decisions, providing recommendations, and how data can be manipulated in the system.	
Process Recognition Program Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what if scenarios) when recognition program data (e.g., award recommendation request, personnel award reclama, award order requirement, award data, award order, and personnel award request) is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Retirement Benefit Data	System Function	Functionality includes enforcing retirement benefit business rules and performing validation and calculations when retirement benefit data is captured in the system.	
Process Returned Materiel/Asset	System Function	This function provides the details of how the materiel item or asset was returned and the date of return and for what reason. This function updates a materiel item or property record and generates the appropriate journal entries for the financial system. This function supports the required steps that are taken to return an item that is nonconforming, defective, etc. This function also records the disposition decision to store, maintain, return to vendor, transport, or dispose of a materiel or an asset. It records the costs associated with returning a materiel or asset to a vendor.	
Process Shipments	System Function	This function supports the physical storage of materiel and identifies the location at which it is stored. This function supports the initial delivery of materiel to the warehouse. The system produces a report of items ordered from the procurement system. This process reconciles items received with total quantities procured to identify either overage or short shipments.	
Process Time, Absence, and Labor Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when time, absence, and labor data (e.g., time worked data, absence data, labor data, and retirement points data) is captured in the system. Functionality also includes the verification of personnel actions.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Process Transfer Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what if scenarios) when assignment action data (e.g., transfer order acknowledgment data, individual travel authorization data, transfer order requirement data, transfer order data, transfer package data, transfer eligibility concurrence data, individual transfer response data, transfer request data, transfer appeal request data) is captured in the system. Functionality also includes approving or disapproving personnel actions.	
Process Transition Assistance Program Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when transition assistance program data is captured in the system.	
Process Travel Management Data	System Function	Functionality includes enforcing travel management business rules and performing validation and calculations when travel management data is captured in the system.	
Process Unauthorized Absence Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and performing model simulation to support what if scenarios) when unauthorized absence data (e.g., unauthorized absence notification, Federal Bureau of Investigation deserter information, return of unauthorized absence notification, inapprehensible unauthorized absence report, and unauthorized absence information request) is captured in the system. Functionality also includes the verification of personnel actions.	
Process Workforce Analysis Data	System Function	Functionality includes enforcing business rules and performing validation and calculations (e.g., defining algorithms to process data and perform model simulation to support what-if scenarios) when workforce analysis data is captured in the system.	
Process Workforce Occupational Safety Analysis Data	System Function	Functionality includes enforcing workforce occupational safety analysis business rules and performing validation and calculations when workforce occupational safety analysis data is captured in the system.	
Produce Adverse Actions Report	System Function	Functionality includes providing the ability to generate and print pre-defined adverse actions reports and enabling users to produce and print custom reports.	
Produce Assignment Action Report	System Function	Functionality includes providing assignment action data (e.g. individual assignment response, funded position identification, assignment request, force structure, strategic planning guidance, asset, program and funding document, personnel distribution requirement, candidate nomination for assignment, assignment action request, assignment order requirement, and other assignment action data) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom assignment action report.	
Produce Assignment Order Report	System Function	Functionality includes providing assignment order data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom recruiting and accession management report. This report may include (but not be limited to) approved order date and status, order number, order effective date, travel information (e.g., travel destination, and accommodations), and order type.	
Produce Civilian Personnel Separation and Retirement Report	System Function	Functionality includes providing civilian personnel separation and retirement data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom civilian personnel separation and retirement report.	
Produce Civilian Staff Acquisition Management Report	System Function	Functionality includes providing civilian staff acquisition management data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom civilian staff acquisition management report.	
Produce Compensation and Reimbursements Report	System Function	Functionality includes providing compensation and reimbursements data (e.g., earnings data, deduction data, collection data, individual allotment data, individual tax levy data, individual indebtedness acknowledgement data, debt disposition data, individual in-service indebtedness data, debtor response data, department of defense fund balance data, individual reimbursement request data, and individual travel authorization data query) capabilities and producing and printing a filtered set of results as a pre-defined and/or custom compensation and reimbursements report.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce Custom Personnel Distribution Report	System Function	Functionality includes providing personnel distribution data (e.g., personnel distribution plan, personnel requirement request, personnel distribution guidance, manpower document, workforce analysis information, proposed personnel requirement request, assignment final order, workforce analysis request, personnel distribution plan, validated personnel requisition, and non-validated personnel requisition) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel distribution report for a specific personnel distribution business need. The reports may include (but not be limited to) capturing data related to the personnel distribution profile and specific mission requirements related to the personnel distribution business.	
Produce Deliver Morale, Welfare and Recreation Program Report	System Function	Functionality includes providing Morale, Welfare and Recreation (MWR) program data (e.g., MWR program usage request data, individual human resources data, retirement checklist action requirement data, separation checklist action requirement data, debtor response data) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom MWR program data report.	
Produce Education Benefit Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom education benefit reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Education Management Report	System Function	Functionality includes providing education management (e.g., personnel occupation competencies, personnel development plans, course evaluation and instructor assessments, education course deficiencies, education requirements, education course curriculum, education resource requirements and availability, education course scheduling, student admission enrollment, student enrollment, student and instructor course evaluation, Department of Defense Fund Balance, market information, workforce analysis, aggregated spend, commitment modification request, program and funding document, notification of insufficient funds, contract or order closure, procurement change request, discrepancy report, contract or order, receiving report, advance ship notice, supplier advance ship notice, acceptance) data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom education management report.	
Produce Equal Opportunity Report	System Function	Functionality includes providing equal opportunity data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom equal opportunity report.	
Produce Grievance Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom grievance reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Health Insurance Benefit Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom health insurance benefit reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce HR RCP Report	System Function	Functionality includes providing Human Resources (HR) Recovery Coordination Program (RCP) data (e.g., recovering service member care category information, HR RCP enrollment information, HR RCP comprehensive needs assessment information, HR recovery plan, HR recovery plan assessment information, HR RCP information, HR RCP enrollment report, recovery coordination feedback information, recovering service member information response, HR RCP evaluation response) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom HR RCP report.	
Produce Human Resources Data Report	System Function	Functionality includes providing Human Resources (HR) data (e.g., HR profile data, HR profile update data, HR record data, recruitment applicant data, HR personal change request data, military record correction request data, investigating officer report, HR data request) data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom HR report. This data may include (but not be limited to) updates to the HR profile.	
Produce Human Resources Interaction Report	System Function	Functionality includes providing the ability to generate and print pre-defined and/or custom negotiated labor, workforce communication, process workflow, union relations programs, labor rights issue request, individual Human Resources personal, military record correction request, and investigating officer reports.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce Identity Credential Management Report	System Function	Functionality includes providing Identity Credential Management data (e.g., eligibility status, DD Form 1127, driver's license) query capabilities and producing and printing a filtered set of results as a pre-defined and/or Identity Credential Management report.	
Produce Individual Assignment Report	System Function	Functionality includes providing individual assignment data (e.g., incident notification), query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom individual assignment report.	
Produce Individual Training Course Management Report	System Function	Functionality includes providing individual training course (e.g., individual training course information, individual training course resource requirements information, course evaluation assessment information, instructor assessment information, individual training course requirements information, individual training course scheduling information, student enrollment information, student course evaluation, instructor course evaluation, personnel development plan, occupation competencies information, individual training course deficiency, workforce analysis information, individual training course resources availability information, department of defense fund balance, market information, aggregated spend information, notification of insufficient funds, program and funding document, commitment modification request, contract or order information, contract or order closure information, procurement change request, advance ship notice information, supplier advance ship notice information, acceptance evidence, receiving report information, discrepancy report information, and individual training course student enrollment request) .	
Produce Interagency Support Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom interagency support reports. Functionality also includes providing a trend analysis tools for projection planning and modeling.	
Produce Law Enforcement Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom law enforcement reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Leave Sell Back Report	System Function	Functionality includes providing leave sell back data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom leave sell back report.	
Produce Legal Personnel Program Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom legal personnel program reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Line of Duty Determination Process Management Report	System Function	Functionality includes providing line of duty determination process management data (e.g., incident notification, adverse action notification, line of duty determination request, line of duty legal recommendation documentation, line of duty data, line of duty investigation request, and line of duty investigation findings, line of duty request documentation, and line of duty appeal request) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom line of duty determination process management report.	
Produce Manage Casualty Assistance Programs Report	System Function	Functionality includes providing Manage Casualty Assistance Programs data (e.g., casualty assistance request, extraordinary request data, casualty assistance program evaluation response) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom Manage Casualty Assistance Programs report.	
Produce Manage Family Support Report	System Function	Functionality includes providing Family Support data (e.g., Family Support Needs Assessment, Family Support Service Evaluation, and QoL Program Evaluation) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom Family Support report.	
Produce Manpower Document Report	System Function	Functionality includes generating a report of the authorized Manpower. This report contains data pertaining to the organization's structure.	
Produce Manpower Report	System Function	Functionality includes providing the ability to generate and print pre-defined Manpower reports and enabling users to produce and print custom Manpower reports. Functionality also includes trend analysis tools for projections, planning, and modeling.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce Military Health Benefit Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom military health benefit reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Military Personnel Retirement Report	System Function	Functionality includes providing military personnel retirement report data (e.g., retirement eligibility concurrence report, retirement counsel completion report, retirement order requirement report, retirement checklist, retirement order report, retirement inquiry report, retirement request report, retirement appeal request report, retirement checklist action requirement report, military experience and training discrepancies report, retirement order acknowledgement report, individual travel authorization report, and custom military personnel retirement report.) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom military personnel retirement report.	
Produce Military Personnel Separation Report	System Function	Functionality includes providing military personnel separation data (e.g., separation order requirement data, separation order data, separation concurrence data, separation checklist data, separation request data, separation appeal request data, separation order acknowledgement data, stop loss criteria data, reduction in force data, transfer eligibility concurrence data, military experience and training discrepancies data, separation checklist action completion data, involuntary separation notification acknowledgement data, individual travel authorization data, and custom military personnel separation data) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom military personnel separation report.	
Produce Military Recruiting and Accession Management Report	System Function	Functionality includes providing military recruiting and accession management (e.g., competency testing results report, recruiting prospect, list of recruitment applicants, accession agreement, waiver request, personnel requisition, personnel distribution plan, prospect location data, candidate recruitment data, competency testing results, individual travel authorization, classification action response, background investigation report, assignment order, and personnel requirement request) data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom recruiting and accession management report.	
Produce Non-DoD Personnel Separation Report	System Function	Functionality includes providing performance program data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom non-DoD personnel separation report.	
Produce Other Benefits Report	System Function	Functionality includes providing performance program data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom other benefits report.	
Produce Performance Evaluation Report	System Function	Functionality includes providing performance evaluation data (e.g. list of personnel requiring performance evaluation, personnel action decision, performance evaluation data, performance evaluation refusal, performance evaluation shell, performance evaluation input, performance evaluation appeal request) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom performance evaluation report.	
Produce Performance Program Report	System Function	Functionality includes providing performance program data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom performance program report.	
Produce Personnel Availability Tracking Report	System Function	Functionality includes providing personnel availability tracking data, query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel availability tracking report.	
Produce Personnel Casualty Management Report	System Function	Functionality includes providing personnel casualty management data (e.g., incident notification), query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel casualty management report.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce Personnel Development Report	System Function	Functionality includes providing personnel development data (Personnel Classification Catalog Report, Personnel Occupation Competency Report, Scheduling Report, Request Report, Personnel Plan Report, Deficiency Report, Proposal Report, Buyer Materiel Report, Maintenance Report, Service Status Report, Aggregate Spend Report, Contract or Order Report, Force Structure Report, Market Report, Notification of Insufficient Funds Report, Occupational Safety Analysis Report, Personnel Distribution Requirement Change Report, Program and Funding Document Report, Strategic Planning Guidance, Department of Defense Fund Balance Report, Operational Experience Report, Individual Human Resource Report, Custom Personnel Development Report) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel development report.	
Produce Personnel Distribution Guidance Report	System Function	Functionality includes providing personnel distribution guidance data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel distribution report.	
Produce Personnel Distribution Plan Report	System Function	Functionality includes providing personnel distribution plan data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom recruiting and accession management report. This report may include (but not limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Produce Personnel Distribution Report	System Function	Functionality includes providing personnel distribution data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom assignment report.	
Produce Personnel Grade Change Report	System Function	Functionality includes providing personnel grade change (e.g., promotion order requirement, demotion order requirement, promotion package, potential promotion eligibility list, recommended promotion list, promotion list, program and funding document, Department of Defense fund balance, promotion criteria, promotion appeal package, individual promotion response, personnel grade change draft order, and personnel grade change final order) data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel grade change report.	
Produce Personnel Readiness Report	System Function	Functionality includes providing personnel readiness data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel readiness report.	
Produce Personnel Requirement Request Report	System Function	Functionality includes providing personnel requirement request data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel distribution report. This report may include (but not limited to) request date, justification, recommendation, request quantity, occupational code, unit identification code (UIC), and requestor name.	
Produce Personnel Retention Report	System Function	Functionality includes providing personnel retention data (e.g., Enlistment Extension Agreement Report, Enlistment Extension Appeal Report, Individual Enlistment Extension Response Report, Individual Reenlistment Response Report, Involuntary Enlistment Extension Candidate List Report, Officer Agreement Change Counseling Report, Officer Involuntary Retention Appeal Report, Reenlistment Candidate List Report, Reenlistment Waiver Request Report, Stop Loss Criteria Report, Stop Loss Notification Report, Reenlistment Waiver Report, Custom Personnel Retention Report, Reenlistment Request Report, Reenlistment Appeal Request Report, Enlistment Extension Request Report, Involuntary Enlistment Extension Waiver Request Report, Individual Human Resource Data Report) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom personnel retention report.	
Produce Personnel Security Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom personnel security reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Physical Evaluation Process Report	System Function	Functionality includes providing physical evaluation process data (e.g., medical evaluation findings data, continuation of service data, Veterans Affairs disability severity data, physical evaluation appeal request data, and custom physical evaluation process management report data) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom physical evaluation process report.	
Produce Physical Fitness Program Report	System Function	Functionality includes providing physical fitness program data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom physical fitness program report.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Produce Quality of Life Program Management Report	System Function	Functionality includes providing Quality of Life (QoL) program management data (e.g., QoL program evaluation, QoL program planning document, QoL program assessment) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom QoL program management report.	
Produce Recognition Program Report	System Function	Functionality includes providing recognition program data (e.g., award recommendation request, personnel award reclama, award order requirement, award data, award order, and personnel award request) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom recognition report.	
Produce Retirement Benefit Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom retirement benefit reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Time, Absence, and Labor Data Report	System Function	Functionality includes providing time, absence, and labor data (e.g., time worked data, absence data, labor data, and retirement points data) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom time, absence, and labor report.	
Produce Transfer Data Report	System Function	Functionality includes providing transfer data (e.g., transfer order acknowledgement, individual travel authorization, transfer order requirement, transfer order, individual transfer response, transfer package, transfer appeal request, transfer eligibility concurrence, transfer request) query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom transfer report.	
Produce Transition Assistance Program Report	System Function	Functionality includes providing performance program data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom transition assistance program report.	
Produce Travel Management Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom travel management reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Produce Unauthorized Absence Report	System Function	Functionality includes providing unauthorized absence (e.g., unauthorized absence notification, Federal Bureau of Investigation deserter, return of unauthorized absence notification, inapprehensible authorized absence, and unauthorized absence data request) data query capabilities and producing and printing a filtered set of results as a pre-defined and/or custom unauthorized absence report.	
Produce Workforce Analysis Report	System Function	Functionality includes providing the ability to generate and print pre-defined and/or custom workforce analysis reports.	
Produce Workforce Occupational Safety Analysis Report	System Function	Functionality includes providing the ability to generate and print pre-defined reports and enabling users to produce and print custom workforce occupational safety analysis reports. Functionality also includes providing trend analysis tools for projection planning and modeling.	
Provide Adverse Actions Workflow	System Function	Functionality includes providing the ability to route adverse actions data, sending a notification, and defining workflow criteria based on sequenced events required by the adverse actions workflow process.	
Provide Assignment Action Workflow	System Function	Functionality includes providing routing (e.g., name the data to be routed) , notification (e.g. name the notification), and identity verification (e.g. business area name user identity) based on sequenced events required by recognition program processes.	
Provide Budget (CE & POM/BES)	System Function	This function provides access to the Budget (Pres. Budget/POM/BE).	
Provide Civilian Personnel Separation and Retirement Workflow	System Function	Functionality includes providing the ability to route civilian personnel separation and retirement data, sending a notification, and defining workflow criteria based on sequenced events required by the civilian personnel separation and retirement process.	
Provide Civilian Staff Acquisition Management Workflow	System Function	Functionality includes providing the ability to route civilian staff acquisition management data, sending a notification, and defining workflow criteria based on sequenced events required by the civilian staff acquisition management workflow process.	
Provide Compensation and Reimbursements Workflow	System Function	Functionality includes providing the ability to route compensation and reimbursements data, sending a compensation and reimbursements notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the compensation and reimbursements process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Deliver Morale, Welfare and Recreation Program Workflow	System Function	Functionality includes providing the ability to route Morale, Welfare and Recreation (MWR) program data, sending an MWR program decision notification, defining workflow criteria to include type of information (e.g. request, form, and waiver) being routed and defining chain of people to review and provide decisions/recommendations based on sequenced events required by the deliver MWR program process.	
Provide Education Benefit Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by education benefit processes.	
Provide Education Management Workflow	System Function	Functionality includes providing the ability to route education management data and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the education management workflow process.	
Provide Equal Opportunity Workflow	System Function	Functionality includes providing the ability to route equal opportunity data, sending a notification, and defining workflow criteria based on sequenced events required by the equal opportunity process.	
Provide EV Data	System Function	This function provides access for Contract related EV data.	
Provide Grievance Workflow	System Function	Functionality includes providing the ability to route grievance data, sending a notification, and defining workflow criteria based on sequenced events required by the grievance workflow process.	
