Object Class Code	Attribute	Object Class Codes are categories in a classification system that presents obligations by the items or services purchased by the Federal Government. These are the major object classes: 10 Personnel compensation and benefits, 20 Contractual services and supplies, 30 Acquisition of assets, 40 Grants and fixed charges, 90 Other. OMB divides these major classes into smaller classes and presents them in object class schedules. The classes present obligations according to their initial purpose, not the end product or service. For example, if you pay a Federal employee who constructs a building, classify the obligations for the employee's wages under Personnel compensation and benefits, rather than Acquisition of assets. If you purchase a building, classify the contractual obligations under Acquisition of assets.	Entity: OBJECT-CLASS-OBJECT-SUB-CLASS

Object Class Code	Attribute	Object Class Codes are categories in a classification system that presents obligations by the items or services purchased by the Federal Government. These are the major object classes: 10 Personnel compensation and benefits, 20 Contractual services and supplies, 30 Acquisition of assets, 40 Grants and fixed charges, 90 Other. OMB divides these major classes into smaller classes and presents them in object class schedules. The classes present obligations according to their initial purpose, not the end product or service. For example, if you pay a Federal employee who constructs a building, classify the obligations for the employee's wages under Personnel compensation and benefits, rather than Acquisition of assets. If you purchase a building, classify the contractual obligations under Acquisition of assets.	Entity: APPORTIONMENT-EVENT-OBJECT-CLASS

Product_Materials_to_Avoid_Text	Attribute	A statement providing details about the material(s) to avoid which may affect the stability of material.	Entity: PHD-PRODUCT-MATERIAL
Product_Medical_Conditions_Aggravated_by_Exposure_Text	Attribute	A statement providing details about the medical conditions aggravated by exposure or overexposure to the product.	Entity: PRODUCT-EXPOSURE-INFORMATION
Product_Molecular_Weight	Attribute	The numeric value for the molecular weight of a compound in grams, corresponding to the sum of the atomic weights of the elements in the compound.	Entity: PHD-PRODUCT-MATERIAL
Product_Name	Attribute	The product name as indicated on the Material Safety Data Sheet (MSDS), technical data sheet, or the product label. Example: ACME Super Insecticide.	Entity: PHD-PRODUCT
Product_Neutralizing_Agent_Text	Attribute	A statement providing details about the substance(s) used to neutralize the strong acid or base (alkaline) characteristics of the product.	Entity: PHD-PRODUCT-MATERIAL
Product_Note_to_Physician_Text	Attribute	A statement providing specific and detailed information about the product to health care professionals.	Entity: PHD-PRODUCT
Product_Odor_Description_Text	Attribute	A statement providing details about a typical, healthy person's physiological sensation due to contact of the product's molecules with the person's olfactory nervous system. Example: Slight clean and fresh odor.	Entity: PHD-PRODUCT-MATERIAL
Product_Or_Service_Text	Attribute	States whether the line item is for a product or for a service.	Entity: PDS-XSD
Product_Or_Service_Text	Attribute	States whether the line item is for a product or for a service.	Entity: PRDS-XSD
Product_OSHA_Health_Hazard_Category_Name	Attribute	A designation provided on a Material Safety Data Sheet (MSDS) that characterizes a product's hazardous nature through a commonly understood term for the Occupational Safety and Health Administration (OSHA) health hazard category for immediate and long-term health hazards in accordance with 29 CFR §1910.1200 Appendix A. Examples: Carcinogen, Corrosive, Highly Toxic, Irritant, Sensitizer, and Toxic.	Entity: PHD-PRODUCT-OSHA-INFORMATION
Product_Percent_by_Volume_Hazardous_Air_Pollutant_Quantity	Attribute	The relative volume, expressed as a percentage, occupied by the hazardous air pollutant within the product.	Entity: PRODUCT-MATERIAL-HAZARDOUS-AIR-POLLUTANT-INFORMATION
Product_Percent_by_Weight_Hazardous_Air_Pollutant_Quantity	Attribute	The relative weight, expressed as a percentage, occupied by the hazardous air pollutant within the product.	Entity: PRODUCT-MATERIAL-HAZARDOUS-AIR-POLLUTANT-INFORMATION
Product_Percent_Solid_by_Volume	Attribute	The relative volume, expressed as a percentage, occupied by solids in a unit volume of the material. For example, a paint may contain 45 percent solids by volume that will adhere to the item being painted.	Entity: PHD-PRODUCT-MATERIAL
Product_Percent_Solid_by_Weight	Attribute	The relative mass occupied by solids in a unit mass of the material, expressed in hundredths. For example, a paint may contain 45 percent solids by weight that will adhere to the item being painted.	Entity: PHD-PRODUCT-MATERIAL
Product_Percent_Volatile_by_Volume	Attribute	The relative volume, expressed as a percentage, occupied by the components with the tendency to evaporate at ambient temperature of 70 degrees Fahrenheit, within a unit volume of a solid or liquid material.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION

AV-2 Integrated Dictionary (BEA 11.1)

Object	Type	Description	Additional Keys
Product_Percent_Volatile_by_Volume_Calculation_Value_4_NonNumerical_Percent_Text	Attribute	The approved quantity, expressed as a percentage, to be used for calculations when reporting the use of the product, that correspond to the Responsible Party's textual representation of the amount of volatile components in a specific material formulation, expressed as a percent by volume.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_Percent_Volatile_by_Volume_NonNumerical_Percent_Text	Attribute	The text, rather than an actual numeric percentage, used by the Responsible Party to describe the percentage of volatile components by volume. Examples: Trace, Less than 10%, etc.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_Percent_Volatile_by_Weight	Attribute	The relative weight, expressed as a percentage, occupied by the components with the tendency to evaporate at ambient temperature of 70 degrees Fahrenheit, within a unit weight of a solid or liquid material.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_Percent_Volatile_by_Weight_Calculation_Value_4_NonNumerical_Percent_Text	Attribute	The approved quantity, expressed as a percentage, to be used for calculations when reporting the use of the product, that correspond to the Responsible Party's textual representation of the amount of volatile components in a specific material formulation, expressed as a percent by weight.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_Percent_Volatile_by_Weight_NonNumerical_Percent_Text	Attribute	The text, rather than an actual numeric percentage, used by the Responsible Party to describe the percentage of volatile components by weight. Examples: Trace, Less than 10%, etc.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_Percent_Volatile_Identifier	Attribute	A designator that distinguishes one PRODUCT-PERCENT-VOLATILE-INFORMATION from another.	Entity: PHD-PRODUCT-MATERIAL
Product_Percent_Volatile_Identifier	Attribute	A designator that distinguishes one PRODUCT-PERCENT-VOLATILE-INFORMATION from another.	Entity: PRODUCT-PERCENT-VOLATILE-INFORMATION
Product_pH	Attribute	A measure of the acidity or alkalinity of the product on a logarithmic scale of acidity based on the activity of hydrogen ions in a solution where the value ranges from 0 to 14, 7 is the value for a neutral (neither acidic or alkaline) solution. Example: pure water in contact with the atmosphere has a pH of 7.0.	Entity: PHD-PRODUCT-PH-INFORMATION
Product_pH_Text	Attribute	A statement providing details about the conditions and circumstances under which the pH of the product was measured.	Entity: PHD-PRODUCT-PH-INFORMATION
Product_Pictograph_ISO_Identifier	Attribute	A designator of a graphical symbol, as assigned jointly by the ISO (International Organization for Standardization), IEC (International Electrotechnical Commission), and Globally Harmonized Hazard Communication Standard, that identifies a major hazardous characteristic of the product.	Entity: PHD-PRODUCT-PICTOGRAPH-ISO
Product_Pictograph_ISO_Identifier	Attribute	A designator of a graphical symbol, as assigned jointly by the ISO (International Organization for Standardization), IEC (International Electrotechnical Commission), and Globally Harmonized Hazard Communication Standard, that identifies a major hazardous characteristic of the product.	Entity: PICTOGRAPH-ISO
Product_Pictograph_ISO_Title	Attribute	A commonly understood term for the name of a graphical symbol, as assigned jointly by the ISO (International Organization for Standardization), IEC (International Electrotechnical Commission), and Globally Harmonized Hazard Communication Standard, that characterizes a major hazardous characteristic of the product. Examples: "Flame, Exploding bomb", "Flame over circle", "Exploding bomb and flame", "Skull and crossbones".	Entity: PICTOGRAPH-ISO
Product_Pure_Mixture_Indication_Code	Attribute	A designation of whether the product is a pure chemical substance or a mixture. Example: P for "Pure", M for "Mixture", N for "Not Applicable", X for "Not Supplied".	Entity: PHD-PRODUCT-MATERIAL
Product_Radioactive_Indicator	Attribute	A designation of whether the product is documented to contain any ingredient that has a radioactive isotope. Examples: Y for "Radioactive", N for "Not Radioactive".	Entity: PHD-PRODUCT
Product_Service_Category_Description_Text	Attribute	Description of the product or service identified in the product or service category.	Entity: PRDS-XSD
Product_Service_Category_Description_Text	Attribute	Description of the product or service identified in the product or service category.	Entity: PDS-XSD
Product_Service_Code_Commodity_Name	Attribute	A descriptive category name that associated with the Product Service Code that indicates what type of category the code references.	Entity: PRODUCT-SERVICE-CODE
Product_Service_Ordered_Quantity	Attribute	The amount of product or service ordered.	Entity: PRDS-XSD