Provide Health Insurance Benefit Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by health insurance benefit processes.	
Provide HR RCP Workflow	System Function	Functionality includes providing the ability to route Human Resources (HR) Recovery Coordination Program (RCP) data, sending HR RCP notification, and defining workflow criteria (e.g., HR RCP evaluation request, recovering service member recovery plan status notification, HR recovery plan, HR RCP assistance request, HR RCP comprehensive needs assessment information, HR RCP enrollment information, recovering service member care category information, recovering service member information request, HR RCP enrollment notification).	
Provide Human Resources Data Workflow	System Function	Functionality includes providing the ability to route Human Resources (HR) data, sending an HR notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the HR workflow process.	
Provide Human Resources Interaction Workflow	System Function	Functionality includes providing the ability to route Human Resources interaction data, sending a Human Resources interaction notification, and authenticating a user's identity based on sequenced events required by the Human Resources interaction process.	
Provide Identity Credential Management Workflow	System Function	Functionality includes providing the ability to route Identity Credential Management Workflow data, sending a Identity Credential Management Workflow decision notification, defining workflow criteria to include type of information (e.g., request, form, and wavier) being routed and defining chain of people to review and provide decisions /recommendations based on sequenced events required by the Identity Credential Management Workflow process.	
Provide Individual Assignment Workflow	System Function	Functionality includes providing the ability to route individual assignment data, sending a notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the individual assignment process.	
Provide Individual Training Course Management Workflow	System Function	Functionality includes providing the ability to route individual training course data, sending a individual training course notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the individual training course workflow process.	
Provide Interagency Support Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by interagency support processes.	
Provide Law Enforcement Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by law enforcement processes.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Leave Sell Back Workflow	System Function	Functionality includes providing routing (e.g., leave sell back request), notification (e.g., leave sell back decision notification), and identity verification (leave sell back user identity) based on sequenced events required by leave sell back processes.	
Provide Legal Personnel Program Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by legal personnel program processes.	
Provide Line of Duty Determination Process Management Workflow	System Function	Functionality includes providing the ability to route line of duty determination process management data, sending a line of duty determination process management notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the line of duty determination process management process.	
Provide Manage Casualty Assistance Programs Workflow	System Function	Functionality includes providing the ability to route personnel casualty management data, sending a notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the personnel casualty management process.	
Provide Manage Family Support Process Workflow	System Function	Functionality includes providing the ability to route Family Support data, sending a Family Support decision notification, defining workflow criteria to include type of information (e.g. request, form, and waiver) being routed and defining chain of people to review and provide decisions/recommendations based on sequenced events required by the Family Support process.	
Provide Manpower Workflow	System Function	Functionality includes providing routing, notification, and electronic signature authentication based on sequenced events required by processes.	
Provide Milestone Data	System Function	This function provides access to the program Milestone Data to the users.	
Provide Military Health Benefit Workflow	System Function	Functionality includes providing routing, notification, electronic signature, and status update based on sequenced events that are required by military health benefit processes.	
Provide Military Personnel Retirement Workflow	System Function	Functionality includes providing routing (e.g., retirement eligibility concurrence data, retirement counsel completion data, retirement appeal request data, retirement order acknowledgement data, and individual travel authorization data ), notification (e.g., mandatory retirement projection notification, retirement decision notification, and retirement order decision notification), and identity verification (e.g., authenticate military personnel retirement identity) based on sequenced events required by the military personnel retirement process.	
Provide Military Personnel Separation Workflow	System Function	Functionality includes providing routing (e.g., separation concurrence data, separation appeal request data, separation order data, separation order acknowledgement data, and individual travel authorization data), notification (e.g., separation decision notification, separation order decision, and notification), and identity verification (e.g., military personnel separation user identity) based on sequenced events required by military personnel separation process.	
Provide Military Recruiting and Accession Management Workflow	System Function	Functionality includes providing the ability to route military recruiting and accession management data, sending a recruiting and accession management notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the recruiting and accession management workflow process.	
Provide Non-DoD Personnel Separation Workflow	System Function	Functionality includes providing the ability to route non-DoD personnel separation data, sending a notification, and defining workflow criteria based on sequenced events required by the non-DoD personnel separation process.	
Provide Order Status	System Function	This function allows the user to inquire about the status of an order, indicating where the item is in the order fulfillment process.	
Provide Other Benefits Workflow	System Function	Functionality includes providing the ability to route other benefits data, sending a notification, and defining workflow criteria based on sequenced events required by the other benefits process.	
Provide Performance Evaluation Workflow	System Function	Functionality includes providing the ability to route performance evaluation data, sending a performance evaluation notification, and authenticating a user's identity based on sequenced events required by the performance evaluation process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Performance Program Workflow	System Function	Functionality includes providing the ability to route performance program data, sending a notification, and defining workflow criteria based on sequenced events required by the performance program process.	
Provide Personnel Availability Tracking Workflow	System Function	Functionality includes providing the ability to route personnel availability tracking data, sending a notification, and defining workflow criteria based on sequenced events required by the personnel availability tracking process.	
Provide Personnel Casualty Management Workflow	System Function	Functionality includes providing the ability to route personnel casualty management data, sending a notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the personnel casualty management process.	
Provide Personnel Development Workflow	System Function	Functionality includes providing the ability to route personnel development data, sending a personnel development notification, and authenticating a user's identity based on sequenced events required by the personnel development process.	
Provide Personnel Distribution Workflow	System Function	Functionality includes providing the ability to route personnel distribution data, sending a personnel distribution notification, and authenticating a user's identity based on sequenced events required by the personnel distribution process.	
Provide Personnel Grade Change Workflow	System Function	Functionality includes providing the ability to route personnel grade change data, sending a personnel grade change notification, and authenticating a user's identity based on sequenced events required by the personnel grade change process.	
Provide Personnel Readiness Workflow	System Function	Functionality includes providing the ability to route personnel readiness data, sending a notification, and defining workflow criteria based on sequenced events required by the personnel readiness process.	
Provide Personnel Retention Workflow	System Function	Functionality includes providing the ability to route personnel retention data, sending a personnel retention notification, and authenticating a user's identity based on sequenced events required by the personnel retention process.	
Provide Personnel Security Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by personnel security processes.	
Provide Physical Evaluation Process Workflow	System Function	Functionality includes providing the ability to route physical evaluation process data, sending a physical evaluation process notification, and defining workflow criteria (e.g., type of personnel action, chain of people to review and provide approval/recommendations on personnel action) based on sequenced events required by the physical evaluation workflow process.	
Provide Physical Fitness Program Workflow	System Function	Functionality includes providing the ability to route physical fitness program data, sending a notification, and defining workflow criteria based on sequenced events required by the physical fitness program process.	
Provide Program/Subprogram	System Function	This function provides access to the Program/Subprogram data.	
Provide Quality of Life Program Management Workflow	System Function	Functionality includes providing the ability to route Quality of Life (QoL) program management data, sending a QoL program management decision notification, defining workflow criteria to include type of information (e.g. request, form, and waiver) being routed and defining chain of people to review and provide decisions /recommendations based on sequenced events required by the QoL program management process.	
Provide Recognition Program Workflow	System Function	Functionality includes providing routing (e.g., personnel award reclama, award recommendation request), notification (e.g., personnel action decision notification), and identity verification (recognition program) based on sequenced events required by recognition program processes.	
Provide Retirement Benefit Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by retirement benefit processes.	
Provide Technology (KPP)	System Function	This function provides access to the Technology (KPP).	
Provide Time, Absence, and Labor Workflow	System Function	Functionality includes routing (e.g., time worked data, absence data, and labor data), notification (e.g., time, absence, and labor notification), and identity verification (e.g., time, absence, and labor user identity) based on sequenced events required by time, absence, and labor process.	
Provide Transfer Workflow	System Function	Functionality includes providing the ability to route transfer data, sending a transfer notification, and authenticating a user's identity based on sequenced events required by the transfer process.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Provide Transition Assistance Program Workflow	System Function	Functionality includes providing the ability to route transition assistance program data, sending a notification, and defining workflow criteria based on sequenced events required by the transition assistance program process.	
Provide Travel Management Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by travel management processes.	
Provide Unauthorized Absence Workflow	System Function	Functionality includes providing routing (e.g., unauthorized absence), notification (e.g., apprehension assistance, search and rescue assistance, reward or reimbursement eligibility, and unauthorized absence resolution), and identity verification (e.g., unauthorized absence user identity) based on sequenced events required by unauthorized absence processes.	
Provide Unit Cost Data	System Function	This function provides access to the unit cost data from the Component data sources.	
Provide Workforce Occupational Safety Analysis Workflow	System Function	Functionality includes providing routing, notification, and identity verification based on sequenced events required by workforce occupational safety analysis processes.	
Record Inspection	System Function	This function compares received materiel against the order and the packing list. Any discrepancies are rejected and sent back to the vendor. For accepted items, this function updates the asset/inventory system to reflect the additional items.	
Record Issuance	System Function	This function supports the issue of materiel items, transfer between services, etc., in order to maintain accurate records of the location of assets. This function prepares the pick-list to be used in pulling materiel out of stock. This function reduces the on-hand quantities by the number of items removed.	
Record Receipt	System Function	This function supports the receipt of goods in a warehouse, which takes place after final inspection and delivery. This receipt is forwarded to the core financial system to close a contract upon delivery.	
Record Transportation Fulfillment	System Function	This function records receipt and location of materiel/ personnel. The data indicates that materiel or personnel has been shipped/transported and delivered to the appropriate destination, including required information and all the associated cost to verify Perfect Order Fulfillment.	
Retrieve Item Status and Availability	System Function	This function captures the data specified by a query of data for actual inventory items. Item status refers to quantities of the states that an item may be in such as on-hand, on-order, discontinued, and the like. Item availability refers to date and count data concerning when the item could be retrieved from inventory.	
Send Adverse Actions Data to External Destination	System Function	Functionality includes sending adverse actions data (e.g. court-martial referral data, investigation report data) to interfacing systems or generating data files for retrieval.	
Send Assignment Action Data to External Destination	System Function	Functionality includes sending assignment action data to interfacing systems or generating data files for retrieval. This data may include (but is not limited to) personnel requisition information, assignment acceptance or declination, assignment action status, assignment start and stop date, and assignment action identifier.	
Send Civilian Personnel Separation and Retirement Data to External Destination	System Function	Functionality includes sending civilian personnel separation and retirement data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Civilian Staff Acquisition Management Data to External Destination	System Function	Functionality includes sending civilian staff acquisition management data to interfacing systems or generating data files for retrieval. This may include sending civilian staff acquisition management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Send Compensation and Reimbursements Data to External Destination	System Function	Functionality includes sending compensation and reimbursements data (e.g., request for corrective action data, personnel and pay debt disposition data, debt correspondence data, certified human resources management pay data, pay statement data, separated or terminated or transferred individual debt data, and certified reimbursement data) to interfacing systems or generating data files for retrieval.	
Send Deliver Morale, Welfare and Recreation Program Data to External Destination	System Function	Functionality includes sending Morale, Welfare and Recreation (MWR) program data (e.g., MWR program usage response data, separation checklist action completion data, retirement checklist action completion data, benefit debt disposition data, Quality of Life program evaluation data) to interfacing systems or generating data files for retrieval.	
Send Education Benefit Data to External Destination	System Function	Functionality includes sending education benefit data to interfacing systems or generating data files for retrieval.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Send Education Management Data to External Destination	System Function	Functionality includes sending education management data (e.g., individual training and education procurement request, education course proposal assessment, education course catalog, curriculum, commitment request, workforce analysis request, education resource requirements, evidence of goods tendered and services rendered, education course scheduling, student enrollment) to interfacing systems or generating data files for retrieval. This may include sending education management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Send Equal Opportunity Data to External Destination	System Function	Functionality includes sending equal opportunity data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Family Support Data to External Destination	System Function	Functionality includes sending Family Support data (e.g., Family Support Needs Assessment, Family Support Information Request, and Human Resources Recovery Coordination Assistance Response) to interfacing systems or generating data files for retrieval.	
Send Grievance Data to External Destination	System Function	Functionality includes sending grievance data to interfacing systems or generating data files for retrieval.	
Send Health Insurance Benefit Data to External Destination	System Function	Functionality includes sending health insurance benefit data to interfacing systems or generating data files for retrieval.	
Send HR RCP Data to External Destination	System Function	Functionality includes sending Human Resources (HR) Recovery Coordination Program (RCP) data (e.g., HR RCP evaluation request, recovering service member recovery plan status notification, HR recovery plan, HR RCP assistance request, HR RCP comprehensive needs assessment information, HR RCP enrollment information, recovering service member care category information, recovering service member information request, HR RCP enrollment notification) to interfacing systems or generating data files for retrieval.	
Send Human Resources Data to External Destination	System Function	Functionality includes sending Human Resources (HR) data (e.g., HR profile data, HR record data, investigating officer request data, HR disposition data) to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) sending HR data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement), and sending HR data that is requested.	
Send Human Resources Interaction Data to External Destination	System Function	Functionality includes sending Human Resources interaction data, customer communication data, negotiated labor agreement data, labor rights issue response data, labor rights issue analysis summary data, investigating officer request data to interfacing systems or generating data files for retrieval.	
Send Identity Credential Management Data to External Destination	System Function	Functionality includes sending Identity Credential Management data (e.g., national agency check, passport, and credential service status) to interfacing systems or generating data files for retrieval.	
Send Individual Assignment Data to External Destination	System Function	Functionality includes sending individual assignment data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Individual Training Course Management Data to External Destination	System Function	Functionality includes sending individual training course data (e.g., evidence of goods tendered and services rendered, commitment request, individual training and education procurement request, individual training course proposal assessment, individual training catalog information, individual training course resource requirements information, workforce analysis request, course evaluation assessment information, instructor assessment information, individual training course scheduling information, student enrollment information, and individual training course information) to interfacing systems or generating data files for retrieval. This may include sending individual training course data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Send Interagency Support Data to External Destination	System Function	Functionality includes sending interagency support data to interfacing systems or generating data files for retrieval.	
Send Law Enforcement Data to External Destination	System Function	Functionality includes sending law enforcement data to interfacing systems or generating data files for retrieval.	
Send Leave Sell Back Data to External Destination	System Function	Functionality includes sending leave sell back data to interfacing systems or generating data files for retrieval.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Send Legal Personnel Program Data to External Destination	System Function	Functionality includes sending legal personnel program data to interfacing systems or generating data files for retrieval.	
Send Line of Duty Determination Process Management Data to External Destination	System Function	Functionality includes sending line of duty determination process management data (e.g., line of duty legal review data request, and line of duty data request) to interfacing systems or generating data files for retrieval.	
Send Manage Casualty Assistance Programs Data to External Destination	System Function	Functionality includes sending Manage Casualty Assistance Programs data (e.g., invitational travel order requirement, casualty assistance program feedback) to interfacing systems or generating data files for retrieval.	
Send Manpower Data to External Destination	System Function	Functionality includes sending data to interfacing systems or generating data files for retrieval. Functionality includes, but is not limited to, publication and subscription of capabilities.	
Send Military Health Benefit Data to External Destination	System Function	Functionality includes sending military health benefit data to interfacing systems or generating data files for retrieval.	
Send Military Personnel Retirement Data to External Destination	System Function	Functionality includes sending military personnel retirement data (e.g., retirement inquiry response data, retirement eligibility nonconcurrency data, retirement eligibility concurrency data, retirement checklist action requirement data, retirement order data, retirement documentation data, and retirement clearance notification data) to interfacing systems or generating data files for retrieval.	
Send Military Personnel Separation Data to External Destination	System Function	Functionality includes sending military personnel separation data (e.g., separation concurrency data, separation nonconcurrency data, separation checklist action requirement data, separation documentation data, separation clearance notification data, involuntary separation notification data, and separation order data) to interfacing systems or generating data files for retrieval.	
Send Military Recruiting and Accession Management Data to External Destination	System Function	Functionality includes sending military recruiting and accession management data (e.g., workforce analysis request, recruitment applicant, medical prescreen, travel requirement, recruitment mitigation plan, background investigation request, competency testing request, medical evaluation results, classification action request, pre-induction documentation, signed accession agreement, and personnel requirement request) to interfacing systems or generating data files for retrieval. This may include sending recruiting and accession management data as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Send Non-DoD Personnel Separation Data to External Destination	System Function	Functionality includes sending non-DoD personnel separation data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Other Benefits Data to External Destination	System Function	Functionality includes sending other benefits data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Performance Evaluation Data to External Destination	System Function	Functionality includes sending performance evaluation data to interfacing systems or generating data files for retrieval.	
Send Performance Program Data to External Destination	System Function	Functionality includes sending performance program data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Personnel Availability Tracking Data to External Destination	System Function	Functionality includes sending personnel availability data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Personnel Casualty Management Data to External Destination	System Function	Functionality includes sending personnel casualty management data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Personnel Development Data to External Destination	System Function	Functionality includes sending personnel development data (e.g., Catalog Data, Personnel Plan Assessment Data, Proposal Assessment Data, Personnel Development Resource Master Schedule Data, Evidence of Goods Tendered and Services Rendered Data, Sales Reimbursement Data, Career Path Data, Request Data) to interfacing systems or generating data files for retrieval.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Send Personnel Distribution Data to External Destination	System Function	Functionality includes sending personnel distribution data (e.g., workforce analysis request, personnel distribution plan, validated personnel requisition, non-validated personnel requisition, personnel requirement request response) to interfacing systems or generating data files for retrieval.	
Send Personnel Distribution Plan Data to External Destination	System Function	Functionality includes sending personnel distribution plan data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) manpower levels, timelines for manning levels, manning priorities, and aggregated distribution plans.	
Send Personnel Grade Change Data to External Destination	System Function	Functionality includes sending personnel grade change data (e.g., personnel grade change draft order, and personnel grade change final order) to interfacing systems or generating data files for retrieval. This data may include (but not limited to) draft order date, order effective date, order type, order action, approved order date and status, order number, order effective date, and order type.	
Send Personnel Readiness Data to External Destination	System Function	Functionality includes sending personnel readiness data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Personnel Requirement Request Response Data to External Destination	System Function	Functionality includes sending personnel requirement request response data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) requestor name, request date, requested quantity, discrepancy information, occupational code, unit identification code (UIC), current authorization information, and current gain and loss information.	
Send Personnel Requisition Data to External Destination	System Function	Functionality includes sending validated personnel requisition and non-validated personnel requisition data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) decision date, decision reason, request date, request quantity, occupational code, unit identification code (UIC), and requisition date.	
Send Personnel Retention Data to External Destination	System Function	Functionality includes sending personnel retention data to interfacing systems or generating data files for retrieval.	
Send Personnel Security Data to External Destination	System Function	Functionality includes sending personnel security data to interfacing systems or generating data files for retrieval.	
Send Physical Evaluation Process Data to External Destination	System Function	Functionality includes sending physical evaluation process data (e.g., involuntary separation request data and retirement request data) to interfacing systems or generating data files for retrieval. This may include sending physical evaluation process data to external source as a result of an interface agreement (e.g., Memorandum of Understanding and Memorandum of Agreement).	
Send Physical Fitness Program Data to External Destination	System Function	Functionality includes sending physical fitness program data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Quality of Life Program Management Data to External Destination	System Function	Functionality includes sending Quality of Life (QoL) program management data (e.g., QoL program decision notification, workforce analysis request, obligation request) to interfacing systems or generating data files for retrieval.	
Send Recognition Program Data to External Destination	System Function	Functionality includes sending recognition program data to interfacing systems or generating data files for retrieval.	
Send Retirement Benefit Data to External Destination	System Function	Functionality includes sending retirement benefit data to interfacing systems or generating data files for retrieval.	
Send Time, Absence, and Labor Data to External Destination	System Function	Functionality includes sending time, absence, and labor data (e.g., time worked data, absence data, labor data, and retirement points data) to interfacing systems or generating data files for retrieval.	
Send Transfer Data to External Destination	System Function	Functionality includes sending transfer data (e.g., transfer order data, transfer eligibility nonconcurrency, transfer eligibility concurrence) to interfacing systems or generating data files for retrieval.	
Send Transition Assistance Program Data to External Destination	System Function	Functionality includes sending transition assistance program data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date and time, requested information, and requestor name.	
Send Travel Management Data to External Destination	System Function	Functionality includes sending travel management data to interfacing systems or generating data files for retrieval.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Send Unauthorized Absence Data to External Destination	System Function	Functionality includes sending unauthorized absence data (e.g., Federal Bureau of Investigation deserter, initial report of offense, and unauthorized absence report) to interfacing systems or generating data files for retrieval.	
Send Workforce Analysis Request Data to External Destination	System Function	Functionality includes sending workforce analysis request data to interfacing systems or generating data files for retrieval. This data may include (but not be limited to) request date, requestor name, and request description.	
Send Workforce Occupational Safety Analysis Data to External Destination	System Function	Functionality includes sending workforce occupational safety analysis data to interfacing systems or generating data files for retrieval.	
Track Transportation Status	System Function	This function is used to track the movement of materiel and personnel. This function records financial and non-financial data from the time items are sent to the time they are received by the requesting customer. The status of the shipment can be retrieved to provide advice to customers on the shipments of materiel. For tracking personnel, this function indicates when personnel have arrived at the point of departure and have undergone all pre-movement processes, indicates when they are in transit, and indicates when they have arrived at the destination point.	
BEIS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between BEIS and FoS External Systems.	
BEIS - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between BEIS and FoS General Ledger Management.	
CAMS-ME - BEIS	System Interface	This system interface represents the requirements to exchange data between CAMS-ME and BEIS.	
CAMS-ME - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between CAMS-ME and FoS Asset Management.	
CCR - DoD EMALL	System Interface	This system interface represents the requirements to exchange data between CCR and DoD EMALL.	
CCR - eSRS	System Interface	This system interface represents the requirements to exchange data between CCR and eSRS.	
CCR - FBO	System Interface	This system interface represents the requirements to exchange data between CCR and FBO.	
CCR - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between CCR and FoS Manage Sourcing.	
CCR - FPDS-NG	System Interface	This system interface represents the requirements to exchange data between CCR and FPDS-NG.	
CCR - ORCA	System Interface	This system interface represents the requirements to exchange data between CCR and ORCA.	
CCR - PPIRS	System Interface	This system interface represents the requirements to exchange data between CCR and PPIRS.	
CCR - SPS	System Interface	This system interface represents the requirements to exchange data between CCR and SPS.	
CCR - WAWF	System Interface	This system interface represents the requirements to exchange data between CCR and WAWF.	
DAI - BEIS	System Interface	This system interface represents the requirements to exchange data between DAI and BEIS.	
DAI - DCPDS	System Interface	This system interface represents the requirements to exchange data between DAI and DCPDS.	
DAIS - FoS External	System Interface	This system interface represents the requirements to exchange data between DAIS and FoS External Systems.	
DAIS - FoS Installations	System Interface	This system interface represents the requirements to exchange data between DAIS and FoS Installations.	
DAMIR - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between DAMIR and FoS Defense Acquisition Management.	
DAMIR - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between DAMIR and FoS External Systems.	
DCPDS - DAI	System Interface	This system interface represents the requirements to exchange data between DCPDS and DAI.	
DCPDS - DCPDS	System Interface	This system interface represents the requirements to exchange data between DCPDS and DCPDS.	
DCPDS - DTS	System Interface	This system interface represents the requirements to exchange data between DCPDS and DTS.

FoS Enterprise System - FoS Fund Balance with Treasury Management	System Interface	This system interface represents the requirements to exchange data between FoS Enterprise System and FoS Fund Balance with Treasury Management.	
FoS Enterprise System - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between FoS Enterprise System and FoS Payment Management.	
FoS Enterprise System - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Enterprise System and FoS Enterprise System - FoS Receivable Management.	
FoS Enterprise System - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Enterprise System and NGRMS.	
FoS Enterprise System - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Enterprise System and PBAS.	
FoS Enterprise System - SDI	System Interface	This system interface represents the requirements to exchange data between Fos Enterprise System and SDI.	
FoS ESOH - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and EXTSE.	
FoS ESOH - FoS GIS	System Interface	This system interface represents the requirements to exchange data between FoS Environment, Safety, and Occupational Health and FoS Geospatial Information and Services.	
FoS ESOH - FoS Installations	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and FoS Installations.	
FoS ESOH - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and FoS Manage Sourcing.	
FoS ESOH - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and FoS Medical Administration.	
FoS ESOH - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and FoS Personnel and Pay Management.	
FoS ESOH - KBCRS	System Interface	This system interface represents the requirements to exchange data between FoS ESOH and KBCRS.	
FoS External - DAIS	System Interface	This system interface represents the requirements to exchange data between DAIS and FoS External Systems.	
FoS External Systems - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and BEIS.	
FoS External Systems - CCR	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and CCR.	
FoS External Systems - CPARS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and CPARS.	
FoS External Systems - DAI	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and DAI.	
FoS External Systems - DCPDS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and DCPDS.	
FoS External Systems - DoD EMALL	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and DoD EMALL.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS External Systems - eSRS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and eSRS.	
FoS External Systems - FedReg	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FedReg.	
FoS External Systems - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Asset Management.	
FoS External Systems - FoS Benefits Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Benefits Management.	
FoS External Systems - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Budgetary Resource Management.	
FoS External Systems - FoS Chemical Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Chemical Management.	
FoS External Systems - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Core Accounting System.	
FoS External Systems - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Defense Acquisition Management.	
FoS External Systems - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Distribution.	
FoS External Systems - FoS Energy	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Energy.	
FoS External Systems - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS ESOH.	
FoS External Systems - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Force Management.	
FoS External Systems - FoS Fund Balance with Treasury Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Fund Balance with Treasury Management.	
FoS External Systems - FoS HR Decision Support Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS HR Decision Support Management.	
FoS External Systems - FoS HR Organizational Infrastructure Support	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS HR Organizational Infrastructure Support.	
FoS External Systems - FoS Human Resources Information Security Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Human Resources Information Security Management.	
FoS External Systems - FoS Installations	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Installations.	
FoS External Systems - FoS IUID Registry	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS IUID Registry.	
FoS External Systems - FoS Law Enforcement Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Law Enforcement Management.	
FoS External Systems - FoS Logistics Planning	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Logistics Planning.	
FoS External Systems - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Manage Sourcing.	
FoS External Systems - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Medical Administration.	
FoS External Systems - FoS Other Financial Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Other Financial Management.	
FoS External Systems - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Payment Management.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS External Systems - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Personnel and Pay Management.	
FoS External Systems - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Quality of Life/MWR Management.	
FoS External Systems - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Receivable Management.	
FoS External Systems - FoS Travel Management	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and FoS Travel Management.	
FoS External Systems - HMIRS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and HMIRS.	
FoS External Systems - MOCAS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and MOCAS.	
FoS External Systems - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and NGRMS.	
FoS External Systems - ORCA	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and ORCA.	
FoS External Systems - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and PBAS.	
FoS External Systems - PPIRS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and PPIRS.	
FoS External Systems - SDI	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and SDI.	
FoS External Systems - USXPORTS	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and USXPORTS.	
FoS External Systems - WAWF	System Interface	This system interface represents the requirements to exchange data between FoS External Systems and WAWF.	
FoS Force Management - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and FoS Budgetary Resource Management.	
FoS Force Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and FoS Core Accounting System.	
FoS Force Management - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and FoS Cost Management.	
FoS Force Management - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and FoS ESOH.	
FoS Force Management - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and NGRMS.	
FoS Force Management - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and PBAS.	
FoS Fund Balance with Treasury Management - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between FoS Fund Balance with Treasury Management and FoS Enterprise System.	
FoS Fund Balance with Treasury Management - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS Fund Balance with Treasury Management and FoS General Ledger Management.	
FoS Fund Balance with Treasury Management - Treasury-CARS	System Interface	This system interface represents the requirements to exchange data between FoS Fund Balance with Treasury Management and Treasury-CARS.	
FoS General Ledger Management - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and BEIS.	
FoS General Ledger Management - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and FoS Cost Management.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS General Ledger Management - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and FoS Enterprise System.	
FoS General Ledger Management - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and FoS Medical Administration.	
FoS General Ledger Management - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and FoS Personnel and Pay Management.	
FoS General Ledger Management - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between FoS General Ledger Management and FoS Quality of Life/MWR Management.	
FoS GIS - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Geospatial Information and Services and FoS Environment, Safety, and Occupational Health.	
FoS GIS - FoS Installations	System Interface	This system interface represents the requirements to exchange data between FoS Geospatial Information and Services and FoS Installations.	
FoS HR Decision Support Management - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS HR Decision Support Management and FoS ESOH.	
FoS HR Organizational Infrastructure Support Management - DCPDS	System Interface	This system interface represents the requirements to exchange data between FoS HR Organizational Infrastructure Support Management and DCPDS.	
FoS HR Organizational Infrastructure Support Management - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS HR Organizational Infrastructure Support Management and FoS ESOH.	
FoS HR Organizational Infrastructure Support Management - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS HR Organizational Infrastructure Support Management and FoS External Systems.	
FoS Installations - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS Installations and BEIS.	
FoS Installations - DAIS	System Interface	This system interface represents the requirements to exchange data between FoS Installations and DAIS.	
FoS Installations - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS Budgetary Resource Management.	
FoS Installations - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS Core Accounting System.	
FoS Installations - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS Cost Management.	
FoS Installations - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS ESOH.	
FoS Installations - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Force Management and FoS External Systems.	
FoS Installations - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS General Ledger Management.	
FoS Installations - FoS GIS	System Interface	This system interface represents the requirements to exchange data between FoS Installations and FoS Geospatial Information and Services.	
FoS Installations - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Installations and NGRMS.	
FoS Installations - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Installations and PBAS.	
FoS Installations - RPAD	System Interface	This system interface represents the requirements to exchange data between FoS Installations and RPAD.	
FoS Installations - RPUIR	System Interface	This system interface represents the requirements to exchange data between FoS Installations and RPUIR.	
FoS IUID Registry - CAMS-ME	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and CAMS-ME.	
FoS IUID Registry - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and FoS Core Accounting System.	
FoS IUID Registry - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and ENTSE.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS IUID Registry - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and FoS General Ledger Management.	
FoS IUID Registry - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and FoS Manage Sourcing.	
FoS IUID Registry - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS IUID Registry and FoS Personnel and Pay Management.	
FoS Legal Services Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Legal Services Management and FoS Core Accounting System.	
FoS Legal Services Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Legal Services Management and FoS Receivable Management.	
FoS Logistics Planning - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS Logistics Planning - FoS Manage Sourcing.	
FoS Manage Receipt and Acceptance - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Manage Receipt and Acceptance and FoS Core Accounting System.	
FoS Manage Receipt and Acceptance - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Manage Receipt and Acceptance and FoS External Systems.	
FoS Manage Receipt and Acceptance - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS Defense Acquisition Management and FoS Manage Sourcing.	
FoS Manage Receipt and Acceptance - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Receipt and Acceptance and FoS Payment Management.	
FoS Manage Receipt and Acceptance - PPIRS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Receipt and Acceptance and PPIRS.	
FoS Manage Request - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Request and FoS Asset Management.	
FoS Manage Request - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between FoS Manage Request and FoS Distribution.	
FoS Manage Request - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Manage Request and EXTSE.	
FoS Manage Request - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between oS Manage Request and FoS Manage Sourcing	
FoS Manage Request - SPS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Request - SPS.	
FoS Manage Sourcing - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and BEIS.	
FoS Manage Sourcing - DCPDS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and DCPDS.	
FoS Manage Sourcing - DTS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and DTS.	
FoS Manage Sourcing - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Asset Management.	
FoS Manage Sourcing - FoS Benefits Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Benefits Management.	
FoS Manage Sourcing - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Budgetary Resource Management.	
FoS Manage Sourcing - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Core Accounting System.	
FoS Manage Sourcing - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Cost Management.	
FoS Manage Sourcing - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Defense Acquisition Management.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Manage Sourcing - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Distribution.	
FoS Manage Sourcing - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Force Management.	
FoS Manage Sourcing - FoS Installations	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Installations.	
FoS Manage Sourcing - FoS IUID Registry	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS IUID Registry.	
FoS Manage Sourcing - FoS Logistics Planning	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Logistics Planning.	
FoS Manage Sourcing - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Medical Administration.	
FoS Manage Sourcing - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Personnel and Pay Management.	
FoS Manage Sourcing - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Quality of Life/MWR Management.	
FoS Manage Sourcing - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Receivable Management.	
FoS Manage Sourcing - FoS Travel Management	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and FoS Travel Management.	
FoS Manage Sourcing - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and NGRMS.	
FoS Manage Sourcing - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and PBAS	
FoS Manage Sourcing - PPIRS	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and PPIRS.	
FoS Manage Sourcing - WAWF	System Interface	This system interface represents the requirements to exchange data between FoS Manage Sourcing and WAWF.	
FoS Medical Administration - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS Budgetary Resource Management.	
FoS Medical Administration - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS Core Accounting System.	
FoS Medical Administration - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS Cost Management.	
FoS Medical Administration - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS ESOH.	
FoS Medical Administration - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS External Systems.	
FoS Medical Administration - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and FoS Receivable Management.	
FoS Medical Administration - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and NGRMS.	
FoS Medical Administration - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Medical Administration and PBAS.	
FoS Other Financial Management - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS Other Financial Management and BEIS.	
FoS Other Financial Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Other Financial Management and FoS Core Accounting System.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Other Financial Management - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Other Financial Management and EXTSE.	
FoS Other Financial Management - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS Other Financial Management and FoS General Ledger Management.	
FoS Other Financial Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Other Financial Management and FoS Receivable Management.	
FoS Payment Management - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and BEIS.	
FoS Payment Management - DAI	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and DAI.	
FoS Payment Management - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS ESOH.	
FoS Payment Management - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and EXTSE.	
FoS Payment Management - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS General Ledger Management.	
FoS Payment Management - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS Manage Sourcing.	
FoS Payment Management - FoS Monitor Payment	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS Monitor Payment.	
FoS Payment Management - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS Payment Management.	
FoS Payment Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Payment Management and FoS Receivable Management.	
FoS Personnel and Pay - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay - FoS Manage Sourcing.	
FoS Personnel and Pay Management - DCPDS	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and DCPDS.	
FoS Personnel and Pay Management - DTS	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and DTS.	
FoS Personnel and Pay Management - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Budgetary Resource Management.	
FoS Personnel and Pay Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Core Accounting System.	
FoS Personnel and Pay Management - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Cost Management.	
FoS Personnel and Pay Management - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS ESOH.	
FoS Personnel and Pay Management - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS External Systems.	
FoS Personnel and Pay Management - FoS Installations	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Installations.	
FoS Personnel and Pay Management - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Payment Management.	
FoS Personnel and Pay Management - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Personnel and Pay Management.	
FoS Personnel and Pay Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and FoS Receivable Management.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Personnel and Pay Management - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and NGRMS.	
FoS Personnel and Pay Management - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Personnel and Pay Management and PBAS.	
FoS Quality of Life/MWR Management - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and FoS Budgetary Resource Management.	
FoS Quality of Life/MWR Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and FoS Core Accounting System.	
FoS Quality of Life/MWR Management - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and FoS Cost Management.	
FoS Quality of Life/MWR Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and FoS Receivable Management.	
FoS Quality of Life/MWR Management - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and NGRMS.	
FoS Quality of Life/MWR Management - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and PBAS.	
FoS Quality of Life/MWR Management - WAWF	System Interface	This system interface represents the requirements to exchange data between FoS Quality of Life/MWR Management and WAWF.	
FoS Receivable Management - BEIS	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and BEIS.	
FoS Receivable Management - DCPDS	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and DCPDS.	
FoS Receivable Management - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and FoS Budgetary Resource Management.	
FoS Receivable Management - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and FoS Enterprise System.	