Product_Service_Product_Group_Code	Attribute	A Group designating the relationship of the reference number to the item of supply. (CAGE) Code assigned to establishments which either fabricates items of production and/or have design control of items procured by the federal government, or to identify certain military specifications or standards, and certain numbering systems developed by government agencies, panels or committees. Used in the identification of catalog data in federal catalog system and also for identifying contractors for the mechanical interchange of data required by P2P & Service/Agencies ADP Systems.	Entity: PDS-XSD
Product_Services_Ordered_Text	Attribute	Details of the product or services ordered.	Entity: PDS-XSD
Product_Signs_and_Symptoms_Text	Attribute	A statement providing details about the signs and symptoms of overexposure to the product.	Entity: PRODUCT-EXPOSURE-INFORMATION
Product_Specific_Gravity	Attribute	The relative density of the product. For a solid or a liquid, the specific gravity is the ratio of the density of the substance to the density of pure water at 4 degrees Celsius. For a gas, the specific gravity is the ratio of the density of the gas to the density of dry air at standard temperature and pressure.	Entity: PHD-PRODUCT-MATERIAL
Product_Specification_Document_Number	Attribute	The entire range of specific types of products and/or services identified for optional entry in dlms supplements to further describe a logistics item (product) or a provided service.	Entity: PDS-XSD
Product_Stability_Code	Attribute	A designation of whether the material is depicted in documentation as remaining unchanged or as changing during storage or use. Examples: Stable, Unstable, Not Applicable, Not Supplied.	Entity: PHD-PRODUCT-MATERIAL
Product_Stability_Condition_to_Avoid_Text	Attribute	A statement providing details about the type of condition(s) which may affect the stability of a material.	Entity: PHD-PRODUCT-MATERIAL
Product_Stability_Text	Attribute	A statement describing the stability of a product during its storage or use.	Entity: PHD-PRODUCT-MATERIAL
Product_Storage_Precautions_Text	Attribute	A statement providing details about the care that must be taken when storing the material to avoid any hazards. Storage precautions also identify any equipment or special containers that are required for transfer or storage.	Entity: PHD-PRODUCT-HANDLING-AND-STORAGE
Product_Supplemental_Health_and_Safety_Text	Attribute	A statement providing details about the supplemental safety and health control measures when using or handling the product.	Entity: PHD-PRODUCT-HANDLING-AND-STORAGE
Product_Total_Inorganic_Hazardous_Air_Pollutant_Quantity	Attribute	The weight per volume, in unit measure, for all inorganic hazardous air pollutants in the product, excluding the residual weight of the product's container.	Entity: PRODUCT-MATERIAL-HAZARDOUS-AIR-POLLUTANT-INFORMATION
Product_Total_Organic_Hazardous_Air_Pollutant_Quantity	Attribute	The weight per volume, in unit measure, for all organic hazardous air pollutants in the product, excluding the residual weight of the product's container.	Entity: PRODUCT-MATERIAL-HAZARDOUS-AIR-POLLUTANT-INFORMATION
Product_Trade_Secret_Indicator	Attribute	A designation of whether some information has been deliberately omitted from the Material Safety Data Sheet (MSDS) because the product's manufacturer has chosen to protect that information as proprietary. Examples: Y for "Product Trade Secret", N for "Not Product Trade Secret".	Entity: PHD-PRODUCT
Product_Use_Type_Name	Attribute	The common identification or name that stands for the broad category of how the product is intended to be used. Examples: Herbicide, Aerospace Sealants, etc.	Entity: PHD-PRODUCT
Product_Use_Type_Text	Attribute	A statement by the Responsible Party providing details about the intended use of the product. Example: "Herbicide for evergreens.	Entity: PHD-PRODUCT
Product_Vapor_Density	Attribute	The unitless numeric value for the density of the material vapor as compared to air at standard temperature and pressure.	Entity: PHD-PRODUCT-MATERIAL
Product_Viscosity	Attribute	The amount, in unit measure, for the tendency of the product to resist internal flow without regard to its density.	Entity: PHD-PRODUCT-MATERIAL
Product_Volatile_Organic_Compound_as_Applied_Determination_Method_Name	Attribute	The common identification or term for the technique used to ascertain the Product Volatile Organic Compound as Applied Quantity. Example: South Coast Air Quality Management District's (SCAQMD) Test Method 25.3 for "Determination of Total Gaseous Non-Methane Organic Emissions as Carbon".	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION

AV-2 Integrated Dictionary (BEA 11.1)

Product_Volatile_Organic_Compound_as_Applied_Determination_Method_Text	Attribute	The description of the technique used to ascertain the Product Volatile Organic Compound as Applied Quantity. Example: "Determination of Total Gaseous Non-Methane Organic Emissions as Carbon" for South Coast Air Quality Management District's (SCAQMD) Test Method 25.3.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Volatile_Organic_Compound_as_Applied_Quantity	Attribute	The numeric value, in unit measure, of the Volatile Organic Compound (VOC) content of the exact formulation of the material during application onto a surface or impregnation into a substrate.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Volatile_Organic_Compound_Identifier	Attribute	The designator that distinguishes one PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION from another.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Volatile_Organic_Compound_Percent_by_Volume	Attribute	The relative volume, expressed as a percentage, occupied by the organic components with the tendency to evaporate at ambient temperature of 70 degrees Fahrenheit, within a unit volume of a solid or liquid material.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Volatile_Organic_Compound_Percent_by_Weight	Attribute	The relative weight, expressed as a percentage, occupied by the organic components with the tendency to evaporate at ambient temperature of 70 degrees Fahrenheit, within a unit weight of a solid or liquid material.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Volatile_Organic_Compound_Quantity	Attribute	The weight of the organic components of the product, with the tendency to evaporate at ambient temperature of 70 degrees Fahrenheit, per unit volume of a solid or liquid material.	Entity: PRODUCT-VOLATILE-ORGANIC-COMPOUND-INFORMATION
Product_Waste_Disposal_Method_Text	Attribute	A statement providing details about the waste disposal method code for an unused material.	Entity: PHD-PRODUCT-MATERIAL
Product_Work_Hygienic_Practices_Text	Attribute	A statement providing details about the work hygienic practices that should be followed for use of the material.	Entity: PHD-PRODUCT-HANDLING-AND-STORAGE
Procurement_Instrument_Type_Text	Attribute	The type of procurement instrument the specification is for. (see list)	Entity: PDS-XSD
Procurement_Instrument_Type_Text	Attribute	The type of procurement instrument the specification is for. (see list)	Entity: PRDS-XSD
Professional_Accomplishment_Description_Text	Attribute	A short description or a title of the professional accomplishment.	Entity: PROFESSIONAL-ACCOMPLISHMENT
Professional_Accomplishment_End_Date	Attribute	The calendar date that a PROFESSIONAL-ACCOMPLISHMENT ends.	Entity: PROFESSIONAL-ACCOMPLISHMENT
Professional_Accomplishment_Identifier	Attribute	Uniquely identifies a Person's professional accomplishment.	Entity: DEVELOPMENT-PLAN-GOAL
Professional_Accomplishment_Identifier	Attribute	Uniquely identifies a Person's professional accomplishment.	Entity: PROFESSIONAL-ACCOMPLISHMENT
Professional_Accomplishment_Start_Date	Attribute	The calendar date a PROFESSIONAL-ACCOMPLISHMENT starts.	Entity: PROFESSIONAL-ACCOMPLISHMENT
Professional_Accomplishment_Status_Code	Attribute	The state of completion of professional accomplishment.	Entity: PROFESSIONAL-ACCOMPLISHMENT
Profit Structure	Attribute	Profit Structure- Identification of an organization based on how it distributes surplus funds. A "non-profit" does not distribute its surplus funds to owners or shareholders while a "For Profit" organization distributes funds that are not retained to maintain the organization to owners or shareholders.	Entity: SUPPLIER
Profit_Structure_Text	Attribute	Profit Structure- Identification of an organization based on how it distributes surplus funds. A "non-profit" does not distribute its surplus funds to owners or shareholders while a "For Profit" organization distributes funds that are not retained to maintain the organization to owners or shareholders. Program Report Code	Attribute	The Program Report Code identifies meaningful program reporting categories during the apportionment tracking process. The program report codes and associated amounts are reported as attachments to the Standard Form 132, Apportionment and Re-apportionment Schedule. DoD agencies (i.e. Navy, Army, Air Force, Marines, NASA, & other Treasury defined agencies) use the program report codes to group and track designated obligations on the SF133 Reports on Budget Execution and Budgetary Resources. For example, rather than reporting a single number for its obligations, a Department of the Navy account may separately show obligations for: maintaining land resources; performing major constructions; and performing base support. Program reporting categories are not used to apportion funds, are not subject to the Anti-deficiency Act, and are not shown on the actual SF132 apportionment or letter apportionment forms, but are included as attachments to these forms.