FoS Receivable Management - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and FoS General Ledger Management.	
FoS Receivable Management - FoS Travel Management	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and FoS Travel Management.	
FoS Receivable Management - FoS Treasury System	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and FoS Treasury System.	
FoS Receivable Management - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and NGRMS.	
FoS Receivable Management - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Receivable Management and PBAS.	
FoS Travel Management - DTS	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and DTS.	
FoS Travel Management - FoS Budgetary Resource Management	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and FoS Budgetary Resource Management.	
FoS Travel Management - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and FoS Core Accounting System.	
FoS Travel Management - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and FoS Cost Management.	
FoS Travel Management - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and FoS Receivable Management.	
FoS Travel Management - NGRMS	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and NGRMS.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FoS Travel Management - PBAS	System Interface	This system interface represents the requirements to exchange data between FoS Travel Management and PBAS.	
FPDS-NG - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between FPDS-NG and FoS Enterprise Systems.	
FPDS-NG - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between FPDS-NG and FoS External Systems.	
FPDS-NG - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between FPDS-NG and FoS Manage Sourcing.	
FPDS-NG - SPOT	System Interface	This system interface represents the requirements to exchange data between FPDS-NG and SPOT.	
HMIRS - FoS Chemical Management	System Interface	This system interface represents the requirements to exchange data between HMIRS and FoS Chemical Management.	
MOCAS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between MOCAS and FoS External Systems.	
MOCAS - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between MOCAS and FoS General Ledger Management.	
MOCAS - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between MOCAS and FoS Receivable Management.	
NGRMS - BEIS	System Interface	This system interface represents the requirements to exchange data between NGRMS and BEIS.	
NGRMS - DCPDS	System Interface	This system interface represents the requirements to exchange data between NGRMS and DCPDS.	
NGRMS - DTS	System Interface	This system interface represents the requirements to exchange data between NGRMS and DTS.	
NGRMS - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Asset Management.	
NGRMS - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Core Accounting System.	
NGRMS - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Cost Management.	
NGRMS - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Defense Acquisition Management.	
NGRMS - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Distribution.	
NGRMS - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS ESOH.	
NGRMS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS External Systems.	
NGRMS - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between NGRMS - FoS Force Management.	
NGRMS - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS General Ledger Management.	
NGRMS - FoS Installations	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Installations.	
NGRMS - FoS Manage Request	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Manage Request.	
NGRMS - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Medical Administration.	
NGRMS - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Personnel and Pay Management.	
NGRMS - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between NGRMS and FoS Quality of Life/MWR Management.

Object	Type	Description	Additional Keys
NGRMS - NGRMS	System Interface	This system interface represents the requirements to exchange data between NGRMS and NGRMS.	
ORCA - SPS	System Interface	This system interface represents the requirements to exchange data between ORCA and SPS.	
PBAS - BEIS	System Interface	This system interface represents the requirements to exchange data between PBAS and BEIS.	
PBAS - DCPDS	System Interface	This system interface represents the requirements to exchange data between PBAS and DCPDS.	
PBAS - DTS	System Interface	This system interface represents the requirements to exchange data between PBAS and DTS.	
PBAS - FoS Asset Management	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Asset Management.	
PBAS - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Core Accounting System.	
PBAS - FoS Cost Management	System Interface	This system interface represents the requirements to exchange data between PBAS - FoS Cost Management.	
PBAS - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between PBAS - FoS Defense Acquisition Management.	
PBAS - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Distribution.	
PBAS - FoS ESOH	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS ESOH.	
PBAS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS External Systems.	
PBAS - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Force Management.	
PBAS - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS General Ledger Management	
PBAS - FoS Installations	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Installations.	
PBAS - FoS Manage Request	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Manage Request.	
PBAS - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Medical Administration.	
PBAS - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Personnel and Pay Management.	
PBAS - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between PBAS and FoS Quality of Life/MWR Management.	
PBAS - PBAS	System Interface	This system interface represents the requirements to exchange data between PBAS and PBAS.	
SDI - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between SDI and FoS Core Accounting System.	
SDI - FoS Enterprise System	System Interface	This system interface represents the requirements to exchange data between SDI and FoS Enterprise System	
SDI - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between SDI and FoS General Ledger Management	
SPS - EDA	System Interface	This system interface represents the requirement to exchange data between SPS and EDA.	
SPS - FBO	System Interface	This system interface represents the requirements to exchange data between SPS and FBO.	
SPS - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Core Accounting System.	
SPS - FoS Defense Acquisition Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Defense Acquisition Management.	
SPS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between SPS and FoS External Systems.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
SPS - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Force Management.	
SPS - FoS General Ledger Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS General Ledger Management.	
SPS - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Medical Administration.	
SPS - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Payment Management.	
SPS - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Personnel and Pay Management.	
SPS - FoS Travel Management	System Interface	This system interface represents the requirements to exchange data between SPS and FoS Travel Management.	
SPS - FPDS-NG	System Interface	This system interface represents the requirements to exchange data between SPS and FPDS-NG.	
SPS - SPOT	System Interface	This system interface represents the requirement to exchange data between SPS (via GEX) and SPOT.	
Treasury-CARS - FoS Fund Balance with Treasury Management	System Interface	This system interface represents the requirements to exchange data between Treasury-CARS and FoS Fund Balance with Treasury Management.	
USXPORTS - FoS External Systems	System Interface	This system interface represents the requirements to exchange data between USXPORTS and FoS External Systems.	
WAWF - CAMS-ME	System Interface	This system interface represents the requirements to exchange data between WAWF and CAMS-ME.	
WAWF - DCPDS	System Interface	This system interface represents the requirements to exchange data between WAWF and DCPDS.	
WAWF - FoS Core Accounting System	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Core Accounting System.	
WAWF - FoS Distribution	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Distribution.	
WAWF - FoS Force Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Force Management.	
WAWF - FoS IUID Registry	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS IUID Registry.	
WAWF - FoS Medical Administration	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Medical Administration.	
WAWF - FoS Payment Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Payment Management.	
WAWF - FoS Personnel and Pay Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Personnel and Pay Management.	
WAWF - FoS Quality of Life/MWR Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Quality of Life/MWR Management.	
WAWF - FoS Receivable Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Receivable Management.	
WAWF - FoS Travel Management	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Travel Management.	
WDOL - FoS Manage Sourcing	System Interface	This system interface represents the requirements to exchange data between WAWF and FoS Manage Sourcing.	
Enterprise	System Node	The DoD Enterprise system node contains systems that have common internal DoD systems as well as certain external systems.	
External	System Node	The External system node contains Non-DoD systems that interact with the Department of Defense.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
FM	System Node	The Financial Management (FM) node contains systems that provide accurate and reliable financial information in support of the Planning, Programming, Budgeting, and Execution (PPBE) process to ensure adequate financial resources for DoD mission requirements. In addition, the systems provide the conduct, output, and performance of Warfighter operations and missions - both in total and varying levels of organizational, operational, and resource detail; including ongoing, completed, or projected programs in support of Warfighter requirements.	
GSA	System Node	The General Services Administration (GSA) is an independent agency of the United States government, established in 1949 to help manage and support the basic functioning of federal agencies. The GSA supplies products and communications for U.S. government offices, provides transportation and office space to federal employees, and develops government wide cost-minimizing policies, among other management tasks. Its stated mission is to "help federal agencies better serve the public by offering, at best value, superior workplaces, expert solutions, acquisition services and management policies".	
HRM	System Node	The Human Resources Management (HRM) system node contains systems that support all personnel processes related to acquiring, training, and preparing personnel to populate Warfighter and support organizations. This includes timely and accurate access to all applicable compensation and benefits for all DoD personnel.	
MSSM	System Node	The Materiel Supply and Service Management (MSSM) system node contains systems that provide readiness of non-deployed and deployed Warfighters in support of Operational Tempo (OPTEMPO). These systems are associated with requesting, acquiring, sourcing, storing, transporting, receiving and accepting, monitoring payment, asset accountability, and disposing of supplies.	
RPILM	System Node	The Real Property and Installation Lifecycle Management (RPILM) node contains systems that provide support of installations and facilities for military forces, storage and maintenance of military equipment, training, and deployment. The systems also support accountability of real property assets and resources, disposal of property, and environmental security of assets including damage and remediation.	
WSLM	System Node	The Weapon System Lifecycle Management (WSLM) node contains systems that represents full lifecycle management, cradle-to-grave, of Defense acquisition of weapon systems and automated information systems to include requirements, technology, development, production, and sustainment.	
Account Classification Reference Number	Term	Account Classification Reference Number means any combination of a two position alpha/numeric code used as a method of relating the accounting classification citation to detailed line item information contained in the schedule.	
Accounting	Term	Accounting is the process of recording financial events and ensuring fiscal integrity as required by law.	
Accounting Classification	Term	An Accounting Classification is a subset of an agency's financial information classification.	
Accredited Standards Committee	Term	The Accredited Standards Committee is an organization, accredited by ANSI, for the development of ANS.	
Accrual	Term	An Accrual is the recognition of revenue when earned or expenses when incurred, regardless of when cash is received or disbursed.	
Acquisition Category	Term	The United States Department of Defense divides future acquisition programs into four acquisition categories: ACAT I, ACAT II, ACAT III, or ACAT IA. The differences between these categories depend on their size and programatic differences.	
Acquisition Program Baseline	Term	Each program's Acquisition Program Baseline (APB) is developed and updated by the program manager and will govern the activity by prescribing the cost, schedule and performance constraints in the phase succeeding the milestone for which it was developed. The APB captures the user capability needs, including key performance parameters, which are copied verbatim from the capability development document. (CJCSI 3170.01E).	
Acquisition Visibility	Term	Acquisition Visibility (AV) is defined as achieving timely access to accurate, authoritative, and reliable information supporting acquisition oversight, accountability, and decision-making throughout the Department for effective and efficient delivery of Warfighter capabilities.	
Acronym	Term	An Acronym is the short form of a phrase used in the BEA or ETP.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Active Component	Term	That portion of the armed forces as identified in annual authorization acts as "active forces," and in section 115 of Title 10 USC as those Active Duty personnel paid from funds appropriated for Active Duty personnel. (DoDI 1215.06, Para. E2.1)	
Active Duty	Term	Full-time duty in the active military service of the United States. This includes members of the Reserve Component serving on active duty or full-time training duty, but does not include full-time National Guard duty. Also called AD. See also active duty for training; inactive duty training.	
Active Duty for Training	Term	A tour of active duty which is used for training members of the Reserve Components to provide trained units and qualified persons to fill the needs of the Armed Forces in time of war or national emergency and such other times as the national security requires. The member is under orders that provide for return to non-active status when the period of active duty for training is completed. This includes annual training, special tours of active duty for training, school tours, and the initial duty for training performed by nonprior service enlistees. Also called ADT.	
Active Guard/Reserve	Term	Active Guard and Reserve are members of a Reserve component on active duty under section 12301(d) of Reference (d), 14 U.S.C. (Reference (g)), or full-time National Guard duty under sections 328 and 502(f) of reference (e) for a period of 180 consecutive days or more to perform duties as described in sections 101, 10211, and 12310 of Reference (d). (DoDI 1205.18)	
Activities	Term	Activities are a DoDAF Meta-Model Data Group used to capture architecture content. Activities are work that transforms (changes) inputs into outputs or changes their state.	
Activity	Term	Work, not specific to a single organization, weapon system or individual that transforms inputs (Resources) into outputs (Resources) or changes their state.	
Advance Medical Directive	Term	A written document which explains one's wishes about medical treatment if one becomes incompetent or unable to communicate, or which governs the withholding or withdrawal of life-sustaining treatment from the maker of the document in the event of an incurable or irreversible condition that will cause death within a relatively short period of time, and when the maker is no longer able/competent to make decisions regarding his/her medical treatment. (DODD 1350.4)	
Advance Payments	Term	An Advance Payment is an advance of money by the Government to a prime contractor before, in anticipation of, and for the purpose of complete performance under one or more contracts.	
Agency	Term	An Agency is any department, commission, authority, administration, board, or other independent establishment in the Executive branch of the Government.	
Agency Operations	Term	Agency Operations (Agency Ops) provides centralized support across the Business Transformation Agency. This support enables the directorates to complete their individual missions, contributing to the overall transformation mission of the Agency.	
All Viewpoint	Term	Some overarching aspects of an Architectural Description relate to all the views. The All Viewpoint (AV) models provide information pertinent to the entire Architectural Description, such as the scope and context of the Architectural Description. The scope includes the subject area and time frame for the Architectural Description. The setting in which the Architectural Description exists comprises the interrelated conditions that compose the context for the Architectural Description. These conditions include doctrine; tactics, techniques, and procedures; relevant goals and vision statements; concepts of operations (CONOPS); scenarios; and environmental conditions.	
American National Standard	Term	American National Standard is a designation conferred by ANSI upon standards submitted by ANSI-accredited Standards Development Organizations.	
American National Standards Institute	Term	The American National Standards Institute is an organization that administers and coordinates the U.S. voluntary standardization and conformity assessment system.	
Architecture-guided	Term	The architecture provides a framework against which new capabilities are identified and within which existing capabilities are arranged. It serves as a critical benchmark against which the DBSMC and IRBs assess and certify any proposed initiatives and expenditures.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Attribute	Term	An Attribute is a property or characteristic that is common to some or all of the instances of an Entity. Attributes that identify Entities are key Attributes. Attributes that describe an Entity are non-key Attributes. Attributes are associated to one and only one Entity and represent the normalized view of Data Elements within DIV-2 Entities.	
Authentication	Term	In the context of an Information Exchange Integrity attribute, the requirement for proof of identity/ authorization.	
Authorized	Term	An Authorization is the giving of permission before an act.	
Availability	Term	Timely, reliable access to data and information services for authorized users; an Information Exchange characteristic.	
Basic Allowance for Housing	Term	The Basic Allowance for Housing is an allowance to offset the cost of housing when you do not receive government-provided housing. Your BAH depends upon your location, pay grade and whether you have dependents. BAH rates are set by surveying the cost of rental properties in each geographic location. The rates are established such that members in each pay grade, independent of location, pay approximately the same out-of-pocket costs. Therefore, BAH rates in high-cost areas will be much greater than those in low-cost areas.	
Basic Format	Term	The format of a date and time representation or date and time format representation comprising the minimum number of time elements necessary for the accuracy required.	
BEA Development Methodology	Term	The BEA Development Methodology (BDM) document describes the overall approach and process for developing the Business Enterprise Architecture (BEA), one of the primary tools used to drive transformation within the Department of Defense (DoD) Business Mission Area (BMA). The BDM reflects the current methodology for developing the BEA, incorporating lessons learned across the architecture development life-cycle and identifying best practices from the successful development of previous releases of the BEA.	
BEA Improvement Proposal	Term	A BEA Improvement Proposal (BIP) identifies specific gaps or business capability improvements to be addressed in a future release of the BEA. These gaps or business capability improvements are documented in the form of a BIP. BIPs are generated and submitted from multiple sources including BEA stakeholders and changes to LRPs.	
BPM Event	Term	An Event is something that "happens" during the course of a business process. These events affect the flow of the process and usually have a cause (trigger) or an impact (result). Events are represented as circles with open centers to allow internal markers to differentiate different triggers or results. There are three types of Events, based on when they affect the flow: Start, Intermediate, and End.	
BPM Process	Term	A Process is used on an OV-6c to denote a set of activities performed within a business organization, where an activity (not to be confused with the OV-5 usage for "operational activity") is a generic term for work that a business organization performs. A BPM Process is depicted as a graph of Flow Objects, which are a set of other process steps and the controls that sequence them.	
BR Source Type	Term	A Business Rule Source Type indicates the derivation of the Business Rule; that is, compliance requirement, derived requirement, or process.	
Business Capability	Term	A Business Capability is the ability to execute a specific course of action. It can be a single business enabler or a combination of business enablers (e.g., business processes, policies, people, tools, or systems information) that assist an organization in delivering value to its customer.	
Business Enterprise Architecture	Term	A Business Enterprise Architecture is a blueprint to guide and constrain investments in DoD organizations, operations, and systems as they relate to or impact business operations. It will provide the basis for the planning, development, and implementation of business management systems that comply with Federal mandates and requirements, and will produce accurate, reliable, timely, and compliant information for DoD staff.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Business Enterprise Priority	Term	A Business Enterprise Priority is an area where transformed business operations will provide improved warfighter support, reduced costs, and better regulatory compliance. A BEP is formulated based on requirements identified by the warfighter, the Components, and the BTA. Initial priorities are; Acquisition Visibility, Common Supplier Engagement, Financial Visibility, Materiel Visibility, Personnel Visibility, and Real Property Accountability.	
Business Mission Area	Term	The Global Information Grid Architecture identifies four interdependent entities, or Mission Areas, within the DoD Enterprise Architecture. The Mission Areas are Warfighting (WMA), Business (BMA), DoD portion of Intelligence (DIMIA), and Enterprise Information Environment (EIE). The role of the BMA is to deliver products and services required by the WMA to accomplish assigned objectives.	
Business Process Reengineering	Term	Business Process Reengineering (BPR) is basically the fundamental rethinking and radical re-design made to an organizations existing resources. It is more than just business improving. It is an approach for redesigning the way work is done to better support the mission of the organization and reduce costs.	
Business Rule	Term	Listed in the OV-6a, a Business Rule is a "constraint on an enterprise, a mission, operation, business, or architecture". A business rule describes what the business must or cannot do. A business rule is "an atomic piece of business logic, specified declaratively, whose intent is to control, guide, or enhance behavior.	
Business System	Term	A Business System is an information system, other than a national security system, operated by, for, or on behalf of the Department of Defense, including financial systems, mixed systems, financial data feeder systems, and information technology and information assurance infrastructure, used to support business activities. These business activities include acquisition, financial management, logistics, strategic planning and budgeting, installations and environment, and human resources management. (FY05 NDAA) In addition, the DODD 8500.1 further defines a system as a "set of information resources organized for the collection, storage, processing, maintenance, use, sharing, dissemination, disposition, display, or transmission of information." DCMO business systems include: Federal Systems used or supported by DoD; Component (multi-Component) standard systems; major command systems; and data stores. DCMO business systems do not include: office automation, data management, information assurance, and other similar types of enabling software.	
Business Systems Response Office	Term	To address COCOMs' near-term emergent requirements, a Business Systems Response Office (BSRO) has been recently established within USD (AT&L) to assist in identifying quick win and quick turn-around business solutions. As an advocate for the warfighter, the BSRO coordinates on Department-level issues with the OSD staff, USTRANSCOM, COCOMs, Services, and DLA to resolve near-term business system, process, procedures and policy concerns that are encumbering force transformation.	
Business Transformation	Term	Business Transformation is a key executive management initiative to align the technology initiatives of an organization more closely with its business strategy and vision. Business transformation is achieved through efforts from both business and IT areas.	
Business Transformation Agency	Term	The Deputy Secretary of Defense directed the establishment of the Defense Business Transformation Agency (BTA) in a memorandum effective October 7, 2005. The mission of this Agency is to transform business operations to achieve improved warfighter support while enabling financial accountability across the Department of Defense.  The BTA was abolished effective October 1, 2011 and the BEA/Enterprise Transition Plan related responsibilities of the agency were transferred to the DCMO.	
Capabilities Production Document	Term	A document that addresses the production elements specific to a single increment of an acquisition program. The CPD must be validated and approved before a Milestone C decision review. The refinement of performance attributes and Key Performance Parameters (KPPs) is the most significant difference between the Capability Development Document (CDD) and CPD. The CPD format is contained in DoD 5000.02 and CJCSI 3170.01G.	
Capability	Term	Capability is a DoDAF Meta-Model Data Group used to capture architecture content on models of what is needed to perform a set of activities under certain conditions and standards to achieve desired effects and the way in which those needs are satisfied.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Capability Dependencies	Term	The dependencies between planned capabilities and the definition of logical groupings of capabilities.	
Capability Development Document	Term	A document that captures the information necessary to develop a proposed program(s), normally using an evolutionary acquisition strategy. The CDD outlines an affordable increment of militarily useful, logistically supportable, and technically mature capability. The CDD supports a Milestone B decision review. The CDD format is contained in Manual for the Operation of the Joint Capabilities Integration and Development System.	
Capability Phasing	Term	The planned achievement of capability at different points in time or during specific periods of time. The CV-3 shows the capability phasing in terms of the activities, conditions, desired effects, rules complied with, resource consumption and production, and measures, without regard to the performer and location solutions.	
Capability Target	Term	A major portion of a capability such as the development and deployment of a system that is part of the implementation of a Capability. "Target" implies that metrics can be identified and taken to assess the progress towards achieving the target.	
Capability Taxonomy	Term	A hierarchy of capabilities which specifies all the capabilities that are referenced throughout one or more Architectural Descriptions.	
Capability to Operational Activities Mapping	Term	A mapping between the capabilities required and the operational activities that those capabilities support.	
Capability to Organizational Development Mapping	Term	The fulfillment of capability requirements shows the planned capability deployment and interconnection for a particular Capability Phase. The CV-5 shows the planned solution for the phase in terms of performers and locations and their associated concepts.	
Capability to Services Mapping	Term	A mapping between the capabilities and the services that these capabilities enable.	
Capability Viewpoint	Term	The Capability Viewpoint (CV) captures the enterprise goals associated with the overall vision for executing a specified course of action, or the ability to achieve a desired effect under specific standards and conditions through combinations of means and ways to perform a set of tasks. It provides a strategic context for the capabilities described in an Architectural Description, and an accompanying high-level scope, more general than the scenario-based scope defined in an operational concept diagram. The models are highlevel and describe capabilities using terminology, which is easily understood by decision makers and used for communicating a strategic vision regarding capability evolution.	
Capability-driven	Term	Transformation is planned and implemented around the concept of a capability.	
Cargo	Term	Cargo is materiel or goods being transported or waiting to be transported.	
Certification Authority	Term	<p>The designated PSA with responsibility for review, approval, and oversight of the planning, design, acquisition, deployment, operation, maintenance, and modernization of Defense business systems. Primary authorities for certification of the system are:</p> <ul style="list-style-type: none"> <li>USD (P&amp;R) Under Secretary of Defense (Personnel &amp; Readiness)</li> <li>USD (AT&amp;L) USD (Acquisition, Technology &amp; Logistics)</li> <li>USD (C) (Comptroller)</li> <li>ASD (NII) Assistant Secretary of Defense (Networks and Information Integration )</li> </ul> <p>For example, the USD (AT&amp;L) is responsible and accountable for any Defense business system that supports defense acquisition activities, logistics activities, or installations and environment activities of DoD. Others include the USD(C) for any Defense business system that supports financial management activities or strategic planning and budgeting activities; the USD (P&amp;R) for any Defense business system that supports human resources management activities; and the Deputy Secretary of Defense or an Under Secretary of Defense as designated by the Secretary of Defense, for any Defense business system that supports any activity of the DoD not covered by the established four CAs.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Chairman of the Joint Chief of Staff Instruction	Term	A replacement document for all types of correspondence containing Chairman of the Joint Chiefs of Staff policy and guidance that does not involve the employment of forces. An instruction is of indefinite duration and is applicable to external agencies, or both the Joint Staff and external agencies. It remains in effect until superseded, rescinded, or otherwise canceled. Chairman of the Joint Chiefs of Staff instructions, unlike joint publications, will not contain joint doctrine. Terminology used in these publications will be consistent with JP 1-02.	
Chemical Weapons Convention Implementation Act	Term	Executive Order 13128--Implementation of the Chemical Weapons Convention and the Chemical Weapons Convention Implementation Act.	
Classification	Term	A Classification is an arrangement or grouping.	
Classified	Term	In the context of an Information Exchange Confidentiality characteristic, the confidentiality protection required under the terms of Executive Order (EO) 12958.	
Commercial Invoice	Term	A stand-alone payment request that is used to invoice the DoD for supplies or services.	
Commercial Invoice 2N1	Term	A stand-alone payment request that is used to invoice the DoD for non cost reimbursable service contracts.	
Commercial Item Financing Request	Term	A form of contract financing for commercial items. This request typically refers to any item, other than real property, that is customarily used by the general public and has been sold (or offered to be), leased, or licensed to the general public. There are two types of Commercial Financing; namely, Commercial Advance Payments, which take place before any work is done on the contract, and Commercial Interim Payments, which involve financing payments after some work has been accomplished.	
Common Data Structure	Term	All financial and programmatic information used by the budgetary, cost and financial processes.	
Common Supplier Engagement	Term	Common Supplier Engagement (CSE) is the alignment and integration of the policies, processes, data, technology and people to provide a consistent experience for suppliers and DoD stakeholders to ensure reliable and accurate delivery of acceptable goods and services to support the warfighter.	
Compliance Requirement	Term	A Compliance Requirement is an architecture constraint derived from a public law, regulation, and/or policy (LRP) applicable to a particular Process, Gateway, Data Object, or Data Element. BEA Compliance Requirements are maintained in the LRP Repository and/or as an OV-6c Object.	
Component	Term	DoD Components (for DCMO purposes) are defined as the Military Services, DoD Agencies, Defense Field Activities, Joint Staff, and Combatant Commands.	
Component Acquisition Executive	Term	Component Acquisition Executives are Secretaries of the Military Departments or Heads of Agencies with the power of redelegation. In the Military Departments, the officials delegated as CAEs (also called Service Acquisition Executives (SAEs)) are respectively, the Assistant Secretary of the Army (Acquisition, Logistics, and Technology), the Assistant Secretary of the Navy (Research, Development and Acquisition), and the Assistant Secretary of the Air Force (Acquisition). The CAEs are responsible for all acquisition functions within their Component. This includes both the SAEs for the Military Departments and acquisition executives in other DoD Components, such as the U.S. Special Operations Command (USSOCOM) and Defense Logistics Agency (DLA), who also have acquisition management responsibilities.	
Component Priority	Term	A Component Priority is an area where transformed business operations will provide a Component with improved warfighter support, reduced costs, and better regulatory compliance. These priorities are complementary to Business Enterprise Priorities and address the assigned mission needs of the particular Component.	
Component-Level	Term	Component-Level, within the context of tiered accountability, refers to the programs and solutions managed by the Component.	
Comprehensive Recovery Plan	Term	An individualized plan that captures the RSMs Needs, Goals, and Actions through the phases of recovery with appropriate contact information to complete the actions and achieve the goals.	
Conceptual Data Model	Term	The required high-level data concepts and their relationships.	
Confidentiality	Term	Assurance that information is not disclosed to unauthorized entities or processes; an Information Exchange characteristic.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Confidentiality Level	Term	An expression indicating whether a system is designed to handle Classified, Sensitive, or Public information.	
Configuration Control Procedure	Term	The Configuration Control Procedure (CCP) describes the change control processes that have been implemented to request and manage changes to the BEA through the use of the EE) architecture and configuration management tool, SA architecture tool, and the DKO web portal.	
Constraints	Term	Constraints are actions, occurrences, or factors outside the scope or control of the system or initiative that may adversely affect the proposed solution.	
Continuing Resolution Act	Term	A Continuing Resolution Act is a joint resolution that provides continuing appropriations for a fiscal year. CRAs (CRs) are enacted when Congress has not yet passed new appropriations bills and a program's appropriations are about to or have expired, or when the President has vetoed congressionally passed appropriations bills.	
Core Business Mission	Term	A Core Business Mission is a defined area of responsibility with functions and processes that provides end-to-end support to the warfighter. The five Core Business Missions are; Human Resources Management (HRM), Weapon System Lifecycle Management (WSLM), Real Property & Installation Lifecycle Management (RPILM), Materiel Supply & Service Management (MS&SM), and Financial Management (FM).	
Cost of Living Allowance	Term	Stipends or extra pay provided to employees who are being temporarily relocated may also be called cost-of-living adjustments or cost-of-living allowances. Such adjustments are intended to offset changes in welfare due to geographic differences in the cost of living. Such adjustments might more accurately be described as a per diem allowance or tied to a specific item, as with housing allowances. Employees who are being permanently relocated are less likely to receive such allowances, but may receive a base salary adjustment to reflect local market conditions.	
Critical Technology Element	Term	New or novel platform or system that depends on specific technologies to meet system operational threshold requirements in development, production, and operation.	
Cross-Service Provider	Term	A Cross-Service Provider is the Military Service or element thereof that performs a specific Human Resources function in support of a person or entity of another Military Service.	
Cross-Service Support	Term	Cross-Service Support is the required set of operational controls implemented by Human Resources Management (HRM) to comply with Cross-Service Support legal, regulatory, policy and performance requirements. The controls take the form of terms and conditions established by the OUSD P&R and consist of levels of HRM Cross-Service Support. One level is the ability to provide personnel and pay management support to all military members assigned to a unit, even when the commander belongs to a different military service than one or more of the members. Another level is the ability to provide specified HRM functions to service members not assigned to a unit but may be in an area where support from their own unit is not readily or efficiently available. Cross-Service Support increases the effectiveness of combined operations by reducing a service member's administrative time away from duty.	
Data	Term	Representation of information in a formalized manner suitable for communication, interpretation, or processing by humans or by automatic means. Examples could be whole models, packages, entities, attributes, classes, domain values, enumeration values, records, tables, rows, columns, and fields.	
Data and Information Viewpoint	Term	The Data and Information Viewpoint (DIV) captures the business information requirements and structural business process rules for the Architectural Description. It describes the information that is associated with the information exchanges in the Architectural Description, such as attributes, characteristics, and inter-relationships. Data is described fully in Volume 2. Where appropriate, the data captured in the models of this Viewpoint needs to be considered by COIs.	
Data Domain	Term	A Data Domain represents a named and defined set of permitted values from which one or more Data Elements draw their values. A Data Domain is associated with Attributes through Data Elements. There are two kinds of data domains; Specific Domain and General Domain.	
Data Element	Term	A Data Element is the smallest unit of stored data, which means that it cannot be broken down further, or that it makes no sense to break it down further. The data element, however, can inherit properties from a data domain. Data Elements are unique across the BMA and are associated with one or more Attributes within the BEA Entities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Data Object	Term	A Data Object contains additional information on an OV-6c, which does not have any direct effect on the Sequence Flow or Message Flow but does show the data that may be passed, created, or consumed by the BPM Process. Data Objects are a mechanism to show how data is required or produced by process steps. A Data Object is considered an artifact because it does not have a direct effect on the Sequence or Message flow of the Process.	
Data Synonym	Term	Data Synonyms are optional BEA-defined constructs used to describe Data in alternate terms familiar to the business user. Data Synonyms exist in the context of a particular Information Exchange and must be associated to one or more attributes mapped to the same IE.	
Defense Acquisition System Processes or Activities	Term	The management process by which the Department of Defense provides effective, affordable, and timely systems to the users. (DoDD 5000.1)	
Defense Business Systems Acquisition Executive	Term	The Defense Business Systems Acquisition Executive (DBSAE), under the direction of the DBSMC, will drive the implementation of DoD Business Enterprise Priority systems and initiatives in support of DoD business transformation. The DBSAE will serve as the Component Acquisition Executive for DoD-wide business systems and will work with the Components to develop overarching business, acquisition, and contracting strategies that promote interoperability, risk identification and risk management, meaningful performance metrics, and lowest total operating cost. The DBSAE is responsible for managing the cost, schedule, and performance of enterprise-level programs and initiatives.	
Defense Business Systems Management Committee	Term	Chaired by the Deputy Secretary of Defense, it is the highest authority providing top level governance to coordinate defense business system modernization and to link improvements in business capabilities to the Warfighter. The DBSMC comprises the Deputy Secretary of Defense, the Under Secretaries, the Chairman of the Joint Chiefs of Staff (CJCS), the Service Secretaries, the Combatant Commanders of U.S. TRANSCOM and Joint Forces Command, the Assistant Secretary of Defense for Networks and Information Integration/DoD Chief Information Officer (NII/CIO), and the Director of Program Analysis and Evaluation (PA&E) in an advisory role.	
Defense Enterprise Integration Executive	Term	The Defense Enterprise Integration Executive is the leader of the Enterprise Integration organization in the Office of the Deputy Chief Management Officer (ODCMO).	
Defense Financial Management Improvement Rules	Term	System and operational rules which substantially improve the timeliness, reliability, and accuracy of financial information across DoD and contribute towards the Department's objectives of achieving audit readiness and delivering interoperable financial management systems.	
Defense Health Program	Term	The process for financial management oversight of the MHS funding. (DoD 6015.1-M)	
Department of Defense	Term	The Department of Defense is the United States' oldest and largest government agency. It is rooted back to pre-Revolutionary times; since then the Department of Defense has grown and evolved. The Department is not only in charge of the military, but it also employs a civilian force of thousands. Over 1.4 million men and women are on active duty, 718,000 personnel are civilian and 1.1 million serve in the National Guard and Reserve forces. The Defense Department manages an inventory of installations and facilities. The Department's physical plant consists of more than several hundred thousand individual buildings and structures located at more than 5,000 different locations or sites.	
Department of Defense Architecture Framework	Term	The Department of Defense (DoD) Architecture Framework (DoDAF), Version 1.0, defines a common approach for DoD architecture description development, presentation, and integration for both Warfighting operations and business operations and processes. The Framework is intended to ensure that architecture descriptions can be compared and related across organizational boundaries, including Joint and multinational boundaries" (from the Executive Summary of the DoDAF, version 1.)	
Department of Defense Information Technology Portfolio Repository	Term	The DoD IT Portfolio Repository (DITPR) is a database directly updated by the Components and contains key information that catalogues the DoD business systems.	
Direct Cite	Term	A Direct Cite is a citation of customer funds as the financing source on documents leaving the Department of Defense system.	
Direct Cost Voucher	Term	A form of payment request that is used when the vendor is authorized to bill for labor and materials, and is routed directly to the entitlement system without approval.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Direct Loan	Term	A disbursement of funds by the government to a nonfederal borrower under a contract requiring repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by a nonfederal lender. It also includes the sale of a government asset on credit terms of more than 90 days duration.	
Disbursement	Term	A Disbursement is a prepayment for products or services received, or an advance to others.	
DoD Activity	Term	A Department of Defense (DoD) Activity is a ship, camp, post, station, base, activity, unit, installation, or facility operating within the DoD.	
DoD Business Transformation Approach	Term	The DoD Business Transformation Approach is a five-step process that guides planning for the To-Be state and occurs concurrently at the enterprise and Component levels. The five steps are: 1: Set Priorities 2: Analyze and Approve Solution 3: Build/Refine Required Architecture and Transition Plans 4: Define and Fund Programs 5: Execute and Evaluate Each step is revisited and improved as necessary during the process.	
Domain Permitted Value	Term	Domain Permitted Values are the entire set of the possible values with their definitions for a Specific Domain.	
E2E Business Flow	Term	An End-to-End (E2E) Business Flow (aka value chain) represents a set of integrated business processes that are aligned with the native capabilities of ERPs to fulfill a need identified by the organization. By its nature an E2E Business Flow is cross functional, cutting across organizational boundaries from an enterprise perspective.	
Enterprise Elements	Term	The Enterprise Elements (EE) is a configurable database-like product that is designed to allow the rapid construction of complex enterprise-ready systems that solve enterprise-class challenges, such as Enterprise Architecture, Systems Engineering Data Management, Acquisition Process Management, Knowledge Management and many others.	
Enterprise Information Environment	Term	As part of the DoD Global Information Grid (GIG), the Enterprise Information Environment (EIE) is one of the four Mission Areas and is overseen by the Office of the Assistant Secretary of Defense for Network and Information Integration (ASD (NII)). The EIE includes any system, equipment, software, or service that meets one or more of the following criteria; Transmits information to, receives information from, routes information among, or interchanges information among other equipment, software, and services, Provides retention, organization, discovery, visualization, information assurance, disposition of data, information, or knowledge received from or transmitted to other equipment, software, and services, Processes data or information for use by other equipment, software, or services.	
Enterprise Integration	Term	This organization is led by the Defense Enterprise Integration Executive (DEIE), and is responsible for supporting the integration of enterprise-level business capabilities such as Enterprise Resource Planning (ERP) systems, and how they should be implemented across complex organizational boundaries such as the Department of Defense (DoD) to support the joint warfighter. Specifically, this office will ensure that best practices are leveraged across DoD ERP implementation initiatives, will work to ensure rapid adoption of DoD-wide information and process standards as defined in the Business Enterprise Architecture (BEA), and will work to eliminate any burdensome processes that hinder successful, rapid deployment of ERP capabilities within the components. Additionally, EI will work to promote the adoption of best practices for the implementation of ERP systems across the DoD Enterprise and the Services and Agencies, via collaborative engagement and participation in the acquisition process. Finally, EI will create operational awareness within the OSD community of the tactical impact of information, process, and data standards on service transformation efforts, and act as a conduit of communication and awareness regarding tactical deployment of DoD Business Enterprise Standards as defined in the BEA.	
Enterprise Planning and Investment	Term	Enterprise Planning and Investment (EP&I) is a unit of the DCMO which improves business operations by strengthening the synergies of the BEA, ETP and IM, which comprise the enterprise-wide framework that enables informed decision making and are built on the foundations of tiered accountability and federation.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Enterprise Sub-Service	Term	An Enterprise Sub-Service is used in the SV-TV Bridge to describe the intersection between enterprise systems and Technical Services, and defines standard attributes.	
Enterprise System	Term	An Enterprise System is a system that has been identified as the standard across the DoD.	
Enterprise Transition Plan	Term	The Enterprise Transition Plan is designed to guide and track the business transformation of the DoD Business Mission Area. Includes activities associated with developing the plan and framework for moving from the "As Is" to the "To Be" using strategic plans, Business Capabilities, and architecture information. Key elements include the objectives, schedules, funding, and migration information for the systems and initiatives supporting DoD's Business Enterprise Priorities.	
Enterprise-Level	Term	Enterprise-Level, within the context of tiered accountability, refers to programs/solutions managed by OSD.	
Entity	Term	An Entity is the representation of a set of real or abstract things (people, objects, places, events, ideas, combination of things, etc.) that are recognized as the same type because they share the same characteristics and can participate in the same relationships.	
Event-Trace Description	Term	One of three models used to describe activity (operational activity). It traces actions in a scenario or sequence of events.	
Evidence	Term	Evidence is information that permits an auditor to reach conclusions through reasoning.	
Expense	Term	An Expense is an outflow or other consumption of assets and/or incurrence of liabilities, where the benefits from which do not extend beyond the present operating period.	
Extended Format	Term	The extension of the ISO 8601 basic format of a date and time representation that includes additional separators.	
Faces	Term	A term utilized in DoD assignment administrative actions that refers to individuals under consideration for assignment against a position (also known as a billet or space).	
Family of Systems	Term	A set or arrangement of independent systems that can be arranged or interconnected in various ways to provide different capabilities.	
Fast-Pay Invoice	Term	A method for paying invoices within 15 days of receipt of the invoice with a receiving report from the vendor to follow as soon as goods are received. All copies of the invoice must be marked as "Fast Pay", and, if the contract requires a receiving report, receiving report information is attached to the invoice and marked "No Receiving Report Prepared".	
FEA BRM	Term	The Federal Enterprise Architecture (FEA) Business Reference Model (BRM) is a function-driven framework for describing the business operations of the Federal Government independent of the agencies that perform them. The BEA maps leaf-level Operational Activities to FEA BRM Sub-functions.	
Federal Activities Inventory Reform	Term	The Federal Activities Inventory Reform (FAIR) Act of 1998 (P.L. 105-270), requires Federal agencies to prepare and submit to the Office of Management and Budget (OMB), inventories of commercial activities performed by Federal employees. OMB Circular A-76, Performance of Commercial Activities, further requires agencies to submit inventories of their inherently governmental activities to OMB.	
Federal Financial Management Improvement Act	Term	The Federal Financial Management Improvement Act of 1996 (FFMIA) is a public law that requires each Federal agency to implement and maintain financial management systems that comply with applicable accounting standards and systems requirements.	
Federal Insurance Contributions Act	Term	The Federal Insurance Contributions Act tax is a United States payroll (or employment) tax imposed by the federal government on both employees and employers to fund Social Security and Medicare - federal programs that provide benefits for retirees, the disabled, and children of deceased workers. Social Security benefits include old-age, survivors, and disability insurance; Medicare provides hospital insurance benefits. The amount that one pays in payroll taxes throughout one's working career is directly tied to the social security benefits annuity that one receives as a retiree. This has led some to claim that the payroll tax is not a tax because its collection is directly tied to a benefit.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Federated Architecture	Term	Federated Architecture is an approach for enterprise architecture development, composed of a set of coherent but distinct entity architectures, with shared responsibilities across members of the federation. The members of the federation participate to produce an interoperable, effectively integrated enterprise architecture. The federation sets the overarching rules of the federated architecture, defining the policies, practices, and legislation to be followed as well as the interfederate procedures and processes, data interchanges, and interface standards to be observed by all members. Each federation member conforms to the Enterprise view and overarching rules of the federation in developing its architecture. Internal to themselves, each focuses on their separate mission and the architecture that supports that mission.	
Final Cost Voucher	Term	A form of payment request that is used when the vendor is authorized to bill for labor and materials, and must be approved by the receiving Service or Agency prior to entitlement.	
Final Payment	Term	A Final Payment is the last payment made to the contractor after completion of all contractor obligations under the terms of the contract.	
Financial Visibility	Term	Financial Visibility (FV) means having immediate access to accurate and reliable financial information (planning, programming, budgeting, accounting, and cost information) in support of financial accountability and efficient and effective decision-making throughout the Department in support of the missions of the warfighter.	
Force Structure	Term	Force Structure is position information depicted within the organizational structure, and related subdivisions of the Total Force.	
Force Structure Update Information	Term	Force Structure Update Information is the updated position information depicted within the organizational structure, and related subdivisions of the Total Force.	
Foreign Key	Term	A Foreign Key is an Attribute of an OV-7 Entity that is a primary key component in a related Entity.	
Frocking	Term	Frocking is the administrative authority from the Secretary of the Military Department concerned granting members selected for promotion and, if required, confirmed by the U.S. Senate, but not yet promoted, the right to wear the insignia and uniform and assume the title of the next higher grade.	
Full Deployment Decision Review	Term	A review conducted at the conclusion of IOC (for business systems) to ascertain readiness and to authorize deployment. FDDR is the business systems' equivalent to the DoD Acquisition Full Rate Production Decision Review (FRPDR) milestone.	
Full Operational Capability	Term	Full Operational Capability is defined in JCS Pub 1-02 as "the full capability to employ effectively a weapon, item of equipment or system of approved specific characteristics, and which is manned and operated by an adequately trained, equipped and supported military force or unit".	
Full-Time Support	Term	Members of the Reserve components or AC, NDST, and CIV personnel, assigned to organize; administer; instruct; recruit and train; maintain supplies, equipment, and aircraft; and perform other functions required on a daily basis in the execution of operational missions and readiness preparation as authorized in title 5, title 10, and title 32 (References (f), (d), and (e), respectively). Collectively, FTS personnel consist of five categories that are AGR, MTs, AC personnel, NDSTs, and CIV employees. (DoDI 1205.18)	
Gateway	Term	Used on an OV-6c, a Gateway flow object controls the divergence and convergence of multiple Sequence Flows.	
Geospatial Feature	Term	A Geospatial Feature is an abstraction of a real world phenomenon that physically places the phenomenon via an implicit or explicit reference to a specific location relative to the Earth.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Global Information Grid	Term	The Global Information Grid is "the globally interconnected, end-to-end set of information capabilities, associated processes, and personnel for collecting, processing, storing, disseminating and managing information on demand to warfighters, policy makers, and support personnel. The GIG includes all owned and leased communications and computing systems and services, software (including applications), data, security services, and other associated services necessary to achieve Information Superiority. It also includes National Security Systems as defined in section 5142 of the Clinger-Cohen Act of 1996 (reference (b)). The GIG supports all Department of Defense, National Security, and related Intelligence Community missions and functions (strategic, operational, tactical, and business), in war and in peace. The GIG provides capabilities from all operating locations (bases, posts, camps, stations, facilities, mobile platforms, and deployed sites). The GIG provides interfaces to coalition, allied, and non-DoD users and systems." (Source: DODD 8100.1).	
Goal	Term	Goals are simply a clearer statement of the visions, specifying the accomplishments to be achieved if the vision is to become real." (Source: Strategic Planning in Nonprofit or For-Profit Organizations, by Carter McNamara, MBA, PhD).	
Goals	Term	Goals are a DoDAF Meta-Model Data Group used to capture architecture content on how goals, visions, objectives, and effects relate and bear on architectures.	
Governance	Term	Governance is "The process through which organizations make strategic decisions, determine whom they involve and demonstrate accountability for the results of their actions." (Source: Army Enterprise Integration Oversight Office - Reference Center).	
Grant	Term	A contractual relationship between a Federal awarding agency and a non-Federal entity (the grantee), in which the awarding agency agrees to transfer money or something of value to the grantee. The grantee agrees to use such resources in carrying out a public purpose of support or stimulation authorized by law. Neither party envisions substantial involvement by the awarding agency in carrying out the grant.	
Group	Term	A grouping of activities that does not affect the Sequence Flow. It can be used for documentation or analysis purposes. Groups may also be used to identify the activities of a distributed transaction that is shown across Pools.	
Higher Authority	Term	A level in the federal government command hierarchy higher than the level where an action is being executed.	
High-Level Operational Concept Graphic	Term	The high-level graphical/textual description of the operational concept.	
Human Immunodeficiency Virus	Term	The virus(es) associated with the Acquired Immune Deficiency Syndrome (commonly referred to as "AIDS"). (DoDI 6485.01)	
Human Resources Entitlements	Term	Human Resources Entitlements are the legal obligation on the federal government to provide the means for a person to receive items of pay, allowance, and/or benefits.	
Human Resources Management	Term	The Human Resources Management (HRM) of the Department of Defense (DoD) is a DoD Core Business Mission (CBM). HRM encompasses the complete life cycle of human resources functions and spans the operational spectrum of mobilized/demobilized, combat/combat support, benefits and morale support. HRM encompasses all activities that support DoD personnel and family members, throughout their careers and beyond, and that enable effective management of DoD personnel assets. It also includes providing trained, healthy and ready personnel to combat and combat support organizations and ensuring timely and accurate access to all applicable compensation and benefits for all DoD personnel. The objective of the HRM CBM is to provide accurate human resources information: numbers, competencies (occupations, skills, education and training), reception accounting, individual readiness, patient accountability and status reporting, individuals' unit and location, and assigned duty within organizations. This mission includes ensuring timely and accurate compensation and benefits for DoD personnel and their families and ensuring that Combatant Commanders have access to the timely and accurate data on personnel and their skill sets. HRM is comprised of 14 lines of business. They focus on the processes required to acquire, train, manage, pay and provide benefits to the military and civilian personnel in the DoD, as well as support family members, veterans, retirees, volunteers and contractors.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
ICOM Arrow	Term	<p>Used on an OV-5, an ICOM Arrow represents the Input, Control, Output, or Mechanism that defines information relationships in an Activity Model.</p> <ul style="list-style-type: none"> <li>- Input: Information received from another Operational Activity, either internal or external to the model, which is needed for the given Operational Activity to be carried out.</li> <li>- Control: Information that affects the way an activity is performed or that constrains that activity. Primary sources are policies, regulations, and laws. BEP initiatives are also reflected as controls to emphasize the impact on a specific activity of those business transformation concepts. In the BEA, there are two types of Controls: External and Internal. External Controls are decomposed from the LRP Parent. Internal Controls are Initiatives that are created as outputs from other operational activities within the BEA OV-5 Activity Model.</li> <li>- Output: Information that has been transformed or created by the Operational Activity and is sent to another internal Operational Activity or to an external activity (one outside the scope of the model/viewpoint).</li> <li>- Mechanism: Resource used to perform the activity. Mechanisms will be CBMs and those Systems or Initiatives defined by the BEP Executives.</li> </ul>	
IDEF0 Model	Term	An IDEF0 Model is a graphic description of a system or subject that is developed for a specific purpose and from a selected viewpoint. A set of one or more IDEF0 diagrams that depict the functions of a system or subject area with graphics, text, and glossary.	
IDEF1X Categorization	Term	An IDEF1X Categorization is a type of relationship that defines the scheme that distinguishes among related subtype Entities. It defines what the scheme is, not how, where, or when the scheme is used or who uses it. If a categorization value is known, it will be used to differentiate between subtypes.	
Implementing Agency	Term	The Implementing Agency (IA) is a Department of Defense Component authorized to respond to Letters of Request by preparing and executing cases in the Foreign Military Sales (FMS) Trust Fund.	
Information and Data	Term	Information and Data is a DoDAF Meta-Model Data Group used to capture architecture content on representations (descriptions) of things of interest and necessary for the conduct of activities.	
Information Exchange	Term	Listed in the OV-3, an Information Exchange shows the information exchanged between two Operational Nodes. A corresponding leaf level Activity Input or Output ICOM is associated to the Information Exchange with the same name, definition, CBM stakeholder, and BEP stakeholder.	
Information Support Plan	Term	A requirement for all Acquisition Category (ACAT) programs that connect in any way to the communications and information infrastructure including both Information Technology (IT) and National Security System (NSS) programs. The ISP is used by program authorities to document IT and NSS needs, objectives, and interface requirements in sufficient detail to enable testing and verification of requirements. The ISP also contains interface descriptions, infrastructure and support requirements, standards profiles, measures of performance, and interoperability shortfalls. The ISP is summarized in the Acquisition Strategy and reviewed at Milestones B and C.	
Information System	Term	The term "information system" means a discrete set of information resources organized for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information. (USC 3505 Title 44)	
Information Technology	Term	The development, implementation, and maintenance of computer hardware and software systems to organize and communicate information electronically.	
Information Technology System	Term	Set of information resources organized for the collection, storage, processing, maintenance, use, sharing, dissemination, disposition, display, or transmission of information. Any Acquisition Category (ACAT) system that meets these criteria, anything categorized as a NSS or a Mission Assurance Category (MAC) level is, by definition, considered an IT system.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Initial Capabilities Document	Term	A requirement for all Acquisition Category (ACAT) programs that connect in any way to the communications and information infrastructure including both Information Technology (IT) and National Security System (NSS) programs. The ISP is used by program authorities to document IT and NSS needs, objectives, and interface requirements in sufficient detail to enable testing and verification of requirements. The ISP also contains interface descriptions, infrastructure and support requirements, standards profiles, measures of performance, and interoperability shortfalls. The ISP is summarized in the Acquisition Strategy and reviewed at Milestones B and C.	
Initial Operational Capability	Term	Defined in JCS Pub 1-02 as "the first attainment of the capability to employ effectively a weapon, item of equipment or system of approved specific characteristics, and which is manned and operated by an adequately trained, equipped and supported military force or unit." IOC is defined slightly differently by each military department but with comparable meaning.	
Initiate	Term	To Initiate is to get going by taking the first step.	
Initiative	Term	An Initiative is a construct for the management of resources. "All IT/NSS [IT/ National Security Systems] resources must be managed in accordance with appropriations guidance and applicable expense and investment criteria. All resources will be reported within initiatives. Initiatives can be systems, programs, projects, organizations, activities or family of systems." (Source: FMR Volume 2B, Chapter 18, June 2004.) Within DCMO, especially when used in the context of systems and initiatives, the term initiative refers to non-system programs or activities focused on policy changes, data standards, or other business practice changes.	
Integrated Dictionary	Term	An architectural data repository with definitions of all terms used throughout the architectural data and presentations.	
Integrity	Term	Protection against unauthorized modification or destruction of information; an Information Exchange characteristic.	
Interservice	Term	Interservice describes interactions that occur between uniformed services. (Paraphrased from DoDI 1304.25, Para. 6.8)	
Interservice Transfer	Term	An HRM administrative personnel transfer action between services such as a transfer from the Army to the Marine Corps.	
Intra-agency Order	Term	A specific type of intragovernmental order in which the order is between two components within the same agency, e.g. Deputy Chief Management Office (DCMO) and Army Material Command within DoD.	
Intragovernmental	Term	Intragovernmental transactions are transactions and/or balances that result from business activities conducted by two different Federal Government entities.	
Intragovernmental Order	Term	An order placed by an agency or one of its components with another Federal government agency or component.	
Intraservice	Term	Describes interactions that occur between individuals or entities within a single uniformed service. (paraphrased from DoDI 1304.25, Para. 6.8)	
Intraservice Transfer	Term	An HRM administrative action such as a transfer from a Regular component to the Reserves, transfer between Reserve Categories (e.g., Ready Reserve, Standby Reserve, Retired Reserve), or a transfer from a Regular component to the National Guard.	
Investment Management	Term	(1) IT investment management is a process for linking IT investment decisions to an organization's strategic objectives and business plans. Generally, it includes structures (including decision-making bodies known as IRBs), processes for developing information on investments (such as costs and benefits), and practices to inform management decisions (such as investment alignment with an enterprise architecture). The federal approach to IT investment management is based on establishing systematic processes for selecting, controlling, and evaluating investments. (2) Investment Management provides leadership in investment management for DoD Enterprise-level business systems, coordinates the efforts of the DoD 5000 series as it pertains to business systems, and provides Business Transformation Agency input for the Quadrennial Defense Review (QDR).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Investment Review Board	Term	Each Certification Authority is required to establish and charter an IRB to provide investment review of its business systems. Each IRB will assess modernization investments relative to their impact on end-to-end business process improvements that support Warfighter needs. IRB membership includes representatives from the Components, combatant Commands, and the Joint Chiefs of Staff.	
Item Unique Identifier	Term	Item Unique Identification (IUID) is a system of marking items delivered to the DoD with unique item identifiers, encoded in machine-readable symbologies and distinguishing an item from all other like and unlike items.	
ITMA Number	Term	An ITMA Number is the unique ID of an Initiative in the Information Technology Management Application (ITMA).	
JCIDS Process	Term	Policy and procedures that support the Chairman of the Joint Chiefs of Staff and the Joint Requirements Oversight Council in identifying, assessing, and prioritizing joint military capability needs. (JCISI 3170.01E)	
Joint Capability Areas	Term	Joint Capability Area (JCA) - Collections of like DOD activities functionally grouped to support capability analysis, strategy development, investment decision making, capability portfolio management, and capabilities-based force development and operational planning.	
Joint Contingency Contracting System	Term	Joint Contingency Contracting System (JCCS) is a real time contract data repository and reporting tool for reconstruction contracts in Iraq and Afghanistan. The goals of the system include 1) allow the posting of Iraqi and Afghani reconstruction solicitations, 2) the functionality to review vendor past performance, 3) provide a web-based location for vendors to submit proposals, 4) track all historical reconstruction data, 5) allow oversight of in-theatre contracts to monitor cost, schedule, performance, and vendor activities, and 6) track spend analysis for strategic sourcing and staffing.	
Joint Enterprise Military Pay	Term	This encompasses the integrated FM and HRM business rules, information standards and other enterprise level specifications required to ensure DoD wide consistent pay computation, deductions, disbursement, accounting and related reporting functionality.	
Joint Environment	Term	Any DoD Service, agency, component, activity, operation, project, organization or other military environment where any member belongs to a different military Service than other members.	
Joint Publication	Term	A publication containing joint doctrine that is prepared under the direction and authority of the Chairman of the Joint Chiefs of Staff and applies to all US military forces. Also called JP.	
Joint Travel Regulation	Term	Regulations, issued under authority of the General Services Administration (41 CFR 300-304), the Department of State, Office of Personnel Management (OPM), United States Code (Title 10 and Title 5), Executive Orders, GSA Commuted Rate Schedule, and DoD directives and instructions; and The U.S. General Accounting Office, that pertain to per diem, travel and transportation allowances, relocation allowances, and certain other allowances of DoD civilian employees and civilians who travel using DoD funding.	
Judge Advocate General	Term	The legal branch or occupational specialty of any of the US Armed Forces including the Army, Navy, Air Force and Marine Corps. Officers serving as Judge Advocate Generals are typically called JAGs.	
Key Performance Parameter	Term	Those attributes or characteristics of a system that are considered critical or essential to the development of an effective military capability and those attributes that make a significant contribution to the key characteristics as defined in the Joint Operations Concepts. KPPs are validated by the Joint Requirements Oversight Council (JROC) for JROC Interest documents, and by the DOD component for Joint Integration or Independent documents. Capability development and capability production document KPPs are included verbatim in the acquisition program baseline. (JCISI 3170.01E)	
Latest System Review Date	Term	Date of system or initiative certification by DCMO (Comptroller or IRB).	
Legacy System	Term	An existing system that is designated for closure when the capability is absorbed by an interim or core system or if the capability is no longer required. No modifications or enhancements are made to legacy systems.	
Letter of Authorization	Term	The Letter of Authorization (LOA) is a Government document authorizing a person to proceed to designated locations within the specified Area of Responsibility (AOR) for a designated deployment period under a specified contract or Government mission. Further, the LOA authorizes the contractor to receive specific government furnished services (GFS).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Level of Assurance	Term	In the context of an Information Exchange Integrity attribute, the degree of confidence that the information has not been altered by an unauthorized subject.	
Level of Effort	Term	In the context of an Information Exchange Availability attribute, the resources that must be committed to ensure that the information can be accessed.	
Line Item	Term	A Line Item is a single line entry on a reporting form that indicates a quantity of property having the same description and condition code from any one contract at any one reporting location.	
Line of Duty	Term	A Member's status while in an authorized duty status and exhibiting behaviors that would not be considered grossly negligent or characterized as misconduct. (paraphrased from DoDI 1241.2, Encl. 2, Para. E2.1.7 )	
Loan Guarantee	Term	Any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a nonfederal borrower to a nonfederal lender. It does not, however, include the insurance of deposits, shares, or other withdrawable accounts in financial institutions. When a pre-1992 loan guarantee is modified it becomes subject to credit reform accounting. The guarantee liability is transferred from the liquidating account to the financing account. A one-time adjusting payment is made from the liquidating account to the financing account. Subsequent cash flows shall be recorded directly to the financing account. When a loan guarantee is in default, the defaulted loan claim of the nonfederal lender is paid from the financing account.	
Locations	Term	Locations are a DoDAF Meta-Model Data Group used to capture architecture content on all forms of locations including points, lines, areas, volumes, regions, installations, facilities, and addresses including electronic addresses (e.g., Uniform Resource Locators [URL] and physical (e.g., postal).	
Logical Data Model	Term	The documentation of the data requirements and structural business process (activity) rules. In DoDAF V1.5, this was the OV-7.	
LRP Source	Term	The LRP Source is the unique identifier of a law, regulation or policy in the LRP Repository (DOORS) database.	
Major Automated Information System	Term	A MAIS is an Automated Information System (AIS) program that is Designated by the OSD(NII) as a MAIS or Estimated to require program costs in any single year in excess of \$32 million or total program costs in excess of \$126 million (both in FY 2000 constant dollars). MAIS does not include IT that involves equipment that is an integral part of a weapons system or is an acquisition services program.	
Major Defense Acquisition Program	Term	Estimated by the USD(AT&L) to require an eventual total expenditure for research, development, test and evaluation (RDT&E) of more than \$365 million in fiscal year (FY) 2000 constant dollars or, for procurement, of more than \$2.190 billion in FY 2000 constant dollars." (Source: DoDI 5000.2, May 12, 2003)	
Managing Component	Term	Name of Military Service, Defense Agency, or Defense Field Activity that receives and manages funding.	
Manpower Document	Term	A document depicting DoD position related information such as manpower requirements, authorizations, and contract equivalents, including time-phased wartime requirements.	
Manpower Programming	Term	The process of compiling and projecting future manpower requirements; documenting these requirements; integrating them into the overall planning, programming, and budgeting process; and translating them into a form that provides a basis for personnel procurement, training, and assignment. (DODI 1120.11)	
Master Product Hazard Data	Term	Authoritative DoD product information that is used in the management of hazardous materials and is maintained in the master product hazard data (MPHD) data warehouse.	
Materiel	Term	All items (including ships, tanks, self-propelled weapons, aircraft, etc., and related spares, repair parts, and support equipment, but excluding real property, installations, and utilities) necessary to equip, operate, maintain, and support military activities without distinction as to its application for administrative or combat purposes.	
Materiel Visibility	Term	Materiel Visibility (MV) is defined as the ability to locate and account for materiel assets and their condition throughout their lifecycle and provide transaction and management visibility across logistics systems in support of the joint warfighting mission.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Measures	Term	Measures are a DoDAF Meta-Model Data Group used to capture architecture content on all form of measures (metrics) applicable to architectures including needs satisfaction measures, performance measures, interoperability measures, organizational measures, and resource measures.	
Message Flow	Term	A Message Flow shows the flow of messages between two entities that are prepared to send and receive them. Two separate Pools in the Diagram will represent the two business entities. [OV-6c].	
Migration Date	Term	The date of FOC for the final set of functions or final set of users migrating to the target system in a production environment.	
Migration End Date	Term	The date a legacy system is scheduled to finish its migration to the Target System.	
Migration Start Date	Term	The date a legacy system is scheduled to begin its migration to the Target System.	
Milestone	Term	A milestone is a significant event. For business transformation, these are events tracked to monitor progress towards or achievement of improved business capabilities. In the acquisition sense, a milestone is "The point at which a recommendation is made and approval sought regarding starting or continuing an acquisition program" (Source: DAU Glossary)	
Military Service	Term	The term "Military Service," as used herein, refers to the Army, the Navy, the Air Force, or the Marine Corps. "Source: DODD 5160.65 April 14, 2004.	
Mission	Term	The DoD task, together with the purpose, that clearly indicates the actions to be taken and the reason therefore.	
Mission Assurance Category	Term	Applicable to DoD information systems, the mission assurance category reflects the importance of information relative to the achievement of DoD goals and objectives, particularly the warfighters' combat mission. Mission assurance categories are primarily used to determine the requirements for availability and integrity.	
National Defense Authorization Act for FY05	Term	With the National Defense Authorization Act of 2005 (NDAA), Congress provided the Department a mandated governance structure to provide oversight and direction of Defense business systems developmental activities.	
National Security System	Term	Any telecommunications or information system operated by the United States Government, the function, operation, or use of which: (a) involves intelligence activities; (b) involves cryptologic activities related to national security; (c) involves command and control of military forces; (d) involves equipment that is an integral part of a weapon or weapon system; or (e) is critical to the direct fulfillment of military or intelligence missions and does not include a system that is to be used for routine administrative and business applications (including payroll, finance, logistics, and personnel management applications).	
NDAA Category	Term	The NDAA defines three transition categories as follows: 1. New - New systems expected to be needed to complete the DoD Business Enterprise Architecture 2. Legacy - Defense business systems as of December 2, 2002 (known as "legacy" systems), that will not be part of the objective DoD Business Enterprise Architecture 3. Modify - Defense business legacy systems that will be a part of the objective Defense business system by making modifications to those systems to ensure that they comply with the DoD Business Enterprise Architecture. Unknown - DoD business legacy systems for which a transition strategy has not been determined (Category of Unknown not defined in the NDAA).	
Need Line	Term	Shown on an OV-2, a Need Line documents the requirement to exchange information between Operational Nodes. Arrows on Need Lines indicate the direction of the information flow. Each arrow only indicates that there is a need for some kind of information transfer between the two connected nodes, not how the information transfer is implemented.	
Network-centricity (or Net-centricity)	Term	Net-centricity is a robust, globally interconnected network environment (including infrastructure, systems, processes and people) in which data are shared in a timely and seamless manner among users, applications and platforms. Net-centricity enables substantially improved military situational awareness and significantly shortened decision-making cycles. (CJCSI 3170.01E).	
Node Tree Only	Term	Node Tree Only - Refers to Activities which appear in the OV-5a only, not in the OV-5b. These activities are touch points for architecture alignment with the BEA, for Investment Management purposes, and may related to other DoDAF artifacts within the BEA.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Non-Direct Cost Voucher	Term	A form of payment request that is used when the vendor is authorized to bill for labor and materials, and must be approved by the DCAA auditor prior to entitlement.	
Non-Force Structure	Term	Defense-related entities not defined or counted within the numbers, size, and composition of the units that comprise US defense forces; e.g., divisions, ships, air wings.	
Non-repudiation	Term	In the context of an Information Exchange Integrity attribute, the requirement for proof of sender/origin and/or proof of receipt.	
North American Industry Classification System	Term	The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.	
Nunn-McCurdy Unit Cost	Term	A "Nunn-McCurdy" unit cost breach occurs when a Major Defense Acquisition Program (MDAP) experiences an increase of at least 15% in Program Acquisition Unit Cost (PAUC) or Average Procurement Unit Cost (APUC) above the unit costs in the Acquisition Program Baseline.	
Objective Value	Term	The desired operational goal associated with a performance attribute, beyond which any gain in utility does not warrant additional expenditure. The objective value is an operationally significant increment above the threshold. An objective value may be the same as the threshold when an operationally significant increment above the threshold is not significant or useful. (CJCSI 3170.01E)	
Objectives	Term	A "clearer statement of the specific activities required to achieve the goals, starting from the current status." (Source: Strategic Planning (in Nonprofit or For-Profit Organizations), by Carter McNamara, MBA, PhD).	
Obligating Document	Term	<p>Per Title 31 of the United States Code (U.S.C.), Section 1501, which states:                      Sec. 1501. Documentary evidence requirement for Government obligations</p> <p>(a) An amount shall be recorded as an obligation of the United States Government only when supported by documentary evidence of—</p> <p>(1) a binding agreement between an agency and another person (including an agency) that is—</p> <p>(A) in writing, in a way and form, and for a purpose authorized by law; and</p> <p>(B) executed before the end of the period of availability for obligation of the appropriation or fund used for specific goods to be delivered, real property to be bought or leased, or work or service to be provided;</p> <p>(2) a loan agreement showing the amount and terms of repayment;</p> <p>(3) an order required by law to be placed with an agency;</p> <p>(4) an order issued under a law authorizing purchases without advertising—</p> <p>(A) when necessary because of a public exigency;</p> <p>(B) for perishable subsistence supplies; or</p> <p>(C) within specific monetary limits;</p> <p>(5) a grant or subsidy payable—</p> <p>(A) from appropriations made for payment of, or contributions to, amounts required to be paid in specific amounts fixed by law or under formulas prescribed by law;</p> <p>(B) under an agreement authorized by law; or</p> <p>(C) under plans approved consistent with and authorized by law;</p> <p>(6) a liability that may result from pending litigation;</p> <p>(7) employment or services or persons or expenses of travel under law;</p> <p>(8) services provided by public utilities; or</p> <p>(9) other legal liability of the Government against an available appropriation or fund.</p>	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
OmniClass	Term	The OmniClass Construction Classification System (known as OmniClass or OCCS) is a classification system for the construction industry. OmniClass is useful for many applications, from organizing library materials, product literature, and project information, to providing a classification structure for electronic databases. It incorporates other extant systems currently in use as the basis of many of its Tables MasterFormat for work results, UniFormat for elements, and EPIC (Electronic Product Information Cooperation) for structuring products.	
Ontology	Term	Data categorization schemes, thesauruses, vocabularies, key-word lists, and taxonomies. Ontologies promote semantic and syntactic understanding of data.	
Operational Activity	Term	An activity is an action performed in conducting the business of an enterprise. It is a general term that does not imply a placement in a hierarchy (e.g., it could be a process or a task as defined in other documents and it could be at any level of the hierarchy of the Operational Activity Model). It is used to portray operational actions not hardware/software system functions. (DoDAF)	
Operational Activity Decomposition Tree	Term	The capabilities and activities (operational activities) organized in a hierarchal structure.	
Operational Activity Model	Term	The context of capabilities and activities (operational activities) and their relationships among activities, inputs, and outputs; Additional data can show cost, performers, or other pertinent information.	
Operational Activity to Services Traceability Matrix	Term	A mapping of services (activities) back to operational activities (activities).	
Operational Activity to Systems Function Traceability Matrix	Term	A mapping of system functions (activities) back to operational activities (activities).	
Operational Activity to Systems Traceability Matrix	Term	A mapping of systems back to capabilities or operational activities (activities).	
Operational Node	Term	Shown in an OV-2, an Operational Node describes what type of mission or role will be performed within an organizational unit. It is a job performed within an organizational unit.	
Operational Resource Flow Description	Term	A description of the Resource Flows exchanged between operational activities.	
Operational Resource Flow Matrix	Term	A description of the resources exchanged and the relevant attributes of the exchanges.	
Operational Rules Model	Term	One of three models used to describe activity (operational activity). It identifies business rules that constrain operations.	
Operational Viewpoint	Term	The Operational Viewpoint (OV) captures the organizations, tasks, or activities performed, and information that must be exchanged between them to accomplish DoD missions. It conveys the types of information exchanged, the frequency of exchange, which tasks and activities are supported by the information exchanges, and the nature of information exchanges.	
Organizational Relationships Chart	Term	The organizational context, role or other relationships among organizations.	
Over Target Baseline	Term	Total allocated budget that exceeds the contract budget base.	
Overview and Summary Information	Term	Describes a Project's Visions, Goals, Objectives, Plans, Activities, Events, Conditions, Measures, Effects (Outcomes), and produced objects.	
Participant	Term	A Participant is a single business entity or a business role, which controls or is responsible for a business process. A Pool represents a Participant in the Process.	
Performance Based Payment Request	Term	A form of contract financing that is based upon certain specified performance criterion being accomplished by the vendor (i.e., milestones).	
Performance Measurement	Term	Performance Measurement is a means of assessing progress against stated goals and objectives in a way that is unbiased and quantifiable. It brings with it an emphasis on objectivity, fairness, consistency, and responsiveness. At the same time, it functions as a reliable indicator of an organization's long-term health. Its impact on an organization can be both immediate and far-reaching." (Source: OSD Comptroller iCenter - web presence).	
Performer	Term	Any entity - human, automated, or any aggregation of human and/or automated - that performs an activity and provides a capability.	
Performers	Term	Performers are a DoDAF Meta-Model Data Group used to capture architecture content on things that perform activities such as service performers, systems, personnel, and organizations.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Permanent Change of Station	Term	The assignment, detail, or transfer of an employee, member, or unit to a different PDS under a competent travel order that does not specify the duty as temporary, provide for further assignment to a new PDS, or direct return to the old PDS. (IFTR, Appendix A, Reference b)	
Permissible Exposure Limit	Term	The permissible exposure limit (PEL or OSHA PEL) is a legal limit in the United States for exposure of an employee to a chemical substance or physical agent.	
Personnel Visibility	Term	Personnel Visibility (PV) is the fusion of accurate human resources (HR) information and secure, interoperable technology within the HRM Business Mission. PV is defined as having reliable information that provides visibility of military Service members, civilian employees, military retirees, contractors (in theater), and other U.S. personnel, across the full spectrum-during peacetime and war, through mobilization and demobilization, for deployment and redeployment, while assigned in a theater of operation or at home base, and into retirement. This includes ensuring timely and accurate access to compensation and benefits for DoD personnel and their families and ensuring that Combatant Commanders have access to the timely and accurate data on personnel and their skill sets.	
pH Scale	Term	The pH scale measures how acidic or basic a substance is. The pH scale ranges from 0 to 14. A pH of 7 is neutral. A pH less than 7 is acidic. A pH greater than 7 is basic.	
Physical Data Model	Term	The physical implementation format of the Logical Data Model entities, e.g., message formats, file structures, physical schema. In DoDAF V1.5, this was the SV-11.	
Plan to Stock	Term	Plan to Stock encompasses all business functions necessary to plan, procure, produce, inventory, and stock materials used both in operations and maintenance (O&M) as well as for sale.	
Planning, Programming, Budgeting and Execution Process	Term	The Department of Defense's cyclic process for determining requirements and allocating resources (CJCSI 8501.01A)	
Portfolio Management	Term	Management of IT investments using integrated strategic planning, integrated architectures, measures of performance, risk management techniques, transition plans, and portfolio investment strategies. The core activities associated with portfolio management are analysis, selection, control, and evaluation. Decisions on IT investments are based on compliance with the BEA, mission area goals, risk tolerance levels, potential returns, and performance.	
Prepayments	Term	A Prepayment is a payment made by a Federal entity to cover certain periodic expenses before those expenses are incurred.	
Primary Key	Term	The Primary Key is an Attribute, or set of Attributes, that uniquely identifies an instance of an OV-7 Entity.	
Principal Staff Assistants	Term	The Under Secretaries of Defense, the Director of Defense Research and Engineering, the Assistant Secretaries of Defense, the General Counsel of the Department of Defense, the Comptroller of the Department of Defense, the Assistants to the Secretary of Defense, and the OSD Directors or equivalents who report directly to the Secretary or Deputy Secretary of Defense. (Source: DoDD 5100.81, Department of Defense Support Activities (DSAs))	
Procurement Instrument Identification Number	Term	The concatenation of four PDS data elements, (Enterprise Identifier + Year + Type Code + Serialized Identifier), that together uniquely identify a procurement instrument throughout DoD.	
Product Hazard Data	Term	Product information defined by the DoD to be used for the management of hazardous materials.	
Program Baseline	Term	A program baseline establishes a foundation of projected costs, schedules, and performance expectations for Enterprise-level systems and initiatives. This baseline is used to; Monitor execution of transition efforts relative to established plans, Evaluate the alignment of transition efforts, Examine program interdependencies, and Assess impacts of the transition efforts. It reflects decisions about investments and documents accomplishments. The program baseline works integrally with the Enterprise Transition Plan to provide Department stakeholders with the necessary information to guide and track their transformation efforts.	
Program Director	Term	The manager responsible for the implementation of a System or Initiative.	
Program Level	Term	The level at which a target system and its Business Capabilities will be implemented or managed. DCMO program levels are Enterprise or Component.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Program Manager	Term	A military or civilian official who is responsible for managing, through integrated product teams (IPTs), an acquisition program. (Source: Navy Strategic Sourcing Reference Library - Strategic Sourcing Terminology)	
Program/Budget Framework	Term	The Program/Budget (P/B) Framework provides a foundation for a new program and budget data structure utilizing a common language that enables senior level DoD decision makers to weigh options versus resource constraints across a spectrum of challenges. The P/B Framework consists of a number of related data transparency initiatives that span across all portions of the Planning, Programming, Budgeting, and Execution process.	
Program-enabled	Term	The implementation of architecture-guided, capability-driven systems and initiatives.	
Progress Payment Request	Term	A payment request that is made based on the cost incurred by the contractor as work progresses under the contract (cost accumulation). When authorized in the contract, payments can be made for 80% or more of the accumulated costs on certain items.	
Project	Term	Project are a DoDAF Meta-Model Data Group used to capture architecture content on all forms of planned activities that are responsive to visions, goals, and objectives that aim to change the state of some situation.	
Project Portfolio Relationships	Term	It describes the dependency relationships between the organizations and projects and the organizational structures needed to manage a portfolio of projects.	
Project Timelines	Term	A timeline perspective on programs or projects, with the key milestones and interdependencies.	
Project to Capability Mapping	Term	A mapping of programs and projects to capabilities to show how the specific projects and program elements help to achieve a capability.	
Project Viewpoint	Term	The Project Viewpoint (PV) captures how programs are grouped in organizational terms as a coherent portfolio of acquisition programs. It provides a way of describing the organizational relationships between multiple acquisition programs, each of which are responsible for delivering individual systems or capabilities.	
Public	Term	In the context of an Information Exchange Confidentiality characteristic, information that has been reviewed and approved for release under DoDD 5230.9 and DoDI 5230.2	
Published Interface	Term	Shown on a SvcV-1, a Published Interface represents the Service Resource Flow, visible to everyone, between Service - Service Consumer.	
Real Property Accountability	Term	Real Property Accountability (RPA) provides the warfighter and Core Business Missions (CBM) access to near-real time secure, accurate and reliable information on real property assets and environment, safety and occupational health sustainability.	
Real World Phenomenon	Term	Real world phenomenon is something that can be observed or sensed physically.	
Record	Term	A Record is any item, collection, or grouping of information about an entity that is maintained by an agency.	
Recovering Service Member	Term	A member of the Armed Forces including a member of the National Guard or a Reserve, who is undergoing medical treatment, recuperation, or therapy and is in an outpatient status while recovering from a serious injury or illness related to the member's military service.	
Reduction in Force	Term	The release of DoD personnel due to the elimination of a position or its modification so that it no longer satisfies related statutory criteria. Such elimination or modification may occur as a result of administrative actions such as reorganization, curtailment of work, a determination that a position no longer satisfies the required criteria, lack of funds, or the withdrawal of the position's authorization by DoD or OPM.	
Reimbursable	Term	A Reimbursable is an expenditure made for another agency, fund, or appropriation, or for a private individual, firm, or corporation, which subsequently will be recovered.	
Relationship	Term	An association between two entities or between instances of the same entity.	
Reserve Component	Term	The Armed Forces of the United States Reserve Component consists of: a. the Army National Guard of the United States; b. the Army Reserve; c. the Navy Reserve; d. the Marine Corps Reserve; e. the Air National Guard of the United States; f. the Air Force Reserve; and g. the Coast Guard Reserve. Also called RC. See also component; reserve.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Resource	Term	Data, Information, Performers, Materiel, or Personnel Types that are produced or consumed.	
Resource Description Framework	Term	RDF is a standard model for data interchange on the Web. RDF has features that facilitate data merging even if the underlying schemas differ, and it specifically supports the evolution of schemas over time without requiring all the data consumers to be changed.  RDF extends the linking structure of the Web to use URIs to name the relationship between things as well as the two ends of the link (this is usually referred to as a "triple"). Using this simple model, it allows structured and semi-structured data to be mixed, exposed, and shared across different applications.  This linking structure forms a directed, labeled graph, where the edges represent the named link between two resources, represented by the graph nodes. This graph view is the easiest possible mental model for RDF and is often used in easy-to-understand visual explanations.	
Resource Flows	Term	Resource Flows are a DoDAF Meta-Model Data Group used to capture architecture content on the interaction between Activities (which are performed by Performers) that is both temporal and results in the flow or exchange of objects such as information, data, materiel, and performers.	
Risk	Term	Risk is a measure of the potential inability to achieve overall program objectives within defined cost, schedule, and technical constraints and has two components: (1) the probability/ likelihood of failing to achieve a particular outcome, and (2) the consequences/impacts of failing to achieve that outcome. (Source: Risk Management Guide for DoD Acquisition, Fifth Edition (Version 2.0), June 2003)	
Risk Management	Term	Risk management is the act or practice of dealing with risk. It includes planning for risk, assessing (identifying and analyzing) risk areas, developing risk-handling options, monitoring risks to determine how risks have changed, and documenting the overall risk management program. (Source: Risk Management Guide for DoD Acquisition, Fifth Edition (Version 2.0), June 2003)	
Role Name	Term	A name assigned to a foreign key attribute to represent the use of the foreign key in the entity.	
Rules	Term	Rules are a DoDAF Meta-Model Data Group used to capture architecture content on how rules, standards, agreements, constraints, and regulations and are relevant to architectures.  The following should be noted about the Rules Data Group: 1. A Rule constrains Activities. 2. Security classification, security marking, releasability, etc. are types of Guidance. Similarly; a Rule is a stronger form of Guidance. 3. An important Constraint type is a Service Policy that constrains access to capability Performers. 4. Doctrine, by definition, constrains military action.	
Sensitive	Term	In the context of an Information Exchange Confidentiality characteristic, information the loss, misuse, or unauthorized access to or modification of which could adversely affect the national interest or the conduct of Federal programs, or the privacy to which individuals are entitled under The Privacy Act, but which has not been specifically authorized under criteria established by Executive order or an Act of Congress to be kept secret in the interest of national defense or foreign policy Includes information in routine DoD payroll, finance, logistics, and personnel management systems.	
Sequence Flow	Term	A Sequence Flow is an arrow that shows the order that Process Steps will be performed in a process.	
Service	Term	The means by which the needs of a consumer are brought together with the capabilities of a provider.	
Service Consumer	Term	Shown on a SvcV-1, a Service Consumer represents a collection of users, systems, organizations that consume the services.	
Service Interface	Term	Shown on a SvcV-1, a Service Interface represents the Service Resource Flow, not visible to public, between Service - Service or Service - System Entity.	
Service Provider	Term	Shown on a SvcV-1, a Service Provider represents a collection of Services and/or System Entity(s).	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Services	Term	Services are a DoDAF Meta-Model Data Group used to capture architecture content on business and software services, what they do for what effects, by what measures and rules, how they are described for discovery and use, and how and where they can be accomplished.	
Services Context Description	Term	The identification of services, service items, and their interconnections.	
Services Event-Trace Description	Term	One of three models used to describe service functionality. It identifies service-specific refinements of critical sequences of events described in the Operational Viewpoint.	
Services Evolution Description	Term	The planned incremental steps toward migrating a suite of services to a more efficient suite or toward evolving current services to a future implementation.	
Services Functionality Description	Term	The functions performed by services and the service data flows among service functions (activities).	
Services Measures Matrix	Term	The measures (metrics) of Services Model elements for the appropriate time frame(s).	
Services Resource Flow Description	Term	A description of Resource Flows exchanged between services.	
Services Resource Flow Matrix	Term	It provides details of service Resource Flow elements being exchanged between services and the attributes of that exchange.	
Services Rules Model	Term	One of three models used to describe service functionality. It identifies constraints that are imposed on systems functionality due to some aspect of system design or implementation.	
Services State Transition Description	Term	One of three models used to describe service functionality. It identifies responses of services to events.	
Services Technology & Skills Forecast	Term	The emerging technologies, software/hardware products, and skills that are expected to be available in a given set of time frames and that will affect future service development.	
Services Viewpoint	Term	The Services Viewpoint (SvcV) captures system, service, and interconnection functionality providing for, or supporting, operational activities. DoD processes include warfighting, business, intelligence, and infrastructure functions. The SvcV functions and service resources and components may be linked to the architectural data in the OV. These system functions and service resources support the operational activities and facilitate the exchange of information.	
Services-Services Matrix	Term	The relationships among services in a given Architectural Description. It can be designed to show relationships of interest, (e.g., service-type interfaces, planned vs. existing interfaces).	
Special Interest Program	Term	A program may be special interest based on one or more of the following factors: technological complexity; Congressional interest; a large commitment of resources; the program is critical to achievement of a capability or set of capabilities; or the program is a joint program. Exhibiting one or more of these characteristics, however, shall not automatically lead to a 'special interest' designation.	
Standard	Term	A Standard is an agreed upon means that establishes uniform engineering and technical requirements.	
Standard Industrial Classification	Term	Standard Industrial Classification (SIC) system was replaced by the NAICS adopted in 1997.	
Standard Viewpoint	Term	The Standards Viewpoint (StdV) is the minimal set of rules governing the arrangement, interaction, and interdependence of system parts or elements. Its purpose is to ensure that a system satisfies a specified set of operational requirements. The StdV provides the technical systems implementation guidelines upon which engineering specifications are based, common building blocks established, and product lines developed. It includes a collection of the technical standards, implementation conventions, standards options, rules, and criteria that can be organized into profile(s) that govern systems and system or service elements in a given Architectural Description.	
Standards Forecast	Term	The description of emerging standards and potential impact on current solution elements, within a set of time frames.	
Standards Profile	Term	The listing of standards that apply to solution elements.	
State Transition Description	Term	One of three models used to describe operational activity (activity). It identifies business process (activity) responses to events (usually, very short activities).	
Stove-pipe	Term	An entity, i.e., a system, organization, process, etc., whose design does not support effective information sharing or leveraging of capabilities with other, related entities.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Strategic Management Plan	Term	The DoD Strategic Management Plan (SMP) provides an executive overview of the Department's overall strategic planning and management framework for business systems. The SMP describes the integrated activities that comprise the Department's performance management system, which enables the Department's leadership to enhance productivity by focusing resources on the key levers that drive success.	
Supply Chain Entitlements	Term	The determination of what a vendor, or other party, is owed as a result of having provided material or services to the government, including but not limited to contracted goods or services, and miscellaneous payments.	
System	Term	Systems can be an information system, other than a national security system, operated by, for, or on behalf of the Department of Defense, including financial systems, mixed systems, financial data feeder systems, and information technology and information assurance infrastructure, used to support business activities, such as acquisition, financial management, logistics, strategic planning and budgeting, installations and environment, and human resources management.	
System Data Exchange	Term	Listed in the SV-6, a System Data Exchange represents data exchanges between System Functions and may include additional information assurance or performance attributes to characterize the exchange. The data in the system data exchange is represented using data entities and/or data elements within the DoDAF OV-7 architecture product.	
System Entity	Term	Shown on a SV-1, a System Entity represents computer systems, family of systems or systems of systems. A System Entity resides within a System Node and may contain one or more system functions.	
System Function	Term	A function that is performed by a system. Although commonly used to refer to the automation of activities, data transformation or information exchanges within an IT system, it also refers to the delivery of military capabilities.	
System Interface	Term	Shown on an SV-1, a System Interface represents the data exchange between System Entities.	
System Node	Term	Shown on an SV-1, a System Node represents the system capabilities that are required to support the business practices that are described in the Operational View.	
System of Systems	Term	A set or arrangement of independent systems that are related or connected to provide a given capability. The loss of any part of the system will degrade the performance or capabilities of the whole.	
Systems Event-Trace Description	Term	One of three models used to describe system functionality. It identifies system-specific refinements of critical sequences of events described in the Operational Viewpoint.	
Systems Evolution Description	Term	The planned incremental steps toward migrating a suite of systems to a more efficient suite, or toward evolving a current system to a future implementation.	
Systems Functionality Description	Term	The functions (activities) performed by systems and the system data flows among system functions (activities).	
Systems Interface Description	Term	The identification of systems, system items, and their interconnections.	
Systems Measures Matrix	Term	The measures (metrics) of Systems Model elements for the appropriate timeframe(s).	
Systems Resource Flow Description	Term	A description of Resource Flows exchanged between systems.	
Systems Resource Flow Matrix	Term	Provides details of system resource flow elements being exchanged between systems and the attributes of that exchange.	
Systems Rules Model	Term	One of three models used to describe system functionality. It identifies constraints that are imposed on systems functionality due to some aspect of system design or implementation.	
Systems State Transition Description	Term	One of three models used to describe system functionality. It identifies responses of systems to events.	
Systems Technology & Skills Forecast	Term	The emerging technologies, software/hardware products, and skills that are expected to be available in a given set of time frames and that will affect future system development.	
Systems Viewpoint	Term	Systems Viewpoint (SV) captures the information on supporting automated systems, interconnectivity, and other systems functionality in support of operating activities.	
Systems-Services Matrix	Term	The relationships among or between systems and services in a given Architectural Description.	

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Systems-Systems Matrix	Term	The relationships among systems in a given Architectural Description. It can be designed to show relationships of interest, (e.g., system-type interfaces, planned vs. existing interfaces).	
Target System	Term	The system(s) solution targeted to assume some or all of the migrating systems' functionality to achieve a specific Business Capability or set of capabilities.	
Target System Acronym	Term	The acronym of the target system as listed in the DITPR. If the system is not listed in the DITPR, then the acronym from another authoritative source is used.	
Target System Name	Term	The full name of the Target System as listed in the DITPR. If the Target System is not listed in the DITPR, then the name from another authoritative source is used.	
Technical Service	Term	Listed in the TV-1 with its constituent standards, a Technical Service represents a technical capability designed to support an Enterprise Sub-Service.	
Technical Service Standard	Term	A Technical Service Standard is an agreed upon means that establishes uniform engineering and technical requirements to implement all or part of a Technical Service.	
Technology Service Area	Term	Shown in the TV-1, a Technology Service Area groups similar Technical Services together for increased organization and comprehension. There may be one or more Technical Services in a Technology Service Area. The current TV-1 takes its highest-level structure from the DoD Enterprise Architecture Technical Reference Model (EA TRM). It contains four Technology Service Areas, drawn from the Core Service Areas of the DoD EA TRM.	
Term	Term	Used in the BEA or ETP, a Term is a word or group of words designating a selected concept.	
Termination Date	Term	The date a system is scheduled to be terminated (synonymous with Retirement Date or Sunset Date).	
Three-Way Match	Term	A three-way match may be performed while calculating the adjustment to an account payable for a vendor, or other party owed by the government, by comparing the obligating document, receipt/acceptance, and payment request.	
Tiered Accountability	Term	Tiered Accountability is an approach to business transformation that is based on dividing the planning and management of programs and initiatives between Enterprise and Component levels.	
Timeliness	Term	In the context of an Information Exchange Availability attribute, the requirement for information to be accessible within a certain time period.	
Toxic Release Inventory	Term	The Toxics Release Inventory (TRI) is a publicly available database containing information on toxic chemical releases and other waste management activities in the United States.	
Toxic Substance Control Act	Term	The Toxic Substances Control Act (TSCA) is a United States law, passed by the United States Congress in 1976, that regulates the introduction of new or already existing chemicals.	
Training/Skill/Education	Term	Training/Skill/Education is a DoDAF Meta-Model Data Group used to capture architecture content on definitions, descriptions, and the promulgation of training requirements, skills sets required for specific capabilities and operations, and the formal education required.
